intracontinental (in-trä-kon-ti-nen'tal), *a.* [< *intra-* + *continent* + *-al.*] Within the borders or in the interior of a continental land-mass; inland; not pertaining to the sea-coast.

intracostalis (in"trä-kos-tā'lis), *n.*; pl. *intracostales* (-lēz). [NL., < L. *intra*, within, + *costa*, rib: see *costal.*] An internal intercostal muscle; one of the intercostales interni.

intracranial (in-trä-krā'ni-al), *a.* [< L. *intra*, within, + *cranium*, the skull: see *cranial.*] Situated within the cranium.

intracruræus (in"trä-krö-rē'us), *n.*; pl. *intracruræi* (-ī). [< L. *intra*, within, + NL. *crurœus.*] The inner part of the crurœus muscle, commonly called the *vastus internus*. See *crurœus.*

intractability (in-trak-ta-bil'i-ti), *n.* [< *intractable*: see *-bility.*] Same as *intractableness.*

He subdued the *intractability* of all the four elements, and made them subservient to the use of man.
Warburton, On Pope's Essay on Man (ed. 1751), iii. 219.

intractable (in-trak'ta-bl), *a.* [= It. *intrattabile*, < L. *intractabilis*, that may not be handled, unmanageable, < *in-* priv. + *tractabilis*, that may be handled: see *tractable.*] **1.** Not tractable or to be drawn or guided by persuasion; uncontrollable.

What comforte of life shall he have, when all his parishioners are soe unsociable, soe *intractable*, so ill-affected unto him, as they usually be to all the English?
Spenser, State of Ireland.

Hee who is *intractable*, he whom nothing can perswade, may boast himself invincible. *Milton*, Eikonoklastes, ix.

2. Not to be brought into the desired order or condition; unmanageable; resisting effort: as, an *intractable* disposition; an *intractable* subject for literary treatment.

It is amazing what money can do in the way of transforming a sterile and *intractable* place into beauty.
C. D. Warner, Roundabout Journey, p. 321.

=Syn. *Stubborn*, *Refractory*, etc. (see *obstinate*); unruly, unmanageable, ungovernable, wilful.

intractableness (in-trak'ta-bl-nes), *n.* The character or quality of being intractable. Also *intractability.*

intractably (in-trak'ta-bli), *adv.* In an intractable manner; uncontrollably; unmanageably.

intracted† (in-trak'ted), *a.* [< L. *in*, in, + *tractus*, drawn (see *tract*1), + *-ed*2.] Indrawn; sunken.

With hot *intracted* tongue and sonken een.
T. Hudson, tr. of Du Bartas's Judith, iii. 299.

intractile† (in-trak'til), *a.* [< *in-*3 + *tractile.*] Not tractile; incapable of being drawn out. *Bacon*, Nat. Hist., § 839.

intracystic (in-trä-sis'tik), *a.* [< *intra-* + *cyst* + *-ic.*] Situated or occurring within a cyst.

intrada (in-trä'dä), *n.* [For **intrata*, < It. *intrata*, an entrance, entry, prelude: see *entry.*] In *music*, an introduction, usually instrumental, often found in old operas and suites.

intrado† (in-trä'dō), *n.* [For **intrada*, < Sp. Pg. *entrada*, entry: see *entry.*] **1.** Entry.

And now my lady makes her *intrado*, and begins the great work of the day. *Gentleman Instructed*, p. 117.

2. Income.

The statute of Mortmaine, and after it that of Premunire was made; . . . these much abated his *intrado*.
Fuller, Church Hist., V. iii. 35.

intrados (in-trā'dos), *n.* [< F. *intrados*, < L. *intra*, within, + *dorsum* (> F. *dos*), the back: see *dorse*1.] In *arch.*, the interior or lower line, curve, or surface of an arch or vault. The exterior or upper curve or surface is called the *extrados*. See *arch*1, 2.

intra-epithelial (in-trä-ep-i-thē'li-al), *a.* Same as *intercpithelial.*

intrafoliaceous (in-trä-fō-li-ā'shius), *a.* [< L. *intra*, within, + *folium*, leaf: see *foliaceous.*] In *bot.*, growing between a leaf and the axis, i. e., in the axil of a leaf.

intragyral (in-trä-jī'ral), *a.* [< L. *intra*, within, + NL. *gyrus*, a gyre: see *gyral*, *gyre.*] Situated in a gyre or convolution of the brain.

intrahepatic (in"trä-hē-pat'ik), *a.* [< L. *intra*, within, + Gr. *ἡπαρ* (*ἡπατ-*), the liver: see *hepatic.*] Situated or occurring within the liver.

intrail†, *v. t.* Same as *entrail*2.

intrails†, *n. pl.* An obsolete form of *entrails.*

intrain†, *v. t.* Same as *entrain.*

intralamellar (in-trä-lam'e-lär), *a.* [< L. *intra*, within, + *lamella*, a thin plate (NL. lamella): see *lamellar.*] In *bot.*, situated within the lamellæ. In the *Hymenomycetes* the *intralamellar tissue* is the same as the *trama.*

intralaryngeal (in"trä-lā-rin'jē-al), *a.* [< L. *intra*, within, + *larynx*, larynx: see *larynx.*] Situated or occurring within the larynx.

intraligamentous (in-trä-lig-a-men'tus), *a.* [< *intra-* + *ligament* + *-ous.*] Situated in a ligament; specifically, occurring between the two layers of the broad ligament of the uterus, as a tumor. Also *intraligamentary.*

intralobular (in-trä-lob'ū-lär), *a.* [< *intra-* + *lobule* + *-ar*3.] Situated within a lobule: specifically applied to veins in the lobules of the liver. See *interlobular* and *sublobular.*

The *intralobular* vein returns the blood from the center of the lobule, and opens immediately into a sublobular vein. *Holden*, Anat. (1885), p. 598.

intrals†, *n. pl.* An obsolete form of *entrails.*

intramandibular (in"trä-man-dib'ū-lär), *a.* [< L. *intra*, within, + *mandibulum*, lower jaw (mandible): see *mandibular.*] Situated in the man-

dible—that is, between the two sides of the lower jaw; interramal.

intramarginal (in-trā-mär'ji-nal), *a.* [< L. *intra*, within, + *margo* (*margin-*), margin: see *marginal*.] Situated within the margin: as, the *intramarginal* vein in the leaves of some of the ★plants belonging to the myrtle family.

intramatrical (in-trā-mat'ri-kal), *a.* [< L. *intra*, within, + *matrix* (*-ic-*), matrix, + *-al*.] In *bot.*, situated within a matrix or nidus.

intramedullary (in″trā-mē-dul'ā-ri), *a.* [< L. *intra*, within, + *medulla*, pith (medulla): see *medullary*.] Situated within the substance of the spinal cord: as, *intramedullary* tumors.

intramembranous (in-trā-mem'brā-nus), *a.* [< L. *intra*, within, + *membrana*, membrane: see *membranous*.] Situated or occurring within the substance of a membrane: as, *intramembranous* ossification.

intrameningeal (in″trā-mē-nin'jē-al), *a.* [< L. *intra*, within, + Gr. *μῆνιγξ*, the membrane inclosing the brain: see *meningeal*.] Situated or occurring within the meninges of the brain.

intramercurial (in″trā-mėr-kū'ri-al), *a.* [< L. *intra*, within, + *Mercurius*, Mercury: see *mercurial*.] Lying within the orbit of the planet Mercury. The existence of an intramercurial planet has been suspected both from irregularities in the movement of Mercury and from observations during eclipses; but at present the evidence is rather against the existence of such a planet.

intramercurian (in″trā-mėr-kū'ri-an), *a.* Same as *intramercurial*.

intramolecular (in″trā-mō-lek'ū-lär), *a.* [< *intra-* + *molecule* + *-ar*³.] Being or occurring within a molecule.

Intramolecular work [is] done within each several molecule [in the] production of *intramolecular* vibration.
A. Daniell, Prin. of Physics, p. 323.

intramundane (in-trā-mun'dān), *a.* [< L. *intra*, within, + *mundus*, world: see *mundane*.] Being within the world; belonging to the material world. *Imp. Dict.*

intramural (in-trā-mū'ral), *a.* [< L. *intra*, within, + *murus*, wall: see *mural*.] 1. Being within the walls or boundaries, as of a city or building: as, *intramural* interment is now prohibited in many cities.

The same sort of impressiveness as the great *intramural* demesne of Magdalen College at Oxford.
H. James, Jr., Trans. Sketches, p. 184.

2. In *anat.* and *med.*, situated in the substance of the walls of a tubular or other hollow organ, as the intestine.

intramuscular (in-trā-mus'kū-lär), *a.* [< L. *intra*, within, + *musculus*, a muscle: see *muscular*.] Located or occurring within a muscle.

A . . . very close-meshed network, the *intramuscular*, whose varicose fibrillæ occupy the narrow passages between the contractile cells.
Frey, Histol. and Histochem. (trans.), p. 325.

intranasal (in-trā-nā'zal), *a.* [< L. *intra*, within, + *nasus*, nose: see *nasal*.] Situated or occurring within the nose.

Neurotic asthma and other neurotic maladies in their relations to *intranasal* disease. *Medical News*, XLIX. 213.

intrance[1]†, *n.* An obsolete spelling of *entrance*[1].

intrance[2]†, **intrancement**†. Obsolete forms of *entrance*[2], *entrancement*.

intranquillity (in-trang-kwil'i-ti), *n.* [< *in-*[3] + *tranquillity*.] Lack of tranquillity; unquietness; inquietude.

That *intranquillity* which makes men impatient of lying in their beds. *Sir W. Temple.*

intrans. An abbreviation of *intransitive*.

intranscalency (in-tranz-kā'len-si), *n.* [< L. *in-* priv. + *trans*, over, through, + *calescen(t-)s*, ppr. of *calescere*, grow hot, < *calere*, be hot: see *calescence*.] Imperviousness to heat. [Rare.]

This extraordinary *intranscalency* of aqueous vapour to rays issuing from water has been conclusively proved by Tyndall. *E. Frankland*, Exper. in Chem., p. 977.

intranscalent (in-tranz-kā'lent), *a.* [< *in-*[3] + *transcalent*.] Impervious to heat. [Rare.]

Water is *intranscalent* to rays of obscure heat.
E. Frankland, Exper. in Chem., p. 935.

intransformable (in-tranz-fôr'ma-bl), *a.* Not transformable; incapable of transformation.

The transformable gives place to the *intransformable*.
J. Sully, Mind, XII. 118.

intransgressible (in-tranz-gres'i-bl), *a.* [< *in-*[3] + *transgressible*.] Not transgressible; incapable of being passed.

A divine reason or sentence *intransgressible* and inevitable, proceeding from a cause that cannot be diverted or impeached. *Holland*, tr. of Plutarch, p. 859.

intransient (in-tran'shent), *a.* [< *in-*[3] + *transient*.] Not transient; not passing suddenly away.

An unchangeable, an *intransient*, indefeasible priesthood. *Killingbeck*, Sermons, p. 93.

intransigent (in-tran'si-jent), *a.* and *n.* [= F. *intransigeant*, also *intransigent* (after Sp.); < Sp. *intransigente*, not compromising, not ready to compromise, < L. *in-* priv. + *transigen(t-)s*, ppr. of *transigere*, pp. *transactus*, transact, come to a settlement: see *transact*.] **I.** *a.* Refusing to agree or come to an understanding; uncompromising; irreconcilable: used especially of some extreme political party. See *intransigentist*.

The opposition secured 83 seats out of 114 in the new Storthing, and was able to elect all its most *intransigent* members into the Lagthing.
Nineteenth Century, XXIII. 59.

II. *n.* Same as *intransigentist*.

intransigentism (in-tran'si-jen-tizm), *n.* [< *intransigent* + *-ism*.] The doctrine or program of the intransigentists.

Communism, *intransigentism*, and nihilism are not well represented in scientific reunions.
Goldwin Smith, Pop. Sci. Mo., XX. 757.

intransigentist (in-tran'si-jen-tist), *n.* [< *intransigent* + *-ist*.] 1. An irreconcilable person.—2. Specifically, in *politics*: (*a*) A member of a radical party in Spain, which in 1873–74 fomented an unsuccessful insurrection. (*b*) A member of a faction in France whose parliamentary program includes various radical reforms and socialistic changes. Also *intransigent*.★

intransitive (in-tran'si-tiv), *a.* and *n.* [= F. *intransitif* = Sp. Pg. It. *intransitivo*, < LL. *intransitivus*, not transitive, < *in-* priv. + *transitivus*, transitive: see *transitive*.] **I.** *a.* 1. In *gram.*, not expressing an action that passes immediately over to an object; not taking a direct object: said of verbs that require a preposition before their object, or take one only indirectly, or in the manner of a dative: as, to *stand* on the ground; to *swim* in the water; to *run* away. But the distinction of transitive and intransitive is not a very sharp one in English. Every transitive verb is capable of being used also intransitively, or without an expressed object; and, on the other hand, many intransitives may be used transitively (the verb being usually causal), taking a direct object, as in to *run* a horse, or merely a cognate object, as in to *run* a race; or are used factitively with a more general object, as in to *breathe* a prayer, to *look* love, or with an objective predicate, as in to *sing* one's self hoarse, to *stare* one out of countenance, and so on. Owing, also, to the non-distinction of dative and accusative in modern English, a construction often seems transitive which is historically intransitive: as, to *forgive us*, where *us* is historically dative, the direct object being understood, or expressed as in "forgive us our *debts*." Abbreviated *intrans*.

2. Not transitive, in the logical or mathematical sense.

II. *n.* In *gram.*, a verb which does not properly take after it an object, as *sit*, *fall*, *run*, *lie*.

intransitively (in-tran'si-tiv-li), *adv.* In the manner of an intransitive verb; without passing over to or governing an object.

in transitu (in tran'si-tū). [L.: *in* = E. *in*; *transitu*, abl. of *transitus*, passage: see *transit*.] In transit; on the way; in course of transportation: as, if one who buys goods without paying is insolvent, the seller has a right to stop the goods *in transitu*. In law the important question as to the scope of this phrase is in the very common controversy as to the point at which the transit is deemed to have ceased, and the goods to have come under the dominion of the buyer.

intransmissible (in-tranz-mis'i-bl), *a.* [= Pg. *intransmissivel*; as *in-*[3] + *transmissible*.] Not transmissible; incapable of being transmitted.

intransmutability (in-tranz-mū-ta-bil'i-ti), *n.* [= Sp. *intransmutabilidad*; as *intransmutable* + *-ity*: see *-bility*.] The quality of being intransmutable.

intransmutable (in-tranz-mū'ta-bl), *a.* [= F. *intransmuable* = Sp. *intransmutable* = It. *intrasmutabile*; as *in-*[3] + *transmutable*.] Not transmutable; incapable of being transmuted or changed into another substance.

Some of the most learn'd and experienc'd chymists do affirm quicksilver to be *intransmutable*, and therefore call it liquor æternus. *Ray*, Works of Creation, i.

intrant (in'trant), *n.* [< L. *intran(t-)s*, ppr. of *intrare*, go in, enter: see *enter*[1], and cf. *entrant*.] 1. Same as *entrant*.

A new oath was imposed upon *intrants*.
Hume, Hist. Eng., liii.

2†. In the University of St. Andrews, one of four electors chosen by the nations to elect the ★rector.

intranuclear (in-trā-nū'klē-ār), *a.* [< L. *intra*, within, + *nucleus*, nucleus: see *nuclear*.] Situated within a nucleus: opposed to *extranuclear*.

intra-ocular (in-trā-ok'ū-lär), *a.* [< L. *intra*, within, + *oculus*, eye: see *ocular*.] Situated within the eye—that is, within the eyeball.

intra-orbital (in-trā-ôr'bi-tal), *a.* [< L. *intra*, within, + *orbita*, orbit: see *orbital*.] Situated in the orbit of the eye; lying in the eye-socket.

intra-osseous (in-trā-os'ē-us), *a.* [< L. *intra*, within, + *os* (*oss-*), bone: see *osseous*.] Situated within a bone.

intra-ovarian (in″trā-ō-vā'ri-an), *a.* [< *intra-* + *ovary* + *-an*.] Contained in or not yet discharged from the ovary, as an ovum.

intrap (in-trap'), *v. t.* See *entrap*.

intraparacentral (in-trā-par-a-sen'tral), *a.* [< *intra-* + *paracentral*.] Lying in the paracentral gyre of the brain: as, an *intraparacentral* fissure.

intraparietal (in″trā-pā-rī'e-tal), *a.* [< L. *intra*, within, + *paries* (*pariet-*), a wall: see *parietal*.] 1. Situated or happening within walls or within an inclosure; shut out from public view; hence, private: as, *intraparietal* executions.—2. In *anat.*, situated in the parietal lobe of the brain: as, the *intraparietal* fissure of the cerebrum. See *fissure*.

intrapelvic (in-trā-pel'vik), *a.* [< L. *intra*, within, + NL. *pelvis*, q. v.] Situated within the pelvis.

intraperitoneal (in-trā-per″i-tō-nē'al), *a.* [< *intra-* + *peritoneum* + *-al*.] Placed in the cavity of the peritoneum.

Intraperitoneal injections cause death in two or three days. *Medical News*, LII. 641.

intrapetalous (in-trā-pet'a-lus), *a.* [< L. *intra*, within, + NL. *petalum*, a petal: see *petal*.] In *zoöl.*, situated within a petaloid ambulacrum of a sea-urchin. See cut under *Spatangoida*.

intrapetiolar (in-trā-pet'i-ō-lär), *a.* [< L. *intra*, within, + *petiolus*, a little stalk, a petiole (see *petiole*), + *-ar*³.] In *bot.*: (*a*) Situated within or interior to a petiole: applied to a pair of stipules which unite by the margins that are nearest to the petiole, and thus seem to form a single stipule between the petiole and the stem or branch. (*b*) Inclosed by the expanded base of the petiole: applied to buds formed in the fall immediately under the base of the petiole of leaves of the previous summer, into a cavity of which they project and are not exposed until the fall of the leaf, as in *Platanus*, *Rhus*, etc. It is often confounded with *interpetiolar*.

Intrapetiolar.

intrapetiolary (in-trā-pet'i-ō-lā-ri), *a.* Same as *intrapetiolar*.

intraphilosophic (in-trā-fil-ō-sof'ik), *a.* [< L. *intra*, within, + *philosophia*, philosophy: see *philosophic*.] Within the limits of philosophic inquiry. [Rare.]

What is the nature of this or that existence in the superascientific but *intraphilosophic* region?
Hodgson, Phil. of Reflection, I. iii. § 1.

intraplantar (in-trā-plan'tär), *a.* [< L. *intra*, within, + *planta*, sole: see *plantar*.] Situated upon the inner side of the sole of the foot: opposed to *extraplantar*: as, the *intraplantar* nerve.

intraprotoplasmic (in-trā-prō-tō-plaz'mik), *a.* [< *intra-* + *protoplasm* + *-ic*.] Being or occurring in the substance of protoplasm.★

intrapulmonary (in-trā-pul'mō-nā-ri), *a.* [< L. *intra*, within, + *pulmo(n-)*, lung: see *pulmonary*.] Situated within the lungs.

intraretinal (in-trā-ret'i-nal), *a.* [< *intra-* + *retina* + *-al*.] Situated within the substance of the retina.

intrasemital (in-trā-sem'i-tal), *a.* [< L. *intra*, within, + *semita*, path: see *semita*.] Situated within a semita of an echinoderm.

intraspinal (in-trā-spī'nal), *a.* [< L. *intra*, within, + *spina*, spine: see *spine*.] Lying, existing, or occurring within the spinal canal, or within the spinal cord.

intratarsal (in-trā-tär'sal), *a.* [< *intra-* + *tarsus* + *-al*.] Situated upon the inner side of the tarsus.

intratelluric (in-trā-te-lū'rik), *a.* [< L. *intra*, within, + *tellus* (*tellur-*), the earth: see *telluric*.] In *lithol.*, a term first used by Rosenbusch to designate that period in the formation of an eruptive rock which precedes its appearance on the surface. The mineral constituents which separate or become individualized at or during that time are called by him *intratelluric*.

It was after their slow development in the magma, during an *intra-telluric* period, that the mass in which they floated was upraised. *Nature*, XXXIX. 273.

intraterritorial (in-trä-ter-i-tō′ri-al), *a.* [< L. *intra*, within, + *territorium*, territory: see *territorial*.] Existing within a territory: opposed to *extraterritorial*.

intrathecal (in-trä-thē′kal), *a.* [< *intra-* + NL. *theca*, q. v., + *-al*.] Contained in the theca, as a part of a coral.

The *intrathecal* parts of the polyp, the endoderm cells, are entirely converted into a parenchymatous tissue. *G. C. Bourne*, Micros. Science, XXVIII. 31.

intrathoracic (in″trä-thō-ras′ik), *a.* [< L. *intra*, within, + NL. *thorax* (*-ac-*), thorax.] Situated or occurring within the thorax or chest: as, the heart and lungs are *intrathoracic* organs.

intratropical (in-trä-trop′i-kal), *a.* [< L. *intra*, within, + LL. *tropicus*, tropic, + *-al*.] Situated within the tropics; of or pertaining to the regions within the tropics: as, an *intratropical* climate.

intra-urban (in-trä-ėr′ban), *a.* [< L. *intra*, within, + *urbs*, city: see *urban*.] Situated within a city; relating to what is within the limits of a city.

The telephone is coming more and more into use for short distances and *intra-urban* communications. *Edinburgh Rev.*, CLXIV. 15.

intra-uterine (in-trä-ū′te-rin), *a.* [< L. *intra*, within, + *uterus*, womb: see *uterine*.] Lying, existing, or occurring within the uterus.

intravalvular (in-trä-val′vū-lär), *a.* [< L. *intra*, within, + NL. *valvula*, a little valve: see *valvular*.] In *bot.*, placed within valves, as the dissepiments of many of the *Brassicaceæ*.

intravasation (in-trav-ā-sā′shon), *n.* [< L. *intra*, within, + *vas*, vessel, + *-ation*. Cf. *extravasation*.] The entrance into vessels of matters formed outside of them or in their parietes. *Dunglison*. [Rare.]

intravascular (in-trä-vas′kū-lär), *a.* [< L. *intra*, within, + *vasculum*, a little vessel: see *vascular*.] Situated within a vessel, specifically within a blood-vessel.

intravenous (in-trä-vē′nus), *a.* [< L. *intra*, within, + *vena*, vein: see *venous*.] Situated or occurring within veins.

intraventricular (in″trä-ven-trik′ū-lär), *a.* [< L. *intra*, within, + *ventriculus*, ventricle: see *ventricular*.] Existing or taking place within one of the ventricles of either the heart or the brain.

intravertebrated (in-trä-vėr′tē-brā-ted), *a.* [< *intra-* + *vertebrated*.] Having an endoskeleton, as a vertebrate; vertebrated, in a usual sense. *Thomas*, Med. Dict.

intravesical (in-trä-ves′i-kal), *a.* [< L. *intra*, within, + *vesica*, bladder.] Situated or occurring within the bladder.

intravitelline (in″trä-vi-tel′in), *a.* [< L. *intra*, within, + *vitellus*, the yolk of an egg.] Situated or occurring in the substance of the vitellus or yolk.

intraxylary (in-trä-zī′la-ri), *a.* [< L. *intra*, within, + Gr. *ξύλον*, wood, + *-ary*[2].] In *bot.*, within the xylem: said of certain tissues that occur inside the xylem, as in the *Combretaceæ*, which are characterized, with a few exceptions, by the presence of an intraxylary soft bast provided with sieve-tubes.

intreasure†, *v. t.* See *entreasure*.

intreat†, *v.* An obsolete form of *entreat*. *Spenser*.

intreatance† (in-trē′tans), *n.* [< *intreat* + *-ance*.] Same as *entreatance*. *Holland*.

intreatful†, **intreatment**†. Same as *entreatful*, *entreatment*.

intreaty†, *n.* An obsolete form of *entreaty*. ★*Hakluyt*.

intrench (in-trench′), *v.* [Also *entrench*; < *in-*[2] + *trench*.] **I.** *trans.* 1. To make a trench or furrow in; furrow; cut.

It was this very sword *entrenched* it [a wound]. *Shak.*, All's Well, ii. 1, 46.

His face
Deep scars of thunder had *intrench'd*. *Milton*, P. L., i. 601.

2. To surround as with a trench or ditch.

A little farther is a bay wherein falleth 3 or 4 prettie brookes and creekes that halfe *intrench* the Inhabitants of Warraskoyac. *Capt. John Smith*, Works, I. 116.

I went to work . . . to build me another house, . . . and *intrenched* it round with a ditch, and planted an hedge. *R. Knox* (Arber's Eng. Garner, I. 382).

3. To fortify with a trench or ditch and parapet; strengthen or protect by walls of defense: as, to *intrench* a camp or an army.

The English in the suburbs close *intrench'd*. *Shak.*, 1 Hen. VI., i. 4, 9.

The national troops were now strongly *intrenched* in Chattanooga Valley, with the Tennessee River behind them. *U. S. Grant*, The Century, XXXI. 129.

intricate (in′tri-kāt), *a.* [= OF. *entriqué* = Sp. Pg. *intrincado*, entangled, < L. *intricatus*, pp.: see the verb.] 1. Perplexingly involved or entangled; hard to disentangle or disengage, or to trace out; complicated; obscure: as, an *intricate* knot; the *intricate* windings of a labyrinth; *intricate* accounts; the *intricate* plot of a tragedy.

You have put me upon such an odd *intricate* Piece of Business that I think there was never the like of it. *Howell*, Letters, ii. 19.

Being got about two thirds of the way up, we came to certain Grotto's cut with *intricate* Windings and Caverns under ground. *Maundrell*, Aleppo to Jerusalem, p. 104.

2. In *entom.*, having unequal elevations and depressions placed irregularly and close together, but without running into each other: said of a sculptured surface. =Syn. 1. *Intricate*, *Complex*, *Complicated*, *Compound*. Between *complex* and *complicated* there is the same difference as between *complexity* and *complication*. (See *complication*.) That is *complex* which is made up of many parts, whose relation is perhaps not easily comprehended; if this latter be true, especially if it be true to a marked degree, the thing is said to be *complicated*; it is also *complicated* if its parts have become entangled: as, the matter was still further *complicated* by their failure to protest against the seizure. That is *intricate* which, like a labyrinth, makes decision with regard to the right path or course to pursue difficult: as, an *intricate* question. *Compound* generally implies a mixture or union of parts in some way that makes a whole: as, a *compound* flower; *compound* motion; a *compound* idea; the word does not, like the others, suggest difficulty in comprehension. See *implicate*.

intricate (in′tri-kāt), *v. t.*; pret. and pp. *intricated*, ppr. *intricating*. [< L. *intricatus*, pp. of *intricare*, entangle, perplex, embarrass, < *in*, in, + *tricæ*, trifles, vexations, perplexities. See *intrigue*, and cf. *extricate*.] To render intricate or involved; make perplexing or obscure. [Rare.]

Chesterfield, towards the end of his career, *intrigued* against Newcastle with the Duchess of Yarmouth.
Lecky, Eng. in 18th Cent., iii.

2. To have clandestine or illicit intercourse.

intrigue (in-trēg′), *n.* [= D. G. *intrigue* = Dan. *intrige* = Sw. *intrig*, < F. *intrigue*, a plot, intrigue, formerly also *intrigue*, intricateness, a maze, = Sp. Pg. *intriga* = It. *intrigo*, *intrico*, intricateness, a maze, plot, intrigue; from the verb: see *intrigue*, *v.*] **1**†. Intricacy; complication; maze.

But though this vicinity of ourselves cannot give us the full prospect of all the *intrigues* of our nature, yet we have thereby . . . much more advantage to know ourselves than to know other things without us.
Sir M. Hale, Orig. of Mankind, p. 21.

2. Secret or underhand plotting or scheming; the exertion of secret influence for the accomplishment of a purpose.

Habits of petty *intrigue* and dissimulation might have rendered him incapable of great general views, but that the expanding effect of his philosophical studies counteracted the narrowing tendency. *Macaulay*, Machiavelli.

3. A clandestine plot; a scheme for entangling others, or for gaining an end by the exertion of secret influence: as, to expose an *intrigue*.

His invention was ever busy in devising *intrigues*, which he recommended by his subtle, insinuating eloquence.
Prescott, Ferd. and Isa., i. 3.

In the first Hanoverian reigns the most important influences were Court *intrigues* or parliamentary corruption.
Lecky, Eng. in 18th Cent., iii.

4. The plot of a play, poem, or romance; the series of complications in which a writer involves his imaginary characters.

As these causes are the beginning of the action, the opposite designs against that of the hero are the middle of it, and form that difficulty or *intrigue* which make up the greatest part of the poem.
Le Bossu, tr. in pref. to Pope's Odyssey.

5. Clandestine intercourse between a man and a woman; illicit intimacy; a liaison.

Of the three companions I had this last half year, . . . I was obliged to send away the third, because I suspected an *intrigue* with the chaplain. *Goldsmith*, Vicar, xi.

5. Something that leads to or opens the way for the understanding of something else; specifically, a preliminary explanation or statement; the part of a book or discourse which precedes the main work, and in which the author or speaker gives some general account of his design and subject; an elaborate preface, or a preliminary discourse.

Thou soon shalt . . . see before thine eyes
The monarchies of the earth, their pomp and state;
Sufficient *introduction* to inform
Thee, of thyself so apt, in regal arts.
Milton, P. R., iii. 247.

Were it not that the study of Etruscan art is a necessary *introduction* to that of Roman, it would hardly be worth while trying to gather together and illustrate the few fragments and notices of it that remain.
J. Fergusson, Hist. Arch., I. 283.

6. A more or less elementary treatise on any branch of study; a treatise leading the way to more elaborate works on the same subject: as, an *introduction* to botany.—**7.** In *music*, a preparatory phrase or movement at the beginning of a work, or of a part of a work, designed to attract the hearer's attention or to foreshadow the subsequent themes or development. Introductions vary in length from one or two chords to an elaborated movement, with its own themes and development.—**Biblical introduction**, the technical designation of a work devoted to a consideration of subjects properly introductory to a detailed study and exposition of the books of the Bible, as their genuineness, credibility, integrity of

text, date and authorship, language, contents, and more important versions. A Biblical introduction properly includes an inquiry into the history (1) of each book, (2) of the canon or collection of the several books into the one book, (3) of the text, including a comparison of the various texts, and (4) of the translations and versions. =Syn. 5. *Exordium, Introduction, Preface, Prelude, Preamble, Prologue.* *Exordium* is the old or classic technical word in rhetoric for the beginning of an oration, up to the second division, which may be "narration," "partition," "proposition," or the like. *Introduction* is a more general word, in this connection applying to spoken or written discourse, and covering whatever is preliminary to the subject; in a book it may be the opening chapter. As distinguished from the *preface*, the *introduction* is supposed to be an essential part of the discussion or treatment of the theme, and written at the outset of composition. A *preface* is supposed to be the last words of the author in connection with his subject, and is generally explanatory or conciliatory, having the style of more direct address to the reader. A *prelude* is generally an introductory piece of music (see the definition of *overture*); a *preamble*, of a resolution, an ordinance, or a law: as, the *preamble* to the Declaration of Independence. A *prologue* is a conciliatory spoken preface to a play. All these words have some freedom of figurative use.

introductive (in-trō-duk'tiv), *a.* [= F. *introductif* = It. *introduttivo;* as *introduct* + *-ive.*] Serving to introduce; introductory: sometimes followed by *of*.

The action is of itself, or by reason of a public known indisposition of some persons, probably *introductive of* a sin. *Jer. Taylor*, Works (ed. 1835), I. 279.

introductively (in-trō-duk'tiv-li), *adv.* In a manner serving to introduce.

introflexion, *n.* See *introflection.*

introgression (in-trō-gresh'ọn), *n.* [< L. as if **introgressio(n-)*, < *introgredi*, pp. *introgressus*, go in, enter, < *intro*, within, + *gradi*, go: see *grade*[1].] The act of going in or of proceeding inward; entrance. *Blount.*

introit (in-trō'it), *n.* [= F. *introït* = Pr. *introit* = Sp. *introito* = Pg. It. *introito*, < L. *introitus*, a going in, entrance, < *introire*, go in, enter, < *intro*, within, + *ire*, go: see *iter*[1].] In *liturgics*, an antiphon sung by the priest and choir as the priest approaches the altar to celebrate the mass or communion. The name *introit* (*introitus*, literally 'entrance') is an abridgment of *antiphon at the introit* (*antiphona ad introitum*), and has been explained as referring to the entrance of the people into church rather than that of the priest into the sanctuary. The introit seems to have originated in the psalms sung at the beginning of the Jewish liturgy. The name *antiphon* has been given by preëminence to the introit, as in the Greek Church, where it is threefold, answering to the Western introibo, introit, and Gloria in Excelsis. The Greek antiphons consist of verses from the Psalms with a constant response, or of the psalms called *Typica* and the *Beatitudes*. In the liturgies of St. Mark and St. James the hymn "Only-begotten Son" is the introit, in the Armenian liturgy this followed by a psalm and hymn. The "Only-begotten Son" is also subjoined to the Greek second antiphon. The Roman introit (see *invitatory*) consists of a verse (the introit in the narrower sense), followed by a verse of a psalm, the Gloria Patri, and the repetition of the first verse. In the Ambrosian rite the introit is called the *ingressa*. An ancient Gallican name for it was the *prælegere*. In the Mozarabic liturgy, in certain monastic rites, and in Norman and English missals, it is called the *officium* or *office*. Psalms as special introits are appointed in the Prayer-book of 1549 and in the Nonjuror's communion office of 1718. In the Anglican Church at the present day a psalm or anthem is sung as the introit. The name is sometimes less properly used for a hymn or any musical composition sung or played at the beginning of the communion office.

Then shall the Clerkes syng in Englishe for the office, or *Introite* (as they call it), a Psalme appointed for that daie. *First Prayer Book of Edw. VI.* (1549), The Communion.

intromission (in-trō-mish'ọn), *n.* [= F. *intromission* = Pr. *intromissio* = It. *intromessione*, < ML. *intromissio(n-)*, < L. *intromittere*, pp. *intromissus*, send in: see *intromit.*] **1.** The act of sending or putting in; insertion, as of one body within another; introduction within.

The evasion of a tragic end by the invention and *intromission* of Mariana has . . . received high praise for its ingenuity. *Swinburne*, Shakespeare, p. 204.

2. The act of taking in or admitting; admission within.

Repentance is the first *intromission* into the sanctities of christian religion. *Jer. Taylor*, Works (ed. 1835), I. 85.

A general *intromission* of all sorts, sects, and persuasions into our communion. *South*, Works, II. xii.

3. In *Scots* and *old Eng. law*, an interfering with the effects of another. The assuming of the possession and management of property belonging to another without authority is called *vicious intromission*. The term is also applied to the ordinary transactions of an agent or subordinate with the money of his superior: as, to give security for one's *intromissions*.

intromit (in-trō-mit'), *v.*; pret. and pp. *intromitted*, ppr. *intromitting*. [< L. *intromittere*, send in, < *intro*, within, + *mittere*, send: see *mission.*] **I.** *trans.* **1.** To send or put in; insert or introduce within.—**2.** To allow to enter; be the medium by which a thing enters.

Glass in the window *intromits* light, without cold, to those in the room. *Holder.*

II. *intrans.* In *Scots* and *old Eng. law*, to interfere with the effects of another.

In any citie, borough, towne incorporate, or other place franchised or priuiledged, where the said officer or officers may not lawfully *intromit* or intermeddle. *Charter of Philip and Mary*, in Hakluyt's Voyages, I. 271.

We *intromitted*, as Scotch law phrases it, with many family affairs. *De Quincey.*

intromittent (in-trō-mit'ẹnt), *a.* [< L. *intromitten(t-)s*, ppr. of *intromittere*, intromit: see *intromit.*] Throwing or conveying into or within something: as, an *intromittent* instrument.—**Intromittent organ,** in *comparative anat.*, that part of the male sexual apparatus which conveys the seminal fluid into the body of the female. It may be directly connected with the testes, or constitute a separate seminal reservoir on some other part of the body, as on the pedipalps of a male spider, or the second abdominal ring of a dragon-fly.

intromitter (in-trō-mit'ėr), *n.* One who intromits; an intermeddler.

Sacrilegious *intromitters* with royal property. *Scott*, Woodstock, Pref.

intropression (in-trō-presh'ọn), *n.* [< L. *intro*, within, + *pressio(n-)*, a pressing, < *premere*, pp. *pressus*, press: see *press*[1].] Pressure acting within or inwardly; inward or internal pressure. *Battie*, Madness, § x. [Rare.]

introreception (in″trō-rē-sep'shọn), *n.* [< L. *intro*, within, + *receptio(n-)*, reception: see *reception.*] The act of receiving or admitting into or within something. [Rare.]

Were but the love of Christ to us ever suffered to come into our hearts (as species to the eye by *introreception*), . . . what would we not do to recompence . . . that love? *Hammond*, Works, IV. 564.

introrse (in-trôrs'), *a.* [< L. *introrsus, introrsum*, adv., toward the inside, contr. of *introversus*, < *intro*, within, + *versus*, turned, pp. of *vertere*, turn: see *verse.* Cf. *extrorse.*] Turned or facing inward: an epithet used in describing the direction of bodies, to denote their being turned toward the axis to which they appertain. In botany it is applied to anthers when their valves are turned toward the style.

Introrse Anthers of *Nymphæa odorata*, with the floral envelops and all but four of the stamens removed.

introrsely (in-trôrs'li), *adv.* To or toward the interior in position or direction.

introspect (in-trō-spekt'), *v.* [< L. *introspectare*, freq. of *introspicere*, pp. *introspectus*, look into, < *intro*, within, + *spicere*, look.] **I.** *trans.* To look into or within; view the inside of.

II. *intrans.* To practise introspection; look inward; consider one's own internal state or feelings.

We cannot cogitate without examining consciousness, and when we do this we *introspect.* *Pop. Sci. Mo.*, XXV. 257.

introspection (in-trō-spek'shọn), *n.* [< L. as if **introspectio(n-)*, a looking into, < *introspicere*, pp. *introspectus*, look into: see *introspect.*] The act of looking inward; a view of the inside or interior; specifically, the act or process of directly observing the contents of one's own mind; attentive experience of one's mental states or processes. It is employed in psychology as the sole method of directly ascertaining the facts of consciousness; but its results are valid only when the self-observation is taken under experimental conditions.

I was forced to make an *introspection* into mine own mind, and into that idea of beauty which I have formed in my own imagination. Quoted in *Dryden's* Parallel of Poetry and Painting.

This mutual exclusiveness receives a further explanation from the fact so often used to discredit psychology, viz. that the so-called *introspection* and indeed all reflexion are really retrospective. *J. Ward*, Encyc. Brit., XX. 84.

Introspection of our intellectual operations is not the best of means for preserving us from intellectual hesitations. *J. H. Newman*, Gram. of Assent, p. 206.

The curious, critical *introspection* which marks every sensitive and refined nature, and paralyzes action. *G. W. Curtis*, Int. to Cecil Dreeme.

introspectionist (in-trō-spek'shọn-ist), *n.* [< *introspection* + *-ist.*] One who practises introspection; one who follows the introspective method in psychological inquiry.

As a rule, skeptics . . . are keen *introspectionists.* *J. Owen*, Evenings with Skeptics, I. 312.

Little will they weigh with the *introspectionist.* *Maudsley*, Body and Will, p. 91.

introspective (in-trō-spek'tiv), *a.* [< *introspect* + *-ive.*] Looking within; characterized or effected by introspection; studying or exhibiting one's own consciousness or internal state.

Most *introspective* poetry . . . wearies us, because it so often is the petty or morbid sentiment of natures little superior to our own. *Stedman*, Vict. Poets, p. 147.

Introspective method, in *psychol.*, the method of studying mental phenomena by attempting to observe directly what occurs in one's own consciousness. This method, though indispensable, is exposed to many difficulties, and requires the support of other methods, as those of experimental and comparative psychology.

He [Hume] further agrees with Descartes and all his predecessors in pursuing the simple *introspective method:* that is to say, in attempting to discover truth by simply contemplating his own mind. *Leslie Stephen*, Eng. Thought, i. § 30.

introsume† (in-trō-sūm'), *v. t.* [< L. *intro*, within, + *sumere*, take: see *assume, consume*, etc.] To take in; absorb.

How they elect, then *introsume* their proper food. *Evelyn.*

introsumption† (in-trō-sump'shọn), *n.* [< *introsume*, after *assumption* < *assume*, etc.] The act of taking into or within; a taking in, especially of nourishment.

introsusception (in″trō-su-sep'shọn), *n.* [< L. *intro*, within, + *susceptio(n-)*, a taking up or in, < *suscipere*, pp. *susceptus*, take up or in: see *susceptible.*] **1.** The act of receiving within.

The parts of the body . . . are nourished by the *intro susception* of . . . aliment. *J. Smith*, Portrait of Old Age, p. 160.

The person is corrupted by the *introsusception* of a nature which becomes evil thereby. *Coleridge.*

2. In *anat.* and *bot.*, same as *intussusception.*

introvenient (in-trō-vē'niẹnt), *a.* [< LL. *introvenien(t-)s*, pp. of *introvenire*, come in, enter, < L. *intro*, within, + *venire*, come: see *come.*] Coming in or between; entering. [Rare.]

There being scarce any condition (but what depends upon clime) which is not exhausted or obscured from the commixture of *introvenient* nations either by commerce or conquest. *Sir T. Browne*, Vulg. Err., iv. 10.

introvenium (in-trō-vē'ni-um), *n.* [NL., < L. *intro*, within, + *vena*, vein: see *vein.*] In *bot.*, a condition in which the veins of leaves are so buried in the parenchyma as to be only indistinctly or not at all visible from the surface. See *nervation, hyphodrome.*

introversibility (in-trō-vėr-si-bil'i-ti), *n.* [< *introversible* + *-ity:* see *-bility.*] The quality of being introversible; capacity for introversion.

The telescopic *introversibility* of the lophophore does not advance beyond an initial stage. *E. R. Lankester*, Encyc. Brit., XIX. 439.

introversible (in-trō-vėr'si-bl), *a.* [< *intro-* + *versible.*] Capable of being introverted.

The anterior *introversible* region [of *Paludicella*]. *E. R. Lankester*, Encyc. Brit., XIX. 432.

introversion (in-trō-vėr'shọn), *n.* [= Sp. *introversión* = Pg. *introversão* = It. *introversione*, < L. *intro*, within, + *versio(n-)*, a turning: see

version. Cf. *introvert.*] The act of introverting, or the state of being introverted; a turning or directing inward, physical or mental.

This *introversion* of my faculties, wherein I regard my own soul as the image of her Creator.
Bp. Berkeley, Guardian, No. 89.

introversive (in-trō-vėr'siv), *a.* [< L. *introversus*, turned toward the inside, + *-ive.*] Turning within; having an inward or internal direction. Also *introvertive.*

When we come to mental derangements, *introversive* study is obviously fruitless. *Pop. Sci. Mo.*, XXV. 267.

introvert (in-trō-vėrt'), *v. t.* [< L. *intro*, within, + *vertere*, turn: see *verse.* Cf. *invert*, etc.] **1.** To turn within; direct inward or interiorly.

His awkward gait, his *introverted* toes.
Cowper, Task, iv. 633.

Struggling, with *introverted* effort, to disentangle a thought. *L. Wallace*, Ben-Hur, p. 445.

2. In *zoöl.*, to turn in, or invert; insheathe a part of within another part.

introvert (in'trō-vėrt), *n.* [< *introvert, v.*] That which is introverted; in *zoöl.*, some part or organ which is turned in upon itself, or intussuscepted.

We find that the anterior portion of the body of the polypide can be pulled into the hinder part, as the finger of a glove may be tucked into the hand. It is in fact an *introvert.* *E. R. Lankester*, Encyc. Brit., XIX. 431.

introvertive (in-trō-vėr'tiv), *a.* [< *introvert* + *-ive.*] Same as *introversive.*

Natures reflective, *introvertive*, restless.
Faiths of the World, p. 37.

intrude (in-tröd'), *v.*; pret. and pp. *intruded*, ppr. *intruding.* [= OF. *intrure, intruire*, < L. *intrudere*, thrust in (refl. thrust oneself in), < *in*, in, + *trudere*, thrust, push, crowd: cf. *extrude, obtrude.*] **I.** *trans.* **1†.** To thrust in; bring in forcibly.

An there come e'er a citizen gentlewoman in my name, let her have entrance, I pray you; . . . there she is! good master, *intrude* her. *B. Jonson*, Cynthia's Revels, v. 2.

If it [a clyster] should be *intruded* up by force, it cannot so quickly penetrate to the superior parts.
Greenhill, Art of Embalming, p. 273.

2. To thrust or bring in without necessity or right; bring forward unwarrantably or inappropriately: often used reflexively.

Our fantasy would *intrude* a thousand fears, suspicions, chimeras, upon us. *Burton*, Anat. of Mel., p. 329.

The envy of the class which Frederic quitted, and the civil scorn of the class into which he *intruded himself*, were marked in very significant ways.
Macaulay, Frederic the Great.

3. To push or crowd in; thrust into some unusual, improper, or abnormal place or position: as, *intruded* rocks or dikes in a geological formation. In entomology an intruded part or organ is one that is nearly concealed in a hollow of the supporting parts, only the apex being visible.

Their capitals are *intruded* between the triforium arches, appearing as if the vault had pressed them from their proper station on the clerestory string-course.
The Century, XXXVI. 594.

4†. To enter forcibly; invade.

Why should the worm *intrude* the maiden bud?
Shak., Lucrece, l. 848.

Intruded head, a head nearly withdrawn into the prothorax, as in certain *Coleoptera.*

II. *intrans.* To come or appear as if thrust in; enter without necessity or warrant; especially, to come in unbidden and unwelcomely: as, to *intrude* upon a private circle; to *intrude* where one is not wanted.

Where you're always welcome, you never can *intrude.*
Steele, Lying Lover, i. 1.

Some men are placed in posts of danger, and to these danger comes in the way of duty; but others must not *intrude* into their honourable office.
J. H. Newman, Parochial Sermons, i. 163.

=**Syn.** *Encroach upon, Infringe upon*, etc. See *trespass, v. i. Intrude, Obtrude.* The essential difference between these words lies in the prepositions: *intrude*, to thrust one's self *into* places, invading privacy or private rights; *obtrude*, to thrust one's self *out* beyond modesty or the limits proper to ourselves, and offensively *against* the attention, etc., of others.

intruder (in-trö'dėr), *n.* One who intrudes; one who thrusts himself in, or enters where he has no right or is not welcome.

Go, base *intruder!* overweening slave!
Shak., T. G. of V., iii. 1, 157.

intrudingly (in-trö'ding-li), *adv.* By intruding; intrusively.

I thrust myself *intrudingly* upon you.
Steele, Lying Lover, i. 1.

intrudress† (in-trö'dres), *n.* [< *intruder* + *-ess.*] A female intruder.

Joash should recover his rightful throne from the unjust usurpation of Athaliah, an idolatrous *intrudress* thereinto. *Fuller*, Pisgah Sight.

intrunk† (in-trungk'), *v. t.* [< *in-*[2] + *trunk.*] To inclose as in a trunk; incase.

Had eager lust *intrunked* my conquered soul,
I had not buried living joys in death.
Ford, Love's Sacrifice, v. 3.

intruse (in-trös'), *a.* [< L. *intrusus*, pp. of *intrudere*, thrust in.] In *bot.*, pushed or projecting inward. *A. Gray.*

intrusion (in-trö'zhọn), *n.* [= F. *intrusion* = Sp. *intrusión* = Pg. *intrusão* = It. *intrusione*, < ML. *intrusio(n-)*, a thrusting in, < L. *intrudere*, pp. *intrusus*, thrust in: see *intrude.*] **1.** The act of intruding; the act of entering without warrant or justification; unbidden, unwelcome, or unfit entrance into or upon anything.

Why this *intrusion?*
Were not my orders that I should be private?
Addison, Cato, v. 2.

Who feared the pale *intrusion* of remorse
In a just deed? *Shelley*, The Cenci, iii. 2.

2. Specifically, in *law:* (*a*) A wrongful entry after the determination of a particular estate, say for life, and before the freehold remainderman or reversioner can enter. *Minor.* (*b*) In *Eng. law*, any trespass committed on the public lands of the crown, as by entering thereon without title, holding over after a lease is determined, taking the profits, cutting down timber, and the like. (*c*) Usurpation, as of an office.— **3.** A thrusting or pushing in, as of something out of place; irregular or abnormal entrance or irruption: as, an *intrusion* of foreign matter; the *intrusion* of extrinsic rocks or dikes in a geological formation. See *intrusive rocks*, under *intrusive.*

The composition is thus better than that of the front itself, as there are two harmonious stages in the same style, without any *intrusion* of foreign elements.
E. A. Freeman, Venice, p. 249.

Action of ejection and intrusion. See *ejection.*— **Information of intrusion.** See *information.*

intrusional (in-trö'zhọn-ạl), *a.* [< *intrusion* + *-al.*] Of or belonging to intrusion; noting intrusion.

intrusionist (in-trö'zhọn-ist), *n.* [< *intrusion* + *-ist.*] One who intrudes, or favors intrusion; specifically, one of those in the Established Church of Scotland who denied the right of a parish or congregation to resist or object to the settlement or appointment of an obnoxious minister by a patron. The exercise of this right of presenting or appointing a minister against the wishes of the congregation led to much controversy, and was one of the causes of the disruption in 1843, when the non-intrusionists formed themselves into the Free Church of Scotland. Church patronage was abolished in Scotland in 1874. See *non-intrusionist* and *patronage.*

intrusive (in-trö'siv), *a.* [< L. *intrudere*, pp. *intrusus*, thrust in (see *intrude*), + *-ive.*] **1.** Apt to intrude; coming unbidden or without welcome; appearing undesirably: as, *intrusive* thoughts or guests.

Let me shake off the *intrusive* cares of day.
Thomson, Winter, l. 207.

2. Done or effected by intrusion; carried out by irregular or unauthorized entrance: as, *intrusive* interference.

The shaft sunk from the top [of a mound] showed several *intrusive* burials. *Science*, III. 79.

3. Thrust in out of regular place or order; introduced from an extraneous source; due to intrusion or irregular entrance.

The number and bulk of the *intrusive* masses of differently coloured porphyries, injected one into another and intersected by dikes, is truly extraordinary.
Darwin, Geol. Observations, ii. 513.

The greater gods of Greece . . . were the *intrusive* gods, the divinities of new comers into the land.
Keary, Prim. Belief, p. 214.

Intrusive rocks, in *geol.*, rocks which have made their way up from below into another rock or series of beds. As generally used by geologists at the present time, the phrase refers only to those rocks often styled *Plutonic*, or such as are revealed at the surface by erosion of a certain thickness of overlying rock. Masses which have come up to the surface in the manner of ordinary volcanic rock would not be called *intrusive.*

intrusively (in-trö'siv-li), *adv.* In an intrusive manner; by intrusion.

intrusiveness (in-trö'siv-nes), *n.* The character or quality of being intrusive.

intrusor† (in-trö'sọr), *n.* [ME. *intrusour*, < ML. *intrusor*, < L. *intrudere*, pp. *intrusus*, intrude: see *intrude.*] An intruder. *Lydgate.*

intrust (in-trust'), *v. t.* [Also *entrust;* < *in-*[2], *en-*[1], + *trust.*] **1.** To consign or make over as a trust; transfer or commit in trust; confide: followed by *to.*

I hope . . . that I may have the liberty to *intrust* my neck to the fidelity of my own feet, rather than to those of my horse. *Cotton*, in Walton's Angler, ii. 228.

Besides the loftiest part of the work of Providence, *entrusted to* the Hebrew race, there was other work to do, and it was done elsewhere. *Gladstone*, Might of Right, p. 108.

2. To invest, as with a trust or responsibility; endue, as with the care or fiduciary possession of something: followed by *with.*

The joy of our Lord and master, which they only are admitted to who are careful to improve the talents they are *intrusted* withall. *Bp. Wilkins*, Natural Religion, ii. 8.

In a republic, every citizen is himself in some measure *intrusted with* the public safety, and acts an important part for its weal or woe. *Story*, Misc. Writings, p. 513.

=**Syn. 1.** *Confide, Consign*, etc. See *commit.*

intubation (in-tū-bā'shọn), *n.* [< L. *in*, in, + *tubus*, tube, + *-ation.*] The act of inserting a tube into some orifice.— **Intubation of the larynx,** the insertion of a specially designed tube into the glottis to keep it patent, as in diphtheritic obstruction: a substitute for tracheotomy.

intuit (in'tū-it), *v.*; pret. and pp. *intuited*, ppr. *intuiting.* [Also *intuite;* < L. *intuitus*, pp. of *intueri*, look at or upon, observe, regard, contemplate, consider, < *in*, in, on, + *tueri*, look: see *tuition, tutor.*] **I.** *trans.* To know intuitively or by immediate perception.

If there are no other origins for right and wrong than . . . [the] enunciated or *intuited* divine will, then, as alleged, were there no knowledge of the divine will.
H. Spencer, Data of Ethics, p. 50.

II. *intrans.* To receive or assimilate knowledge by direct perception or comprehension.

God must see, he must *intuit*, so to speak.
De Quincey, Rhetoric.

The passage from the Known to the Unknown is one of constant trial. We see, and from it infer what is not seen; we *intuite*, and conclude.
G. H. Lewes, Probs. of Life and Mind, II. iii. 7.

intuition (in-tū-ish'ọn), *n.* [= F. *intuition* = Sp. *intuición* = Pg. *intuição* = It. *intuizione*, < ML. *intuitio(n-)*, a looking at, immediate cognition, < L. *intueri*, look at, consider: see *intuit.*] **1†.** A looking on; a sight or view.

His [Christ's] disciples must not only abstain from the act of unlawful concubinate, but from the impurer *intuition* of a wife of another man.
Jer. Taylor, Works (ed. 1835), I. 215.

2. Direct or immediate cognition or perception; comprehension of ideas or truths independently of ratiocination; instinctive knowledge of the relations or consequences of ideas, facts, or actions.

No doubt, with Philolaus the motion of the earth was only a guess, or, if you like, a happy *intuition.*
Max Müller, Sci. of Lang., 1st ser., p. 29.

3. Specifically, in *philos.*, an immediate cognition of an object as existent.

The term *intuition* is not unambiguous. Besides its original and proper meaning (as a visual perception), it has been employed to denote a kind of apprehension, and a kind of judgment. Under the former head, *intuition* or intuitive knowledge has been used in the six following significations: — a. — To denote a perception of the actual and present, in opposition to the abstractive knowledge which we have of the possible in imagination and of the past in memory. b. — To denote an immediate apprehension of a thing in itself, in contrast to a representative, vicarious, or mediate apprehension of it, in or through something else. (Hence, by Fichte, Schelling, and others, *Intuition* is employed to designate the cognition as opposed to the conception of the Absolute.) c. — To denote the knowledge which we can adequately represent in imagination, in contradistinction to the symbolical knowledge which we cannot image, but only think or conceive, through and under a sign or word. (Hence, probably, Kant's application of the term to the forms of the sensibility — the imaginations of space and time — in contrast to the forms or categories of the understanding.) d. — To denote perception proper (the objective), in contrast to sensation proper (the subjective), in our sensitive consciousness. e. — To denote the simple apprehension of a notion, in contradistinction to the complex apprehension of the terms of a proposition. Under the latter head it has only a single signification, viz.: f. — To denote the immediate affirmation by the intellect, that the predicate does or does not pertain to the subject, in what are called self-evident propositions. All these meanings, however, with the exception of the fourth, have this in common, that they express the condition of an immediate in opposition to mediate knowledge.
Sir W. Hamilton, Reid's Works, p. 759, note A, § 5.

The term *intuition* will be taken as signifying a cognition not determined by a previous cognition of the same object, and therefore so determined by something out of the consciousness. The word intuitus first occurs as a technical term in St. Anselm's Monologium. He wished to distinguish between our knowledge of God and our knowledge of finite things (and, in the next world, of God also); and, thinking of the saying of St. Paul, "Videmus nunc per speculum in aenigmate: tunc autem facie ad faciem," he called the former speculation and the latter *intuition.* This use of "speculation" did not take root, because that word already had another exact and widely different signification. In the middle ages the term "intuitive cognition" had two principal senses: 1st, as opposed to abstractive cognition, it meant the knowledge of the present as present, and this is its meaning in Anselm; but, 2d, as no intuitive cognition was allowed to be determined by a previous cognition, it came to be used as the opposite of discursive cognition (see Scotus), and this is nearly the sense in which I employ it. *C. S. Peirce.*

(Some writers hold that the German *Anschauung* should not be translated by *intuition*. But this term is a part of the Kantian terminology, the whole of which was framed in Latin and translated into German, and this word in particular was used by Kant in his Latin writings in the form *intuitus*, and he frequently brackets this form after *Anschauung*, to make his meaning clear. Besides, the *cognitio intuitiva* of Scotus, who anticipated some of Kant's most important views on this subject, is almost identical with Kant's own definition of *Anschauung*. *Intellectual intuition*, used since Kant for an immediate cognition of the existence of God, was by the German mystics employed for their spiritual illumination (the term *intuitio intellectualis* was borrowed by them from Cardinal de Cusa), or light of nature.)

4. Any object or truth discerned by direct cognition; a first or primary truth; a truth that cannot be acquired by but is assumed in experience.—5. Pure, untaught knowledge.

We denote this primary wisdom as *intuition*, whilst all later teachings are tuitions. *Emerson*, Self-Reliance, p. 56.

Intellectual intuition. See *intellectual*.

intuitional (in-tū-ish′ọn-ạl), *a.* [< *intuition* + *-al*.] Pertaining to or derived from intuition; based on intuition as a principle: as, the *intuitional* origin of knowledge; the *intuitional* school of philosophy.

intuitionalism (in-tū-ish′ọn-ạl-izm), *n.* [< *intuitional* + *-ism*.] In *metaph.*, the doctrine that the absolute is known, in its existence, by an ★immediate cognition of the understanding.

intuitionalist (in-tū-ish′ọn-ạl-ist), *n.* [< *intuitional* + *-ist*.] A believer in the doctrine of intuitionalism.

The great opposing theories of the experientialists and the *intuitionalists*. *J. Fiske*, Cosmic Philos., I. 73.

intuitionism (in-tū-ish′ọn-izm), *n.* [< *intuition* + *-ism*.] The doctrine of Reid and other Scotch philosophers that external objects are immediately known in perception, without the intervention of a vicarious phenomenon.

intuitionist (in-tū-ish′ọn-ist), *n.* [< *intuition* + *-ist*.] An adherent of the doctrine of Reid concerning immediate perception.

intuitive (in-tū′i-tiv), *a.* [= F. *intuitif* = Sp. Pg. It. *intuitivo*, < ML. *intuitivus*, < L. *intueri*, look at, consider: see *intuit*, *intuition*.] 1. Perceiving directly, without a medium, vicarious representation, symbol, or phenomenon; perceiving the object immediately as it exists.

Faith, beginning here with a weak apprehension of things not seen, endeth with the *intuitive* vision of God in the world to come. *Hooker*, Eccles. Polity.

2. Pertaining to a knowledge (especially, but not exclusively, an immediate knowledge) of a thing as existent.—3. Not determined by other cognitions; not discursive; of the nature of a first premise; immediate; self-evident; reached without reasoning by an inexplicable and unconscious process of thought.

Whence the soul
Reason receives, and reason is her being,
Discursive or *intuitive*. *Milton*, P. L., v. 488.

4. Presenting an object as an individual image; not general.—**Intuitive certainty, cognition, judgment,** etc. See the nouns.

intuitively (in-tū′i-tiv-li), *adv.* In an intuitive manner; by instinctive apprehension: as, to perceive truth *intuitively*.

God Almighty, who sees all things *intuitively*, does not want logical helps. *Baker*, On Learning.

We feel *intuitively* that there is something not only imperfect, but absolutely repulsive, in the purely skeptical spirit. *H. N. Oxenham*, Short Studies, p. 263.

intuitivism (in-tū′i-tiv-izm), *n.* [< *intuitive* + *-ism*.] The doctrine that the fundamental principles of ethics are reached by intuition.

The difference between the two phases of *Intuitivism* in which these notions [of the relations between right and good, and that the right is always in our power] are respectively prominent is purely formal; their practical prescriptions are never found to conflict.
H. Sidgwick, Methods of Ethics, p. 99.

intuitivist (in-tū′i-tiv-ist), *n.* [< *intuitive* + *-ist*.] One who believes in intuition; one who believes in the intuitive character of ethical ideas.

The *intuitivist*, . . . by teaching the latent existence in the soul of the regulative moral idea, leaves open ▪ door to a sudden, accidental, and semi-miraculous discovery of the path of duty.
J. Sully, Sensation and Intuition, p. 159.

intumesce (in-tū-mes′), *v. i.*; pret. and pp. *intumesced*, ppr. *intumescing*. [= Sp. *entumecer* = Pg. *intumecer*, < L. *intumescere*, swell up, < *in*, in, on, + *tumescere*, inceptive of *tumere*, swell: see *tumid*.] To enlarge or expand, as with heat; swell up; become tumid.

A number of the vesicles being half filled up with a white soft, earthy mesotypic mineral, which *intumesced* under the blowpipe in a remarkable manner.
Darwin, Geol. Observations, i. 31.

intumescence (in-tū-mes′ẹns), *n.* [= F. *intumescence* = Pg. *intumecencia* = Sp. *intumescencia* = It. *intumescenza*, < NL. *intumescentia*, < L. *intumescen(t-)s*, swelling up: see *intumescent*.] 1. The state or process of swelling or enlarging, as with heat; expansion; tumidity.

Had navigation been at that time sufficiently advanced to make so long a passage easily practicable, there is little reason for doubting but the *intumescence* of nations would have found its vent, like all other expansive violence, where there was least resistance.
Johnson, Taxation no Tyranny.

2. A swollen or tumid growth or mass; tumefaction.

intumescency (in-tū-mes′ẹn-si), *n.* [As *intumescence*.] Same as *intumescence*. *Sir T. Browne*, Vulg. Err., vii. 13.

intumescent (in-tū-mes′ẹnt), *a.* [= Sp. *intumescente*, < L. *intumescen(t-)s*, ppr. of *intumescere*, swell up, < *in*, in, + *tumescere*, begin to swell: see *tumescent*.] Swelling up; becoming tumid.

The treatment consisted in reducing the size of the *intumescent* membranes. *Medical News*, LII. 665.

intumulate† (in-tū′mụ-lāt), *v. t.* [< ML. *intumulatus*, pp. of *intumulare*, bury, entomb, < L. *in*, in, + *tumulatus*, pp. of *tumulare*, bury, < *tumulus*, a mound, tomb: see *tumulus*.] To place or deposit within a tomb or grave; inter or inhume; bury.

He also caused the corps of King Richard ye Second to be taken from the earth, whom King Henry the Fourth had *intumulate* in the friers Church of Langley.
Stow, Hen. V., an. 1413.

intumulate† (in-tū′mụ-lāt), *a.* [< ML. *intumulatus*, pp.: see the verb.] Interred; buried.

Whose corps was . . . on the right hand of the high aulter, princely enterred and *intumulate*.
Hall, Edw. IV., an. 23.

intumulated† (in-tū′mụ-lā-ted), *a.* [< L. *intumulatus*, unburied, < *in-* priv. + *tumulatus*, pp. of *tumulare*, bury: see *intumulate*.] Not buried. *Cockeram*.

intune†, *v. t.* Same as *entune*.

inturbidate (in-tėr′bi-dāt), *v. t.*; pret. and pp. *inturbidated*, ppr. *inturbidating*. [< L. *in*, in, + *turbidatus*, pp. of *turbidare*, trouble, < *turbidus*, troubled: see *turbid*.] To render turbid, dark, or confused. [Rare.]

The confusion of ideas and conceptions under the same term painfully *inturbidates* his theology. *Coleridge*.

inturgescence† (in-tėr-jes′ẹns), *n.* [< LL. *inturgescere*, swell up, < L. *in*, in, on, + *turgescere*, begin to swell, < *turgere*, swell: see *turgid*.] A swelling; the act of swelling, or the state of being swollen.

inturgescency† (in-tėr-jes′ẹn-si), *n.* Same as *inturgescence*.

Intergescencies caused first at the bottom [of the sea], and carrying the upper part before them.
Sir T. Browne, Vulg. Err., vii. 13.

inturn (in′tėrn), *n.* [< *in*[1] + *turn*, *n.*] The act of a wrestler when he puts his thigh between the thighs of his adversary, and lifts him up.

Then with an *inturne* following that,
Upon his backe he threw him flat.
Lucan, Pharsalia (trans.), 1614.

inturned (in′tėrnd), *a.* Turned in.

This is, I believe, only an optical effect due to the *inturned* edges of the cuticle. *Micros. Sci.*, XXIX. iii. 265.

intuse†, *n.* [< LL. *intusus*, pp. of *intundere*, pound, bruise, < L. *in*, in, + *tundere*, pound, bruise: cf. *contuse*.] A bruise.

And, after having searcht the *intuse* deepe,
She with her scarf did bind the wound from cold to keepe.
Spenser, F. Q., III. v. 33.

intuspose (in-tus-pōz′), *v. t.*; pret. and pp. *intusposed*, ppr. *intusposing*. [< L. *intus*, within, + *pose*[2].] To introduce; cause to occupy an interior position; place within. *J. W. Dale*, Classic Baptism, p. xxi.

intusposition (in″tus-pō-zish′ọn), *n.* [< L. *intus*, within, + *positio(n-)*, a placing: see *position*. Cf. *intuspose*.] Situation within; the state or condition of being within, or surrounded on all sides, as by an enveloping space or element. *J. W. Dale*, Classic Baptism, p. xvii.

intussuscepted (in″tu-su-sep′ted), *a.* [< L. *intus*, within, + *susceptus*, pp. of *suscipere*, take up: see *susceptible*.] Taken up into itself or into something else; invaginated; introverted: specifically applied to a part of a bowel which suffers intussusception.

intussusception (in″tu-su-sep′shọn), *n.* [= F. *intussusception* = Sp. *intususcepción* = Pg. *intuscepção*, < L. *intus*, within, + *susceptio(n-)*, ▪ taking up, < *suscipere*, pp. *susceptus*, take up: see *susceptible*.] A receiving within; reception of one part within another part of the same organ, or of one organ within another of the same kind; invagination; introversion; introsusception. Specifically—(*a*) In *pathol.*, the introduction of a part of the intestine into an adjacent part.

Having once commenced, the *intussusception* goes on increasing . . . as the result of peristaltic action.
Quain, Med. Dict.

(*b*) In *physiol.*, reception of foreign matter by a living organism, and its conversion into living tissue; ingestion, digestion, and assimilation of food, including the whole process of nutrition and growth. It is the mode of interstitial growth characteristic of organic life, as distinguished from any process of accretion by which a mineral may increase in size. (*c*) In *bot.*, according to the theory proposed by Nägeli, the growth of cell-walls and of starch grains by the intercalation of new solid particles between those already in existence. The intussusception theory is opposed to that of growth by apposition, which supposes the new particles to be deposited in layers on the inner side of the cell-wall, or on the outer side of the starch grain.

intussusceptive (in″tu-su-sep′tiv), *a.* [< L. *intus*, within, + *suscipere*, pp. *susceptus*, take up. Cf. *intussusception*.] In *physiol.*, of the nature of or characterized by intussusception; interstitial, as a mode of growth. See *intussusception* (*b*).

The consequence of this *intussusceptive* growth is the "development" or "evolution" of the germ into the visible bird. *Huxley*, Evol. in Biology.

intwine, *v.* See *entwine*.

intwist (in-twist′), *v. t.* Same as *entwist*.

inuendo, *n.* An erroneous spelling of *innuendo*, 2.

Inula (in′ū-lạ), *n.* [L., supposed to be a corrupt form of Gr. ἑλένιον, a plant, supposed to be elecampane: see *helenium*, *elecampane*.] A genus of plants of the family *Asteraceæ*, type of the tribe *Inuleæ*. They are usually inert, rather coarse herbs, with moderately large heads of yellow-rayed flowers, and radical or alternate entire or serrate leaves. About 90 species are known, natives of Europe, Asia, and Africa. *I. Helenium*, the elecampane, elf-dock, horseheal, horse-elder, or scabwort, is a native of central and southern Europe, Siberia, and the Himalayas, and has been extensively naturalized in England (where it may possibly also be native) and North America. The root is an aromatic tonic and gentle stimulant, and has been supposed to possess diaphoretic, diuretic, expectorant, and emmenagogic properties. It was much employed by the ancients, but its use at present is confined to chronic diseases of the lungs. (See cut under *elecampane*.) *I. Conyza*, the rigid inule or plowman's spikenard, is a native of central and southern Europe; *I. Africana* is a South African species; *I. crithmoides*, the samphire-inule or golden samphire, is a native of western Europe and of all the region around the Mediterranean; *I. graveolens* is widely distributed in the Mediterranean region; and *I. salicina*, the willow-leafed inule, is also widely distributed over Europe.

Inulaceæ (in-ū-lā′sē-ē), *n. pl.* [NL. (Presl, 1822), < *Inula* + *-aceæ*.] A tribe of composite plants, typified by the genus *Inula*: now included in the tribe *Inuleæ*.

inule (in′ūl), *n.* [< NL. *Inula*.] A plant of the genus *Inula*, particularly *I. Helenium*, the elecampane.

inulin (in′ū-lin), *n.* [< *Inula* + *-in*[2].] A vegetable principle ($C_{36}H_{62}O_{31}$) which is spontaneously deposited from a decoction of the roots of *Inula Helenium* and certain other plants. It is a white powder soluble in hot water, is colored yellow by iodine, and in its chemical properties appears to be intermediate between those of sugar and starch. Also called *dahlin* and *alantin*.

inulinoid (in′ū-lin-oid), *a.* [< *inul(in)* + *-oid*.] Resembling or related to inulin.

Inuloideæ (in-ū-loi′dē-ē), *n. pl.* [NL., < *Inula* + *-oideæ*.] A large and somewhat heterogeneous tribe of composite plants, typified by the genus *Inula*.

inumbrate† (in-um′brāt), *v. t.* [< L. *inumbratus*, pp. of *inumbrare*, cast a shadow upon, < *in*, on, + *umbrare*, shadow, shade, < *umbra*, a shadow: see *umbra*.] To cast a shadow upon. *Bailey*.

inumbration† (in-um-brā′shọn), *n.* [< LL. *inumbratio(n-)*, an overshadowing, < L. *inumbrare*, overshadow: see *inumbrate*.] Shade; ▪ shadow; an overshadowing.

The obstruction and *inumbration* beginneth on that side.
Holland, tr. of Plutarch, p. 956.

inuncate† (in-ung′kāt), *v. t.* [< L. *inuncatus*, pp. of *inuncare*, hook, < *in*, in, + *uncus*, a hook: see *aduncate*.] To hook or entangle. *Bailey*, 1731.

inuncted† (in-ungk′ted), *a.* [< L. *inunctus*, anointed: see *inunction*, and cf. *anointed*.] Anointed.

inunction (in-ungk′shọn), *n.* [< L. *inunctio(n-)*, an anointing, a spreading on, < *inungere*, anoint, spread on, < *in*, on, + *ungere*, smear: see *unction*. Cf. *anoint*, from the same verb (L. *inungere*).] The action of anointing; unc-

tion: in *med.*, the act of rubbing in an ointment or a liniment.

When the skin is cold and dry, or cold and moist, and insufficiently nourished, as well as in certain fevers and other morbid conditions, there can be no doubt of the value of *inunction*.
Buck's Handbook of Med. Sciences, IV. 646.

inunctuosity (in-ungk-tū-os′i-ti), *n.* [< *in-*3 + *unctuosity*.] Lack of unctuosity; absence of greasiness or oiliness perceptible to the touch: as, the *inunctuosity* of porcelain-clay. *Kirwan*.

inundant (in-un′dant), *a.* [= Sp. Pg. *inundante*, < L. *inundan(t-)s*, ppr. of *inundare*, overflow: see *inundate*. Cf. *abundant*, *redundant*.] Overflowing; inundating. [Poetical.]

Days, and nights, and hours,
Thy voice, hydropick Fancy, calls aloud
For costly draughts, *inundant* bowls of joy.
Shenstone, Economy, 1.

Inundatæ (in-un-dā′tē), *n. pl.* [NL. (Linnæus, 1751), fem. pl. of L. *inundatus*, overflowed: see *inundate*.] A division (order) of water-plants or water-loving plants, containing the genera *Hippuris*, *Ceratophyllum*, *Potamogeton*, *Ruppia*, *Typha*, etc., which are now referred to the families *Haloragidaceæ*, *Potamogetonaceæ*, *Typhaceæ*, etc.

inundate (in-un′dāt or in′un-dāt), *v. t.*; pret. and pp. *inundated*, ppr. *inundating*. [< L. *inundatus*, pp. of *inundare* (> It. *inondare*, *innondare* = Sp. Pg. *inundar* = F. *inonder*), overflow, < *in*, on, + *undare*, rise in waves: see *ound*, and cf. *abound*, *redound*, *surround*.] 1. To overspread with or as if with a flood; overflow; flood; deluge.

Nonnus reports, in the history of his embassy, that during the period when the Nile *inundates* Egypt there are very violent storms in the different parts of Æthiopia.
Beloe, tr. of Herodotus, ii. 39.

Hence—2. To gorge with excessive circulation or abundance; fill inordinately; overspread; overwhelm.

The calm and the magical moonlight
Seemed to *inundate* her soul with indescribable longings.
Longfellow, Evangeline, ii. 3.

The whole system is *inundated* with the tides of joy.
Emerson, Success.

inundation (in-un-dā′shọn), *n.* [= F. *inondation* = Pr. *inondacion* = Sp. *inundación* = Pg. *inundação* = It. *inundazione*, *inondazione*, < L. *inundatio(n-)*, an overflowing, < *inundare*, pp. *inundatus*, overflow: see *inundate*.] The act of inundating, or the state of being inundated; an overflow of water or other fluid; a flood; a rising and spreading of water over low grounds; hence, an overspreading of any kind; an overflow or superfluous abundance.

Her father, . . . in his wisdom, hastes our marriage,
To stop the *inundation* of her tears.
Shak., R. and J., iv. 1, 12.

Seuen or eight weekes we withstood the *invndations* of these disorderly humors.
Capt. John Smith, Works, II. 101.

The greater portion of the cultivable soil is fertilized by the natural annual *inundation*.
E. W. Lane, Modern Egyptians, II. 24.

inunderstanding† (in-un-dėr-stan′ding), *a.* [< *in-*3 + *understanding*, ppr. of *understand*.] Void of understanding; unintelligent.

Can we think that such material and mortal, that such *inunderstanding* souls, should by God and nature be furnished with bodies of so long permansion?
Bp. Pearson, Expos. of Creed, x.

inurbane (in-ėr-bān′), *a.* [= Sp. Pg. It. *inurbano*, < L. *inurbanus*, not civil or polite, < *in-* priv. + *urbanus*, civil, polite: see *urbane*.] Not urbane; uncivil; discourteous; unpolished.

Just it would be, and by no means *inurbane*, but hardly, perhaps, Christian.
M. Arnold, Literature and Dogma, vi.

inurbanely (in-ėr-bān′li), *adv.* Without urbanity; uncivilly.

inurbaneness (in-ėr-bān′nes), *n.* Lack of urbanity; incivility. *Bailey*, 1727.

inurbanity (in-ėr-ban′i-ti), *n.* [= F. *inurbanité* = Sp. *inurbanidad* = It. *inurbanità*, < L. as if **inurbanita(t-)s*, < *inurbanus*, inurbane: see *inurbane*, and cf. *urbanity*.] Lack of urbanity or courtesy; rude, unpolished manners or deportment; incivility.

Plautus abounds in pleasantries that were the delight of his own and of the following age, but which at the distance of one hundred and fifty years Horace scruples not to censure for their *inurbanity*.
Beattie, Laughter and Ludicrous Composition.

inure (in-ūr′), *v.*; pret. and pp. *inured*, ppr. *inuring*. [Also *enure*; < *in ure*, in the phrase *put in ure*, put in practice: *in*1, *prep.*; *ure*, work, operation, practice: see *ure*.] **I.** *trans.* 1†. To establish by use; put into exercise or act; insure.

But us he sends upon his high behests
For state, as Sovran King; and to *inure*
Our prompt obedience. *Milton*, P. L., viii. 239.

2†. To use; adapt; qualify; practise; exercise; ply.

Inure the with them that byn wyse,
Then to Ryches thow shalt Aryse.
Booke of Precedence (E. E. T. S., extra ser.), i. 70.

I also *inure* my pen sometimes in that kind.
Spenser, To G. Harvey.

A prince may animate and *inure* some meaner persons to be scourges to ambitious men.
Bacon, Ambition (ed. 1887).

3. To toughen or harden by exercise; deaden the sensibility of; accustom; habituate: followed by *to*.

A nation warlike, and *inured to* practice
Of policy and labour, cannot brook
A feminate authority. *Ford*, Broken Heart, v. 3.

Inur'd to hardships from his early youth,
Much had he done, and suffer'd for his truth.
Dryden, Hind and Panther, iii. 910.

The poor, *inur'd to* drudg'ry and distress,
Act without aim, think little, and feel less.
Cowper, Hope, l. 7.

II. *intrans.* 1. To pass in use; take or have effect; be applied; become available or serviceable: as, the land will *inure* to the heirs, or to the benefit of the heirs.

Speaking before of the figure [Synecdoche] wee called him [Quicke conceit] because he *inured* in a single word onely by way of intendment or large meaning, but such as was speedily discouered by euery quicke wit.
Puttenham, Arte of Eng. Poesie, p. 193.

Almost every privilege conceded by neutrals would be apt to *inure* more to the benefit of one than of the other of two hostile nations.
Woolsey, Introd. to Inter. Law, § 157.

2. In *law*, to devolve as a right. It is commonly used of a devolution by law not intended by the parties: as, if the holder of a lease with covenant for renewal assigns it, and afterward gets a renewal to himself, the renewal *inures* to the benefit of the assignee.

inurement (in-ūr′ment), *n.* [< *inure* + *-ment*.] The act of inuring, or the state of being inured; practice; habit.

How much more may we hope, through the very same means (education being nothing else but a constant plight and *inurement*), to induce by custom good habits into a reasonable creature. *Sir H. Wotton*, Reliquiæ, p. 79.

inurn (in-ėrn′), *v. t.* [< *in-*2 + *urn*.] To put into an urn, especially a funeral urn; hence, to bury; inter; intomb.

The sepulchre,
Wherein we saw thee quietly *inurn'd*.
Shak., Hamlet, i. 4, 49.

-inus. [NL., L., a common adj. suffix: see *-in*1, *-ine*1.] A suffix forming Latin adjectives and nouns thence derived. It is frequent in New Latin generic and specific names, as in *Acanthinus*, etc.

inusitate† (in-ū′zi-tāt), *a.* [= F. *inusité*, < L. *inusitatus*, unused, unusual, < *in-* priv. + *usitatus*, used, usual, pp. of *usitari*, use often, freq. of *uti*, pp. *usus*, use: see *use*, *v.*] Unused; unusual.

I find some *inusitate* expressions about some mysteries.
Abp. Bramhall, Works, II. 61.

The mammæ of the male have not vanished by *inusitation*.
Paley, Nat. Theol., xxiii.

inust†, *a.* [< L. *inustus*, pp. of *inurere*, burn in, brand, < *in*, in, on, + *urere*, burn.] Burnt in.

That furious hot *inust* impression.
Dr. H. More, Psychathanasia, III. iii. 69.

inustion† (in-us′chọn), *n.* [< L. as if **inustio(n-)*, < *inurere*, pp. *inustus*, burn in: see *inust*.] The act of burning, or of marking by burning; a branding; in *med.*, cauterization.

A kingdom brought him to tyranny, tyranny to . . . *inustion* of other countries, among which Israel felt the smart in the burning of her cities and massacring her inhabitants. *Rev. T. Adams*, Works, II. 354.

in utero (in ū′tẹ-rō). [L.: *in*, in; *utero*, abl. of *uterus*, womb: see *uterus*.] In the womb; be★gotten, but yet to be born. See *in ventre*.

inutile (in-ū′til), *a.* [= F. *inutile* = Pr. *inutil* = Sp. *inútil* = Pg. *inutil* = It. *inutile*, < L. *inutilis*, useless, < *in-* priv. + *utilis*, useful: see *utility*.] Unprofitable; useless.

To refer to heat and cold is a compendious and *inutile* speculation. *Bacon*, Nat. Hist.

inutility (in-ū-til′i-ti), *n.*; pl. *inutilities* (-tiz). [= F. *inutilité* = Sp. *inutilidad* = Pg. *inutilidade* = It. *inutilità*, < L. *inutilita(t-)s*, uselessness, < *inutilis*, useless: see *inutile*.] 1. The quality of being useless or unprofitable; lack of utility; uselessness; unprofitableness.

It is obvious that utility passes through *inutility* before changing into disutility, these notions being related as +, 0, and —. *Jevons*, Pol. Econ., p. 63.

Even on their own opinion of their *inutility* . . . I shall propose to you to suppress the board of trade and plantations. *Burke*, Economical Reform.

2. Something that is useless.

"Pshaw!" replied Arminius, contemptuously; "that great rope [the Atlantic cable], with a Philistine at each end of it talking *inutilities!*"
M. Arnold, Friendship's Garland, vii.

inutilized (in-ū′ti-līzd), *a.* [< *in-*3 + *utilized*.] Not utilized. Also spelled *inutilised*.

The application [of native ultramarine, which is worth, weight for weight, more than gold], remained *inutilised* for several years.
W. Crookes, Dyeing and Calico-printing, p. 80.

in utroque jure (in ū-trō′kwē jū′rē). [L.: *in*, in; *utroque*, abl. of *uterque*, either; *jure*, abl. of *jus*, law.] In each or either law; under both laws.

inutterable (in-ut′ėr-a-bl), *a.* [< *in-*3 + *utterable*.] Incapable of being uttered; unutterable.

All monstrous, all prodigious things,
Abominable, *inutterable*, and worse
Than fables yet have feign'd. *Milton*, P. L., ii. 626.

There,
If the wolf spare me, weep my life away,
Kill'd with *inutterable* unkindliness.
Tennyson, Merlin and Vivien.

Inuus (in′ū-us), *n.* [NL., < L. *Inuus*, a name of Pan.] A notable genus of old-world monkeys, of the family *Cynopithecidæ* and subfamily *Cynopithecinæ*, related to the macaques. *Inuus ecaudatus*, the well-known Barbary ape, inhabiting the rock of Gibraltar, is the only species. This animal is called an ape, and has been placed with the higher simians in the family *Simiidæ*; but its proper position is with the lower monkeys, near the baboons. See cut under *ape*.

in vacuo (in vak′ū-ō). [L.: *in*, in; *vacuo*, abl. of *vacuum*, vacuum: see *vacuum*.] In a vacuum; in empty space.

invade (in-vād′), *v. t.*; pret. and pp. *invaded*, ppr. *invading*. [= OF. *invader* = Sp. Pg. *invadir* = It. *invadere*, < L. *invadere*, go, come, or get into, enter into, attack, invade, < *in*, in, + *vadere*, go: see *evade*. Cf. *inveigh*.] 1†. To go into or upon; enter.

Becomes a body, and doth then *invade*
The state of life, out of the grisely shade.
Spenser, F. Q., III. vi. 37.

This contentious storm
Invades us to the skin. *Shak.*, Lear, iii. 4, 7.

2. To enter or penetrate into as an enemy; go or pass into or over with hostile intent, as in a military incursion.

By cordes let fal fast gan they slide adown:
And streight *inuade* the town yburied then
With wine and slepe. *Surrey*, Æneid, ii.

Flur, for whose love the Roman Cæsar first
Invaded Britain. *Tennyson*, Geraint.

Hence—3. To come into or upon as if by a hostile incursion; make an attack upon.

Jove can endure no longer
Your great ones should your less *invade*.
B. Jonson, Golden Age Restored.

Our Saviour himself, comming to reform his Church, was accus'd of an intent to *invade* Cæsar's right.
Milton, Eikonoklastes, xi.

The fumes of it [authority] *invade* the brain,
And make men giddy, proud, and vain.
S. Butler, Miscellaneous Thoughts.

4. To intrude upon; infringe; encroach on; violate: as, to *invade* the privacy of a family.

When . . . the rights of a whole people are *invaded*, the common forms of municipal law are not to be regarded.
A. Hamilton, Works, II. 95.

invader (in-vā′dėr), *n.* One who invades; an assailant; an encroacher; an intruder.

Let Erin remember the days of old,
Ere her faithless sons betray'd her,
When Malachi wore the collar of gold
Which he won from the proud *invader*.
Moore, Let Erin Remember.

Heroes and patriots have successfully resisted the *invaders* of their country, or perished in its defence.
Story, Misc. Writings, p. 342.

invadiate† (in-vā′di-āt), *v. i.* [< ML. *invadiatus*, pp. of *invadiare*, engage: see *engage*.] To engage or mortgage lands. *Bailey*, 1731.

invaginable (in-vaj′i-na-bl), *a.* [< *invagina(te)* + *-ble*.] Capable of being invaginated: susceptible of invagination.

The great proboscis of Balanoglossus may well be compared to the *invaginable* organ similarly placed in the Nemertines. *Encyc. Brit.*, XXIV. 137.

invaginate (in-vaj′i-nāt), *v. t.*; pret. and pp. *invaginated*, ppr. *invaginating*. [< L. *in*, in, +

vagina, a sheath: see *vagina*.] To sheathe; insert or receive as into a sheath; introvert: opposed to *evaginate*.

Dr. Kingsley claims that the compound eye arises as an *invaginated* pit of ectoderm. *Amer. Naturalist*, XXI. 1120.

invagination (in-vaj-i-nā′shon), *n.* [< *invaginate* + *-ion*.] The act of introverting or sheathing, or the state of being sheathed; insertion or reception as into a sheath; intussusception.

invalescence[2]† (in-vā-les′ens), *n.* [< L. *invalescere*, become strong, < *in-* intensive + *valescere*, inceptive of *valere*, be strong: see *valid*. Cf. *convalescence*.] Strength; health. *Bailey*, 1731.

invaletudinary† (in-val-ē-tū′di-nā-ri), *a.* [= F. *invalétudinaire* = Sp. *invaletudinario*, < L. *invaletudinarius*, sick (used only as a noun), < *in-* intensive + *valetudinarius*, sick: see *valetudinary*.] Sick; ill; valetudinary.

Whether usually the most studious, laborious ministers be not the most *invaletudinary* and infirm?
Papers between the Commissioners for Review of the Liturgy [(1661), p. 127.

invalid[1] (in-val′id), *a.* [= F. *invalide* = Sp. *inválido* = Pg. It. *invalido*, < L. *invalidus*, not strong, weak, inefficient, < *in-* priv. + *validus*, strong: see *valid*. Cf. *invalid*[2].] 1. Not valid; of no force, weight, or cogency; weak.

But this I urge,
Admitting motion in the heavens, to show
Invalid that which thee to doubt it moved.
Milton, P. L., viii. 116.

The greater our obligations to such writers, the more desirable is it that their *invalid* judgments should be discriminated from their valid. *F. Hall*, False Philol., p. 2.

2. In *law*, having no validity or binding force; wanting efficacy; null; void: as, an *invalid* contract or agreement.

invalid[2] (in′va-lid or -lēd), *a.* and *n.* [Formerly also *invalide;* = D. *invaliede*, a., = G. *invalide* = Dan. Sw. *invalid*, n., < F. *invalide* (= Sp. *inválido* = Pg. It. *invalido*), a., not strong, sick, invalid; as a noun, a disabled soldier; < L. *invalidus*, not strong: see *invalid*[1].] **I.** *a.* Deficient in health; infirm; weak; sick.

II. *n.* 1. An infirm or sickly person; one who is affected by disease or disabled by any infirmity. Hence—2. Something that is damaged, or the worse for wear, but not so much as to be wholly unserviceable. [Humorous.]

The carriages were old second-class *invalids* of English lines: but they were luxurious enough after the long journey in dust and sun.
W. H. Russell, Diary in India, I. 158.

II. *intrans.* To cause one's self to be registered as an invalid. [Rare.]

He had been long suffering from the insidious attacks of a hot climate, and though repeatedly advised to *invalid*, he never would consent. *Marryat*, Peter Simple.

invalidate (in-val′i-dāt), *v. t.*; pret. and pp. *invalidated*, ppr. *invalidating*. [< ML. **invalidatus*, pp. of **invalidare* (> It. *invalidare* = Sp. Pg. *invalidar* = F. *invalider*), make invalid, < L. *invalidus*, invalid: see *invalid*[1]. Cf. *validate*.] 1. To render invalid; destroy the strength or validity of; render of no force or effect.

Argument is to be *invalidated* only by argument, and is in itself of the same force, whether or not it convinces him by whom it is proposed. *Johnson*, Rambler, No. 14.

The force of the objection above set forth may be fully admitted, without in any degree *invalidating* the theory.
H. Spencer, Social Statics, p. 41.

Specifically—2. In *law*, to deprive of binding force or legal efficacy: as, fraud *invalidates* a contract.

invalidation (in-val-i-dā′shon), *n.* [< F. *invalidation* = Sp. *invalidación;* as *invalidate* + *-ion*.] The act of invalidating or of rendering invalid.

The thirty-four confirmations [of Magna Charta] would have been only so many repetitions of their absurdity, so many new links in the chain, and so many *invalidations* of their right.
Burke, Powers of Juries in Prosecutions for Libels.

invalidet†, *a.* and *n.* An obsolete form of *invalid*[2].

invalidhood (in′va-lid- or -lēd-hụd), *n.* [< *invalid*[2] + *-hood*.] The state of being an invalid; invalidism. [Rare.]

About twenty years ago she had an illness, and, on the strength of it, has kept up a character for *invalidhood* ever since. *R. Broughton*, Red as a Rose is She, ix.

invalidism (in′va-lid- or -lēd-izm), *n.* [< *invalid*[2] + *-ism*.] The condition of being an invalid; a state of debility or infirmity; especially, a chronic condition of poor health.

Invalidism is a function to which certain persons are born, as others are born to poetry or art as their calling.
O. W. Holmes, Old Vol. of Life, p. 109.

invalidity (in-va-lid′i-ti), *n.* [= F. *invalidité* = Pg. *invalidade* = It. *invalidità*, invalidity, < ML. *invalidita(t-)s*, weakness, infirmity (from a wound), < L. *invalidus*, not strong: see *invalid*[1], *invalid*[2].] 1†. Weakness; infirmity.

He ordered that none who could work should be idle; and that none who could not work, by age, sickness, or *invalidity*, should want. *Sir W. Temple*.

2. Lack of validity; want of cogency, force, or efficacy; specifically, lack of legal force: as, the *invalidity* of an argument or of a will.

But, however, to prevent all cavillings, in this place I'le shew the *invalidity* of this objection.
Glanville, Pre-existence of Souls, iv.

The penalty of *invalidity* attaching to unstamped documents of various kinds has proved a very effective deterrent to evasion. *Encyc. Brit.*, XXIII. 88.

invalidly (in-val′id-li), *adv.* So as to be invalid; without validity.

Fraudulently bought, and therefore *invalidly* obtained.
Philadelphia Times, Oct. 26, 1885.

The ancient amity & friendship betweene both our lands, with the *invaluable* commodity of sweet amiable peace.
Hakluyt's Voyages, I. 160.

There was an *invaluable* shrine for the head of St. John the Baptist, whose bones and another of his heads are in the cathedral at Genoa.
R. Curzon, Monast. in the Levant, p. 363.

invaluableness (in-val′ū-a-bl-nes), *n.* The character of being invaluable.

Deny, if thou canst, the *invaluablenesse* of this heavenly gift. *Bp. Hall*, Satan's Fiery Darts, ii.

invaluably (in-val′ū-a-bli), *adv.* Inestimably.

That *invaluably* precious blood of the Sonne of God.
Bp. Hall, Sermon of Thanksgiving, Jan., 1625.

invaluedt (in-val′ūd), *a.* [< *in-*[3] + *valued*.] Inestimable; invaluable.

The monument of worth, the angel's pleasure,
Which hoardeth glory's rich *invalu'd* treasure.
Ford, Fame's Memorial, Epitaphs.

invariability (in-vā″ri-a-bil′i-ti), *n.* [= F. *invariabilité* = Sp. *invariabilidad* = Pg. *invariabilidade* = It. *invariabilità;* as *invariable* + *-ity*.] Lack of variability or of liability to change; invariableness.

Therfore, this *invariability* in the birds' operations must proceed from a higher intellect.
Sir K. Digby, Of Bodies, xxxvii.

invariable (in-vā′ri-a-bl), *a.* and *n.* [= F. *invariable* = Sp. *invariable* = Pg. *invariavel* = It. *invariabile;* as *in-*[3] + *variable*.] **I.** *a.* 1. Not variable; constant; uniform; unchanging.

If taste has no fixed principles, if the imagination is not affected according to some *invariable* and certain laws, our labour is like to be employed to very little purpose.
Burke, On Taste, Int.

The only evidence of the shells having been naturally left by the sea consists in their *invariable* and uniform appearance of extreme antiquity.
Darwin, Geol. Observations, ii. 242.

2. Not capable of being varied; unalterable; unchangeable.—**Invariable antecedent**, in *logic*. See *antecedent*, 3 (*c*).—**Invariable pendulum**, a pendulum constructed to be transported unchanged from one station to another, in order to determine the relative acceleration of gravity. Such a pendulum swings upon a knife-edge (which see).—**Invariable system**, in *dynam.*, a system of points whose relative distances remain constant.

II. *n.* In *math.*, a quantity that does not vary; a constant.

invariableness (in-vā′ri-a-bl-nes), *n.* The state of being invariable; constancy of state, condition, or quality; immutability; unchangeableness.

A variety of dispensations [may] be consistent with an *invariableness* of design.
A. Tucker, Light of Nature, II. iii. 24.

invariably (in-vā′ri-a-bli), *adv.* In an invariable manner; without alteration or change; constantly; uniformly.

It [time] is conceived by way of substance, or imagined to subsist of itself, independently and *invariably*, as all abstract ideas are. *Law*, Enquiry, Of Time, ii.

Death succeeds life inevitably and *invariably*.
J. F. Clarke, Self-Culture, p. 157.

invariance (in-vā′ri-ans), *n.* [< *invarian(t)* + *-ce*.] In *math.*, the essential character of invariants; persistence after linear transformation.

invariant (in-vā′ri-ant), *a.* and *n.* [< *in-*[3] + *variant*.] **I.** *a.* Not varying or changing; remaining always the same.

However variable the visible antecedents may be, the real determinants—the coöperant factors—are in each case *invariants*.
G. H. Lewes, Probs. of Life and Mind, II. 94.

II. *n.* In *math.*, a function of the coefficients of a quantic such that, if the quantic is linearly transformed, the same function of the new coefficients is equal to the first function multiplied by some power of the modulus of transformation.—**Absolute, differential, skew,** etc., **invariant.** See the adjectives.—**Theory of invariants,** a branch of mathematics which studies the fundamental invariants of quantics.

invariantive (in-vā′ri-an-tiv), *a.* [< *invariant* + *-ive*.] Pertaining to an invariant; persisting after a linear transformation.

A curve u = 0 may have some *invariantive* property, viz a property independent of the particular axes of coördinates used in the representation of the curve by its equation. *Encyc. Brit.*, VI. 722.

invaried (in-vā′rid), *a.* [< *in-*[3] + *varied*.] Unvaried; not changing or altering. [Rare.]

Change of the particles, or the lesser *invaried* words, that add to the signification of nouns and verbs.
Blackwall, Sacred Classicks, I. 136.

invaroid (in-vā′roid), *n.* [L., < *in-* priv. + *variare*, vary, + term. *-oid*.] In *math.*, an ultracritical function.

Sir James Cockle suggests that . . . it may be possible by means of semicritical relations to form *invaroids*, that is, ultra-critical functions of the calculus analogous to the invariants or ultra-critical functions of algebra.
R. Harley, Proc. Roy. Soc., XXXVIII. 57.

★**invasion** (in-vā′zhon), *n.* [= F. *invasion* = Pr. *envazio* = Sp. *invasión* = Pg. *invasão* = It. *invasione*, < LL. *invasio(n-)*, an attack, invasion, < L. *invadere*, pp. *invasus*, invade: see *invade*.] 1. The act of invading a country or territory as an enemy; hostile entrance or intrusion.

We made an *invasion* upon the south of the Cherethites.
1 Sam. xxx. 14.

No Mahratta *invasion* had ever spread through the province such dismay as this inroad of English lawyers.
Macaulay, Warren Hastings.

Hence—2. A harmful incursion of any kind; an onset or attack, as of disease.

What demonstrates the plague to be endemial to Egypt is its *invasion* and going off at certain seasons. *Arbuthnot*.

The *invasion* of the symptoms [in smallpox] is sudden and severe. *Encyc. Brit.*, XXII. 163.

3. Infringement by intrusion; encroachment by entering into or taking away what belongs to another: as, an *invasion* of one's retirement or rights.

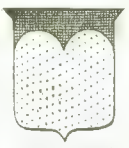
Here is no *invasion* and conquest of the weaker nature by the stronger, but an equal league of souls, each in its own realm still sovereign.
Lowell, Among my Books, 1st ser., p. 329.

invasive (in-vā′siv), *a.* [= F. *invasif* = Sp. Pg. It. *invasivo*, < ML. *invasivus*, invasive, < L. *invasus*, pp. of *invadere*, invade: see *invade*.] Tending to invade; characterized by invasion; aggressive.

Prohibited by the magistrates and rulers to vse or weare any weapon, either *inuasive* or defensiue.
Hall, Hen. VI., an. 34.

He [Washington] had such admirable self-command that he was not at all *invasive* of the opinion of others.
Theodore Parker, Historic Americans, p. 129.

invassalt (in-vas′al), *v. t.* [< *in-*[2] + *vassal*.] Same as *envassal*.



Whilst I myself was free
From that intolerable misery
Whereto affection now *invassels* me.
Daniel, Queen's Arcadia, ii. 1.

invecked (in-vekt′), *a.* [Also *envecked;* cf. *invected*, *invexed*.] Bordered exteriorly by small rounded lobes of slight projection as compared with their width; invected.

The eastern window [of Whalley Church] . . . is *invecked* with ramified tracery. *Baines*, Hist. Lancashire, II. 7.

It has no sleeves, but reveals an under coat of pale blue with *invecked* edges. *N. and Q.*, 7th ser., VII. 97.

A Chief inveckée.

invect† (in-vekt'), *v. i.* [< L. *invectus*, pp. of *invehere*, inveigh: see *inveigh.*] To inveigh.

Fool that I am thus to *invect* against her!
Beau. and Fl. (?), Faithful Friends, iii. 3.

invected (in-vek'ted), *a.* [< L. *invectus*, pp. of *invehere*, bring in or to, enter, penetrate, also attack: see *inveigh.* Cf. *invexed*, *convex.*] Formed exteriorly of small convex or outward curves, or slightly projecting rounded lobes: used in heraldry of a line or the edge of a bearing: the opposite of *engrailed*, in which the curves are concave or turned inward. Formerly *canellé.*

A Pale invected.

invection† (in-vek'shon), *n.* [< L. *invectio(n-)*, a bringing, an attacking, < *invehere*, pp. *invectus*, bring in, attack: see *inveigh.*] Invective.

Many men wish Luther to have used a more temperate style sometimes, especially against princes and temporal estates; and he himself did openly acknowledge his fault therein, especially his immoderate *invection* against King Henry the 8th. *Fulke*, Answer to P. Frarine (1586), p. 28.

invective (in-vek'tiv), *a.* and *n.* [< F. *invectif* = It. *invettivo*, invective (as a noun, F. *invective* = Sp. Pg. *invectiva* = It. *invettiva*, f., invective), < L. *invectivus*, scolding, abusive, invective, < *invehere*, pp. *invectus*, attack, scold, inveigh: see *inveigh.*] **I.** *a.* Censoriously abusive; vituperative; denunciatory.

This is most strangely *invective*,
Most full of spite and insolent upbraiding.
B. Jonson, Sejanus, iii. 1.

Let him rail on; let his *invective* muse
Have four and twenty letters to abuse.
Dryden, Abs. and Achit., ii. 447.

II. *n.* Vehement denunciation; an utterance of violent censure or reproach; also, a railing accusation; vituperation.

In the Fathers' writings there are sundry sharp *invectives* against heretics. *Hooker*, Eccles. Polity, iii. 8.

So desperate thieves, all hopeless of their lives,
Breathe out *invectives* 'gainst the officers.
Shak., 3 Hen. VI., i. 4, 43.

A tide of fierce
Invective seem'd to wait behind her lips.
Tennyson, Princess, iv.

inventful† (in-vent'fûl), *a.* [< *invent* + *-ful.*] Full of invention; inventive.

The genius of the French government appears powerful only in destruction, and *inventful* only in oppression.
Gifford, Residence in France (1797).

inventible (in-ven'ti-bl), *a.* [< *invent* + *-ible.*] Capable of being invented or contrived.

When first I gave my thoughts to make guns shoot often, I thought there had been but one only exquisite way *inventible*; yet, by several trials, and much charge, I have perfectly tried all these. *Century of Inventions*, No. 67.

inventibleness (in-ven'ti-bl-nes), *n.* The state of being inventible.

invention (in-ven'shon), *n.* [= F. *invention* = Pr. *inventio* = Sp. *invención* = Pg. *invenção* = It. *invenzione*, < L. *inventio(n-)*, finding, discovery, invention, < *invenire*, pp. *inventus*, come upon, find: see *invent.*] 1. A finding. [Obsolete, or archaic, as in the phrase *Invention of the Cross.* See *cross*1.]

As Laurentius observeth concerning the *invention* of the stapes or stirrop bone [in the ear], there is some contention between Columbus and Ingrassias, the one of Sicilia, the other of Cremona, and both within this Century.
Sir T. Browne, Vulg. Err.

2. The act or process of finding out how to make something previously unknown, or how to do something in a new way; original contrivance; creation by a new use of means: as, the *invention* of printing; the *invention* of the steam-engine, or of an improved steam-engine.

The labor of *invention* is often estimated and paid on the same plan as that of execution. *J. S. Mill.*

3. That which is invented; something previously unknown, or some new modification of an existing thing, produced by an original use of means; an original contrivance or device. When used absolutely, it generally denotes a new mechanical device, or a new process in one of the useful arts.

God hath made man upright; but they have sought out many *inventions*. Eccl. vii. 29.

The *invention* all admired, and each, how he
To be the inventor miss'd. *Milton*, P. L., vi. 498.

There is no *Invention* hath been more valued by the wiser Part of Mankind than that of Letters.
Stillingfleet, Sermons, III. ii.

An *invention* is any new and useful art, machine, manufacture, or composition of matter, or any new and useful improvement on any art, machine, manufacture, or composition of matter, not before known and used. *Robinson.*

4. Specifically, in *music*, a short piece in which a single thought is worked out, usually contrapuntally, but with the comparative simplicity of an impromptu or of a study.—5. The act of producing by the exercise of the imagination; mental fabrication or creation: as, the *invention* of plots or of excuses.

You divine wits of elder Dayes, from whom
The deep *Invention* of rare Works hath com.
Sylvester, tr. of Du Bartas's Weeks, i. 5.

If thou canst accuse, . . .
Do it without *invention*, suddenly.
Shak., 1 Hen. VI., iii. 1, 5.

Milton's Characters, most of them, lie out of Nature, and were to be formed purely by his own *Invention*.
Addison, Spectator, No. 279.

6. The faculty or power of inventing; skill or ingenuity in original contrivance; the gift of finding out or producing new forms, methods, processes, effects, etc.; in *art* and *lit.*, the exercise of imagination in production; the creative faculty.

I will prove these verses to be very unlearned, neither savouring of poetry, wit, nor *invention*.
Shak., L. L. L., iv. 2, 166.

I had not the assistance of any good book whereby to promote my *invention*, or relieve my memory.
Sir T. Browne, Religio Medici, Pref.

My own *invention* . . . can furnish me with nothing so dull as what is there. *Dryden*, Mock Astrologer, Pref.

7†. A coming in; arrival.

Whilst green Thetis' Nymphs, with many an amorous lay,
Sing our *invention* safe unto her long-wish'd Bay.
Drayton, Polyolbion, i. 68.

Invention of the Cross. See *cross*1.—**Registered invention**, an invention protected by an inferior patent.—**Useful invention**, in the sense of American law, one not injurious or mischievous to society, and not frivolous or insignificant, but capable of use for a purpose from which some advantage can be derived. When an invention is useful in this sense, the degree or extent of its usefulness is wholly unimportant. *Curtis*, Law of Pat. (5th ed.), § 449.

=Syn. 2. *Invention*, *Discovery*; fabrication, excogitation. *Invention* is applied to the contrivance and production of something, often mechanical, that did not before exist, for the utilization of powers of nature long known or lately discovered by investigation. *Discovery* brings to light what existed before, but was not known. We are indebted to *invention* for the thermometer, barometer, telephone, etc.; to *discovery* for knowledge of hitherto unknown parts of the globe, etc. By the *invention* of the spectroscope we have made large *discoveries* as to the metallic elements in many heavenly bodies. See *discover*.—6. *Invention*, *Style*, *Amplification.* Rhetoric is often divided into the departments of *invention* and *style*, *invention* covering all that concerns the supply of the thought, and *style* all that concerns the expression of the thought in language. Some writers divide rhetoric into *invention*, *amplification*, and *style*, but amplification is strictly a part of *invention.*

inventional (in-ven'shon-al), *a.* [< *invention* + *-al.*] Relating to invention; of the nature of invention.

inventious† (in-ven'shus), *a.* [< *inventi(on)* + *-ous.*] Inventive.

It will be most exquisite; thou art a fine *inventious* rogue, sirrah. *B. Jonson*, Cynthia's Revels, ii. 1.

inventive (in-ven'tiv), *a.* [< F. *inventif* = Sp. Pg. It. *inventivo*; as *invent* + *-ive.*] 1. Of or

pertaining to invention; characterized by or manifesting original contrivance.

The leading characteristics of modern societies are in consequence marked out much more by the triumphs of *inventive* skill than by the sustained energy of moral causes. *Lecky*, Europ. Morals, I. 131.

A short course of lectures on the Kindergarten, on the teaching of language, on industrial and *inventive* drawing. *Nineteenth Century*, XXIV. 489.

2. Able to invent; quick at contriving; ready at expedients.

As he had an *inventive* brain, so there never lived any man that believed better thereof, and of himself. *Raleigh.*

Ingenious love, *inventive* in new arts,
Mingled in plays, and quickly touch'd our hearts.
Dryden and Soame, tr. of Horace's Art of Poetry, iii. 91.

We should find the most remarkable instance of the difference between an imaginative and an *inventive* poet to be furnished by the cases of Shakspeare and Spenser. *Athenæum*, No. 3068, p. 198.

inventively (in-ven'tiv-li), *adv.* By the power of invention.

inventiveness (in-ven'tiv-nes), *n.* The quality of being inventive; the faculty of inventing.

The knowledge that clear and appropriate ideas are requisite for discovery, although it does not lead to any very precise precepts, or supersede the value of natural sagacity and *inventiveness*, may still be of use in our pursuit after truth. *Whewell*, Hist. Scientific Ideas.

inventor (in-ven'tor), *n.* [Formerly also *inventer*; = F. *inventeur* = Sp. Pg. *inventor* = It. *inventore*, < L. *inventor*, a finder, contriver, author, inventor, < *invenire*, pp. *inventus*, find out, invent: see *invent*.] One who invents or devises something new; one who makes an invention.

We but teach
Bloody instructions, which, being taught, return
To plague the *inventor*. *Shak.*, Macbeth, i. 7, 10.

His sister Naamah is accounted by some Rabbines the first *inventer* of making Linnen and Woollen, and of vocall Musicke. *Purchas*, Pilgrimage, p. 34.

The lone *Inventor* by his demon haunted.
Lowell, To the Future.

inventorial (in-ven-tō'ri-al), *a.* [< *inventory* + *-al*.] Of or pertaining to an inventory.

inventorially (in-ven-tō'ri-al-i), *adv.* In the manner of an inventory.

To divide him *inventorially* would dizzy the arithmetic of memory *Shak.*, Hamlet, v. 2, 118.

inventory (in'ven-tō-ri), *n.*; pl. *inventories* (-riz). [Formerly also, erroneously, *invitory*; prop. **inventary* (the form *inventory*, OF. *inventore* (< late ML. *inventorium*), involving an irreg. use of the suffix *-ory*) = F. *inventaire* = Pr. *inventari* = Sp. Pg. It. *inventario*, < LL. *inventarium*, a list, inventory, < L. *invenire*, pp. *inventus*, find out: see *invent*.] A detailed descriptive list of articles, such as goods and chattels, or of parcels of land, with the number, quantity, and value of each; specifically, a formal list of movables, as of the goods or wares of a merchant: as, an *inventory* of the estate of a bankrupt, or of a deceased person.

There, take an *inventory* of all I have,
To the last penny. *Shak.*, Hen. VIII., iii. 2, 124.

There are stores laid up in our human nature that our understanding can make no complete *inventory* of. *George Eliot*, Mill on the Floss, v. 1.

Benefit of inventory, in *civil law*, the limit of liability secured by an executor, legatee, or heir, in respect of debts of the deceased, by making and filing an inventory showing the value of the assets coming to his hands. =Syn. *Schedule*, *Register*, etc. See *list*.

inventory (in'ven-tō-ri), *v. t.*; pret. and pp. *inventoried*, ppr. *inventorying*. [< *inventory*, *n.*] To make a list, catalogue, or schedule of; insert or register in an account of goods.

I will give out divers schedules of my beauty. It shall be *inventoried*, and every particle and utensil labelled. *Shak.*, T. N., i. 5, 264.

The learned author himself is *inventoried* and summ'd up to the utmost value of his livery-cloak. *Milton*, Colasterion.

in ventre (in ven'trē). [L.: *in*, in; *ventre*, abl. of *venter*, belly, womb: see *venter*.] In *law*, in the womb.—**In (en) ventre sa mere** [F.], begotten but not yet born. The law recognizes the existence, and protects the rights, of an infant *in ventre sa mere*.

inventress (in-ven'tres), *n.* [< OF. *inventeresse*; as *inventor* + *-ess*. Cf. F. *inventrice* = It. *inventrice*, < L. *inventrix*, fem. of *inventor*, an inventor: see *inventor*.] A female inventor.

Mistress Turner, the first *Inventress* of yellow Starch, was executed in a Cobweb Lawn Ruff of that Colour at Tyburn. *Howell*, Letters, I. i. 2.

At last divine Cecilia came,
Inventress of the vocal frame.
Dryden, Alexander's Feast.

inver-. [Gael.; cf. *aber*.] An element in some Scotch place-names of Gaelic origin, meaning a confluence of a river with another or with the sea: as, *Inverness*, *Inverary*, *Invergordon*, *Inverury*, *Inverlochy*.

inveracity (in-vē-ras'i-ti), *n.*; pl. *inveracities* (-tiz). [< *in*-3 + *veracity*.] Lack of veracity or truthfulness; an untruth.

The anile aphorism still triumphs, solemnly devolving from age to age its loathsome spawn of shams and *inveracities*. *F. Hall*, Mod. Eng., p. 145.

inverisimilitude (in-ver"i-si-mil'i-tūd), *n.* [< *in*-3 + *verisimilitude*.] Lack of verisimilitude; improbability. *Coleridge.*

invermination (in-vėr-mi-nā'shon), *n.* [< L. *in*, in, + *verminatio(n-)*, a writhing pain, the disease called worms, < *verminare*, suffer from worms, < *vermis*, a worm: see *vermin*.] In *pathol.*, the state or condition of being infested by worms; helminthiasis. [Rare.]

inversatile (in-vėr'sa-til), *a.* [< *in*-3 + *versatile*.] In *entom.*, not versatile; not moving on the supporting parts: as, *inversatile* antennæ.

inverse (in-vėrs' or in'vėrs), *a.* and *n.* [< ME. *invers*, *envers*, < OF. *invers*, F. *inverse* = Pr. *envers* = Sp. Pg. It. *inverso*, < L. *inversus*, pp. of *invertere*, turn about, invert: see *invert*.] **I.** *a.* 1. Turned end for end, or in the opposite direction; having a contrary course or tendency; inverted: opposed to *direct*.

The reigning taste was so bad that the success of a writer was in *inverse* proportion to his labour, and to his desire of excellence. *Macaulay*, Dryden.

2. In *math.*, opposite in nature and effect: said with reference to any two operations which, when both performed in succession upon the same quantity, leave it unaltered: thus, subtraction is *inverse* to addition, division to multiplication, extraction of roots to the raising of powers, etc. A direct operation produces an unambiguous and possible value, and between two operations the one which combines quantities symmetrically is preferably considered as direct. Addition, multiplication, involution, and differentiation are considered as direct operations; subtraction, division, evolution, and integration as inverse operations. Corresponding to every direct operation there are, generally speaking, two inverse operations: thus, if $F(x, y)$ be the direct operation, the two inverse operations are the one which gives x from $F(x, y)$ and y, and the one which gives y from $F(x, y)$ and x.—**Inverse congruity, current, difference,** etc. See the nouns.—**Inverse curve, line, point,** etc., a curve, line point, etc., resulting from spherical, quadric, and other varieties of geometrical inversion.—**Inverse ellipsoid of inertia.** See *ellipsoid*.—**Inverse matrix.** See *matrix*.—**Inverse method of fluxions.** See *fluxion*.—**Inverse method of tangents.** See *tangent*.—**Inverse mood,** in *logic*, an indirect mood.—**Inverse order of alienation,** in the law of judicial or forced sales, a fixed order according to which parcels that the debtor has not aliened shall be first sold, and of those that he has aliened the later shall be sold before the earlier: a rule for the protection of earlier over later grantees.—**Inverse problem,** a problem like finding the equation to the ordinate of a curve when its arc is given in terms of the abscissa.—**Inverse proportion, ratio,** etc. See the nouns.—**Inverse rule of three,** the rule of three as applied to quantities in inverse proportion to one another.

II. *n.* An inverted state or condition; a direct opposite; something directly or absolutely contrary to something else: as, the *inverse* of a proposition.

inversed† (in-vėrst'), *a.* [ME. *enversed*; < *inverse* + *-ed*2.] Inverted.

The bough to sette is best in germynyng, . . .
But hem to sette *enversed* nought to doone is.
Palladius, Husbondrie (E. E. T. S.), p. 115.

Inversed proportion†, inverse proportion. See *proportion*.

inversely (in-vėrs'li), *adv.* In an inverted order or manner; in an inverse ratio or proportion, as when one thing is greater or less in proportion as another is less or greater.

inversion (in-vėr'shon), *n.* [= F. *inversion* = Sp. *inversión* = Pg. *inversão* = It. *inversione*, < L. *inversio(n-)*, inversion, < *invertere*, pp. *inversus*, turn about: see *invert*.] The act of inverting, or the state of being inverted; a turning end for end, upside down, or inside out; any change of order such that the last becomes first and the first last; in general, any reversal of a given order or relation.

We shall one day give but an ill and lame account of our watching and praying, if, by an odd *inversion* of the command, all that we do is first to pray against a temptation, and afterwards to watch for it. *South*, Works, VI. x.

Specifically—(*a*) In *gram.*, a change of the natural or recognized order of words: as, "of all vices, impurity is one of the most detestable," instead of "impurity is one of the most detestable of all vices." (*b*) In *rhet.*, a mode of arguing by which the speaker tries to show that the arguments adduced by an opponent tell against his cause and are favorable to the speaker's. (*c*) In *music*: (1) The process, act, or result of transposing the tones of an interval or chord from their original or normal order. The several inversions of a chord are called *first*, *second*, and *third* respectively. See *interval*, 5, and *chord*, 4. (2) The process, act, or result of repeating a subject or theme with all its upward intervals or steps taken downward, and vice versa. Also called *imitation by inversion* or *in contrary motion*. (See *imitation*, 3.) *Retrograde inversion*, however, is the same as *retrograde imitation* (which see, under *imitation*, 3). (3) In *double counterpoint*, the transposition of the upper voice-part below the lower, and vice versa. Inversion is the test of the correctness of the composition. The transposition may be either of an octave or of any other interval. (*d*) In *math.*: (1) A turning backward; a contrary rule of operation: as, to prove an answer by *inversion*, as division by multiplication or addition by subtraction. (2) Change in the order of the terms. (3) Certain transformations. Also the operation of reversing the direction of every line in a body without altering its length. (*e*) In *geol.*, the folding back of strata upon themselves, as by upheaval, in such a way that the order of succession appears reversed. (*f*) *Milit.*, a movement in tactics by which the order of companies in line is inverted, the right being on the left, the left on the right, and so on. (*g*) In *chem.*, a decomposition of certain sugars and other carbohydrates, induced by the action of a ferment or dilute acid by which the elements of water are added to a carbohydrate, each molecule of which breaks up into two molecules of a different carbohydrate. Thus, cane-sugar in solution, when heated with a dilute acid, takes up water and breaks up into equal parts of dextrose and levulose. See *invert-sugar*.—**Circle of inversion,** a circle with respect to which a given curve is its own inverse.—**Geometrical inversion** (usually taken to mean *cyclical* or *spherical inversion*), a transformation by which for each point of a figure is substituted a point in the same direction from a fixed point, called the *center of inversion*, and at a distance therefrom equal to the reciprocal of the distance of the first point.—**Inversion of an organ-** or **pedal-point.** See *organ-point*.—**Inversion of parts.** See def. (*c*) (3).—**Inversion of subjects.** See def. (*c*) (2).—**Quadric inversion,** in *math.*, a transformation of a figure consisting in substituting for each point one lying in the same direction from a fixed center, and on the polar of the variable point with reference to a quadric surface.—**Tangential inversion,** in *math.*, a transformation by which for every straight line of a figure is substituted a parallel line passing through the pole of the first with reference to a conic.

inversive (in-vėr'siv), *a.* [< *inverse* + *-ive*.] Of or pertaining to inversion; capable of causing inversion.

invert (in-vėrt'), *v. t.* [= OF. *invertir* = Sp. *invertir* = Pg. *inverter* = It. *invertere*, < L. *invertere*, turn upside down, turn about, upset, invert, < *in*, in, to, toward, + *vertere*, turn: see *verse*. Cf. *advert*, *convert*, *evert*, etc.] 1. To turn in an opposite direction; turn end for end, upside down, or inside out; place in a contrary order or position: as, to *invert* a cone or a sack; to *invert* the order of words.

Invert
What best is boded me, to mischief.
Shak., Tempest, iii. 1, 70.

Let no attraction *invert* the poles of thy honesty. *Sir T. Browne*, Christ. Mor., i. 9.

We begin by knowing little and believing much, and we sometimes end by *inverting* the quantities. *George Eliot*, Middlemarch, I. 215.

We *invert* the relation of cause and effect when we consider that our emotions are determined by our imaginative creeds. *Leslie Stephen*, Eng. Thought, i. § 16.

2†. To divert; turn into another channel; devote to another purpose.

Solyman charged him bitterly with *inverting* his treasures to his own private use. *Knolles*, Hist. Turks.

=Syn. 1. *Overthrow*, *Subvert*, etc. See *overturn*.

invert (in'vėrt), *n.* [< *invert*, *v.*] 1. In *arch.*, an inverted arch; specifically, the floor of the lock-chamber of a canal, which is usually in the form of an inverted arch, or the bottom of a sewer.

The bottom of the sewer is called the *invert*, from a general resemblance in the construction to an "inverted" arch. *Mayhew*, London Labour and London Poor, II. 445.

2. In *teleg.*, an inverted or reversed insulator.

An effort is at present being made to introduce a form of *invert* in which the bolt passes nearly to the top of the insulating material.
Preece and Sivewright, Telegraphy, p. 224.

invertant (in-vėr'tant), *a.* [< *invert* + *-ant*.] In *her.*, same as *inverted*.

invertebracy (in-vėr'tē-brā-si), *n.* [< *invertebra(te)* + *-cy*.] The condition of being invertebrate, or without a backbone; figuratively, lack of moral stamina; irresolution. [Rare.]

A person may reveal his hopeless *invertebracy* only when brought face to face with some critical situation.
New York Semi-weekly Tribune, Dec. 24, 1886.

invertebral (in-vėr'tē-bral), *a.* [< *in*-3 + *vertebral*.] Same as *invertebrate*.

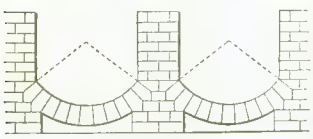
Invertebrata (in-vėr-tē-brā'tă), *n. pl.* [NL., neut. pl. of *invertebratus*, invertebrate: see *invertebrate*.] That one of two great divisions of the animal kingdom (the other being the *Vertebrata*) which includes animals having no spinal column or backbone. It includes seven of the eight main branches into which *Animalia* were divided: *Protozoa*, *Cœlenterata*, *Echinodermata*, *Vermes*, *Arthropoda*, *Molluscoidea*, and *Mollusca*, thus leaving only the *Vertebrata* as the remaining subkingdom, of equal rank only with any one of the others, not with them all collectively. The word, however, no longer retains any exact taxonomic

significance, being simply used to designate those animals collectively which are not vertebrated. The primary division of the animal kingdom now made is into *Protozoa* and *Metazoa*, and the *Vertebrata* form one of the divisions of the latter, to be contrasted with any one of the prime divisions of the metazoic *Invertebrata*, not with the *Invertebrata* collectively. Both terms (*Vertebrata* and *Invertebrata*) originated with Lamarck, about the beginning of the ★nineteenth century. Also called *Evertebrata*.

invertebrate (in-vėr'tē-brāt), *a.* and *n.* [< NL. *invertebratus*, < L. *in-* priv. + *vertebratus*, vertebrate: see *vertebrate*.] **I.** *a.* **1.** Not vertebrate; having no backbone; specifically, of or pertaining to the *Invertebrata*. Also *invertebral*, *invertebrated*.—2. Figuratively, flaccid, as if from lack of a backbone; wanting strength, firmness, or consistency; weak; nerveless.—**Invertebrate matrix.** See *matrix*.

II. *n.* An invertebrated animal; any one of the *Invertebrata*.

invertebrated (in-vėr'tē-brā-ted), *a.* Same as *invertebrate*, 1.



inverted (in-vėr'ted), *p. a.* [Pp. of *invert*, *v.*] Turned in a contrary direction; turned upside down; reversed in order; hence, opposite; contrary.

Such forms have left only their written representatives —"Your obedient servant," "Your humble servant;" reserved for occasions when distance is to be maintained, and for this reason often having *inverted* meanings.
H. Spencer, Prin. of Sociol., § 394.

Specifically—(*a*) In *her.*, turned in the other way from what is usual: as, the hands *inverted* when the fingers point downward. Also *invertant*. (*b*) In *bot.*, opposed to the normal or usual position, as ovules attached to the apex of the ovary or its cells, or as flowers with the normally dorsal side ventral. (*c*) In *geol.*, lying apparently in inverse or reverse order, as strata which have been folded back on each other by the intrusion of igneous rocks or by crust movements.

Eagle displayed; wings inverted.

—**Inverted arch**, in *arch.*, an arch with its intrados below the axis or springing line. Inverted arches are used in foundations to connect particular points, and distribute their weight or pressure over a greater extent of surface, as in piers and the like.—**Inverted chord.** See *inversion* (*c*) (1), and *chord*, 4.—**Inverted comma**, in *printing*, a comma turned upside down so as to bring it into a superior position. The beginning of a quotation is marked by a pair of inverted commas or by one alone, as the end is by a pair of apostrophes or by a single apostrophe. (See *quotation*.) A pair of inverted commas is also often used to signify *ditto*, being placed directly under the word to be repeated.—**Inverted counterpoint.** See *inversion* (*c*) (3), *imitation*, 3, and *counterpoint*, 3.—**Inverted-flower**, the name of several little South African plants of the genus *Monopsis*, which has sometimes been regarded as a section of the genus *Rapuntium*. They differ from typical *Rapuntium* by having the flowers inverted.—**Inverted image.** See *lens*.—**Inverted interval.** See *inversion* (*c*) (1), and *interval*, 6.—**Inverted organ-point** or **pedal-point.** See *organ-point*.—**Inverted oscillating engine.** See *pendulous engine*, under *engine*.—**Inverted position, turn**, etc. See the nouns.

Inverted Arches.

invertedly (in-vėr'ted-li), *adv.* In a contrary or inverted order.

Placing the fore part of the eye to the hole of the window of a darkened room, we have a pretty landskip of the objects abroad, *invertedly* painted on the paper, on the back of the eye. *Derham*, Physico-Theology, iv. 2, note 38.

invertible[1] (in-vėr'ti-bl), *a.* [< *invert* + *-ible*.] Capable of inversion; susceptible of being inverted. [Rare.]

invertible[2]† (in-vėr'ti-bl), *a.* [< L. *in-* priv. + *vertere*, turn, + *-ible*.] Incapable of being turned; inflexible.

An indurate and *invertible* conscience. *Cranmer*.

invertin (in-vėr'tin), *n.* [< *invert* + *-in*[2].] An enzym produced by several species of fungi and other plants, which converts cane-sugar ★in solution into invert-sugar. Also *invertase*.

invertor (in-vėr'tọr), *n.* [< *invert* + *-or*.] That which inverts or changes the direction, as of an electric current; in *elect.*, a commutator.

invert-sugar (in'vėrt-shug″ăr), *n.* An amorphous saccharine substance, the chief constituent of honey, and produced by the action of ferments or dilute acids on cane-sugar. It is regarded as a mixture of equal parts of glucose and fructose. A solution of cane-sugar turns the polarized ray of light to the right, while invert-sugar turns it to the left. From this inversion of the action on polarized light the ★process is called *inversion*, and the product *invert-sugar*.

invest (in-vest'), *v.* [< F. *investir* = Pr. *envestir* = Sp. Pg. *investir* = It. *investire*, < L. *investire*, clothe, cover, < *in*, in, on, + *vestire*, clothe, < *vestis*, clothing: see *vest*. Cf. *divest*, *devest*.] **I.** *trans.* **1.** To cover with or as if with a garment or vesture; clothe; indue: followed by *with*, and sometimes *in*, before the thing covering: opposed to *divest*.

He commaunded vs to *inuest* our selues *in* the saide garments. *Hakluyt's Voyages*, I. 105.

Invest me *in* my motley. *Shak.*, As you Like it, ii. 7, 58.

In the gardens are many fine fountaines, the walls cover'd with citron trees, which being rarely spread, *invest* the stone-works intirely. *Evelyn*, Diary, Nov. 28, 1644.

In dim cathedrals, dark with vaulted gloom,
What holy awe *invests* the saintly tomb!
O. W. Holmes, A Rhymed Lesson.

2†. To clothe or attire with; put on.

Alas! for pittie, that so faire a crew,
As like can not be seene from East to West,
Cannot find one this girdle to *invest*.
Spenser, F. Q., IV. v. 18.

3. To clothe or indue, as with office or authority; hence, to accredit with some quality or attribute; indue by attribution: followed by *with:* as, to *invest* a narrative *with* the charm of romance; to *invest* a friend *with* every virtue.

Beatrice, the unforgotten object of his early tenderness, was *invested* by his imagination *with* glorious and mysterious attributes. *Macaulay*, Dante.

4. In *law*, to put in possession of something to be held as a matter of right; instate or install: as, to *invest* a man with rank, dignity, etc.

The Queen in requital *invested* him *with* the Honour of Earl of Glenkare and Baron of Valence.
Baker, Chronicles, p. 335.

Mary of Orleans . . . had been *invested* in this principality by the three estates in 1694.
J. Adams, Works, IV. 375.

5†. To confer; give; vest.

It *investeth* a right of government. *Bacon*.

6. To surround; hem in or about; especially, to surround with hostile intent, or in such a way as to prevent approach or escape; surround with troops, military works, or other barriers; beleaguer.

I saw a town of this island, which shall be nameless, *invested* on every side, and the inhabitants of it so straitened as to cry for quarter. *Addison*, Husbands and Wives.

Leyden was thoroughly *invested*, no less than sixty-two redoubts . . . now girding the city.
Motley, Dutch Republic, II. 553.

A person trying to steal into an *invested* town with provisions would be summarily dealt with.
Woolsey, Introd. to Inter. Law, App. iii., p. 464.

7. To employ for some profitable use; convert into some other form of wealth, usually of a more or less permanent nature, as in the purchase of property or shares, or in loans secured by mortgage, etc.: said of money or capital: followed by *in:* as, to *invest* one's means *in* lands or houses, or *in* bank-stock, government bonds, etc.; to *invest* large sums *in* books.—**Investing membrane.** See *membrane*.

II. *intrans.* To make an investment: as, to *invest* in railway shares.

investient† (in-ves'tient), *a.* [< L. *investien(t-)s*, ppr. of *investire*, clothe: see *invest*.] Investing; covering; clothing.

This sand, when consolidated and freed from its *investient* shells, is of the same shape as the cavity of the shell. *Woodward*.

investigable[1] (in-ves'ti-gạ-bl), *a.* [< LL. *investigabilis*, that can be searched into, < L. *investigare*, search into, investigate: see *investigate*.] Capable of being investigated or searched out; open to investigation.

In doing evil, we prefer a less good before a greater, the greatness whereof is by reason *investigable* and may be known. *Hooker*, Eccles. Polity, i. 7.

A few years since it would have been preposterous to speculate on the present chemical constitution of the sun's atmosphere; it would have been one of the mysteries which no astronomer would consider *investigable*.
G. H. Lewes, Probs. of Life and Mind, I. i. § 21.

investigable[2]† (in-ves'ti-gạ-bl), *a.* [< LL. *investigabilis*, that cannot be searched into, unsearchable, < *in-* priv. + **vestigabilis*, that can be searched into, < L. *vestigare*, search into: see *investigate*.] That cannot be investigated; unsearchable.

Woman, what tongue or pen is able
To determine what thou art,
A thing so moving and unstable,
So sea-like, so *investigable*. *Cotton*, Woman.

investigate (in-ves'ti-gāt), *v. t.*; pret. and pp. *investigated*, ppr. *investigating*. [< L. *investigatus*, pp. of *investigare*, track or trace out, search into, investigate, < *in*, in, on, + *vestigare*, follow a track, search, < *vestigium*, a track, foot-track: see *vestige*.] To search into or search out; inquire into; search or examine into the particulars of; examine in detail: as, to *investigate* the forces of nature; to *investigate* the causes of natural phenomena; to *investigate* the conduct of an agent.

He went from one room to another with eyes that seemed to be *investigating* everything, though in reality they saw nothing. *Mrs. Oliphant*, Poor Gentleman, xxiv.

The philosopher *investigates* truth independently; the sophist embellishes the truth, which he takes for granted.
Encyc. Brit., XVIII. 797.

=**Syn.** To scrutinize, overhaul, sift, probe into, explore, ★study.

investigation (in-ves-ti-gā'shọn), *n.* [= F. *investigation* = Sp. *investigación* = Pg. *investigação* = It. *investigazione*, < L. *investigatio(n-)*, a searching into, < *investigare*, search into: see *investigate*.] The act of investigating; the making of a search or inquiry; detailed or particularized examination to ascertain the truth in regard to something; careful research.

Your travels I hear much of; my own shall never more be in a strange land, but a diligent *investigation* of my own territories. *Pope*, To Swift.

The intercourse of society—its trade, its religion, its friendships, its quarrels—is one wide judicial *investigation* of character. *Emerson*, 1st ser., p. 259.

=**Syn.** *Inquisition*, *Inquiry*, etc. (see *examination*); overhauling, probing. See *inference*.

investigative (in-ves'ti-gā-tiv), *a.* [< *investigate* + *-ive*.] Of or pertaining to investigation; given to investigation; curious and deliberate in research.

We may work simply for the love of discovery—that is, the exercise of the *investigative* instinct and the pleasure of overcoming difficulties; or we may work with the beneficent idea of increasing the sum of human knowledge.
Stubbs, Medieval and Modern Hist., p. 75.

investigator (in-ves'ti-gā-tọr), *n.* [= F. *investigateur* = Sp. Pg. *investigador* = It. *investigatore*, < L. *investigator*, one who searches, < *investigare*, search: see *investigate*.] One who investigates or makes careful research.

Not as an *investigator* of truth, but as an advocate labouring to prove his point. *Whately*, Rhetoric.

Investigatores (in-ves″ti-gā-tō'rēz), *n. pl.* [NL., pl. of L. *investigator*, one who searches: see *investigator*.] An extensive heterogeneous group of birds proposed by Reichenbach and adopted by Brehm, having no characters by which it can be defined; the searchers.

investion†, *n.* [< ML. *investio(n-)*, an investing, < L. *investire*, invest: see *invest*.] The act of investing; investiture.

We knew, my lord, before we brought the crown,
Intending your *investion* so near
The residence of your despisèd brother,
The lords would not be too exasperate
To injury or suppress your worthy title.
Marlowe, Tamburlaine, I., i. 1.

investitive (in-ves'ti-tiv), *a.* [< L. *investitus*, pp. of *investire*, invest, + *-ive*.] Of or pertaining to investiture. See the quotation.

The *investitive* event [is that] by which the title to the thing in question should have accrued to you, and for want of which such title is, through the delinquency of the offender, as it were intercepted.
Bentham, Introd. to Prin. of Morals and Legislation, xvi. 35.

Investitive fact. See *fact*.

investiture (in-ves'ti-tūr), *n.* [< F. *investiture* = Pr. *investitura* = Sp. Pg. *investidura* = It. *investitura*, < ML. *investitura*, investing, < L. *investire*, invest: see *invest*.] **1.** The act of investing, as with possession or power; formal bestowal or presentation of a possessory or prescriptive right, as to a fief or to the rights and possessions pertaining to an ecclesiastical dignity: opposed to *divestiture*.

The King claimed the *Investiture* of Bishops to be his Right, and forbad Appeals and Intercourse to Rome.
Baker, Chronicles, p. 35.

Charles had entirely failed in his application to Pope Alexander the Sixth for a recognition of his right to Naples by a formal act of *investiture*.
Prescott, Ferd. and Isa., ii. 2.

An excommunication was denounced against all churchmen who should accept *investiture* of ecclesiastical benefices from lay hands.
E. A. Freeman, Norman Conquest, V. 95.

The grant of land or a feud was perfected by the ceremony of corporal *investiture* or open delivery of possession.
Blackstone.

2. That which invests or clothes; covering; vestment.

While we yet have on
Our gross *investiture* of mortal weeds. *Trench*.

Let him so wait until the bright *investiture* and sweet warmth of the sunset are withdrawn from the waters.
Ruskin.

Ecclesiastical investiture, in the *Rom. Cath. Ch.*, the ceremony of conferring possession of the temporalities and privileges of his office upon a bishop or an abbot, by delivering to him the pastoral staff and ring, the symbols of his office. To whom the right of investiture belonged was long a point of conflict between the papacy and the monarchs of Europe. About the tenth century the monarchs controlled the bestowal of these symbols, but Hildebrand (Gregory VII.) in 1075 published a decree forbidding clergymen to receive investiture from a layman under pain

of deposition. This dispute between church and state was settled by the concordat of Worms, in 1122, by which the emperor Henry V. agreed to surrender the right of investiture on condition that the election to the office be held before him or his representative. A similar compromise had been made in 1107 between Henry I. of England and Pope Pascal II. The kings of France continued the contest, and at length secured the right of conferring separate investiture by means of a written instrument. At present, in Roman Catholic countries where the church is supported by the state, special agreements, or concordats, govern investiture; in nearly all these countries the consent of both the Pope and the civil authorities is necessary before investiture.—**Feudal investiture,** the public delivery of the land by the lord to the tenant, which under the feudal system created the estate in fee in the tenant, and the obligation of military or other feudal service in return. See *fealty.*—**Investiture ring,** the ring used in the installation of a pope.

investive, *a.* An erroneous reading of *infestive.*

The horrid fire, all mercilesse, did choke
The scorched wretches with *investive* smoke.
Mir. for Mags., p. 829.

You, lord archbishop, . . .
Whose white *investments* figure innocence.
Shak., 2 Hen. IV., iv. 1, 45.

Such separable *investments* [shells and cysts] are formed by the cell-bodies of many Protozoa, a phenomenon not exhibited by tissue-cells.
E. R. Lankester, Encyc. Brit., XIX. 834.

2. The act of investing, or the state of being invested, as with a right, office, or attribute; endowment; investiture.

What were all his most rightful honours but the people's gift, the *investment* of that lustre, majesty, and honour . . . which redounds from a whole nation into one person?
Milton, Eikonoklastes.

3. A surrounding or hemming in; blockade of the avenues of ingress and egress, as for the besieging of a town or fortress; inclosure by armed force or other obstruction.

I now had my three corps up to the works built for the defence of Vicksburg, on three roads — one to the north, one to the east, and one to the south-east of the city. By the morning of the 19th the *investment* was as complete as my limited number of troops would allow.
U. S. Grant, Personal Memoirs, I. 529.

4. An investing of money or capital; expenditure for profit or future benefit; a placing or conversion of capital in a way intended to secure income or profit from its employment: as, an *investment* in active business, or in stocks, land, or the like; to make safe *investment* of one's principal.—**5.** That which is invested; money or capital laid out for the purpose of producing profit or benefit.

A certain portion of the revenues of Bengall has been, for many years, set apart to be employed in the purchase of goods for exportation to England, and this is called the *investment.* *Burke,* Affairs of India.

6. That in which money is laid out or invested: as, land is the safest *investment.*

J. F. Cooper, The Spy, i.

★**invincible** (in-vin'si-bl), *a.* [< F. *invincible* = Sp. *invencible* = Pg. *invencivel* = It. *invincibile,* < L. *invincibilis,* < *in-* priv. + *vincibilis,* conquerable: see *vincible.*] Incapable of being conquered or subdued; that cannot be overcome; unconquerable; insuperable: as, an *invincible* army; *invincible* difficulties.

And the Romans themselves at this time acknowledg'd they ne're saw a people of a more *invincible* spirit and less afraid of dying than these [Jews] were.
Stillingfleet, Sermons, I. viii.

Yorick had an *invincible* dislike and opposition in his nature to gravity. *Sterne,* Tristram Shandy, i. 11.

It was granted the dangers were great, but not desperate; the difficulties were many, but not *invincible.*
W. Bradford, in Tyler's Amer. Lit., I. 120.

[Some commentators and editors have been of the opinion that this word is used by Jonson, Shakspere, Marlowe, and others as meaning *invisible,* but the instances on which the opinion was formed are somewhat doubtful.

His dimensions to any thick sight were *invincible.*
Shak., 2 Hen. IV., iii. 2, 337.]

The Spanish or Invincible Armada. See *armada,* 1.

invincibleness (in-vin'si-bl-nes), *n.* The quality of being invincible; unconquerableness; insuperableness.

The state of being invisible; incapacity of being seen.

And he that challenged the boldest hand unto the picture of an echo must laugh at this attempt, not onely in the description of *invisibility*, but circumscription of ubiquity, and fetching under lines incomprehensible circularity. *Sir T. Browne*, Vulg. Err., v. 21.

2. That which is invisible.

Atoms and *invisibilities*. *Landor*.

invisible (in-viz′i-bl), *a.* and *n.* [< ME. *invisible*, < OF. *invisible*, F. *invisible* = Pr. *invisible*, *envesible* = Sp. *invisible* = Pg. *invisivel* = It. *invisibile*, < L. *invisibilis*, not visible, unseen, < *in-* priv. + (LL.) *visibilis*, visible: see *visible*.] **I.** *a.* 1. Not visible; incapable of being seen; imperceptible by the sight.

To us *invisible*, or dimly seen
In these thy lowest works.
Milton, P. L., v. 157.

In vain we admire the lustre of anything seen: that which is truly glorious is *invisible*.
Sir T. Browne, Christ. Mor., iii. 11.

The atom, then, is *invisible*; it never directly comes within the range of our perception.
W. Wallace, Epicureanism, p. 175.

We say therefore a line has always two points in common with a conic, but these are either distinct, or coincident, or *invisible*. The word imaginary is generally used instead of *invisible*; but, as the points have nothing to do with imagination, we prefer the word *invisible*, recommended originally by Clifford.
O. Henrici, Encyc. Brit., XIX. 799.

2. Out of sight; concealed or withdrawn from view: as, he keeps himself *invisible*.

I'll come in midst of all thy pride and mirth,
Invisible to all men but thyself.
Beau. and Fl., Knight of Burning Pestle, v. 1.

Invisible church, the church in heaven and in the intermediate state; the church triumphant and the church expectant, as distinguished from the church militant.

Of the Church of God there be two parts, one triumphant and one militant, one invisible and the other visible. In the *invisible Church* are all they who, having finished their course in faith, do now rest from their labours.
Bp. Forbes, Explanation of the Nicene Creed [(ed. 1888), p. 269.

Invisible green, a shade of green so dark as scarcely to be distinguishable from black.—**Invisible ink**. See *ink*1.

II. *n.* 1. A Rosicrucian: so called because of the secret character of the organization.—2. One who rejects or denies the visible character or external organization of the church; specifically [*cap.*], a name given to certain German Protestants because they maintained that the church of Christ might be, and sometimes had been, invisible.—**The Invisible**, God; the Supreme Being.

Th' Invisible, in things scarce seen reveal'd,
To whom an atom is an ample field.
Cowper, Retirement, l. 61.

invisibleness (in-viz′i-bl-nes), *n.* The state of being invisible; invisibility.

invisibly (in-viz′i-bli), *adv.* In a manner to escape the sight; so as not to be seen.

Dear madam, think not me to blame;
Invisibly the fairy came. *Gay*, Fables, iii.

invision† (in-vizh′on), *n.* [< *in-*3 + *vision*.] Lack of vision; blindness.

This is agreeable unto the determination of Aristotle, who computeth the time of their anopsy or *invision* by that of their gestation. *Sir T. Browne*, Vulg. Err., p. 174.

invita Minerva (in-vī′tạ mi-nėr′vạ). [L.: *invitā*, abl. fem. of *invitus*, unwilling; *Minervā*, abl. (absolute) of *Minerva*, Minerva, the goddess of wisdom and genius: see *Minerva*.] Minerva being unwilling or unpropitious—that is, when without inspiration; when not in the vein or mood: used with reference to literary or artistic creation.

invitation (in-vi-tā′shọn), *n.* [< F. *invitation* = Sp. *invitación* = It. *invitazione*, < L. *invitatio(n-)*, < *invitare*, invite: see *invite*.] 1. The act of inviting; solicitation to come, attend, or take part; an intimation of desire for the presence, company, or action of the person invited: as, an *invitation* to a wedding; an *invitation* to sing.

The tempter now
His *invitation* earnestly renew'd:
What doubts the Son of God to sit and eat?
Milton, P. R., ii. 367.

I was by *invitation* from Monsieur Cassini at the Observatoire Royal. *Lister*, Journey to Paris, p. 52.

2. The written or spoken form with which a person is invited.

He received a list, and *invitations* were sent to all whose names were in it. *Daily Telegraph* (London), Sept. 11, 1884.

3. A drawing on by allurement or enticement; inducement; attraction; incitement.

The leer of *invitation*. *Shak.*, M. W. of W., i. 3, 50.

There is no work that a man can apply himself to, no action that he can perform, to which there are greater *invitations*, greater motives—nay, I was going to say, greater temptations of all sorts, than to this of prayer.
Abp. Sharp, Works, I. xv.

How temptingly the landscape shines! the air
Breathes *invitation*. *Wordsworth*, Excursion, ix.

4. In the Anglican communion office, the brief exhortation beginning "Ye that (or who) do truly and earnestly repent you," and introducing the confession. It is first found in the "Order of the Communion" (1548), and in the Prayer-book of 1549, and has been continued, with gradual modifications, in the various revisions of the Prayer-book. Also called, less properly, the *invitory*.

invitatorium (in-vi-tā-tō′ri-um), *n.*; pl. *invitatoria* (-ạ). [ML., neut. of LL. *invitatorius*, invitatory. see *invitatory*.] Same as *invitatory*, *n.*

invitatory (in-vī′tā-tọ-ri), *a.* and *n.* [= F. *invitatoire* = Sp. Pg. It. *invitatorio*, < LL. *invitatorius*, inviting, < L. *invitator*, one who invites, < *invitare*, invite: see *invite*.] **I.** *a.* Using or containing invitation.—**Invitatory psalm**, the Venite or 95th Psalm ("O come, let us sing unto the Lord"), said at matins or morning prayer before the psalms of the office: so called as inviting to praise. In the breviary offices it is immediately followed by a hymn. Its antiphon is called the *invitatory*.

II. *n.*; pl. *invitatories* (-riz). A form of invitation used in religious worship; something consisting of or containing invitation in church service.

The *invitatory*, "Let us pray for the whole state of Christ's Church," was new.
R. W. Dixon, Hist. Church of Eng., xv.

Specifically—(*a*) A form of exhortation to praise; especially, in the daily office of the Western Church, the variable antiphon to the Venite at matins. In the Anglican matins or morning prayer the versicle "Praise ye the Lord" (founded on the former "Alleluia" or "Laus tibi"), with its response, "The Lord's name be praised," serves as unvarying invitatory. In the Greek Church the invariable invitatory is the triple "O come, let us worship . . . (Δεῦτε, προσκυνήσωμεν . . .)" before the psalms at each of the canonical hours.

Then was sung that quickening call of the royal prophet "Venite, exultemus Domino—Come, let us praise the Lord with joy, &c.," known in those times as now by the name of the *invitatory*.
Rock, Church of our Fathers, III. ii. 4.

(*b*) An early name of the Roman introit. (*c*) Any text of Scripture chosen for the day, and used before the Venite or 95th Psalm.

invite (in-vīt′), *v.*; pret. and pp. *invited*, ppr. *inviting*. [< F. *inviter* (OF. *envier*, ult. E. *vie*, q. v.) = Pr. Sp. Pg. *invitar* = It. *invitare*, < L. *invitare*, ask, bid, invite, entertain; origin uncertain.] **I.** *trans.* 1. To solicit to come, attend, or do something; request the presence,

company, or action of; summon because of desire, favor, or courtesy: as, to *invite* a friend to dinner; to *invite* one to a dance.

Absalom had sheepshearers in Baal-hazor, . . . and Absalom *invited* all the king's sons. 2 Sam. xiii. 23.

No noontide bell *invites* the country round.
Pope, Moral Essays, iii. 190.

Not to the dance that dreadful voice *invites*,
It calls to death, and all the rage of fights.
Pope, Iliad, xv. 600.

They . . . entered into an association, and the city of London was *invited* to accede.
Goldsmith, Hist. England, xv.

2. To present allurement or incitement to; draw on or induce by temptation; solicit; incite.

Yet have they many baits and guileful spells,
To inveigle and *invite* the unwary sense
Of them that pass unweeting by the way.
Milton, Comus, l. 538.

I saw nothing in this country that could *invite* me to a longer continuance. *Swift*, Gulliver's Travels, iii. 6.

To resent his [Frederic's] affronts was perilous; yet not to resent them was to deserve and to *invite* them.
Macaulay, Frederic the Great.

The outside stations will be the first to *invite* the savages, and if too far away we shall not know of the attack nor be able to come to the rescue.
Harper's Mag., LXXVI. 423.

=**Syn. 1.** *Convoke*, *Bid*, etc. See *call*[1].

II. *intrans.* To offer invitation or enticement; attract.

Come, Myrrha, let us on to the Euphrates;
The hour *invites*, the galley is prepared.
Byron, Sardanapalus, i. 2.

invite (in-vīt′), *n.* [< *invite*, *v.*] An invitation. [Now only colloq.]

The Lamprey swims to his Lord's *invites*.
Sandys, Travailes, p. 305.

Adepts in every little meanness or contrivance likely to bring about an invitation (or, as they call it with equal good taste, an *invite*). *T. Hook*, Man of Many Friends.

Guest after guest arrived; the *invites* had been excellently arranged. *Dickens*, Sketches, Steam Excursion.

invitement (in-vīt′ment), *n.* [< OF. *invitement* = It. *invitamento*, < L. *invitamentum*, invitation, < *invitare*, invite: see *invite*.] 1†. The act of inviting; invitation.

Nor would I wish any *invitement* of states or friends.
Chapman.

A fair *invitement* to a solemn feast.
Massinger, Unnatural Combat, ii. 1.

2. Enticement; allurement; temptation. [Rare.]

The little creature . . . was unable to resist the delicious *invitement* to repose which he there saw exhibited.
Lamb, Elia, p. 189.

inviter (in-vī′tėr), *n.* One who invites.

Friend with friend, th' *inviter* and the guest.
Harte, Supposed Epistle from Boëtius to his Wife.

invitiate (in-vish′i-āt), *a.* [< *in*-[3] + *vitiate*, *a.*] Not vitiated; uncontaminated; pure.

Hers shall be
The *invitiate* firstlings of experience.
Lowell, The Cathedral.

inviting (in-vī′ting), *n.* [Verbal n. of *invite*, *v.*] 1. The act of giving an invitation.—2. An invitation. [Rare.]

He hath sent me an earnest *inviting*.
Shak., T. of A., iii. 6, 11.

inviting (in-vī′ting), *p. a.* [Ppr. of *invite*, *v.*] Alluring; tempting; attractive: as, an *inviting* prospect.

A cold bath, at such an hour and under such auspices, was anything but *inviting*.
Barham, Ingoldsby Legends, I. 144.

You cannot leave us now,
We must not part at this *inviting* hour.
Wordsworth, Excursion, v.

invitingly (in-vī′ting-li), *adv.* In an inviting manner; so as to attract; attractively.

If he can but dress up a temptation to look *invitingly*, the business is done. *Decay of Christian Piety*, p. 123.

invitingness (in-vī′ting-nes), *n.* The quality of being inviting; attractiveness.

Elegant flowers of speech, to which the nature and resemblances of things, as well as human fancies, have an aptitude and *invitingness*.
Jer. Taylor (?), Artif. Handsomeness, p. 165.

invitrifiable (in-vit′ri-fī-a-bl), *a.* [< *in*-[3] + *vitrifiable*.] Incapable of being vitrified. See *vitrifiable*, *vitrification*.

invocate (in′vō-kāt), *v.*; pret. and pp. *invocated*, ppr. *invocating*. [< L. *invocatus*, pp. of *invocare*, call upon: see *invoke*.] **I.** *trans.* To call on or for in supplication; invoke.

Be it lawful that I *invocate* thy ghost
To hear the lamentations of poor Anne.
Shak., Rich. III., i. 2, 8.

Look in mine eye,
There you shall see dim grief swimming in tears
Invocating succour. *Lust's Dominion*, ii. 3.

II.† *intrans.* To call as in supplication.

Some call on heaven, some *invocate* on hell,
And fates and furies with their woes acquaint.
Drayton, Idea No. 39.

invocation (in-vō-kā′shon), *n.* [= F. *invocation* = Pr. *invocacio*, *envocation* = Sp. *invocación* = Pg. *invocação* = It. *invocazione*, < L. *invocatio*(*n*-), < *invocare*, call upon: see *invoke*, *invocate*.] 1. The act of invoking or calling in prayer; the form or act of summoning or inviting presence or aid: as, *invocation* of the Muses.

'Tis a Greek *invocation* to call fools into a circle.
Shak., As you Like it, ii. 5, 61.

There is in religion no acceptable duty which devout *invocation* of the name of God doth not either presuppose or infer. *Hooker*, Eccles. Polity.

Any fustian *invocations*, captain, will serve as well as the best, so you rant them out well. *The Puritan*, iii. 4.

2. In *law*, a judicial call, demand, or order: as, the *invocation* of papers or evidence into a court. —3. *Eccles.*: (*a*) An invoking of the blessing of God upon any undertaking; especially, an opening prayer in a public service invoking divine blessing upon it; specifically, the words "In nomine Patris, et Filii, et Spiritus Sancti. Amen," "In the name of the Father, and of the Son, and of the Holy Ghost. Amen," used at the beginning of the Roman mass, before sermons in many Anglican churches, and on other occasions. (*b*) The third part of the prayer of consecration in the communion office of the American Book of Common Prayer, in the Scottish office of 1764 (from which that prayer is derived), and in the Nonjurors' office of 1718, on which, as well as on earlier Scottish and English offices and ancient Oriental liturgies, the Scottish office of 1764 is based. It follows the institution and the oblation, and invokes God the Father to send down the Holy Spirit on the eucharistic elements and on the communicants. A similar form of invocation (*epiclesis*), on which this is modeled, is found in the same sequence in almost all the more important primitive liturgies, and some authorities claim that it was originally universal. It is wanting, however, in the Roman Missal and in the present English Book of Common Prayer. In the first Prayer-book (1549) the invocation preceded the institution. (*c*) In the Roman Catholic and Anglican litanies, one of the petitions addressed to God in each person and in Trinity, and to the saints. The invocations are the first of the four main divisions of petitions in these litanies, the others being *deprecations* (with *obsecrations*), *intercessions*, and *supplications*. The response to the invocations addressed to God is "Miserere nobis," "Have mercy upon us," to which the Anglican Prayer-book adds "miserable sinners." The response to the invocations addressed to saints is "Ora (or Orate) pro nobis" ("Pray for us"). The invocations to saints are omitted in the Anglican litany.—**Invocation of saints**, in the Roman Catholic, the Greek, and other Christian churches, the act or practice of mentioning in prayer, asking the prayers of, or addressing prayers to angels or departed saints, in order to obtain their intercession with God.

invocatory (in-vok′a-tō-ri), *a.* [= F. *invocatoire* = Sp. Pg. It. *invocatorio*; as *invocate* + *-ory*.] Making invocation; invoking.

invoice (in′vois), *n.* [Prob. < F. *envois*, pl. of *envoi*, OF. *envoy*, a sending, conveyance (lettre d'*envoi*, an invoice): see *envoy*[1].] In *com.*, a written account of the particulars of merchandise shipped or sent to a purchaser, consignee, factor, etc., with the value or prices and charges annexed. The word does not carry a necessary implication of ownership. In United States revenue law, an invoice sent from abroad is required to be made in triplicate and signed and dated by the seller of the merchandise described therein, and subsequently verified by the American consul or commercial agent of the United States in the port or country of shipment. The three invoices are classified as the *original*, or importer's, the *duplicate*, which is retained by the consul who verified it, and the *triplicate*, which is forwarded to the collector of the port to which the merchandise is consigned.

What English Merchant soever should pass through the Sound, it should be sufficient for him to register an *Invoice* of his Cargazon in the Custom-house Book, and give his Bond to pay all duties at his return.
Howell, Letters, I. vi. 5.

The clerk on the high stool at the long mahogany desk behind the railing, hardly lifting his eyes from a heap of *invoices* before him. *W. M. Baker*, New Timothy, p. 148.

Pro forma invoice. See *pro forma*.

invoice (in′vois), *v. t.*; pret. and pp. *invoiced*, ppr. *invoicing*. [< *invoice*, *n.*] To write or enter in an invoice; make an invoice of.

Goods, wares, and merchandise imported from Norway, and *invoiced* in the current dollar of Norway. *Madison*.

invoice-book (in′vois-bůk), *n.* A book in which invoices are copied.

invoke (in-vōk′), *v. t.*; pret. and pp. *invoked*, ppr. *invoking*. [< F. *invoquer* = Sp. Pg. *invocar* = It. *invocare*, < L. *invocare*, call upon, < *in*, in, on, + *vocare*, call: see *vocal*. Cf. *avoke*, *convoke*, *evoke*, *provoke*, *revoke*.] 1. To address in supplication; call on for protection or aid: as, to *invoke* the Supreme Being; to *invoke* the Muses.

Whilst I *invoke* the Lord, whose power shall me defend.
Surrey, Ps. lxxiii.

To this oath they did not *invoke* any celestial divinity, or divine attribute, but only called to witness the river Styx. *Bacon*, Political Fables, ii.

2. To call for with earnest desire; make supplication or prayer for: as, to *invoke* God's mercy.

No storm-tost sailor sighs for slumbering seas,
He dreads the tempest, but *invokes* the breeze.
Crabbe, The Library.

The King of the Netherlands *invoked* the mediation of the five powers. *Woolsey*, Introd. to Inter. Law, § 49.

3. In *law*, to call for judicially: as, to *invoke* depositions or evidence.=**Syn. 1** and **2.** To implore, supplicate, adjure, solicit, beseech.

invoker (in-vō′kėr), *n.* One who invokes.

All respectable names, but none of them will in the long run save its *invoker*.
M. Arnold, Schools and Universities, p. 273.

involatile (in-vol′a-til), *a.* [< *in*-[3] + *volatile*.] Not volatile; incapable of being vaporized.

The ash or *involatile* constituents of wine.
Encyc. Brit., I. 173.

involuble† (in-vol′ū-bl), *a.* [< *in*-[3] + *voluble*.] Not turning or changing; unchangeable; immutable.

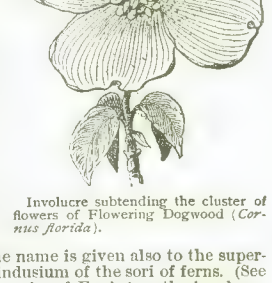
Even Thee, the Cause of Causes,
Sourse of all, . . .
Infallible, *involuble*, insensible.
Sylvester, Little Bartas (trans.), l. 161.

involucel (in-vol′ū-sel), *n.* [= F. *involucelle* = Pg. *involucello*, < NL. *involucellum*, dim. of *involucrum*, involucre: see *involucre*.] In *bot.*, a secondary involucre in a compound cluster of flowers, as in many of the *Apiaceæ*. See cut under *inflorescence* (fig. 9).

involucella, *n.* Plural of *involucellum*.

involucellate (in-vol-ū-sel′āt), *a.* [< *involucel*(*l*) + *-ate*[1].] Having involucels.

involucellum (in-vol-ū-sel′um), *n.*; pl. *involucella* (-ä). [NL.] Same as *involucel*.



involucra, *n.* Plural of *involucrum*.

involucral (in′vō-lū-kral), *a.* [< *involucre* + *-al*.] Pertaining to an involucre or to an involucrum, or having an involucrum.

Involucratæ (in-vol-ū-krā′tē), *n. pl.* [NL. (Hooker and Baker, 1868), fem. pl. of *involucratus*, involucrate: see *involucrate*.] A division of polypodiaceous ferns, containing those tribes which have the sori or fruit-dots furnished with an involucre or indusium.

involucrate (in-vō-lū′krāt), *a.* [< NL. *involucratus*, < *involucrum*, involucre: see *involucre*.] Having an involucre.

involucre (in′vō-lū-kėr), *n.* [= F. *involucre* = Sp. Pg. It. *involucro*, < NL. *involucrum*, < L. *involvere*, roll up, wrap up: see *involve*.] 1. In *bot.*, any collection of bracts round a cluster of flowers. In umbelliferous plants it consists of separate narrow bracts placed in a single whorl; in many composite plants these organs are imbricated in several rows. In some species of *Cornus*, many *Menthaceæ*, and other plants, the involucre is white or variously colored, forming the showy part of the flower. (See cut.) The same name is given also to the superincumbent covering or indusium of the sori of ferns. (See *indusium*, 2.) In some species of *Equisetum* the involucre is the annulus or annular girdle situated between the uppermost whorl of leaf-sheaths and the whorl of sporangiferous scales. (*Bennett and Murray*, Crypt. Bot., p. 110.) In the *Hepaticæ* it is the sheath immediately surrounding the female sexual organs, originating as an outgrowth of the plant-body. In marine algæ it consists of the ramuli subtending a conceptacle, forming a more or less perfect whorl around it. (*Harvey*, Brit. Marine Algæ, Glossary.)

Involucre subtending the cluster of flowers of Flowering Dogwood (*Cornus florida*).

2. In *anat.*, a membranous envelop, as the pericardium.—3. In *zoöl.*, an involucrum.

involucred (in′vō-lū-kėrd), *a.* In *bot.*, having an involucre, as umbels, etc.

involucret (in-vō-lū′kret), *n.* [< *involucre* + *-et*.] An involucel.

involuciform (in-vō-lū′kri-fôrm), *a.* [< NL. *involucrum*, involucre, + L. *forma*, shape.] Resembling an involucre. *Thomas*, Med. Dict.

involucrum (in-vō-lū′krum), *n.*; pl. *involucra* (-krä). [NL., < L. *involucrum*, that in which something is wrapped, < *involvere*, wrap up: see

involve.] **1.** In *zoöl.*, a kind of sheath or involucre about the bases of the thread-cells of acalephs.—**2.** In *bot.*: (*a*) Same as *involucre*. (*b*) Same as *velum*. *Persoon.*

involuntarily (in-vol′un-tā-ri-li), *adv.* In an involuntary manner; not spontaneously; without one's will.

involuntariness (in-vol′un-tā-ri-nes), *n.* The quality of being involuntary.

involuntary (in-vol′un-tā-ri), *a.* [= F. *involontaire* = Sp. Pg. *involuntario*, < LL. *involuntarius*, unwilling, < L. *in-* priv. + *voluntarius*, willing: see *voluntary*.] **1.** Not voluntary or willing; contrary or opposed to will or desire; unwilling; unintentional: as, *involuntary* submission; an *involuntary* listener.

> The gathering number, as it moves along,
> Involves a vast *involuntary* throng.
> *Pope*, Dunciad, iv. 82.

2. Not voluntary or willed; independent of volition or consenting action of the mind; without the agency of the will: as, *involuntary* muscular action; an *involuntary* groan.

> This at least I think evident, that we find in ourselves a power to begin or forbear, continue or end several actions of our minds, and motions of our bodies, barely by a thought or preference of the mind ordering, or, as it were, commanding the doing or not doing such or such a particular action. . . . The forbearance of that action, consequent to such order or command of the mind, is called voluntary; and whatsoever action is performed without such a thought of the mind is called *involuntary*.
> *Locke.*

> Steals down my cheek the *involuntary* tear.
> *Pope*, Imit. of Horace, IV. i. 38.

Involuntary action. See *action*, 7 (*b*).—**Involuntary bankruptcy.** See *bankruptcy*.—**Involuntary escape.** See *escape*, 3.

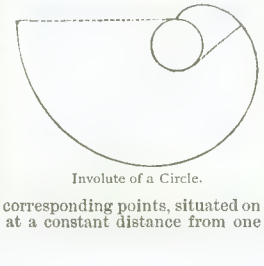
involuntomotory (in-vol″un-tō-mō′tō-ri), *a.* [< *involunt(ary)* + *motory*.] Having or pertaining to motor influence or effect which is not subject to the will, as the involuntary muscular action of the heart, intestines, etc.: specifically applied by Remak to that one of the four germ-layers of the embryo which corresponds to the splanchnopleure of other writers. This is the inner division of the mesoblast, distinguished from the voluntomotory or somatopleural division.

> The *involunto-motory*, corresponding to the visceral wall or splanchno-pleure. *Encyc. Brit.*, VIII. 167.

involutant (in-vō-lū′tant), *n.* [< *involute* + *-ant*.] In *math.*, the topical resultant of the powers and products of powers of two matrices of the same order.

involute (in′vō-lūt), *a.* and *n.* [= OF. *involu* = It. *involuto*, < L. *involutus*, pp. of *involvere*, roll up, wrap up: see *involve*.] **I.** *a.* **1.** Rolled up; wrapped up. Specifically—(*a*) In *bot.*, rolled inward from the edge or edges: said of leaves in vernation, of the petals of flowers in estivation, and of the margin of the cup in the *Discomycetes*, etc. Also *involutive*. (*b*) In *conch.*, having the whorls closely wound round the axis, and nearly or entirely concealing it, as the shells of *Cypræidæ*, *Olividæ*, etc. Also *involved*. (*c*) In *entom.*, curved spirally, as the antennæ of certain *Hymenoptera*.

1, Branch of Poplar, showing involute leaves; 2, outline of transverse section of an involute leaf.



2. Involved; confusedly mingled. [Rare.]

> The style is so *involute* that one cannot help fancying it must be falsely constructed. *Poe*, Marginalia, cxvii.

II. *n.* **1.** That which is involved. [Rare.]

> Far more of our deepest thoughts and feelings pass to us through perplexed combinations of concrete objects, pass to us as *involutes* (if I may coin that word) in compound experiences incapable of being disentangled, than ever reach us directly, and in their own abstract shapes.
> *De Quincey*, Autobiog. Sketches, i.

2. In *geom.*, the curve traced by any point of a flexible and inextensible string when the latter is unwrapped, under tension, from a given curve; or, in other words, the locus of a point in a right line which rolls, without sliding, over a given curve. The curve by unwrapping which a series of involutes is obtained is said to be their common evolute, and any two involutes of a curve constitute a pair of parallel curves, their corresponding tangents being parallel, and their corresponding points, situated on the same normal, being at a constant distance from one another.

Involute of a Circle.

involuted (in′vō-lū-ted), *a.* Same as *involute*.

involution (in-vō-lū′shọn), *n.* [= F. *involution* = Pr. *curolucio* = It. *involuzione*, < LL. *involutio(n-)*, a rolling up, < L. *involvere*, pp. *involutus*, roll up: see *involve*.] **1.** The act of involving, infolding, or inwrapping; a rolling or folding in or round.

> Gloom that sought to strengthen itself by tenfold *involution* in the night of solitary woods.
> *De Quincey*, Secret Societies, i.

2. The state of being entangled or involved; complication.

> The faculty to be trained is the judgment, the practical judgment at work among matters in which its possessor is deeply interested, not from the desire of Truth only, but from his own *involution* in the matters of which he is to judge. *Stubbs*, Medieval and Modern Hist., p. 17.

3. Something involved or entangled; a complication.

> Such the clue
> Of Cretan Ariadne ne'er explain'd!
> Hooks! angles! crooks! and *involutions* wild!
> *Shenstone*, Economy, iii.

4†. A membranous covering or envelop; an involucre.

> Great conceits are raised of the *involution* or membranous covering, commonly called the silly-how, that sometimes is found about the heads of children.
> *Sir T. Browne*, Vulg. Err., v. 23.

5. In *gram.*, complicated construction; the lengthening out of a sentence by the insertion of member within member; the separation of the subject from its predicate by the interjection of matter that should follow the verb or be placed in another sentence.

> The long *involutions* of Latin periods. *Lowell.*

6. In *math.*: (*a*) The multiplication of a quantity into itself any number of times, so as to produce a positive integral power of that quantity. Thus, the operation by which the third power of 5 is found, namely, the multiplication of 5 by itself, making 25, and of the product by 5 again, making 125, is *involution*. In this sense *involution* is opposed to *evolution*, 3 (*b*). (*b*) The raising of a quantity to any power, positive, negative, fractional, or imaginary. In this sense *involution* includes evolution as a particular case. (*c*) A unidimensional continuous series of elements (such as the points of a line), considered as having a definite one-to-one correspondence with themselves, such that infinitely neighboring elements correspond to infinitely neighboring elements, and such that if A corresponds to B, then B corresponds to A: in other words, the elements are associated in conjugate pairs, so that any pair of conjugate elements may by a continuous motion come into coincidence with any other without ceasing, at any stage of the motion, to be conjugate. This is the usual meaning of *involution* in geometry; it dates from Desargues (1639). There are either two real sibi-conjugate or self-corresponding elements in an involution, when it is called a *hyperbolic involution;* or there are none, when it is called an *elliptic involution*. If U = 0, V = 0, W = 0 are three quadratic equations determining three pairs of points in an involution, then these three equations are in a syzygy $\lambda U + \mu V + \nu W = 0$; or if the three equations are $ax^2 + bxy + cy^2 = 0$, $a'x^2 + b'xy + c'y^2 = 0$, $a''x^2 + b''xy + c''y^2 = 0$, then the syzygy may be thus written:

$$\begin{vmatrix} a, & b, & c \\ a', & b', & c' \\ a'', & b'', & c'' \end{vmatrix} = 0.$$

The six elements are said to be an *involution of six*, or, if one or two of them are sibi-conjugate, an *involution of five* or *of four* elements. If the points of a line in a plane are in involution, let any conic (or degenerate conic) be drawn through any pair of conjugate points, and another conic through any other pair; then any conic through the four intersections of these conics will cut the line in a pair of conjugate points. That point of an involution which corresponds to the point at infinity is termed the *center of the involution*. (*d*) Any series of pairs of loci represented by an equation $\lambda U + \mu V = 0$, where λ and μ are numerical constants for each locus, and U = 0 and V = 0 are equations to two loci of the same order. (*e*) Any unidimensional continuum of elements associated in sets of any constant number by a continuous law. According as there are two, three, four, etc., in each set, the involution is said to be *quadratic*, *cubic*, *quartic* (or *biquadratic*), etc. (*f*) The implication of a relation in a system of other relations. *Cayley*, On Abstract Geometry, § 29.—**7.** In *physiol.*, the resorption which organs undergo after enlargement or distention: as, the *involution* of the uterus, which is thus restored to its normal size after pregnancy.—**Center of an involution.** See *center*[1].—**Elliptic involution.** See *elliptic*.—**Involution of six screws**, a system of six screws conferring only five degrees of freedom on a rigid body.—**Mechanical involution**, a relation between a series of pairs of lines such that, taking any three pairs, forces may be made to act along them whose statical sum is zero.—**The involution of notions**, in *logic*, the relation of a notion to another whose depth it includes.

involutive (in′vō-lū-tiv), *a.* [< *involute* + *-ive*.] In *bot.*, same as *involute*, 1 (*a*).

involutorial (in″vō-lū-tō′ri-al), *a.* [< *involute* + *-ory* + *-al*.] Of the nature of geometrical involution; connecting a system of objects in pairs.—**Involutorial homology**, a homology whose parameter is −1.—**Involutorial relation**, a relation between two variables, *x* and *y*, such that $y = Fx$ and $x = Fy$: a term introduced by Siebeck.

involve (in-volv′), *v. t.*; pret. and pp. *involved*, ppr. *involving*. [< OF. *involver* = Sp. *envolver* = Pg. *involver* = It. *involvere*, < L. *involvere*, roll in, roll up, wrap up, < *in*, in, on, + *volvere*, roll: see *volute*. Cf. *convolve*, *devolve*, *evolve*, *revolve*.] **1.** To roll or fold in or wrap up so as to conceal; envelop on all sides; cover completely: infold; specifically, in *zoöl.*, to encircle completely: as, a mark *involving* a joint; wings *involving* the body.

> If it [the sun] should, but one Day, cease to shine,
> Th' vnpurged Aire to Water would resolue,
> And Water would the mountain tops *involue*.
> *Sylvester*, tr. of Du Bartas's Weeks, i. 4.

> A rolling cloud
> *Involv'd* the mount; the thunder roar'd aloud.
> *Pope*, Iliad, xvii. 671.

> The further history of this neglected plantation is *involved* in gloomy uncertainty. *Bancroft*, Hist. U. S., I. 85.

2. To entwine; entangle; implicate; bring into entanglement or complication, literally or figuratively: as, an *involved* problem; to *involve* a nation in war; to be *involved* in debt.

> Judgement rashly giv'n ofttimes *involves* the Judge himself. *Milton*, Eikonoklastes, xii.

> Some of serpent kind,
> Wondrous in length and corpulence, *involved*
> Their snaky folds. *Milton*, P. L., vii. 433.

> Fearing that our stay till the very excessive heats were past might *involve* us in another difficulty, that of missing the Etesian winds. *Bruce*, Source of the Nile, I. 43.

> We seem to have certain direct perceptions, and to attain to others by a more or less *involved* process of reasoning. *Mivart*, Nature and Thought, p. 12.

3. To bring into a common relation or connection; hence, to include as a necessary or logical consequence; imply; comprise.

> The welfare of each is daily more *involved* in the welfare of all. *H. Spencer*, Social Statics, p. 483.

> A knowledge of the entire history of a particle is shown to be *involved* in a complete knowledge of its state at any moment. *W. K. Clifford*, Lectures, I. 3.

> All kinds of mental work *involve* attention.
> *J. Sully*, Outlines of Psychol., p. 13.

4. In *arith.* and *alg.*, to raise to any assigned power; multiply, as a quantity, into itself a given number of times: as, a quantity *involved* to the third or fourth power.—**Syn. 2.** *Entangle*, etc. (see *implicate*); twine, intertwine, interweave, interlace.—**3.** *Imply*, *Involve* (see *imply*); embrace, contain.

involved (in-volvd′), *p. a.* **1.** In *conch.*, same as *involute*, 1 (*b*).—**2.** In *her.*, same as *enveloped*.

involvedness (in-vol′ved-nes), *n.* The state of being involved; involvement. [Rare.]

> But how shall the mind of man . . . extricate itself out of this comprisure and *involvedness* in the bodies, passions, and infirmities?
> *W. Montague*, Devoute Essays, II. x. § 1.

involvement (in-volv′ment), *n.* [< *involve* + *-ment*.] The act of involving, or the state of being involved or implicated; entanglement: as, *involvement* in debt, or in intrigues.

> The spectators were shivering at the Athenian's mishap, and the Sidonian, Byzantine, and Corinthian were striving, with such skill as they possessed, to avoid *involvement* in the ruin. *L. Wallace*, Ben-Hur, p. 363.

invulgar† (in-vul′gär), *v. t.* [< *in-*[2] + *vulgar*.] To cause to become vulgar or common.

> It did so much invile the estimate
> Of th' open'd and *invulgar'd* mysteries.
> *Daniel*, Musophilus.

invulgar† (in-vul′gär), *a.* [< *in-*[3] + *vulgar*.] Not vulgar; refined.

> Judg'd the sad parents this lost infant ow'd
> Were as *invulgar* as their fruit was fair.
> *Drayton*, Moses, i.

invulnerability (in-vul″ne-ra-bil′i-ti), *n.* [= F. *invulnérabilité* = Sp. *invulnerabilidad* = It. *invulnerabilità;* as *invulnerable* + *-ity:* see *-bility*.] The quality or state of being invulnerable.

invulnerable (in-vul′ne-ra-bl), *a.* [= F. *invulnérable* = Sp. *invulnerable* = Pg. *invulneravel* = It. *invulnerabile*, < L. *invulnerabilis*, invulnerable, < *in-* priv. + (LL.) *vulnerabilis*, vulnerable: see *vulnerable*.] **1.** Not vulnerable; incapable of being wounded, hurt, or harmed.

> Achilles is not quite *invulnerable;* the sacred waters did not wash the heel by which Thetis held him.
> *Emerson*, Compensation.

Hence —**2.** Not to be damaged or injuriously affected by attack: as, *invulnerable* arguments or evidence.

He exhorted his hearers to lay aside their prejudices, and arm themselves against the shafts of malice or misfortune by *invulnerable* patience. *Johnson*, Rasselas, xviii.

invulnerableness (in-vul'nē-ra-bl-nes), *n.* Invulnerability.

invulnerably (in-vul'nē-ra-bli), *adv.* In an invulnerable manner; so as to be proof against wounds, injury, or assault; of an argument, irrefutably.

invulnerate† (in-vul'nē-rāt), *a.* [= Pg. *invulnerado*, < L. *invulneratus*, unwounded, < *in-* priv. + *vulneratus*, pp. of *vulnerare*, wound: see *vulnerate*.] Without wound; unhurt.

Not at all on those [skulls]
That are *invulnerate* and free from blows.
S. Butler, Satire upon Marriage.

invultuation (in-vul-tū-ā'shon), *n.* [< ML. *invultuatio(n-)*, *invultuacio(n-)*, < **invultuare*, *invultare* (> OF. *envouter*, F. *envoûter*), stab or pierce the face or body of (a person), that is (to medieval superstition the same thing), of an image of him made of wax or clay (see def.), < L. *in*, in, into, + *vultus*, face.] The act of stabbing or piercing with a sharp instrument a wax or clay image of a person, under the belief that the person himself, though absent and unconscious of the act, will thereupon languish and die: a kind of spell or witchcraft believed in in ancient times and in the middle ages. The practice was so common, and belief in its fatal effects so general, that laws were enacted against it. It was called in Anglo-Saxon *stacung*, 'staking.'

invye†, *n.* A Middle English form of *envy*.

inwall (in-wâl'), *v. t.* [Also *enwall*; < *in-*[1] + *wall*[1]; cf. *immure*.] To wall in; inclose or fortify with a wall. *Dr. H. More*, Psychozoia, iii. 31.

A mountainous range . . . swept far to the north, and ultimately merged in those eternal hills that *inwall* every horizon. *S. Judd*, Margaret, i. 3.

inwall (in'wâl), *n.* [< *in*[1] + *wall*[1].] 1†. An inner wall.

The hinges piecemeal flew, and through the fervent little rock
Thunder'd a passage; with his weight th' *inwall* his breast did knock. *Chapman*, Iliad, xii. 448.

2. Specifically, the interior wall of a blast-furnace.

inwandering (in'won″dėr-ing), *n.* [< *in*[1] + *wandering*.] A wandering in. [Rare.]

This *inwandering* of differentiated cells. *A. Hyatt.*

inward, inwards (in'wärd, -wärdz), *adv.* [< ME. *inward*, < AS. *inweard*, adv., < *in*, in, + *-weard*, E. *-ward*. The form *inwards* (= D. *inwaarts* = G. *einwärts* = Dan. *indvortes* = Sw. *invertes*) is later, with adv. gen. suffix *-s*.] 1. Toward the inside; toward the interior or center.

Sewed Furres with bones and sinewes for their clothing, which they ware *inward* in Winter, outward in Summer. *Purchas*, Pilgrimage, p. 431.

Primitively, however, in all animals, and permanently in some (e. g. Tortoises), both these joints [the elbow and the knee] are so conditioned as to open *inwards*. *Mivart*, Encyc. Brit., XXII. 117.

2. Into the mind or soul.

Celestial Light,
Shine *inward*. *Milton*, P. L., iii. 52.

I would ask what else is reflecting besides turning the mental eye *inwards*? *A. Tucker*, Light of Nature, I. i. 11.

[The forms *inward* and *inwards* are used either indifferently or with some reference to euphony.]

inward (in'wärd), *a.* and *n.* [< ME. *inward*, *inneward*, < AS. *inneweard* (also *innanweard*) (= OHG. *inwart*, *inwarti*, *inwerti*, MHG. *inwart*, *inwerte*), inward, < *inne*, in (< *in*, in), + *-weard*: see *in*[1] and *-ward*.] **I.** *a.* 1. Situated or being within; pertaining to the interior or internal parts: as, the *inward* parts of a person or of a country.

So, stubborn Flints their *inward* Heat conceal,
'Till Art and Force th' unwilling Sparks reveal.
Congreve, To Dryden.

To gritty meal he grinds
The bones of fish, or *inward* bark of trees.
J. Dyer, Fleece, i.

2. Pertaining to or connected with the intimate thoughts or feelings of the soul.

So, bursting frequent from Atrides' breast,
Sighs following sighs his *inward* fears confest.
Pope, Iliad, x. 12.

Behold! as day by day the spirit grows,
Thou see'st by *inward* light things hid before;
Till what God is, thyself, his image shows.
Jones Very, Poems, p. 64.

3†. Intimate; familiar; confidential; private.

Sir, the king is a noble gentleman; and my familiar, I do assure you, very good friend. For what is *inward* between us, let it pass. *Shak.*, L. L. L., v. 1, 102.

Come, we must be *inward*, thou and I all one.
Marston and Webster, Malcontent.

[He was] so *inward* with my Lord Obrien that, after a few moneths of that gentleman's death, he married his widow. *Evelyn*, Diary, July 22, 1674.

4. Deep; low; muffled; half-audible: as, he spoke in an *inward* voice.

As the dog [in dreams]
With *inward* yelp and restless forefoot plies
His function of the woodland. *Tennyson*, Lucretius.

Inward euthanasia, light, etc. See the nouns.—**Inward part** (of a sacrament), that part of a sacrament which is not perceptible to the senses, as the body and blood of Christ in the Lord's Supper, or the gift of regeneration in baptism. Also called *res sacramenti*.—**Inward place,** in *logic*, a place which yields an argument appertaining to the nature and substance of the matter in question.=**Syn. 1** and **2.** *Internal*, *Interior*, etc. See *inner*.

II. *n.* 1. The inside; especially, in the plural, the inner parts of an animal; the bowels; the viscera.

The thought whereof
Doth, like a poisonous mineral, gnaw my *inwards*.
Shak., Othello, ii. 1, 306.

The little book which in your language you have called Saggi Morali. But I give it a weightier name, entitling it Faithful Discourses, or the *Inwards* of Things.
Bacon, To Father Fulgentio, 1625.

2†. *pl.* Mental endowments; intellectual parts.

To guide the Grecian darts,
Juno and Pallas, with the god that doth the earth embrace,
And most for man's use, Mercurie (whom good wise *inwards* grace),
Were partially, and all employ'd. *Chapman*, Iliad, xx.

3†. An intimate.

Sir, I was an *inward* of his: A shy fellow was the duke.
Shak., M. for M., iii. 2, 138.

Salute him fairly; he's a kind gentleman, a very *inward* of mine. *Middleton*, Michaelmas Term, ii. 3.

inwardly (in'wärd-li), *adv.* [< ME. *inwardliche*, *inwardlike*, *inwardlie*, *inwardli*, < AS. *inweardlīce* (= OHG. *inwertlīhho*), < *inweard*, inward: see *inward*.] 1. In an inward manner; internally; privately; secretly.

Let Benedick, like cover'd fire,
Consume away in sighs, waste *inwardly*.
Shak., Much Ado, iii. 1, 78.

Thou art *inwardly* desirous of vain-glory in all that thou sayest or dost. *Bunyan*, Pilgrim's Progress, p. 127.

2. Toward the center: as, to curve *inwardly*.—3†. Intimately; thoroughly.

I shall desire to know him more *inwardly*.
Beau. and Fl., Woman-Hater, ii. 1.

4. In a low tone; not aloud; to one's self.

He shrunk and muttered *inwardly*.
Wordsworth, White Doe of Rylstone, ii.

Half *inwardly*, half audibly she spoke.
Tennyson, Geraint.

inwardness (in'wärd-nes), *n.* [< ME. *inwardnesse*; < *inward* + *-ness*.] 1. The state of being inward or internal; inclosure within.

Such a name [antrum] could not have been given to any individual cave unless the idea of being within, or *inwardness*, had been present in the mind.
Max Müller, Sci. of Lang., p. 375.

2. Internal state; indwelling character or quality; the nature of a thing as it is in itself.

Sense cannot arrive to the *inwardness*
Of things, nor penetrate the crusty fence
Of constipated matter.
Dr. H. More, Psychozoia, i. 28.

3. Inner meaning; real significance or drift; essential purpose.

I should without any difficulty pronounce that his [Homer's] fables had no such *inwardness* in his own meaning.
Bacon, Advancement of Learning, ii. 146.

The true *inwardness* of the late Southern policy of the Republican party. *New York Tribune*, April, 1877.

4†. Intimacy; familiarity; attachment.

You know my *inwardness* and love
Is very much unto the prince and Claudio.
Shak., Much Ado, iv. 1, 247.

And [the Duke of York] did, with much *inwardness*, tell me what was doing. *Pepys*, Diary, Aug. 23, 1668.

5†. The inwards; the heart; the soul.

ghe ben not angwischid in us, but ghe ben angwischid in ghoure *ynwardnessis*. *Wyclif*, 2 Cor. vi. 12.

inwards, *adv.* See *inward*.

inweave (in-wēv'), *v. t.*; pret. *inwove*, pp. *inwoven* (sometimes *inwove*), ppr. *inweaving*. [< *in*[1] + *weave*.] 1. To weave together; intermingle by or as if by weaving.

Down they cast
Their crowns *inwove* with amarant and gold.
Milton, P. L., iii. 352.

2. To weave in; introduce into a web in the process of manufacture, as a pattern, an inscription, or the like.

inweed (in-wēd'), *v. t.* [< *in-*[1] + *weed*.] To hide in the weeds. *Sir P. Sidney*, Arcadia, ii.

inwheel†, **enwheel**† (in-, en-hwēl'), *v. t.* [< *in-*[1] + *wheel*.] To encircle.

Heaven's grace *inwheel* ye!
And all good thoughts and prayers dwell about ye!
Fletcher, Pilgrim, i. 2.

inwheel (in'hwēl), *n.* [< *in*[1] + *wheel*.] The inner wheel of a mill. *Halliwell.*

inwick (in'wik), *n.* [< *in*[1] + *wick*[3].] In the game of curling, a stroke by which the stone comes very near the tee after passing through a wick.

The stone, in a graceful parabola, curls gently inwards, takes an *inwick* off the inner edge of another, and circles in to lie—a pot-lid in the very tee.
Montreal Daily Star, Carnival No., 1884.

inwit† (in'wit), *n.* [ME. *inwit*, *inwyt*, < AS. *inwit*, consciousness, conscience, < *in*, in, + *wit*, knowledge: see *wit*, *n.*] Inward knowledge; understanding; conscience. This word is best known in the title of a Middle English work in the Kentish dialect, "The Ayenbite of *Inwyt*," that is, Remorse of Conscience, translated in the year 1340 by Dan Michel, a monk, from a French work entitled "Le somme des vices et des vertues."

Inwit in the hed is and helpeth the soule,
For thorw his connynge he kepeth Caro et Anima
In rule and in reson bote recheles hit make.
Piers Plowman (A), x. 49.

inwith†, *prep.* [ME. *inwith*, *inewith*, *iwith*; < *in*[1] + *with*[1]. Cf. *within*.] Within; in.

His wyf and eek his doghter hath he left *inwith* his hous.
Chaucer, Tale of Melibeus.

in-wone†, *v. t.* [ME. (= D. MLG. *inwonen* = G. *einwohnen*), < *in*, in, + *wonen*, dwell: see *won*[2].] To dwell in; inhabit; hold.

[She] enfourmet hym fully of the fre rewme,
That the worthy *in-wonet*, as a wale kyng.
Destruction of Troy (E. E. T. S.), l. 13864.

inwork† (in'wėrk), *n.* 1. Interior or inside work; work on the inner side.—2. *pl.* Inner works or defenses of a fortified place. *N. E. D.*

inwork (in-wėrk'), *v.*; pret. and pp. *inworked* or *inwrought*, ppr. *inworking*. [< *in*[1] + *work*.] **I.** *trans.* To work in or into: as, to *inwork* gold or any color, as in embroidery: commonly used in the past participle.

Next Camus, reverend sire, went footing slow,
His mantle hairy, and his bonnet sedge,
Inwrought with figures dim; and on the edge
Like to that sanguine flower, inscribed with woe.
Milton, Lycidas, l. 105.

And from these dangers you will never be wholly free till you have utterly extinguished your vicious inclinations, and *inwrought* all the virtues of religion into your natures. *J. Scott*, Christian Life, I. iv. § 5.

II. *intrans.* To work or operate within. [Rare.]

inworking (in'wėr-king), *n.* [Verbal n. of *inwork*, *v.*] Operation within; energy exerted inwardly, as in the mind or soul: as, the *inworking* of the Holy Spirit.

inworn (in-wōrn'), *a.* [< *in*[1] + *worn*, pp. of *wear*.] Worn or worked into; inwrought.

I perswade me that whatever faultines was but superficial to Prelaty at the beginning, is now by the just judgment of God long since branded and *inworn* into the very essence thereof. *Milton*, Church-Government, ii. 1.

inwrap[1], **enwrap**[1] (in-, en-rap'), *v. t.*; pret. and pp. *inwrapped*, *enwrapped*, ppr. *inwrapping*, *enwrapping*. [< ME. *inwrappen*, *enwrappen*, also *inwlappen*; < *in-*[1], *en-*[1], + *wrap*.] 1. To cover by or as if by wrapping; infold; hence, to include.

David might well look to be *inwrapped* in the common destruction. *Bp. Hall*, Numbering of the People.

So when thick clouds *inwrap* the mountain's head,
O'er heav'n's expanse like one black ceiling spread.
Pope, Iliad, xvi. 354.

Here comes to me Roland, with a delicacy of sentiment leading and *inwrapping* him like a divine cloud or holy ghost. *Emerson*, Behavior.

2. To involve in difficulty or perplexity; perplex.

The case is no sooner made than resolved, if it be made not *inwrapped*, but plainly and perspicuously. *Bacon.*

And though 'tis wonder that *enwraps* me thus,
Yet 'tis not madness. *Shak.*, T. N., iv. 3, 3.

inwrap[2]†, **enwrap**[2]† (in-, en-rap'), *v. t.* [Prob. for **inrap*, **enrap*; < *in-*[2], *en-*[2], + *rap*[2]. Cf. *rapt*.] To transport; enrapture.

For, if such holy song
Enwrap our fancy long,
Time will run back, and fetch the age of gold.
Milton, Nativity, l. 134.

inwrapment, enwrapment (in-, en-rap'ment), *n.* [< *inwrap*[1], *enwrap*[1], + *-ment*.] 1. The act of inwrapping, or the state of being inwrapped.—2. That which inwraps; a covering; a wrapper.

They wreathed together a foliature of the fig-tree, and made themselves *enwrapments*.
Shuckford, The Creation, p. 203.

inwrapped, enwrapped (in-, en-rapt'), *p. a.* Same as *annodated*.

inwreathe, enwreathe (in-, en-rēтн'), *v. t.*; pret. and pp. *inwreathed*, *enwreathed*, ppr. *in-*

wreathing, enwreathing. [< *in-*[1], *en-*[1], + *wreathe.*] To surround with or as if with a wreath. *Mallet,* Amyntor and Theodora.

inwrought (in-rât′), *p. a.* [Pp. of *inwork.*] Wrought or worked in or into; having something (specifically, figures or patterns) worked into it.

io[1] (ī′ō), *interj.* [L. *io,* = Gr. *ἰώ,* an exclamation of joy or pleased excitement: cf. *O, oh,* etc.] A Latin interjection, or exclamation of joy or triumph: sometimes used as a noun in English.

> Hark! how around the hills rejoice,
> And rocks reflected *ios* sing.
> *Congreve,* Ode on Namur, st. 10.

Io[2] (ī′ō), *n.* [L. *Io,* < Gr. Ἰώ.] 1. In *myth.,* a daughter of Inachus, metamorphosed into a heifer and caused to be tormented by a terrible gadfly by Hera, in jealous revenge for the favors of Zeus. See *Argus,* 1.—2. The innermost of the four satellites of Jupiter.—3. In *entom.*: (*a*) A genus of vanessoid butterflies. (*b*) [*l. c.*] The peacock butterfly, *Vanessa io:* used both as the technical specific name and as an English word. (*c*) [*l. c.*] A showy and beautiful moth of North America, *Automeris io,* or *Saturnia io,* of yellow coloration, with prominent pink and bluish eyes on the hinder wings. The larva is covered with bunches of stinging spines, and feeds on many plants and trees, as Indian corn, cotton, hops, clover, elm, and cherry. The eggs are laid in clusters on the under side of the leaf.

Automeris io, natural size.

iodal (ī′ō-dal), *n.* [< *iod(ine)* + *al(cohol).*] A liquid (CI_3CHO) described as similar to chloral in composition and properties. It is doubtful if the substance has been prepared.

iodargyrite (ī-ō-där′ji-rīt), *n.* Same as *iodyrite.*

iodate[1] (ī′ō-dāt), *n.* [< *iod(ine)* + *-ate*[1].] Any compound of iodic acid with a base. The iodates form deflagrating mixtures with combustibles, and when they are heated to low redness oxygen gas is disengaged, and a metallic iodide remains. They are all of very sparing solubility, excepting the iodates of the alkalis. See *iodic.*

iodate[2] (ī′ō-dāt), *v. t.*; pret. and pp. *iodated,* ppr. *iodating.* [< *iod(ine)* + *-ate*[2].] To combine, impregnate, or treat with iodine.

> One variety of *iodated* paper. *Ure,* Dict., III. 567.

iodic (ī-od′ik), *a.* [< *iod(ine)* + *-ic.*] Containing iodine: as, *iodic* silver.—**Iodic acid,** HIO_3, an acid formed by the action of oxidizing agents on iodine in presence of water or alkalis. Iodic acid is a white semi-transparent solid substance, which is inodorous, but has an astringent, sour taste. It is very soluble in water, and detonates when heated with charcoal, sugar, or sulphur. Deoxidizing agents reduce it partly to hydriodic acid, which then reacts upon the remaining iodic acid to form iodine and water. It combines with metallic oxids, forming salts, which are named *iodates,* and these, like the chlorates, yield oxygen when heated, and an iodide remains.

iodide (ī′ō-did or -dīd), *n.* [< *iod(ine)* + *-ide*[1].] A compound of iodine with an element or radical more electropositive than itself: as, sodium *iodide.*—**Iodide of ethyl,** ethyl iodide (C_2H_5I), a colorless liquid insoluble in water, having a penetrating ethereal odor and taste, used in medicine, by inhalation, to introduce iodine rapidly into the system.

iodiferous (ī-ō-dif′e-rus), *a.* [< *iod(ine)* + L. *ferre* = E. *bear*[1].] Yielding iodine: as, *iodiferous* plants.

iodine (ī′ō-din or -dīn), *n.* [= F. *iodine,* < Gr. *ἰοειδής,* like a violet (< *ἴον,* a violet, = L. *viola,* > ult. E. *violet*), + *-ine*[2].] Chemical symbol, I; atomic weight, 126.92. In *chem.,* a peculiar non-metallic elementary solid substance, forming one of the group of halogens. It exists in the water of the ocean and mineral springs, in marine mollusks, in seaweeds, and in the nitrate deposits of western South America. At ordinary temperatures it is a solid crystalline body. Its color is bluish-black or grayish-black, with a metallic luster. It is often in scales, resembling those of micaceous iron ore; sometimes in brilliant rhomboidal plates or in elongated octahedrons. The specific gravity of solid iodine is 4.947. It fuses at 238° F., and boils at 364°. Its vapor, which is very dense, is of an exceedingly rich violet color, a character to which it owes the name of *iodine.* It is a non-conductor of electricity, and, like oxygen and chlorin, is electronegative. It is very sparingly soluble in water, but dissolves copiously in alcohol and in ether, forming dark-brown liquids. It possesses strong powers of combination, and forms with the pure metals and most of the simple non-metallic substances compounds which are named *iodides.* With hydrogen and oxygen it forms iodic acid; combined with hydrogen it forms hydriodic acid. Like chlorin, it destroys vegetable colors, but with less energy. Iodine has a very acrid taste, and its odor somewhat resembles that of chlorin. It is an irritant poison, and is of great service in medicine. It is used externally as a counter-irritant, the skin or mucous membrane being painted with the tincture; and also internally, both as iodine and in combination, especially as iodide of potash. Starch is a characteristic test of iodine, forming with it a deep-blue compound. This test is so delicate that a solution of starch dropped into water containing less than a millionth part of iodine is tinged blue.—**Iodine green.** See *green*[1].—**Iodine scarlet.** Same as *pure scarlet* (which see, under *scarlet*).

iodism (ī′ō-dizm), *n.* [< *iod(ine)* + *-ism.*] In *pathol.,* a peculiar derangement of the system produced by the excessive use of iodine or its salts.

iodize (ī′ō-dīz), *v. t.*; pret. and pp. *iodized,* ppr. *iodizing.* [< *iod(ine)* + *-ize.*] 1. In *med.,* to treat with iodine; affect with iodine.—2. In *photog.,* to impregnate, as collodion, with iodine; add iodine or an iodide to.

iodizer (ī′ō-dī-zėr), *n.* [< *iodize* + *-er*[1].] One who or that which iodizes.

iodobromite (ī″ō-dō-brō′mīt), *n.* [< *iod(ine)* + *brom(ide)* + *-ite*[2].] A sulphur-yellow mineral, occurring in isometric crystals at Dernbach, Nassau, consisting of the iodide, bromide, and chlorid of lead.

iodoform (ī′ō-dō-fôrm), *n.* [< *iod(ine)* + (*chloro*)*form.*] A solid compound (CHI_3) analogous to chloroform, produced by the action of iodine with alkalis or alkali carbonates on alcohol. It forms lemon-yellow crystals, with an odor like that of saffron, which are somewhat volatile at the ordinary temperature, insoluble in water, but readily soluble in alcohol and ether. It is an anesthetic and antiseptic, and is used in surgical dressings.

iodoform (ī′ō-dō-fôrm), *v. t.* [< *iodoform, n.*] To apply iodoform to; impregnate with iodoform.

iodoformize (ī′ō-dō-fôr″mīz), *v. t.*; pret. and pp. *iodoformized,* ppr. *iodoformizing.* [< *iodoform* + *-ize.*] To iodoform.

iodohydric (ī″ō-dō-hī′drik), *a.* [< *iod(ine)* + *hydr(ogen)* + *-ic.*] Same as *hydriodic.*

iodol (ī′ō-dol), *n.* [< *iod(ine)* + *-ol.*] A yellowish-brown substance (C_4I_4NH) composed of long prismatic crystals, used in medicine as an antiseptic.

iodometric (ī″ō-dō-met′rik), *a.* [< *iod(ine)* + *metric.*] In *chem.,* measured by iodine: used of analytical operations in which the quantity of a substance is determined by its reaction with a standard solution of iodine.

iodyrite (ī-od′i-rīt), *n.* [< (earlier) *iod(ite)* + Gr. *ἄργυρος,* silver, + *-ite*[2].] Native silver iodide, a sectile mineral of a bright-yellow color and resinous or adamantine luster, occurring sparingly in Chili and elsewhere.

iolite (ī′ō-līt), *n.* [< Gr. *ἰον,* a violet, + *λίθος,* stone.] A silicate of magnesium, aluminium, and iron, a mineral of a violet-blue color with a shade of purple or black. It often occurs in six-sided rhombic prisms. The smoky-blue peliom and steinheilite are varieties. Iolite is very subject to chemical alteration, and many names have been given to the more or less distinct compounds so formed, as *pinite, fahlunite, gigantolite,* etc. Also called *dichroite* (because the tints along the two axes are unlike) and *cordierite.*

ion (ī′on), *n.* [< Gr. *ἰών,* neut. *ἰόν,* ppr. of *ἰέναι,* L. *ire,* go: see *iter.*] 1. One of the elements of an electrolyte, or compound body undergoing electrolyzation. Those elements of an electrolyte which are evolved at the anode are termed *anions,* and those which are evolved at the cathode *cations,* and when these are spoken of together they are called *ions.*

2. See the supplement.

-ion. [ME. *-ion, -ioun, -iun* (*-on, -un*), < OF. *-ion, -iun* (*-on, -un*), F. *-ion* (*-on*) = Pr. *-ion, -io* = Sp. *-ion* = Pg. *-ão* = It. *-ione,* < L. *-io(n-),* a common suffix forming (*a*) abstract (fem.) nouns from verbs, either from the inf., as *legio(n-),* a legion, < *legere,* collect, *optio(n-),* a choice, < *optare,* choose, *suspicio(n-),* suspicion, < *suspicere,* suspect, etc., or from adjectives, as *communio(n-),* communion, < *communis,* common, *unio(n-),* union, < *unus,* one, etc.; or (*b*) appellative (masc.) nouns, of various origin, as *centurio(n-),* a centurion, *histrio(n-),* an actor, etc. See *-tion, -ation,* etc.] 1. A suffix in abstract nouns (many also used as concrete) of Latin origin, as in *legion, opinion, option, region, religion, suspicion, communion, union,* etc.—2. A similar suffix occurring in a few concrete nouns designating persons or things, as in *centurion, histrion, union* (a pearl), *onion, pavilion,* etc.

Ionian (ī-ō′ni-an), *a.* and *n.* [< L. *Ionius,* < Gr. Ἰώνιος, < Ἰωνία, Ionia, Ἴωνες, the Ionians.] I. *a.* Relating to Ionia or to the Ionians; Ionic.—**Ionian chiton, mode,** etc. See the nouns.—**Ionian school.** Same as *Ionic school* (which see, under *Ionic*).—**Ionian sea,** that part of the Mediterranean which lies between Greece and Sicily.

II. *n.* A member of one of the three or (as some count) four great divisions of the ancient Greek race, the others being the Dorians and Æolians, or the Dorians, Æolians, and Achæans. Originally they inhabited Attica, Eubœa, and the district in the Peloponnesus afterward known as Achæa. From Attica they spread over most of the islands (the Ionian Islands) of the Ægean sea, and settled in Ionia on the coast of Asia Minor. They founded various colonies on the shores of the Euxine, Propontis, and the Ægean, and in the west they planted Catana and other colonies in Sicily; Rhegium, Cumæ, etc., in Italy; and Marseilles and others in Gaul. The Asiatic Ionians especially did much to introduce Asiatic civilization and luxury into Greece, and were often reproached by the other Greeks with effeminacy. Also (rarely) called *Iastian,* and in the plural *Ions.*

Ionic (ī-on′ik), *a.* and *n.* [< L. *Ionicus,* < Gr. Ἰωνικός, < Ἰωνία, Ionia: see *Ionian.*] I. *a.* 1. Of, pertaining, or relating to the Ions or Ionians as a race, or to one of the regions named from them, Ionia or the Ionian Islands: as, the *Ionic* dialect or school; the *Ionic* order.—2. In *anc. pros.,* constituting a foot of two long syllables followed by two shorts, or vice versa; pertaining to or consisting of such feet: as, an *Ionic* foot, colon, verse, or system; *Ionic* rhythm.—**Axis of the Ionic capital.** See *axis*[1].—**Ionic dialect,** the most important of the three main branches of the ancient Greek language (the other two being the Doric and Æolic), including the Attic. Homer's Iliad was written in Old Ionic, the works of Herodotus in New Ionic, and nearly all the great Greek works in its later form, the Attic.—**Ionic foot,** in *pros.,* a foot consisting of four syllables, either two short and two long or two long and two short.—**Ionic meter,** a meter consisting of Ionic feet.—**Ionic mode.** See *mode.*—**Ionic order,** in *arch.,* one of the three Greek orders, so named from the Ionic race, by whom it was held to have been developed and perfected. The distinguishing characteristic of this order is the volute of its capital. In the true Ionic the volutes have the same form on the front and rear, and are connected on the flanks by an ornamented roll or scroll, except in the case of the corner capitals, which have three volutes on their two outer faces, that on the external angle projecting diagonally. The debased Roman form of Ionic gave the capital four diagonal volutes, and curved the sides of the abacus. The spiral fillets of the Greek volute are continued along the face of the capital, beneath the abacus, whereas in the Roman

imitation the origin of the fillet is behind the echinus. The shaft, including the base and the capital to the bottom of the volute, is normally about 9 diameters high, and is generally fluted in 24 flutes, separated by fillets. The bases used with this order are various. The Attic base often occurs, and is the most beautiful and appropriate. The architrave is normally formed in three bands, each projecting slightly beyond that below it, the whole crowned by a rich molding. The frieze frequently bears figures in relief. The cornices fall under three classes: the simple but richly molded and strongly projecting Greek cornice, and the less refined dentil and modillion (Roman) cornices. The best examples of the Ionic order are the temple on the Ilissus, and the Erechtheum and the temple of Wingless Victory on the Acropolis of Athens. The details of the Erechtheum are notable for the delicate elaboration of their ornament; but the interior capitals of the Propylæa are, in their simple purity of line, perhaps the noblest remains of the Greek Ionic. The order was probably evolved by the Ionian Greeks from forms found in Assyrian architecture. See also cut under *Erechtheum.*—**Ionic sect or school,** the earliest series of Greek philosophers, Thales (who is said to have predicted an eclipse 585 B. C.), Anaximander, Anaximenes (in the sixth century B. C.), all of Miletus, and their later adherents. They are called the early physicists, because they mainly studied the material universe, and that in a rudely observational manner. The characteristic of the school is the prominence they gave to the question out of what the world is made (Thales said water, Anaximenes air), believing apparently that, this answered, the secret of the universe was solved. They made little of efficient causes, and, as distinct from living agents,

probably had no conception of such.—**Ionic school of painting**, in the history of ancient Greek art, an important school of painters in the latter part of the fifth and the early part of the fourth century B. C.: so called as distinguished from the Attic and Sicyonian schools. Its greatest masters were Zeuxis and Parrhasius.

II. *n.* In *pros.*: (*a*) An Ionic foot. (*b*) An Ionic verse or meter.

Ionicize (ī-on′i-sīz), *v. t.*; pret. and pp. *Ionicized*, ppr. *Ionicizing*. [< *Ionic* + *-ize*.] To make Ionic; confer an Ionic form upon.

He essays to dissect out a primitive Aeolic core, afterward *Ionicized*, and enlarged by interpolations and accretions. *New Princeton Rev.*, V. 412.

Ionidium (ī-ō-nid′i-um), *n.* [NL., irreg. < Gr. *ἰον*, a violet, + dim. suffix *-ιδιον*.] A name given by Ventenat (1803) to *Calceolaria*, a genus of plants of the family *Violaceæ*, tribe *Violeæ*, characterized by the sepals not being extended at the base, and by the five unequal petals. They are herbs, or rarely shrubs, with alternate or sometimes opposite leaves and generally solitary axillary or racemed flowers. About 50 species are known, of which 5 are found in tropical Asia and Africa, 6 in Australia, and the rest in America, chiefly tropical. The roots of several of the species contain an emetic, and have been used as a substitute for ipecacuanha. *Calceolaria parviflora* and *C. Popaya* are so used by the South Americans. The so-called white ipecacuanha is *C. Calceolaria* (*Viola Calceolaria* of Linnæus). *Cubelium concolor*, the green violet, is referred to this genus by some authors.

Ionism (ī′ō-nizm), *n.* [< Gr. as if **ἰωνισμός*, < *ἰωνιζειν*, speak in Ionic fashion: see *Ionize*.] An Ionic idiom; the use of Ionic idioms or dialect. *Amer. Jour. Philol.*, VII. 205.

Ionist (ī′ō-nist), *n.* [< *Ion(ize)* + *-ist*.] One who uses Ionic idioms or dialect. *Amer. Jour. Philol.*, VII. 209.

ionite (ī′ō-nīt), *n.* [< *Ione* (see def.) + *-ite*2.] A mineral resin found in Ione valley, Amador county, California.

Ionize (ī′ō-nīz), *v. t.*; pret. and pp. *Ionized*, ppr. *Ionizing*. [< Gr. *ἰωνίζειν*, speak in Ionic fashion, < Ἴωνες, Ionians: see *Ionic*.] To Ionicize. *Amer. Jour. Philol.*, VII. 234.

Ionornis (ī-ō-nôr′nis), *n.* [NL., irreg. < Gr. *ἰον*, violet (implying purple), + *ὄρνις*, a bird.] A notable genus of ralliform birds, the American sultans, hyacinths, or porphyry gallinules, family *Rallidæ* and subfamily *Gallinulinæ*, containing such species as the purple gallinule of the United States and warmer parts of America, *I. martinica*. *Reichenbach*, 1853.

iopterous (ī-op′te-rus), *a.* [< Gr. *ἰον*, a violet, + *πτερόν*, a feather.] Having wings of a violet color, as an insect.

iota (ī-ō′tä), *n.* [< L. *iota*, < Gr. *ἰῶτα*, < Phenician (Heb.) *yōdh*. In earlier E. use with extended meaning as *jot*: see *jot*1.] **1.** The name of the Greek letter I, *ι*, corresponding to the Latin and English I, i. In the latter form *ι*, and the Hebrew form י the letter was the smallest of the alphabet. When following a long vowel (as part of a diphthong), in Greek as now written, it is placed under the vowel to which it is attached, being then called *iota subscript*, as in *ῳ*, *ᾳ*.

2. A very small quantity; a tittle; a jot.

You will have the goodness then to put no stuffing of any description in my coat; you will not pinch me an *iota* tighter across the waist than is natural to that part of my body. *Bulwer*, Pelham, xliv.

iotacism (ī-ō′ta-sizm), *n.* [< L. *iotacismus*, < Gr. *ἰωτακισμός*, too much use of iota, repetition of iota, < *ἰῶτα*, iota: see *iota*.] Conversion of other vowel sounds into that of iota (English *ē*); specifically, in pronunciation of Greek, the practice of giving the sound of iota (*ι*) also to the vowels *η* and *υ*, and to the diphthongs *ει*, *ῃ*, *οι*, and *υι* indiscriminately. This is the rule in modern Greek. Opposed to *etacism*. Compare *lambdacism*, *rhotacism*.

Unquestionably the most characteristic feature of the present pronunciation is its *iotacism*.
J. Hadley, Essays, p. 139.

iotacist (ī-ō′ta-sist), *n.* [< *iotac(ism)* + *-ist*.] One who advocates the system of Greek pronunciation called iotacism.

ioterium (ī-ō-tē′ri-um), *n.*; pl. *ioteria* (-ä). [NL., < Gr. *ἰός*, poison, + *τερέω*, pierce.] In *entom.*, a poison-gland, as that at the base of the sting in a hymenopterous insect, or at the base of the chelicera in a spider. See cut under *chelicera*.

I O U (ī′ ō′ ū′), *n.* [So called from the letters *I O U* (standing for *I owe you*) used in the acknowledgment.] A memorandum or acknowledgment of debt less formal than a promissory note, and in England sometimes containing only these letters, with the sum owed and the signature of the debtor. It is not a promissory note, because no direct promise to pay is expressed.

Hee teacheth od fellowes play tricks with their creditors, who instead of payments write *I O V*, and so scoffe many an honest man out of his goods.
Breton, Courtier and Countryman, p. 9.

Mr. Micawber placed his *I. O. U.* in the hands of Traddles. . . . I am persuaded that this was quite the same to Mr. Micawber as paying the money.
Dickens, David Copperfield, xxxvi.

-ious. A termination consisting of the suffix *-ous* with a preceding original or euphonic vowel *i*. It formerly alternated with *-eous*. See *-eous* and *-ous*.

Iowan (ī′ō-wan), *a.* and *n.* **I.** *a.* Of or pertaining to Iowa, a State of the United States lying west of the Mississippi.

★ **II.** *n.* An inhabitant of Iowa.

ipecac (ip′ē-kak), *n.* [An abbr. of *ipecacuanha*.] Same as *ipecacuanha*.—**American ipecac**, an herb of the genus *Porteranthus*.—**Indian ipecac**, the root of a twining, shrubby, asclepiadaceous plant, *Tylophora vomitoria*, used in India as a substitute for ipecacuanha.

ipecacuanha (ip-ē-kak-ū-an′ä), *n.* [< Pg. *ipecacuanha* (= Sp. *ipecacuana*), < Tupi *ipecaaguene*, *ipe-kaa-guéne*, < *ipeh*, low, + *caá*, leaves, herb, + *guéne*, vomit.] The dried root of *Evea Ipecacuanha*, a small shrubby plant, a native of Brazil from Bahia to Rio de Janeiro. There are three varieties, the brown, red, and gray, all products of the same plant, and their differences are due to little more than age, place of growth, or mode of drying. The root is hard, and breaks short and granular (not fibrous), exhibiting a resinous, waxy, or farinaceous interior, white or grayish. It is emetic, purgative, and diaphoretic, and is much used in medicine, in large doses (1.5 grams) as an emetic, in smaller doses as a depressant and nauseant, in still smaller doses as a diaphoretic, and in the smallest as a stimulant to the stomach to check vomiting and produce appetite. Its physiological effects seem to depend on the presence of the alkaloid emetin. The root of *Evea Ipecacuanha* is the only thing recognized as ipecac by the British or the United States Pharmacopœia, but the name has been applied to various other plants with emetic properties, as to the root of *Psychotria emetica*, also called *Peruvian*, *striated*, or *black ipecacuanha*, said to contain emetin; also to the roots of various species of *Richardsonia*, called *white*, *amylaceous*, or *undulated ipecacuanha*. The name *American ipecacuanha* or *ipecacuanha spurge* is given to *Euphorbia Ipecacuanhæ*. *Porteranthus* is also called *American ipecac*. See cut under *Cephaëlis*.

Iphidea (i-fid′ē-ä), *n.* [NL., appar. as *Iphis* (*Iphid-*) + *-ea*.] **1.** A genus of chrysomelid beetles. *Baly*, 1865.—**2.** A genus of brachiopods. *Billings*, 1874.

Iphigenia (if″i-jē-nī′ä), *n.* [NL., < L. *Iphigenia*, < Gr. Ἰφιγένεια, in legend, daughter of Agamemnon.] **1** A genus of bivalve mollusks of the family *Donacidæ*, comprising *Iphigenia brasiliensis* and related species. *Schumacher*, 1817.—**2.** A subgenus of *Clausilia*. *Gray*, 1821.

Iphiona (if-i-ō′nä), *n.* [NL. (Cassini, 1817), perhaps irreg. < Gr. *ἰφυον*, a kind of herb.] A genus of composite plants, type of Schultz's division *Iphioneæ* of the *Euconyzeæ*, now referred to the tribe *Inuleæ*, subtribe *Inulinæ*, and by some regarded as a section of the genus *Inula*, to which the elecampane belongs, but from which it differs by its somewhat double pappus, the outer consisting of short bristles. It embraces about 10 species, inhabiting the Levant, Arabia, Turkestan, tropical and South Africa, and the Mascarene islands.

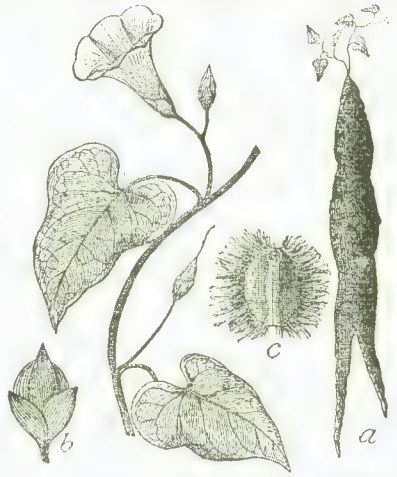
Iphioneæ (if-i-ō′nē-ē), *n. pl.* [NL. (C. H. Schultz, 1843), < *Iphiona* + *-eæ*.] A division of the *Asteraceæ*, typified by the genus *Iphiona*, now embraced in the tribe *Inuleæ* (which see).

Iphis (ī′fis), *n.* [NL., < L. *Iphis*, < Gr. Ἶφις (Ἰφι-, Ἰφιδ-), a masc. and fem. name.] **1.** A genus of brachyurous crustaceans of the family *Leucosiidæ*. *W. E. Leach*, 1817.—**2.** A genus of click-beetles or elaterids, having several large Madagascan species. *Laporte*, 1836.

Iphisa (if′i-sä), *n.* [NL. (Gray, 1851); cf. *Iphis*.] A genus of lizards constituting the family *Iphisidæ*. *I. elegans* is a species inhabiting northern Brazil and Guiana, of an olive-brown color marbled with black, the under parts yellowish white. The feet are small, with the inner finger clawless; the eyes are large.

Iphisa elegans.

Iphisidæ (i-fis′i-dē), *n. pl.* [NL., < *Iphisa* + *-idæ*.] A family of South American lizards, based by J. E. Gray upon the genus *Iphisa*. It is now merged in the family *Teiidæ*.



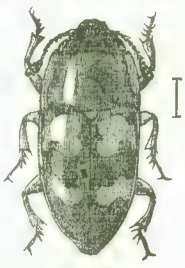
Iphthimus (if′thi-mus), *n.* [NL., < Gr. *ἰφθιμος*, strong, < *ἰφι*, strongly, earlier **ϝίφι*, perhaps dat. of *ἰς*, **ϝίς* = L. *vis*, strength, might: see *inion*2, *vim*.] A genus of tenebrione beetles, founded by Truqui in 1857. *I. opacus* is a species about three fourths of an inch long, with coarsely punctured thorax and elytra. It is found under bark.

Ipinæ (i-pī′nē), *n. pl.* [NL. (Erichson, 1843), < *Ips* + *-inæ*.] A subfamily of clavicorn beetles, of the family *Nitidulidæ*, whose typical genus is *Ips*, mainly characterized by the protuberance of the epistoma.

ipocrast, *n.* An obsolete form of *hippocras*.

ipocrisie, **ipocrite**, *n.* Obsolete (Middle English) forms of *hypocrisy*, *hypocrite*.

Ipomœa (ip-ō-mē′ä), *n.* [NL. (Linnæus), < *Ips*, a name given by Linnæus to *Convolvulus*, bindweed (< Gr. *ἰψ*, a worm: see *Ips*), + Gr. *ὁμοῖος*, like.] A genus of dicotyledonous sympetalous plants, belonging to the family *Convolvulaceæ*, tribe *Convolvuleæ*, characterized by having a 2- to 4-celled ovary, which is 4-ovuled, or rarely 3-celled and 6-ovuled. The capsule is 2- to 4-valved, rarely with an operculum, or rupturing irregularly. The stems are prostrate or erect, herbaceous or woody and climbing, and the leaves alternate, usually entire. The corolla is hypocrateriform or campanulate and 5-lobed. About 400 species have been described, but according to Engler and Prantl this number should be reduced to 300 good species. They occur in the warm parts of the world. The most important product of the genus is the sweet potato, furnished by the roots of *I. Batatas*, which is very extensively cultivated in all tropical countries. Jalap, a well-known medicine, is obtained from the roots of *Exogonium Purga* (*Ipomœa Purga* of Hayne), a native of Mexico. *Operculum Turpethum* (*Ipomœa Turpethum* of Robert Brown) is the Indian jalap. The wild potato of the West Indies is *I. fastigiata*, and *I. Pes-Capræ* is the seaside potato of the East and West Indies. *Quamoclit Quamoclit* (*Ipomœa Quamoclit* of Linnæus), the cypress-vine, Indian-pink, American red bell-flower, or sweet-william of the Barbados, was originally a native of tropical America. *Operculina tuberosa* (*Ipomœa tuberosa* of Linnæus) is the Spanish arbor-vine, Spanish woodbine, or seven-year vine. *Operculina purpurea* (*Ipomœa purpurea* of Roth, *Convolvulus purpureus* of Linnæus), a native of tropical America, is the common morning-glory of cultivation. *I. pandurata* of the eastern United States is the wild potato-vine or man-of-the-earth, the mecha-meck of the North American Indians. *I. digitata* is the Natal cotton-plant. Also, incorrectly, *Ipomœa* and *Ipomea*.



Flowering Branch of Wild Potato-vine (*Ipomœa pandurata*).
a, root; *b*, fruit; *c*, seed.

ipotame, **ipotayne**, *n.* Middle English forms of *hippotame*.

ippocras, *n.* An obsolete form of *hippocras*.

Ips (ips), *n.* [NL. (Fabricius, 1776), < Gr. *ἰψ*, a worm that eats horn and wood; also one that eats vine-buds.] A genus of clavicorn beetles, of the family *Nitidulidæ*, having the antennal club three-jointed, labrum connate with epistoma, anterior coxæ open, and thorax not margined at base. *Ips fasciatus* is a common United States species, shining-black with two pairs of yellow bands on the elytra. *I. ferrugineus* is a European species.

Ips fasciatus.
(Line shows natural size.)

ipse dixit (ip′sē dik′sit). [< L. *ipse dixit*, he himself has said (so): *ipse* (OL. also *ipsus*), he

himself (< *is*, he (see *he*[1]), + *-pse* for *-pte*, an emphasizing suffix, 'self,' 'same,' connected with *potis*, powerful: see *potent*); *dixit*, 3d pers. perf. ind. of *dicere*, say: see *diction*.] An assertion without proof; a dogmatic expression of opinion; a dictum.

It requires something more than Brougham's flippant *ipse dixit* to convince me that the office of chancellor is such a sinecure and bagatelle.
Greville, Memoirs, March 15, 1831.

To acquiesce in an *ipse dixit*. *Whately.*

That day of *ipsedixits*, I trust, is over.
J. H. Newman, Letters (1875), p. 146.

ipsedixitism (ip-sē-dik′sit-izm), *n.* [< *ipse dixit* + *-ism*.] The practice of dogmatic assertion. [Rare.]

It was also under Weigel's influence that he [Pufendorf] developed that independence of character which never bent before other writers, however high their position, and which showed itself in his profound disdain for *ipsedixitism*, to use the piquant phrase of Bentham.
Encyc. Brit., XX. 99.

ipsissima verba (ip-sis′i-mą vėr′bą). [L.: *ipsissima*, neut. pl. of *ipsissimus*, the very same, superl. of *ipse*, he himself, the same (see *ipse dixit*); *verba*, pl. of *verbum*, word: see *verb*.] The very same words; the self-same words; the precise language, word for word.

It is his [the medical man's] duty to make, on the spot, a note of the words actually used. There should be no paraphrase or translation of them, but they should be the *ipsissima verba* of the dying man.
A. S. Taylor, Med. Jurisprudence, p. 7.

ipso facto (ip′sō fak′tō). [L.: *ipso*, abl. neut. of *ipse*, he himself (see *ipse dixit*); *facto*, abl. of *factum*, fact: see *fact*.] By the fact itself; by that very fact.

The religion which is not the holiest conceivable by the man who holds it is condemned *ipso facto*.
F. P. Cobbe, Peak in Darien, p. 6.

i. q. An abbreviation of Latin *idem quod*, 'the same as.'

ir-[1]. Assimilated form (in Latin, etc.) of *in-*[2] before *r*. In the following words, in the etymology, the prefix *ir-*[1] is usually referred directly to the original *in-*[2] or *in*[2].

ir-[2]. Assimilated form (in Latin, etc.) of *in-*[3] before *r*. In the following words, in the etymology, the prefix *ir-*[2] is usually referred directly to the original *in-*[3].

Ir. 1. An abbreviation of *Irish*.—2. In *chem.*, the symbol for *iridium*.

iracund (ī′rą-kund), *a.* [= OF. *iracond* = Sp. Pg. *iracundo* = It. *iracundo*, *iracondo*, < L. *iracundus*, angry, < *ira*, anger: see *ire*[2].] Angry; irritable; passionate. [Rare.]

A spirit cross-grained, fantastic, *iracund*, incompatible.
Carlyle, Misc., IV. 87.

iracundiously† (ī-rą-kun′di-us-li), *adv.* [< **iracundious* (cf. OF. *iracondieux*), for **iracundous* (cf. OF. *iracondos*) (< L. *iracundus*, angry: see *iracund*), + *-ly*[2].] Angrily; passionately.

Drawing out his knife most *iracundiously*.
Nashe, Lenten Stuffe (Harl. Misc., VI. 166).

irade (i-rä′de), *n.* [Turk. *irade*, a decree, command, order, will, volition.] A written decree of the Sultan of Turkey.

For the ministers were already obliged to exercise many of the attributes of the Sovereign, and had constantly to act upon their own authority in cases where an imperial *irade* was strictly requisite.
Nineteenth Century, XXIII. 292.

I-rail (ī′rāl), *n.* An iron rail shaped in section like the letter I; a reversible rail.

iraint, *n.* A Middle English form of *arain*.

Iranian (i-rā′ni-ąn), *a.* and *n.* [< *Iran* (see def.), < Pers. *Irān*, Iran, Persia (see *Aryan*), + *-ian*.] **I.** *a.* Relating or pertaining to Iran or the people of Iran, the ancient name of the region lying between Kurdistan and India, and the modern Persian name of Persia: specifically applied to a branch of Indo-European or Aryan tongues, including Persian, Zend, Pehlevi, Parsi or Pazend, and cognate tongues. The word is derived from the legendary history of the Persian race given in Firdusi's "Book of Kings," according to which Iran and Tur were two of three brothers, from whom the tribes Iran (Persians) and Turan (Turks and their cognate tribes) sprang. See *Turanian*.

The word *Iranian*, as yet unappropriated as an alphabetic designation, is perhaps less unsatisfactory than any other name that can be found, since it may fairly be applied to the oldest as well as to the more modern forms of the alphabet of the old Persian empire.
Isaac Taylor, The Alphabet, II. 229.

II. *n.* An inhabitant of Iran; a member of one of the races speaking Iranian languages.

For the ornamentation of their buildings, externally, and to some extent internally, the *Iranians*, imitating their Semitic predecessors, employed sculpture.
G. Rawlinson, Origin of Nations, p. 102.

Iranic (ī-ran′ik), *a.* [< NL. *Iranicus*, < *Iran*: see *Iranian*.] Of or pertaining to ancient Iran or to its inhabitants; Iranian in the widest sense: as, the *Iranic* family of languages.

irascibility (ī-ras-i-bil′i-ti), *n.* [= F. *irascibilité* = Pr. *iracibilitat* = Sp. *irascibilidad* = Pg. *irascibilidade* = It. *irascibilità*; as *irascible* + *-ity*: see *-bility*.] The quality of being irascible; irritability of temper.

The *irascibility* of this class of tyrants is generally exerted upon petty provocations. *Johnson*, Rambler, No. 112.

irascible (ī-ras′i-bl), *a.* [< F. *irascible* = Sp. *irascible* = Pg. *irascivel* = It. *irascibile*, < LL. *irascibilis*, < L. *irasci*, be angry, < *ira*, anger: see *ire*[2].] 1. Susceptible of anger; easily provoked or inflamed with resentment; choleric: as, an *irascible* man; an *irascible* temper.

Middleton when young was a Dilettante in music; and Dr. Bentley, in contempt, applied the epithet "fiddling Conyers." Had the *irascible* Middleton broken his violin about the head of the learned Grecian, and thus terminated the quarrel, the epithet had then cost Bentley's honour much less than it afterwards did.
D'Israeli, Quarrels of Authors, p. 395.

2. Excited by or arising from anger; manifesting a state of anger or resentment.

I know more than one instance of *irascible* passions subdued by a vegetable diet. *Arbuthnot*, Aliments.

I have given it as my opinion that the *Irascible* emotion and the strong antipathies are to a certain extent outbursts of the sentiment of power, resorted to, like the tender outburst, as a soothing and consoling influence under painful irritation.
A. Bain, Emotions and Will, p. 467.

=Syn. 1. *Irascible*, *Irritable*, *Passionate*, hasty, touchy, testy, splenetic, snappish, peppery, fiery, choleric. *Irascible* indicates quicker and more intense bursts of anger than *irritable*, and less powerful, lasting, or manifest bursts than *passionate*.

irascibleness (ī-ras′i-bl-nes), *n.* Irascibility.

irascibly (ī-ras′i-bli), *adv.* In an irascible manner.

irate (ī-rāt′), *a.* [= Pg. *irado* = It. *irato*, < L. *iratus*, angered, angry, < *irasci*, be angry: see *irascible*.] Excited to anger; made angry; enraged; incensed.

Here his words failed him, and the *irate* colonel, with glaring eyes and purple face, . . . stood . . . speechless before his young enemy. *Thackeray*, Virginians, x.

irchen†, **irchon**†, **irchoun**†. Obsolete forms of *urchin*.

ire[1] (ī′re), *n.* [< ME. *ire*, *yre*, abbr. of *iren*, iron.] Iron. [Now only prov. Eng.]

The cruel *ire*, red as any glede.
Chaucer, Knight's Tale, l. 1139.

He let nine platus of *ire*,
Sumdel thinne and brode.
MS. Laud, 108, f. 92. (*Halliwell.*)

Euerych cart that bryngeth *yre* other steel, twey pans.
English Gilds (E. E. T. S.), p. 58.

ire[2] (īr), *n.* [< ME. *ire*, *yre*, < OF. *ire* = Pr. Sp. Pg. It. *ira*, < L. *ira*, anger, wrath.] Anger; wrath; keen resentment.

When Antenor had tolde & his tale endit,
The kyng was caste into a clene *yre*,
And wrothe at his wordes as a wode lion.
Destruction of Troy (E. E. T. S.), l. 1860.

My gode fader, tell me this,
What thing is *ire*? Sone, it is
That in our englissh wrath is hote.
Gower, Conf. Amant., I. 230.

Language cannot express the awful *ire* of William the Testy on hearing of the catastrophe at Fort Goed Hoop.
Irving, Knickerbocker, p. 222.

=Syn. *Vexation*, *Indignation*, etc. See *anger*[1].

ire[2]†, *v. t.* [< ME. *iren*; < *ire*[2], *n.*] To anger; fret; irritate.

Eke to noo tree thaire dropping is delite,
Her brere thorne and her owne kynde it *ireth*.
Palladius, Husbondrie (E. E. T. S.), p. 57.

ireful (īr′fûl), *a.* [< ME. *ireful*, *irefull*, *yreful*; < *ire*[2] + *-ful*.] Full of ire; angry; wroth.

An *yreful* body is neuer quyet, nor in rest where he doth dwel
One amonge .x. is ix. to many, his malyce is so cruell.
Quoted in *Babees Book* (E. E. T. S.), p. cxxx.

The *ireful* bastard Orleans . . . I soon encountered.
Shak., 1 Hen. VI., iv. 6, 16.

Many an *ireful* glance and frown, between,
The angry visage of the Phantom wore.
Barham, Ingoldsby Legends, I. 105.

irefully (īr′fûl-i), *adv.* In an ireful or angry manner; angrily; wrathfully.

The people . . . began . . . *irefully* to champ upon the bit they had taken into their mouths.
Hooker, Eccles. Polity, Pref., ii.

irefulness (īr′fûl-nes), *n.* [< ME. *irefulnesse*; < *ireful* + *-ness*.] The condition of being ireful; wrath; anger; fury.

Some through couetousnes, and some through *irefulnes* and rashnesse, . . . riffled ye goods of the Romane citizens.
Golding, tr. of Cæsar, fol. 204.

irent, *n.* and *a.* A Middle English form of *iron*.

Irena (ī-rē′nä), *n.* [NL. (Horsfield, 1820; later *Irene*—Boie, 1826), < Gr. Εἰρήνη, a personification of *εἰρήνη*, peace: see *Irene*.] In *ornith.*, a remarkable genus of old-world passerine birds of uncertain position, type of the subfamily *Ireninæ*; the so-called fairy bluebirds. They are brilliantly blue and black in color, about as large as robins, with stout, somewhat shrike-like bill, whose nasal fossæ

Fairy Bluebird (*Irena puella*).

are densely feathered, with rictal and nuchal bristles, and even tail of 12 feathers. There are several species characteristic of the region from India to the Philippines, as *I. puella*, *I. cyanea*, and *I. turcosa*.

irenarch (ī′rę-närk), *n.* [Also *eirenarch*; < LL. *irenarcha*, *irenarches*, < Gr. *εἰρηνάρχης*, < *εἰρήνη*, peace (see *Irene*), + *ἀρχή*, government, rule, < *ἄρχειν*, rule.] A justice or guardian of the peace in the eastern part of the Roman empire and under the Eastern and Byzantine empires.

Irone (ī-rē′nē), *n.* [< Gr. Εἰρήνη, a personification of *εἰρήνη*, peace, quiet.] 1. The fourteenth planetoid, discovered by Hind at London in 1851.—2. In *zoöl.*: (*a*) A genus of acalephs. Also written *Eirene*. *Eschscholtz*, 1829. (*b*) Same as *Irena*.

irenic (ī-ren′ik), *a.* [< Gr. *εἰρηνικός*, of or for peace, peaceful, < *εἰρήνη*, peace: see *Irene*.] Promoting or fitted to promote peace; peaceful; pacific: chiefly used in theology. See *irenicon* and *irenics*.

Mark has no distinct doctrinal type, but is catholic, *irenic*, unsectarian, and neutral as regards the party questions within the apostolic church.
Schaff, Hist. Christ. Church, I. § 81.

irenica, *n.* Plural of *irenicon*.

irenical (ī-ren′i-kąl), *a.* [< *irenic* + *-al*.] Of the character of an irenicon; conciliatory; irenic: as, *irenical* theology.

The bishop of Carlisle, . . . whose thoughtful essays are essentially *irenical*, is an instructive companion.
Science, III. 131.

irenicon (ī-ren′i-kon), *n.*; pl. *irenica* (-kä). [< Gr. *εἰρηνικόν*, neut. of *εἰρηνικός*, of or for peace: see *irenic*.] 1. A proposition, scheme, or treatise designed to promote peace, especially in the church.

They must, in all likelihood (without any other *irenicon*), have restored peace to the Church. *South.*

No doubt it [the Gospel of St. John] is an *Irenicon* of the church, in the highest and best sense of the term; . . . but it is not an *Irenicon* at the expense of truth and facts.
Schaff, Hist. Christ. Church, I. § 83.

2. *pl.* The deacon's litany (diaconica) or great synapte at the beginning of the liturgy of the Greek Church: named from the petitions "In peace let us pray of the Lord . . . For the peace from above . . . For the peace of the whole world . . . let us pray, etc." (response "Kyrie eleison"), with which it opens.

irenics (ī-ren′iks), *n.* [Pl. of *irenic*: see *-ics*.] Irenical theology: opposed to *polemics*. *Schaff*, Hist. Christ. Church, VI. 650.

Ireninæ (ī-rę-nī′nē), *n. pl.* [NL., < *Irena* + *-inæ*.] A subfamily of birds, typified by the genus *Irena*, of uncertain systematic position. The *Ireninæ* have been considered as related to the drongo-shrikes, and placed under *Dicruridæ*, as by G. R. Gray (1869) and others, and to the bulbuls. *Pycnonotidæ*, as by Jerdon and Blyth; and later they have been referred to *Timeliidæ*.

Iresine (ī-re-sī′nē), *n.* [NL. (Linnæus), so called in ref. to the woolly calyx, < Gr. *εἰρεσιώνη*, a branch of laurel or olive entwined with fillets of wool, borne in processions at festivals, irreg. < *εἶρος*, wool.] A genus of plants of the family *Amaranthaceæ*, tribe *Gomphreneæ*. They are herbs, with opposite petioled leaves and minute scarious white flowers, crowded into clusters or spiked and branching panicles. About 20 species are known, natives of

America and Africa. *I. paniculata*, the blood-leaf, Juba's-bush, or Juba's-brush, is native from Ohio southward, and in tropical America. Several of the species are cultivated for ornament.

irian (ī'ri-an), *a.* [< *iri(s)* + *-an.*] Same as *iridian.* [Rare.]

The iris receives the *irian* nerves. *Dunglison.*

Iriartea (ir-i-är'tē-ä), *n.* [NL. (Ruiz and Pavon, 1794), so called from Juan *Iriarte*, an amateur Spanish botanist.] A genus of tree-palms of about 10 species, of tropical America.

Iriarteeæ (ir-i-är-tē'ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1883), < *Iriartea* + *-eæ.*] A subtribe of palms, typified by the genus *Iriartea.* It embraces four other genera. Three of them are natives of tropical America, chiefly of Brazil and the United States of Colombia, and one, *Juania*, is confined to the island of Juan Fernandez.

Iriartella (ir-i-är-tel'ä), *n.* [NL. (Wendland, 1862), < *Iriartea* + dim. *-ella.*] A former genus of Amazonian palms, now referred to *Iriartea*, from other members of which it differs in having a slender trunk scarcely an inch thick, and seldom more than 20 feet high. The flowers also differ. The only species, *Iriartea setigera*, is called the *blowing-cane palm*, and is employed by the natives of the Amazon and Rio Negro for making thin blow-pipes for the discharge of poisoned arrows.

Iricism† (ī'ri-sizm), *n.* [< *Irish* (Latinized *Iric-*) + *-ism.*] Same as *Irishism.*

A pretty strong circumstance of *Iricism.*
H. Walpole, To Mann, April 25, 1743.

Iricize (ī'ri-sīz), *v. t.* and *i.*; pret. and pp. *Iricized*, pp. *Iricizing.* Same as *Irishize.*

Norman names . . . *iricized* gradually with their owners. *Miss Sewell*, Chr. Names, II. 481.

irid (ī'rid), *n.* [< L. *iris* (*irid-*), < Gr. *ἶρις* (*ἰριδ-*), iris: see *iris*, 6, 8, 9.] 1. The iris of the eye. [Rare.]

Her friend had quicker vision than herself; and Caroline seemed to think that the secret of her eagle acuteness might be read in her dark gray *irids.*
Charlotte Brontë, Shirley, xvii.

2. A plant of the family *Iridaceæ.*

Iridaceæ (ir-i-dā'sē-ē), *n. pl.* [NL. (Lindley, 1835), < *Iris* (*Irid-*) + *-aceæ.*] A family of monocotyledonous plants, which includes 3 tribes, 59 genera, and over 1,000 species, widely distributed throughout the temperate or warm regions of the world. The *Iridaceæ* are most abundant in the Mediterranean region and South Africa, and are not rare in America; there are few in Australia and in Asia. They are perennial herbs, with equitant two-ranked leaves and regular or irregular perfect flowers, which are from a spathe of two or more leaves or bracts. The flowers are usually showy, and furnish some of the most highly prized of cultivated plants, among them *Iris*, *Ixia*, *Crocus*, *Gladiolus*, etc. See cuts under *Crocus* and *Iris.*

iridaceous (ir-i-dā'shius), *a.* [< *Iris* (*Irid-*) + *-aceous.*] Resembling or pertaining to plants of the genus *Iris*; belonging to the *Iridaceæ.*

Iridæa (ir-i-dē'ä), *n.* [NL. (Bory de Saint Vincent, 1829), < Gr. *ἶρις* (*ἰριδ-*), a rainbow: see *iris.*] A genus of red algæ growing on rocks in the sea, distinguished by its flat, simple, or loosely divided frond, bearing compound cystocarps immersed in its substance. *I. edulis* is called *dulse* in the south of England. (See *dulse.*) It is of nutritious quality, and is eaten by fishermen, either raw ★or pinched between hot irons.

iridal (ī'ri-dal), *a.* [< *iris* (*irid-*) + *-al.*] Belonging to or resembling the rainbow.

Descartes came far nearer the true philosophy of the *iridal* colours. *Whewell.*

iridectomy (ir-i-dek'tō-mi), *n.* [< Gr. *ἶρις* (*ἰριδ-*), the iris, + *ἐκτομή*, a cutting out, < *ἐκτέμνειν*, *ἐκταμεῖν*, cut out, < *ἐκ*, out, + *τέμνειν*, *ταμεῖν*, cut.] In *surg.*, the operation of cutting out a part of the iris, as for the formation of an artificial pupil.

irideremia (ir″i-de-rē'mi-ä), *n.* [NL., < Gr. *ἶρις* (*ἰριδ-*), iris, + *ἐρημία*, solitude, desolation, absence: see *eremic, eremite.*] Absence, partial or complete, of the iris.

irides, *n.* Latin plural of *iris.*

iridesce (ir-i-des'), *v. i.*; pret. and pp. *iridesced*, ppr. *iridescing.* [< *iris* (*irid-*) + *-esce.*] To be iridescent; exhibit iridescence.

General plumage of metallic lustre, *iridescing* dark green on most parts. *Coues*, Key to N. A. Birds, p. 427.

iridescence (ir-i-des'ens), *n.* [< *iridescen(t)* + *-ce.*] The condition of being iridescent; exhibition of alternating or intermingling colors like those of the rainbow, as in mother-of-pearl, where it is an effect of interference (see *interference*, 5); any shimmer of glittering and changeable colors.

The St. Mark's porches are full of doves, that nestle among the marble foliage, and mingle the soft *iridescence* of their living plumes, changing at every motion, with the tints, hardly less lovely, that have stood unchanged for seven hundred years.
Ruskin, Stones of Venice, II. iv. § 14.

iridescent (ir-i-des'ent), *a.* [< *iris* (*irid-*) + *-escent.*] Exhibiting or giving out colors like those of the rainbow; gleaming or shimmering with rainbow colors; more generally, glittering with different colors which change according to the light in which they are viewed, without reference to what the colors are; lustrously versicolor; of changeable metallic sheen, as certain birds, insects, minerals, glass, fabrics, etc.

The whole texture of . . . [Chaucer's] mind, though its substance seem plain and grave, shows itself at every turn *iridescent* with poetic feeling like shot silk.
Lowell, Study Windows, p. 287.

Iridescent glass, glass having a finely laminated surface that reflects light in colors like mother-of-pearl. Ancient glass long buried exhibits this property as a result of partial decay. Modern glass is made iridescent in imitation of the ancient by treatment with metallic fumes while hot, or with acids under pressure; but such glass is uniformly translucent, and has not the laminated structure and more or less marked opacity of the old. Metals and fabrics also have been made iridescent by chemical treatment. Such metals are sometimes called *irisated* metals, while the process is called *irisation.*

iridesis (ī-rid'e-sis), *n.* [NL.] Same as *iridodesis.*

iridian (ī-rid'i-an), *a.* [< *iris* (*irid-*) + *-ian.*] In *anat.*, of or pertaining to the iris of the eye: as, *iridian* colors; *iridian* muscle, nerve, artery. Also, rarely, *irian.*

iridicolor, iridicolour (ir'i-di-kul″or), *a.* [< L. *iris* (*irid-*), a rainbow (see *iris*), + *color*, color: see *color.*] In *zoöl.*, reflecting prismatic hues which change as the surface is seen from various directions; iridescent.

iridine (ir'i-din), *a.* [< *iris* (*irid-*) + *-ine*[1].] Iridescent; rainbow-colored. [Rare.]

The horned-pout, with its pearly *iridine* breast and iron-brown back. *S. Judd*, Margaret, i. 14.

iriditis (ir-i-dī'tis), *n.* [NL.] Same as *iritis.*

iridium (i-rid'i-um), *n.* [NL., so called because of the varying tints of its salts when passing from one state of oxidation to the other; < Gr. *ἶρις* (*ἰριδ-*), a rainbow: see *iris.*] Chemical symbol, Ir; atomic weight, 193.1. A metal of silver-white color, belonging to the platinum family, and, so far as known, always present in native platinum. Various analyses of Russian platinum give from a trace to 5½ per cent. of iridium; and analyses of Californian platinum give from 0.85 to 4.20 per cent. of the same. Iridium also occurs combined with osmium, forming what is known as *iridosmium* or *iridosmine*, which also contains more or less ruthenium and rhodium. (See *iridosmium.*) Iridium is hard, but malleable, and even less fusible and less easily attacked by chemical reagents than platinum. Iridium as manufactured by Matthey, to be used in the alloy of platinum and iridium, at the recommendation of the International Commission of Weights and Measures, for the standard kilogram and meter, had (the purest obtained) a specific gravity of 22.42. The alloy thus prepared, which contained about 10 per cent. of iridium, is believed to possess those qualities desirable in a standard weight or measure, which is intended to be preserved for all time, in a higher degree than any other known substance or combination of substances. For the geographical distribution of the various members of this group of metals, see *platinum.*

iridization (ir″i-di-zā'shon), *n.* [< *iridize* + *-ation.*] 1. The state of being, or the act or process of rendering, iridescent; exhibition of the colors of the rainbow.

This rainbow was wholly white, without even as much *iridization* as is noticeable in halos.
Pop. Sci. Mo., XXV. 288.

2. In *pathol.*, the rainbow-like appearance about a light seen by persons suffering from glaucoma.

iridize (ir'i-dīz), *v. t.*; pret. and pp. *iridized*, ppr. *iridizing.* [< *iris* (*irid-*) + *-ize.*] To make iridescent, purposely or by the action of slow decay. See *iridescent glass*, under *iridescent.*

iridochoroiditis (ir″i-dō-kō-roi-dī'tis), *n.* [NL., < *iris* (*irid-*) + *choroiditis*, q. v.] Inflammation of the iris and the choroid coat of the eye.

iridocyclitis (ir″i-dō-si-klī'tis), *n.* [NL., < *iris* (*irid-*) + *cyclitis*, q. v.] Inflammation of the iris and the ciliary body of the eye.

iridodesis (ir-i-dod'e-sis), *n.* [NL., < Gr. *ἶρις* (*ἰριδ-*), the iris, + *δέσις*, a binding together, < *δεῖν*, bind.] In *surg.*, the operation of drawing a part of the iris into an incision in the sclerocorneal junction, and fastening it there, for the purpose of changing the position of the pupil. Also *iridesis.*

iridodonesis (ir″i-dō-dō-nē'sis), *n.* [NL., < Gr. *ἶρις* (*ἰριδ-*), iris, + **δόνησις*, a shaking (cf. *δονητός*, shaken), < *δονεῖν*, shake.] Tremulousness of the iris, so that it wavers and trembles on the movement of the eye. It is produced by any cause which withdraws the support of the lens from the edge of the iris, as the removal or dislocation of the lens.

iridoplegia (ir″i-dō-plē'ji-ä), *n.* [NL., < Gr. *ἶρις* (*ἰριδ-*), the iris, + *πλαγή*, a stroke.] Paralysis of the iris.

Iridoprocne (ir″i-dō-prok'nē), *n.* [NL., < Gr. *ἶρις* (*ἰριδ-*), a rainbow, + Πρόκνη, in legend daughter of Pandion, changed into a swallow.] A genus of *Hirundinidæ*, the type of which is the common white-bellied swallow of the United States, *I. bicolor*; the iris-swallows: so called from the iridescent quality of the plumage. *Coues*, 1878.

iridorhexis (ir″i-dō-rek'sis), *n.* [NL., < Gr. *ἶρις* (*ἰριδ-*), the iris, + *ῥῆξις*, a breaking, < *ῥηγνύναι*, break.] In *surg.*, a combined cutting and tearing operation for artificial pupil in cases of firm posterior synechia; in *pathol.*, rupture of the iris.

iridosmine (ir-i-dos'min), *n.* [< *irid(ium)* + *osm(ium)* + *-ine*[2].] Same as *iridosmium.*

iridosmium (ir-i-dos'mi-um), *n.* [NL., < *irid(ium)* + *osmium.*] A native alloy of the metals iridium and osmium, in different proportions, usually containing also some rhodium, ruthenium, platinum, etc. It crystallizes in the hexagonal system, has a tin-white to steel-gray color, and a specific gravity varying from 19.3 to 21, and is nearly as hard as quartz. It is found in minute flat scales with platinum in the Ural mountains, South America, and Australia, and also in northern California. Iridosmium is fusible with great difficulty, and resists all ordinary chemical reagents. It has a limited use for the pointing of gold pens. Also *osmiridium.*

iridotomy (ir-i-dot'ō-mi), *n.* [< Gr. *ἶρις* (*ἰριδ-*), the iris, + *τομή*, a cutting.] Incision of the ★iris.

iris (ī'ris), *n.*; pl. *irises*, *irides* (ī'ris-ez, ī'ri-dēz). [ME. *iris*, a precious stone; = F. *iris* = Sp. Pg. *iris* = It. *iride*, < L. *iris*, < Gr. *ἶρις*, the rainbow (Ἶρις, L. *Iris*, the goddess of the rainbow), the iris of the eye, a kind of lily.] 1. The rainbow.—2. [*cap.*] In *classical myth.*, the goddess of the rainbow and messenger of the gods, attached especially to Hera. She was considered as a radiant maiden borne in swift flight on golden wings, and was often represented with the herald's attributes of Hermes—the talaria and caduceus. Hence sometimes used for any messenger.

Let me hear from thee;
For wheresoe'er thou art in this world's globe,
I'll have an *Iris* that shall find thee out.
Shak., 2 Hen. VI., iii. 2, 407.

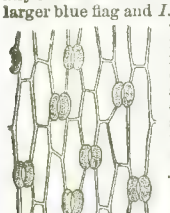
3. [*cap.*] The seventh planetoid, discovered by Hind at London in 1847.—4. An appearance resembling a rainbow; an appearance of the hues of a rainbow, as seen in sunlit spray, the spectrum of sunlight, etc.; any iridescence.

In the Spring a livelier *iris* changes on the burnish'd dove.
Tennyson, Locksley Hall.

5†. A precious stone.

It [a vyne made of fyne gold] hath many clustres of grapes, somme white, somme grene, . . . the white ben of cristalle and of berylle and of *iris.*
Mandeville, Travels, p. 219.

6. In *anat.*, a contractile colored curtain suspended vertically in the aqueous humor of the eye, between the cornea and the lens, separating the anterior and posterior chambers, which intercommunicate through the pupil. The iris gives the color to the eye, by the presence or absence of pigment, and regulates, by contraction and dilatation of its aperture, the amount of light admitted to the eye. The movements of the iris, and consequently the size and shape of the pupil, are effected by two sets of muscular fibers, circular and radiating. The circular fibers which contract the pupil are under the control of the third cranial nerve, while the innervation of the radiating fibers is through the cervical sympathetic. The pupil contracts when the retina is stimulated by light, and on convergence or on accommodation. The pupil dilates on stimulation of the skin. When its contraction is uniform, the pupil always remains circular, as in man; in other cases, as that of the cat, the pupil is a narrow slit when contracted, though circular when dilated; in others, again, the pupil has a more constant oval, elliptical, oblong, or other shape. Muscular action of the iris is usually automatic, depending upon the stimulus of light; but many animals, as birds, have striped and probably voluntary iridian muscles. Some drugs affect the iris powerfully and specifically: thus, opium contracts and belladonna dilates the pupil. Great as is the range of color in the human iris, from light-bluish and grayish tints through all shades of brown to blackish, it is slight in comparison with that of birds, where not only the browns, but bright reds, greens, and blues are found, and sometimes pure white. The iris of albinos is generally pink, being devoid of pigment, and consequently displaying the color of the delicate blood-vessels. The pupil normally appears black, the dark coat of the back of the eyeball being seen through this aperture. See cuts under *eye*[1].



In these [dark-eyed hawks] the wings are pointed, the second feather in the wing is the longest, and the *irides* are dark-brown. *Encyc. Brit.*, IX. 6.

7. In *entom.*, the first or inner ring of an ocellated spot, adjoining the pupil, being a light-colored circle with a dark center and outer bor-

der.—8. [*cap.*] [NL. (Linnæus).] A genus of monocotyledonous plants of the family *Iridaceæ* and the tribe *Moræeæ*, having the perianth 6-parted, the 3 outer divisions spreading or reflexed, and the 3 inner smaller and erect. The pod is 3- to 6-angled. They are perennial herbs with sword-shaped or grassy leaves and generally large and showy purple, yellow, or white flowers. About 180 species are known, natives of Europe, northern Africa, and temperate Asia and America. They are widely known in cultivation under the name of *fleur-de-lis* (*flower-de-luce*), *I. Germanica* being the common cultivated form. The wild species are very generally known in America as *blue flag*, *I. versicolor* being the larger blue flag and *I. prismatica* the slender blue flag. *I. verna* of the eastern United States is the dwarf iris, and *I. cristata* of nearly the same range is the crested dwarf iris. *I. Pseudacorus* of Europe and Russian Asia is the yellow iris or yellow flag. The roots possess astringent qualities, and the seeds when roasted are used in Great Britain as a substitute for coffee. *I. fœtidissima* of western Europe is the fetid iris, gladden, or roast-beef plant. The orris-root of commerce is supplied by *I. Florentina*. This root possesses cathartic and emetic properties, and from its agreeable odor is also used in making tooth- and hair-powders. Six extinct species of *Iris* have been described from the Tertiary deposits of Europe (one in Spitzbergen), and several allied forms from lower formations, under the names *Iridium* and *Irites*.

Blue Flag (*Iris versicolor*). 1, inflorescence; 2, rootstock with leaves; *a*, stamen; *b*, stigma; *c*, fruit.

Epidermis of Leaf of *Iris*, showing the stomata.

9. A plant of the genus *Iris*.

> Each beauteous flower,
> *Iris* all hues, roses, and jessamin,
> Rear'd high their flourish'd heads.
> *Milton*, P. L., iv. 698.

> We glided winding under ranks
> Of *iris*, and the golden reed.
> *Tennyson*, In Memoriam, ciii.

Iris blue. Same as *bice*.—**Iris diaphragm.** See *diaphragm*.—**Iris disease,** in *pathol.*, herpes iris.—**Iris green.** Same as *sap-green*.—**Snake's-head iris,** a plant, *Hermodactylus* (*Iris*) *tuberosus*.

irisated (ī'ri-sā-ted), *a.* [< *iris* + *-ate*[1] + *-ed*[2].] Rainbow-colored; iridescent.

> A variety of hooks were used for different kinds of fish and according to the time of day, *irisated* shells being applied at noon and in a bright sun, while white ones served early in the morning and late in the evening.
> *Science*, X. 115.

irisation (ī-ri-sā'shon), *n.* [< *iris* + *-ation*.] The process of rendering iridescent; also, iridescence. [Rare.]

iriscope (ī'ri-skōp), *n.* [< Gr. *ἶρις*, a rainbow, + *σκοπεῖν*, view.] A philosophical toy for exhibiting prismatic colors. See the extract.

> It [the *iriscope*] consists of a plate of highly polished black glass, having its surface smeared with a solution of fine soap and subsequently dried by rubbing it clean with a piece of chamois-leather. If the breath is directed through a glass tube upon a glass surface thus prepared, the vapor is deposited in brilliant colored rings, the outermost of which is black, while the innermost has various colors, or no color at all, according to the quantity of vapor deposited. The colors in these rings, when seen by common light, correspond with Newton's reflected rings, or those which have black centers, the only difference being that in the plate of vapor, which is thickest in the middle, the rings in the *iriscope* have black circumferences.
> *Sir David Brewster*, Philosophical Transactions (1841), p. 43.

irised (ī'rist), *a.* [< *iris* + *-ed*[2].] **1.** Containing or exhibiting colors like those of the rainbow.

> The gay can weep, the impious can adore,
> From morn's first glimmerings on the chancel floor
> Till dying sunset sheds his crimson stains
> Through the faint halos of the *irised* panes.

2. The language of the native Celtic race in Ireland. It is in age and philological value the most important language of the Celtic family, though its antiquity and importance have been much exaggerated by tradition and patriotism. The alphabet is an adaptation of the Latin. As heretofore printed, the letters, like the so-called Anglo-Saxon letters, are usually made to resemble a conventionalized form of the Latin alphabet in use in Britain in the early middle ages. Gaelic is a comparatively recent form of the Irish spoken by the Celts of Scotland. It differs but slightly from the Irish of the same age. Modern Irish is greatly corrupted in pronunciation, as compared with the Old Irish; but it retains in great part the old orthography. As a living speech it is fast going out of use.

3. English as spoken by natives of Ireland, with characteristic peculiarities (the "Irish brogue"). In an extreme form ("broad Irish") English Irish has some Celtic features; but some peculiarities, for example *baste*, *spake*, for *beast*, *speak*, etc., are merely former English uses retained in Ireland but changed in England.

4†. An old game similar to backgammon, but more complicated. *Halliwell.* Compare *after-game at Irish*, under *after-game*.

> Keep a four-nobles nag and a Jack-merlin,
> Learn to love ale, and play at two-hand *Irish*.

Abbreviated *Ir*.

Irish-American (ī'rish-a-mer'i-kan), *a.* and *n.* **I.** *a.* Pertaining to persons of Irish birth or descent living in America.

II. *n.* A person of Irish birth settled in the United States, or a native American of Irish parentage.

Irishism (ī'rish-izm), *n.* [< *Irish*[1] + *-ism*.] A mode of speaking peculiar to the Irish; any Irish peculiarity of speech or behavior; Hibernicism.

> Master Willie had not quite got rid of all his *Irishisms*.
> *Black*, Shandon Bells, iii.

Irishize (ī'rish-īz), *v. t.* To make Irish or like the Irish; give an Irish character to.

> He . . . conceived the idea of *Irishizing* the fairies.
> *Fraser's Mag.*, 1831, p. 67. *N. E. D.*

Irishman (ī'rish-man), *n.*; pl. *Irishmen* (-men). A man born in Ireland, or one belonging to the Irish race.

> Truly, by this that ye saie, it seemes the *Irishman* is a very brave souldiour. *Spenser*, State of Ireland.

Irishry (ī'rish-ri), *n.* [< ME. *Irishry*, *Irchery*; < *Irish*[1] + *-ry*.] **1.** The people of Ireland, or a company or body of Irish people.

> The whole *Irishry* of rebels. *Milton.*

> The *Irishry* by whom he [Spenser] was surrounded were to the full as savage, as hostile, and as tenacious of their ancestral habitudes as the Scythians.
> *Lowell*, Among my Books, 2d ser., p. 143.

2. Irish soldiers collectively.

Irishwoman (ī'rish-wụm″an), *n.*; pl. *Irishwomen* (-wim″en). A woman of Ireland or of the Irish race.

Irishworts (ī'rish-wėrts), *n. pl.* Same as *Irish heath* (which see, under *heath*, 2).

iris-root (ī'ris-rōt), *n.* Same as *orris-root*.

iris-swallow (ī'ris-swol″ō), *n.* A swallow of the genus *Iridoprocne*.

irite (ī'rīt), *n.* [< *ir*(*idium*) + *-ite*[2].] A mineral substance from the Ural, occurring in minute grains and crystals. It was described as a compound of iridium, osmium, iron, and chromium with oxygen, but was later shown to be a mechanical mixture of iridosmium and chromite.

iritic (ī-rit'ik), *a.* [< *iritis* + *-ic*.] Pertaining to or affected with iritis.

iritis (ī-rī'tis), *n.* [NL., < *iris*, the iris, + *-itis*.] In *pathol.*, inflammation of the iris of the eye. Also *iriditis*.

irk (ėrk), *v.* [< ME. *irken*, *yrken*, *erken*; cf. MHG. *erken*, disgust (rare); Sw. *yrka*, urge, enforce, press, press upon; not related to L. *urgere*, urge: see *urge*.] **I.** *trans.* To weary; give pain to; annoy: now chiefly used with the impersonal *it*.

> Thys discencion beetwene hys frendes sommewhat *yrked* hym. *Sir T. More*, Works, p. 38.

> To see this sight, *it irks* my very soul.

irk† (ėrk), *a.* [ME. *irk*, *yrk*, *irke*, *erke*; < *irk*, *v.*] Weary; tired.

> Yn Goddys servyse are swyche men *yrk*,
> When they come unto the kyrke.
> *MS. Harl.* 1701, f. 30. (*Halliwell.*)

> Men therynne shulde hem delite,
> And of that deede be not *erke*.
> *Rom. of the Rose*, l. 4867.

irk† (ėrk), *n.* [< *irk*, *v.*] Weariness; irksomeness.

> Pressed close by *irk* and ills of earth,
> Man looks above,
> And steady tends to clearer light
> And purer love.
> *J. Upham*, The Forward, VII., No. 5.

irksome (ėrk'sum), *a.* [< ME. *irkesome*, *irksum*; < *irk* + *-some*.] **1.** Wearisome; tedious; burdensome; vexatious; causing annoyance or discomfort, especially by long continuance or frequent repetition.

> A sity [snity] garment is *yrkesome* to neybors.
> *Political Poems*, etc. (ed. Furnivall), p. 31.

> Hee found . . . a solitarie darknesse: which as naturally it breeds a kind of *irkesome* gastfulnesse, so it was to him a most present terrour. *Sir P. Sidney*, Arcadia, iv.

> Old habits of work, old habits of hope, made my endless leisure *irksome* to me. *Howells*, Venetian Life, ii.

2†. Weary; uneasy.

> He could not rest, but did his stout heart eat,
> And wast his inward gall with deepe despight,
> *Yrkesome* of life, and too long lingring night.
> *Spenser*, F. Q., I. ii. 6.

=**Syn. 1.** *Wearisome*, *Tedious*, etc. See *wearisome*.

irksomely (ėrk'sum-li), *adv.* In an irksome, vexatious, wearisome, or tedious manner.

irksomeness (ėrk'sum-nes), *n.* [< ME. *irkesumnesse*; < *irksome* + *-ness*.] The quality or state of being irksome; vexatiousness; tediousness; wearisomeness.

> Drunkards,
> That buy the merry madness of one hour
> With the long *irksomeness* of following time.
> *B. Jonson*, Cynthia's Revels, i. 1.

> Although divine inspiration must certainly have been sweet to those ancient profets, yet the *irksomness* of that truth which they brought was so unpleasant to them that everywhere they call it a burden.

A metal, the most abundant and the most important of all those used in the metallic form. It was formerly thought that iron did not occur native, except as meteoric iron, but it has recently been found in large quantities in the basaltic lava of Greenland near Ovifak. This, however, is not chemically pure, nor is any iron manufactured from the ore in the large way free from impurities, and the substances thus present in manufactured iron are of great importance in reference to the character of the metal produced. Of all these impurities carbon is the most important, and its relations to iron are both complicated and difficult of explanation. Iron, as prepared by Percy, according to the method indicated by Berzelius, and believed to be as nearly chemically pure as possible, had a specific gravity of 7.8707 before being rolled. Iron deposited from solution by electrolysis, and believed to be pure, had a specific gravity ranging from 7.9405 to 8.107. Iron nearly chemically pure, as obtained by Berzelius, was described by him as being very nearly as white as silver, extremely tenacious, softer than ordinary bar-iron, and scaly in fracture. Iron is put upon the market in three forms, which differ essentially in their properties: (1) *cast-iron,* which is hard, comparatively brittle, and readily fusible, and cannot be forged or welded; (2) *wrought-iron,* which is comparatively soft, malleable, ductile, weldable, and fusible only at a very high temperature; (3) *steel,* which is also malleable and weldable, but fusible, and — what is of great importance — capable of acquiring, by being tempered, a very high degree of hardness, so that it cuts wrought-iron with ease. By the processes ordinarily followed, wrought-iron and steel are made not directly from the ore, but from iron which has been smelted in the blast-furnace or that which has the form of cast-iron. The name *cast-iron,* however, is ordinarily given to iron which has been remelted in the cupola-furnace and cast in any form desired for use. The product of the blast-furnace, out of which wrought-iron and steel are made, is called *pig-iron;* but its qualities are not sensibly changed by simple remelting and casting. Some wrought-iron is, however, made directly from the ore. (See *bloomery.*) The process by which pig-iron is converted into wrought-iron is called *puddling* (which see). Steel, formerly produced almost exclusively from wrought-iron by "cementation," is now largely made from pig-iron by the so-called Bessemer process. This process, introduced within a few years, has in a measure obliterated the distinction between wrought-iron and steel, as by it a material can be produced which is intermediate in character between these, having the tenacity and durability of steel, and to a certain extent capable of being tempered. The most striking feature of the chemical composition of the different grades of iron and steel is the difference in the amount of carbon they contain, pig-iron containing the most, and wrought-iron the least. But while the finer kinds of cutlery-steel — such, for instance, as is used for razors — contain 1.5 per cent. of carbon, so-called "steel rails" made by the Bessemer process contain usually only about two tenths of one per cent. As much as five per cent. of carbon is not uncommonly present in pig-iron. The ores of iron are widely and abundantly disseminated over the earth. Their availability for manufacturing purposes depends largely on the proximity of good and cheap fuel and a market. What may truthfully be called mountains of iron ore remain unused in various parts of the world, because not sufficiently well situated. The valuable ores of iron are all oxids or oxidized combinations; the sulphuret is extremely abundant, but useful only as an ore of sulphur. The United States, Germany, and the United Kingdom lead the world in the manufacture of iron, more than three fourths of the total product being made in those countries. The quantity of pig-iron made in the United States in 1907 was 26,193,000, in Germany 13,045,000, and in the United Kingdom 10,082,000 (metric) tons; in 1908, in the United States 16,191,000, in Germany 11,813,000, and in the United Kingdom 9,438,000 (metric) tons; in 1909, in the United States 26,108,000, in Germany 12,917,000, and in the United Kingdom 9,819,000 (metric) tons. The world's production in 1909 was about 61,000,000 tons, and in 1910 the United States produced about 27,000,000 tons. France and Russia are next in importance as producers of this metal. Iron has been known from remote historical times. In the Homeric poems it is recognized, being considered as of more value than copper. Copper, sometimes alloyed with tin, was at that period still generally in use for tools and weapons. The smelting of iron from its ores is not necessarily an indication of advanced civilization, since tribes commonly called savage practise the art, and have done so for an indefinite time. See *steel* and *magnet.*

2. A utensil or weapon made of iron: often in combination with a noun or an adjective expressive of its purpose or character: as, a flat-*iron,* grid*iron,* or shooting-*iron* (slang for *pistol*).

Canst thou fill his skin with barbed *irons?* Job xli. 7.

Specifically — (*a*) A knife, sword, or other cutting implement.

Thyn *yrons* kepe in harde and sharpe usage
For graffyng and for kytting I the charge.
Palladius, Husbondrie (E. E. T. S.), p. 6.

Come, learn of us, lieutenant; hang your *iron* up.
Fletcher, Mad Lover, i. 1.

(*b*) *pl.* Fetters or other chains fastened to the person of a prisoner: as, a mutineer is put in *irons.*

Neuer for me shalt thow be putte in feteres ne in *Irenes* seth thow wilt me graunte that thow will not go with-oute my leve. *Merlin* (E. E. T. S.), iii. 428.

He ordered him into *irons,* without allowing him any food. *Steele,* Spectator, No. 350.

(*c*) In *whaling,* a hand-harpoon; a toggle-iron, used in striking a whale. There are two forms, the *first* and *second irons* (which see, below). (*d*) A brand-iron.

Give me the *iron,* I say, and bind him here.
Shak., K. John, iv. 1, 76.

He sent for burning *irons* straight,
All sparkling hot to see.
Queen Eleanor's Fall (Child's Ballads, VII. 294).

(*e*) In *golf,* a club with an iron head considerably lofted so as to raise the ball. — **Berlin iron-castings,** peculiarly delicate castings made in Berlin, originally for the purpose of being given in exchange for gold contributed to help pay the expenses of the war for the redemption of the country from the iron grasp of Napoleon. Objects thus given bore the inscription "Ich gab Gold um Eisen" (I gave gold for iron). The beauty and delicacy of these castings were due in part to the fluidity of the iron (made from bog-ore), in part to the excellent quality of the molding-sand (made of infusorial silica), and in part to the skill of the workmen employed in the manufacture, which, however, retains little of its former importance. — **Bessemer iron,** pig-iron suitable for the manufacture of Bessemer steel. — **Bog-iron ore.** See *bog*[1]. — **Brown iron ore.** Same as *limonite.* — **Chromic iron.** Same as *chromite.* — **Clay iron ore.** See *clay, a.* — **Common iron,** the commercial term for iron of the poorest quality. Iron is graded as *common, best, best best,* and *chain-cable iron.* — **Converted iron.** See *convert.* — **Corrugated iron,** common sheet-iron or galvanized iron which has been bent into folds or wrinkled by being passed between two powerful rollers, the ridges of the one corresponding to the grooves of the other, or by hydrostatic pressure upon a movable upper block driven upon a lower one. Iron thus treated will resist a much greater strain than flat iron, each groove representing a half-tube. A single sheet, so thin as to be unable to stand without bending when placed vertically, will after corrugation sustain 700 pounds without bending. Walls and roofs of temporary buildings, railway sheds and bridges, emigrants' houses, churches, sheds for dock-yards, etc., are now extensively made of iron thus treated. From its great lightness and power of resisting violent shocks, light boats have been made of it, and it has been proposed as an advantageous material for life-boats. — **Damascus iron.** See *damascus.* — **Dialyzed iron.** See *dialyze.* — **Dividing-iron,** an implement for cutting glass employed before the use of the diamond was introduced. It was an iron which was heated and drawn along the lines where the division was to be made, the glass if of resistant nature being wet at the required line of separation. — **First iron,** in *whaling,* the toggle-iron first thrown into a whale. — **Forming-iron,** a blacksmiths' swage-block. — **Foundry iron.** See *foundry.* — **Galvanized iron.** See *galvanize.* — **Glazed iron, glazy iron.** See *glaze.* — **Green iron ore.** Same as *dufrenite.* — **Iron pyrites.** See *pyrites.* — **Iron's length,** in *whaling,* the length of the toggle-iron as a measure of distance. — **Italian iron,** an instrument used for fluting linen or lace garments. It consists of a metal tube ending in a cone, and heated usually by a hot iron within. [Eng.; a different device used for the same purpose is called in the United States *fluting-iron.*]

While the maid was busy crimping or starching, I took an *Italian iron* from the fire, and applied the light scarlet glowing tip to my arm. *Charlotte Brontë,* Shirley, xxviii.

Malleable iron-castings, or (as more generally called) **malleable cast-iron,** cast-iron decarburized by packing it with oxid of iron and subjecting it to the temperature of red heat for several days. Iron thus treated and carefully cooled may be bent considerably without breaking, and is malleable in a slight degree. — **Meteoric iron,** iron as found in meteorites, usually combined with from 1 to 10 per cent. of nickel. See *meteorite.* — **Micaceous iron ore,** a variety of hematite or oxid of iron, occurring in masses composed of thin laminæ. — **Muck iron,** iron ready for the roller or squeezer. — **Nodular iron ore.** Same as *eaglestone.* — **Oligiste iron.** Same as *specular iron.* — **Pallas iron.** See *meteorite.* — **Red iron ore,** hematite, especially those varieties which have a non-metallic or submetallic luster. — **Second iron,** in *whaling,* the second toggle-iron of a whaling-boat. It is carried at the head, in the boat-crotch, attached to the tow-line by the rope known as the *short warp* by a bowline knot, and is thrown into the whale, if possible, as soon as the first iron has been darted. If there is not time for this, it is thrown overboard as quickly as possible, to avoid fouling the tow-line. — **Spathic** or **sparry iron ore.** Same as *siderite.* — **Specular iron,** a crystallized variety of hematite. — **Titanic iron ore,** or **titaniferous oxid of iron.** Same as *ilmenite.* — **To be in irons.** (*a*) To have the hands or feet, or both, confined by fetters. (*b*) To have, as a square-rigged vessel, the yards so braced that, some sails being full of wind and some aback, the vessel is temporarily unmanageable.

It is more common for a vessel to come up properly, and then, when the after yards have been swung, to lie dead in the water, or *in irons.* *Luce,* Seamanship, p. 420.

To have too many irons in the fire, to be engaged in too many undertakings.

He *hath* more actors in his tragedy, more *irons in the fire.* *Burton,* Anat. of Mel., p. 607.

They held it not agreeable to the rules of prudence to *have too many irons in the fire.*
Heylin, Hist. Reformation, I. 261.

Tow-catch iron, or **tow-iron,** the toggle-iron or harpoon used in whaling.

II. *a.* **1.** Made of iron; consisting of iron: as, an *iron* gate; an *iron* bar.

Go, get thee gone, fetch me an *iron* crow.
Shak., C. of E., iii. 1, 84.

With high *yron* gates, as is reported.
Purchas, Pilgrimage, p. 58.

2. Resembling iron in some respect, either really or metaphorically.

Such notes as, warbled to the string,
Drew *iron* tears down Pluto's cheek.
Milton, Il Penseroso, l. 107.

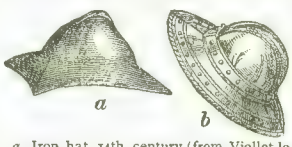
The wood which grides and clangs
Its leafless ribs and *iron* horns.
Tennyson, In Memoriam, cvii.

Hence — (*a*) Harsh; rude; severe.

Iron years of wars and dangers. *Rowe.*

(*b*) Binding fast; not to be broken.

Him death's *iron* sleep oppressed. *Phillips.*



(*c*) Capable of great endurance; firm; robust: as, an *iron* constitution.

E'en hell's grim king Alcides' pow'r confest,
The shaft found entrance in his *iron* breast.
Pope, Iliad, v. 486.

(*d*) Not to be bent; inflexible.

Her *iron* will was broken in her mind.
Tennyson, Princess, vi.

Iron age, buff, cement, etc. See the nouns. — **Iron cross.** See *Order of the Iron Cross,* below. — **Iron crown,** the ancient crown of the kings of Lombardy, with which many of the emperors of Germany and some other rulers, including Napoleon I., were afterward crowned as successors to their power in Italy: now preserved in the cathedral of Monza, the old capital of Lombardy. It takes its name from a thin band of iron, fabled to have been forged from one of the nails of Christ's cross, inclosed by its hoop of gold. — **Iron division.** See *division.* — **Iron hat.** [ME. *iren hat* = Icel. *járnhattr.*] (*a*) Same as *chapel-de-fer.* (*b*) In *mining,* same as *gossan.* [U. S.] — **Iron horse,** a locomotive. — **Iron lacquer, mask, natrolite,** etc. See the nouns. — **Order of the Iron Cross,** a Prussian order founded in 1813 for military services in the wars against Napoleon. In 1870 the order was reorganized. It consists of the great cross, conferred only on a few princes and generals, and two classes comprising several thousand Germans. The original badge was a cross patté of black iron with a silver rim, upon which were the initials F. W. (Frederick William) and the date 1813 or 1815. The modern badge is a modification of this. The ribbon is black with a white border. — **Order of the Iron Crown,** an order founded by Napoleon I. as king of Italy, and adopted by Francis I. of Austria after the fall of Napoleon. It consists of three classes. The badge is a double eagle of Austria resting upon a ring (which represents the iron crown of Monza), and surmounted by an imperial crown; this is attached to an orange ribbon edged with blue.

a, Iron hat, 14th century (from Viollet-le-Duc's "Dict. du Mobilier français"). *b,* Iron hat, time of Charles I. and Cromwell.

iron (ī'ėrn), *v. t.* [Not found in ME.; cf. AS. *īsenian,* furnish or mount with iron (= Icel. *járna,* put in irons, mount with iron, shoe (a horse)), < *īsen,* iron: see *iron, n.*] **1.** To shackle with irons; fetter; handcuff.

Iron him then, let the rest go free.
Middleton, Spanish Gypsy, iv. 3.

2. To furnish, mount, or arm with iron: as, to *iron* a wagon. — **3.** To smooth with an instrument of iron, especially with a hot flat-iron, smoothing-iron, or box-iron.

An a mun have some 'un to *iron* me out my seams, and look me out my bits. *Mrs. Gaskell,* Sylvia's Lovers, I. 69.

iron-alum (ī'ėrn-al″um), *n.* **1.** One of the double sulphates of ferric iron and potassium (ammonium, etc.), analogous to the true alums in composition, and like them crystallizing in octahedrons. — **2.** The mineral halotrichite.

ironbark-tree (ī'ėrn-bärk-trē), *n.* A tree of the genus *Eucalyptus* having solid bark, as *E. crebra,* but more particularly the species *E. resinifera,* a tree with ovatolanceolate leaves which attains a height of from 150 to 200 feet. From this tree is obtained Botany Bay kino, used in medicine as a substitute for kino. When the bark of the tree is wounded a red juice flows very freely, and hardens in the air into masses of irregular form, inodorous and transparent. Sixty gallons of juice may sometimes be obtained from a single tree. The timber is also very valuable, and is extensively used in ship-building and engineering works. The white ironbark-tree is *E. paniculata,* a species which furnishes a hard, durable wood excellent for railroad-ties, etc. The red-flowered ironbark-tree is *E. Leucoxylon.* It attains a height of 100 feet, and is highly prized by carpenters and ship-builders for its durability. The silver-leafed ironbark-tree is *E. pruinosa,* a tree of moderate size.

Branch of Ironbark-tree (*Eucalyptus resinifera*). *a,* flower on larger scale.

iron-black (ī'ėrn-blak), *n.* See *black.*

iron-bound (ī'ėrn-bound), *a.* 1. Bound with iron.

The old oaken bucket, the *iron-bound* bucket,
The moss-covered bucket, which hung in the well.
S. Woodworth, The Bucket.

2. Faced or surrounded with rocks; rock-bound; rugged: as, an *iron-bound* coast.—3. Hard and fast; rigorous; inflexible as iron.

The French, though beyond question the best actors in the world, judge from *iron-bound* standards.
The American, VII. 173.

iron-cased (ī'ėrn-kāst), *a.* Cased or clad with iron; iron-clad.

iron-chamber (ī'ėrn-chām″bėr), *n.* The reverberatory or charge-chamber of a puddling-furnace where the metal is heated.

iron-clad (ī'ėrn-klad), *a.* 1. Covered or cased with iron plates, as a vessel for naval warfare; armor-plated.—2. Figuratively, very rigid or strict; constructed, as a form of words, so as to allow no evasion or escape, or permit no flaw to be detected. [In this use often written *ironclad*.]—**Iron-clad oath.** See *oath*.

ironclad (ī'ėrn-klad), *n.* [< *iron-clad*, *a.*] A naval vessel cased or covered wholly or partly with thick iron or steel plates, designed to resist projectiles or the attacks of other armored vessels: a name given before the development of the modern steel battle-ship. The armor is often very thick; in some British vessels built in 1870–75 the armor is 12, 16, and even 24 inches thick. Later improved armor is of varying thickness, but, as a rule, thinner than the above, owing to the greater areas covered with armor. The armor used, however, is not sufficient to keep out the projectiles of the largest high-power guns of the present day, as its great weight prevents the application of heavy armor except to the most vulnerable parts of the ship. The first armored vessels were built by the French for use during the Crimean war, and the success of the monitors during the civil war in the United States gave a strong impetus to the building of ironclads. Modern war-vessels, except destroyers, have protective steel decks, but the term *ironclad* has been confined to vessels whose sides are protected. Armored ships generally carry several heavy breech-loading rifled guns, in addition to a secondary battery of smaller breech-loading and rapid-firing guns. They have often been constructed as rams, and their hulls are divided into numerous water-tight compartments. See *battle-ship*.

No matter how strong an *iron-clad* may be made, . . . the bottom of the ship is always a point of weakness.
N. A. Rev., CXXVII. 222.

iron-clay (ī'ėrn-klā), *n.* See *clay ironstone*, under *clay*.

iron-cloth (ī'ėrn-klôth), *n.* 1. Chain-mail in general. *Hewitt*, I. 238.—2. Chain-mail of modern fabrication, made for cleansing greasy vessels.

ironer (ī'ėr-nėr), *n.* One who or that which irons.

iron-fisted (ī'ėrn-fis″ted), *a.* Close-fisted; covetous. *Imp. Dict.*

iron-flint (ī'ėrn-flint), *n.* Ferruginous quartz; a subspecies of quartz, opaque or translucent at the edges, with a fracture more or less conchoidal, shining, and nearly vitreous.

iron-foundry (ī'ėrn-foun″dri), *n.* The place where iron castings are made.

iron-furnace (ī'ėrn-fėr″nās), *n.* A general term for any form of iron-working furnace, as a blast-furnace, puddling-furnace, etc. See *furnace*.

iron-glance (i-ėrn-glåns), *n.* Specular iron.

iron-grass (ī'ėrn-gras), *n.* The knot-grass or doorweed, *Polygonum aviculare*.

iron-gray (ī'ėrn-grā), *a.* and *n.* [< ME. *irengray*, < AS. *īsengrēg* (= Icel. *járngrár* = Dan. *isengraa*), < *īsen*, iron, + *grēg*, gray: see *iron* and *gray*.] **I.** *a.* Of a gray hue approaching the color of freshly fractured iron.

Neither was the stranger's dress at all martial. It consisted of a uniform suit of *iron-grey* clothes, cut in rather an old-fashioned form. *Scott*, Monastery, Int. Ep., p. 13.

II. *n.* A hue of gray approaching the color of freshly fractured iron.

iron-gumtree (ī'ėrn-gum″trē), *n.* A very large tree, *Eucalyptus Raveretiana*, a native of Queensland, sometimes attaining a height of over 300 feet and a diameter of 10 feet. It furnishes a very hard dark-colored wood, used for piles, for railroad-ties, and for general building purposes.

iron-handed (ī'ėrn-han″ded), *a.* Exceedingly strong in the hand; hence, rigorously determined or severe; unmerciful.

The *iron-handed* rule of this great commander at Yedo was felt all over the empire. *N. A. Rev.*, CXX. 289.

ironhard†, *n.* [< ME. *irenharde*, < AS. *īsenhearde*, ironhard, *Centaurea nigra* (cf. *īren-heard*, hard as iron, < *īren*, iron, + *heard*, hard).] 1. The knapweed, *Centaurea nigra*.—2. Vervain.

iron-hat†, *n.* See *iron hat*, under *iron*, *a*.

ironhead (ī'ėrn-hed), *n.* The American golden-eneye or whistlewing, a duck. *G. Trumbull*, 1888. [North Carolina.]

ironheads (ī'ėrn-hedz), *n.* The knapweed, *Centaurea nigra*: so called in reference to the knobbed involucres.

iron-hearted (ī'ėrn-här″ted), *a.* Hard-hearted; unfeeling; cruel.

These *iron-hearted* souldiers are so cold,
Till they be beaten to a woman's arms.
Beau. and Fl., Laws of Candy, iv. 1.

Think, ye masters *iron-hearted*,
Lolling at your jovial boards.
Cowper, Negro's Complaint.

ironic (ī-ron'ik), *a.* [= F. *ironique* = Sp. *irónico* = Pg. It. *ironico* (cf. D. G. *ironisch* = Dan. Sw. *ironisk*), < Gr. *εἰρωνικός*, dissembling, ironic, < *εἰρωνεία*, dissimulation, irony: see *irony*2.] Same as *ironical*.

I had better leisure to contemplate that *ironick* satire of Juvenal. *Sir T. Herbert*, Travels in Africa, p. 11.

ironical (ī-ron'i-kal), *a.* [< *ironic* + *-al*.] 1. Pretending ignorance; simulating lack of instruction or knowledge. See *irony*, 1. [Obsolete or archaic.]

The circle of this fallacy is very large; and herein may be comprised all *ironical* mistakes, for intended expressions receiving inverted significations.
Sir T. Browne, Vulg. Err., i. 4.

Hence—2. Conveying or consisting of covert sarcasm; sarcastic under a serious or friendly pretense: as, an *ironical* compliment.

She asked him, in an angry tone, what he did there; to which he only replied in an *ironical* way by drinking her health. *Goldsmith*, Vicar, xxi.

3. Addicted to irony; using disguised sarcasm: as, an *ironical* speaker.

ironically (ī-ron'i-kal-i), *adv.* In an ironical manner; by way of irony; by the use of irony.

ironicalness (ī-ron'i-kal-nes), *n.* The quality of being ironical.

ironing (ī'ėr-ning), *n.* In *laundry-work*: (*a*) The act of smoothing with hot irons. (*b*) The clothes so smoothed. [Colloq.]

ironing-board (ī'ėr-ning-bōrd), *n.* A smooth board covered with cloth, on which to iron clothing, etc.

ironing-box (ī'ėr-ning-boks), *n.* Same as *box-iron*.

ironing-cloth (ī'ėr-ning-klôth), *n.* A cloth used for ironing on. *Mayhew*.

ironing-machine (ī'ėr-ning-ma-shēn″), *n.* A machine for hot-pressing fabrics, clothing, hats, etc. Such machines are made in many forms, and may be arranged in two classes: those using a tailors' goose heated by a gas-jet or by steam (the gas and steam being applied by a flexible pipe), and those employing a cylinder heated by steam or gas. Mechanism is supplied for supporting and guiding the goose over the table. A common form is a cylinder heated by steam, which is rolled by machinery over the fabric to be pressed; in one machine the cylinder is stationary, the table carrying the fabric to be pressed traveling under it. In the hat-ironing machines the goose is of various shapes, and the heated block either moves upon the hat or revolves in a fixed position while the table moves. Sometimes called *ironing-lathe* and *block ironing-machine*.

iron-iodide (ī'ėrn-ī″ō-did), *n.* A crystalline deliquescent salt formed by the union of iron and hydriodic acid, used in medicine as a tonic, diuretic, and emmenagogue.

ironish (ī'ėr-nish), *a.* [< *iron* + *-ish*1.] Somewhat like iron; irony. [Rare.]

Some, who did thrust a probe or little stick into a chink of the coffin, . . . bringing out some moisture with it, found it of an *ironish* taste.
Wood, Athenæ Oxon. (John Colet).

ironist (ī'rō-nist), *n.* [< *iron(ize)* + *-ist*.] One who deals in irony. [Rare.]

A poet or orator . . . would have no more to do but to send . . . to the *ironist* for his sarcasms.
Martinus Scriblerus, xiii.

ironize† (ī'rō-nīz), *v. t.* [< Gr. *εἰρωνίζειν*, dissemble, < *εἴρων*, dissembler: see *irony*2.] To render ironical; use ironically.

If hypocrites why puritaines
We terme be ask'd, in breefe,
'Tis but an *ironized* tearme,
Good-fellow so spells theefe.
Warner, Albion's England, x.

iron-line (ī'ėrn-līn), *n.* A line in the spectrum, caused if bright by iron in the luminous vapor, or if dark by iron in vapor interposed between the luminous body and the eye, as in the atmosphere of the sun.

iron-liquor (ī'ėrn-lik″ėr), *n.* Iron acetate, used by dyers as a mordant.

Under the name of "black" and "*iron liquor*," two of these salts are largely manufactured, the acetate of the protoxide and the acetate of the sesquioxide or peroxide.
Spons' Encyc. Manuf., I. 31.

iron-man (ī'ėrn-man), *n.* 1. A dealer in or manufacturer of iron.—2. A coal-cutting machine. [Prov. Eng.]

iron-master (ī'ėrn-mås″tėr), *n.* A manufacturer of iron.

My father apprenticed me to a Birmingham *ironmaster*.
Dickens, Mugby Junction (Tauchnitz ed.), p. 331.

iron-mold (ī'ėrn-mōld), *n.* Discoloration, in cloth or the like, caused by stains from rusted iron.

iron-mold (ī'ėrn-mōld), *v. t.* To stain or discolor, as cloth, by means of iron-rust.

ironmonger (ī'ėrn-mung″gėr), *n.* [< ME. *iren-mongere*, *iren-manger*; < *iron* + *monger*.] A dealer in ironware or hardware.

Buying several things at the *ironmongers*; dogs, tongues, and shovells, for my wife's closet.
Pepys, Diary, Sept. 7, 1663.

ironmongery (ī'ėrn-mung″gėr-i), *n.* [< *iron-monger* + *-y*: see *-ery*.] The trade of an ironmonger; that which ironmongers deal in.

I might have been inclined, myself, to regard a coffin-nail as the deadest piece of *ironmongery* in the trade.
Dickens, Christmas Carol, i.

ironside (ī'ėrn-sīd), *n.* A person who or something which has great power of endurance or resistance: specifically used (generally in the plural) as a proper name: as, Edmund *Ironside* or *Ironsides* (an Anglo-Saxon king); Cromwell's *Ironsides* (his special corps of troopers); Old *Ironsides* (a designation of the old United States frigate Constitution).

iron-sided (ī'ėrn-sī″ded), *a.* [< *iron* + *side*1 + *-ed*2.] Rough; unruly. *Halliwell*.

ironsmith (ī'ėrn-smith), *n.* [< ME. *irensmith*, < AS. *irensmith*, *isensmith* (= G. *eisenschmied* = Icel. *járnsmiðr*), < *īren*, *īsen*, iron, + *smith*, smith.] 1. A worker in iron, as a blacksmith, locksmith, etc.—2. The barbet of Hainan, *Megalæma faber*: so called from its cry, translating the native name.

From its loud, peculiar call, the Hainan species has earned among the natives of the island the appellation of "*ironsmith*," whence I have derived its specific name [*faber*]. *R. Swinhoe*, quoted in Stand. Nat. Hist., IV. 420.

iron-stain (ī'ėrn-stān), *n.* 1. A stain made by iron-rust, or by the tincture of iron, as on cloth or clothing.—2. An appearance like the stain of iron produced on the leaf of the coffee-plant in Venezuela, and apparently also in Jamaica, by the fungus *Sceptoria* (*Depazea*) *maculosa*, in the form of circular or elliptical blotches.

ironstone (ī'ėrn-stōn), *n.* Any ore of iron which is impure through the admixture of silica or clay.—**Carbonaceous** or **blackband ironstone.** See *blackband*.—**Clay ironstone.** See *clay*.—**Ironstone china,** a hard white pottery of a bluish tint, also known as *white granite*. It was first made in England in 1813 by Charles James Mason. The name was originally intended to refer only to hardness and durability.

iron-strap (ī'ėrn-strap), *n.* In *whaling*, same as *foreganger*, 2.

iron-tree (ī'ėrn-trē), *n.* See *Ixora*.

ironware (ī'ėrn-wār), *n.* Hardware; especially, iron pots, kettles, etc.

ironweed (ī'ėrn-wēd), *n.* Same as *flattop*.

iron-witted† (ī'ėrn-wit″ed), *a.* Dull or heavy-witted; stupid.

I will converse with *iron-witted* fools,
And unrespective boys.
Shak., Rich. III., iv. 2, 28.

ironwood (ī'ėrn-wůd), *n.* One of numerous species of peculiarly hard-wooded trees, be

longing to many families and widely distributed. In North America the name commonly denotes *Ostrya Virginiana*, the hop-hornbeam or leverwood; but also *Bumelia lycioides* (southern buckthorn), *Carpinus Caroliniana* (blue beech), *Cyrilla racemiflora*, *Cliftonia monophylla* (titi, buckwheat-tree), *Exothea paniculata* (inkwood), and *Olneya Tesota*. The black ironwood of the same territory is *Krugiodendron ferreum*; the red, *Reynosia septentrionalis*; the white, *Hypelate trifoliata*. Of the other ironwoods may be mentioned the various species of the tropical genus *Sideroxylon*, the Indian *Xylia xylocarpa*, the *Erythroxylum areolatum* of Jamaica, and the Tasmanian *Notelæa ligustrina*. Several species of *Diospyros* (ebony) are called by the same name. Bastard ironwood is the West Indian *Fagara Fagara*; also *Trichilia hirta*. The black ironwood of South Africa is *Olea laurifolia*, and the white is *Boscia lanceolata* (*Toddalia lanceolata* of Lamarck). Many of these woods take a high polish.

iron-worded (ī′ėrn-wėr″ded), *a.* Worded so as to resist attack; of "iron-clad" character. [Poetical.]

Spurr'd at heart with fieriest energy
To embattail and to wall about thy cause
With *iron-worded* proof.
Tennyson, Sonnet to J. M. K.

ironwork (ī′ėrn-wėrk), *n.* Objects and parts of objects made of iron, as locks and keys, utensils, parts of a building, of a vessel, or the like: as, ornamental *ironwork*.

iron-worker (ī′ėrn-wėr″kėr), *n.* A person employed in the manufacture of iron, or of articles of iron.

The colliers now on strike have forced idleness on the *ironworkers*. *H. Spencer*, Study of Sociol., p. 248.

iron-works (ī′ėrn-wėrks), *n. pl.* An establishment, consisting usually of several connected shops, where iron is manufactured, or where it is wrought or cast into heavy work, as cannon, shafting, rails, merchant bars, etc. [The word is sometimes used as a singular.]

A recent strike in an *iron works*.
N. A. Rev., CXLIII. 167.

ironwort (ī′ėrn-wėrt), *n.* 1. A plant of the labiate genus *Sideritis*.—2. A plant of the genus *Galeopsis*, *G. Tetrahit*.

irony[1] (ī′ėr-ni), *a.* [< ME. **irony*, *yrony*, *yrunny*; < *iron* + *-y*[1].] Consisting of or resembling iron; also, resembling any of the distinctive qualities of iron.

Be heuene that is abooue thee braasny and the lond that thou tredist *yrony*. *Wyclif*, Deut. xxviii. 23.

Some springs of Hungary, highly impregnated with vitriolick salts, dissolve the body of one metal, suppose iron, put into the spring; and deposit, in lieu of the *irony* particles carried off, coppery particles.
Woodward, Fossils.

irony[2] (ī′rọ-ni), *n.*; pl. *ironies* (-niz). [= D. G. *ironie* = Dan. Sw. *ironi*, < F. *ironie* = Sp. *ironía* = Pg. It. *ironia*, < L. *ironia*, < Gr. εἰρωνεία, dissimulation, irony, < εἴρων, a dissembler, lit. 'one who talks' (but says less or more than he thinks), ppr. of εἰρεῖν, speak, tell, talk.] 1. Simulated ignorance in discussion: a method of exposing an antagonist's ignorance by pretending to desire information or instruction from him. This method of discussion, the Socratic irony, was characteristic of Socrates, with reference to whom the term was first used.

Socrates at Athens undertook with many sharp and cutting *Ironies* to reprove the vices of his Age.
Stillingfleet, Sermons, II. iii.

The Athenian's [Socrates's] modest *irony* was of another taste, and better suited to the decorum of conversation, than the Syrian's [Lucan's] frontless buffoonry.
Bp. Hurd, Manner of Writing Dialogues, Pref.

Hence—2. Covert sarcasm; such a use of agreeable or commendatory forms of expression as to convey a meaning opposite to that literally expressed; sarcastic laudation, compliment, or the like.

And call her Ida, tho' I knew her not,
And call her sweet, as if in *irony*.
Tennyson, Princess, vii.

A drayman in a passion calls out "You are a pretty fellow," without suspecting that he is uttering *irony*.
Macaulay, Lord Bacon.

Irony of fate, or of circumstances, an apparent mockery of destiny; an occurrence or result the opposite of what might naturally have been expected; a contradictory outcome: as, it was the *irony of fate* that made Joseph the ruler over the land of his captivity. =**Syn. 2.** *Sarcasm*, etc. See *satire*.

iron-yellow (ī′ėrn-yel″ō), *n.* Same as *Mars yellow* (which see, under *yellow*).

Iroquoian (ir-ọ̄-kwoi′ạn), *a.* [< *Iroquois* + *-an*.] Same as *Iroquois*.

Iroquois (ir-ọ̄-kwoi′), *n.* and *a.* [A F. form (with term. *-ois*, as in *Illinois*: see *-ese*) of the native Indian name.] **I.** *n.* One of a former confederation of American Indians, situated in central New York, originally composed of five tribes—the Mohawks, Oneidas, Onondagas, Cayugas, and Senecas—and hence known as the Five Nations. At a later time a sixth tribe, the Tuscaroras, who had migrated from North Carolina, was added. The name is also given to related Indian tribes occupying central and western New York and Upper Canada, and including, besides the Iroquois proper, the Hurons, the Eries, the Neutral Nation, the Andastes, etc. In this sense also known as *Huron-Iroquois*.

II. *a.* Belonging or relating to the Iroquois or their tribes, or to the Iroquois family of languages.

irourt, *n.* [ME., = OF. *iror*, *irur* = Pr. *iror*, anger, < L. *ira*, anger: see *ire*[2].] Ire; anger. *Seven Sages*, l. 954.

irous† (ir′us), *a.* [ME. *irous*, *irus*, *iros*, < OF. *iros*, *irous*, *ireus* = Pr. *iros* = Pg. It. *iroso*, < ML. **irosus*, angry, < L. *ira*, anger: see *ire*[2].] Apt to be angry; passionate; ireful.

With full *yrous* wreth Gaffrey meued hy,
He salute non, ne spake to gret ne small.
Rom. of Partenay (E. E. T. S.), l. 4889.

It is greet harme and eek greet pite
To sette an *irous* man in heigh degree.
Chaucer, Summoner's Tale, l. 308.

irously† (ir′us-li), *adv.* [ME. *irously*; < *irous* + *-ly*[2].] Angrily.

And whan dorilas saugh with his iye that thei dide so grete damage that were soche mysbelevynge peple, he rode vpon hem full *Irously*. *Merlin* (E. E. T. S.), ii. 243.

irp† (ėrp), *n.* and *a.* [Origin unknown; found only in one piece of Ben Jonson's, and perhaps one of his affected terms.] **I.** *n.* A grimace or contortion of the body.

Spanish shrugs, French faces, smirks, *irpes*, and all affected humours. *B. Jonson*, Cynthia's Revels, Palinode.

II. *a.* Grimacing.

If regardant, then maintain your station brisk and *irpe*, shew the supple motion of your pliant body.
B. Jonson, Cynthia's Revels, iii. 3.

irradiance (i-rā′di-ạns), *n.* [< *irradian*(*t*) + *-ce*.] 1. The act of irradiating; emission of rays of light.—2. An appearance of radiated light; luster; splendor.

Love not the heavenly spirits, and how their love
Express they? by looks only? or do they mix
Irradiance, virtual or immediate touch?
Milton, P. L., viii. 617.

irradiancy (i-rā′di-ạn-si), *n.* Same as *irradiance*.

irradiant (i-rā′di-ạnt), *a.* [< L. *irradian*(*t*-)*s*, *inradian*(*t*-)*s*, ppr. of *irradiare*, *inradiare*, irradiate: see *irradiate*.] Emitting rays of light.

So the bright lamp of night, the constant moon,
Unwearied, does her circling journey run;
Oft thro' the fleecy cloud *irradiant* bends,
And to benighted lands her influence lends.
Boyse, To Marcella.

★ **irradiate** (i-rā′di-āt), *v.*; pret. and pp. *irradiated*, ppr. *irradiating*. [< L. *irradiatus*, *inradiatus*, pp. of *irradiare*, *inradiare* (> It. *irradiare*, *inradiare* = Sp. Pg. *irradiar* = F. *irradier*), beam upon, illumine, < *in*, on, + *radiare*, beam: see *radiate*.] **I.** *trans.* 1. To illuminate or shed light upon or into; make luminous or clear; light up; enlighten.

So much the rather thou, celestial Light,
Shine inward, and the mind through all her powers
Irradiate. *Milton*, P. L., iii. 53.

When the august functions of the Crown are *irradiated* by intelligence and virtue, they are transformed into a higher dignity than words can convey, or Acts of Parliament can confer. *Gladstone*, Might of Right, p. 168.

Those studies that kindle the imagination, and through it *irradiate* the reason. *Lowell*, Harvard Anniversary.

2. To make splendid or glorious; confer honor or dignity upon; exalt; adorn.

No weeping orphan saw his father's stores
Our shrines *irradiate*, or emblaze the floors.
Pope, Eloisa to Abelard, l. 136.

3. To radiate into; penetrate by radiation.

Ethereal or solar heat must digest, influence, *irradiate*, and put those more simple parts of matter into motion.
Sir M. Hale, Orig. of Mankind.

II. *intrans.* To emit rays; shine.

Day was the state of the hemisphere on which light *irradiated*. *Bp. Horne*, Letters on Infidelity, x.

irradiate (i-rā′di-āt), *a.* [< L. *irradiatus*, pp.: see the verb.] Illuminated; made brilliant or splendid. [Poetical.]

Your *irradiate* judgment will soon discover the secrets of this little crystal world.
B. Jonson, Cynthia's Revels, v. 3.

Where *irradiate* dewy eyes
Had shone, gleam stony orbs. *Shelley*, Alastor.

★ **irradiation** (i-rā-di-ā′shọn), *n.* [= F. *irradiation* = Sp. *irradiación* = Pg. *irradiação* = It. *irradiazione*, *inradiazione*, < L. as if **irradiatio*(*n*-), < *irradiare*, irradiate: see *irradiate*.] 1. The act of irradiating or emitting beams of light; illumination; brightness emitted; enlightenment.

Sooner may a dark room enlighten itself without the *irradiation* of a candle or the sun than a natural understanding work out its own ignorance in matters of faith.
South, Works, VIII. xiii.

God does give signs, and when he does so, he gives also *irradiations*, illustrations of the understanding, that they may be discerned to be his signs. *Donne*, Sermons, ii.

This is that *irradiation* that dispels the mists of hell.
Sir T. Browne, Religio Medici, i. 32.

2. In *physics*, the phenomenon of the apparent enlargement of an object strongly illuminated, when seen against a dark ground. It was explained by Plateau as due to the extension of the impression upon the nerves of the retina beyond the outlines of the image; Helmholtz, however, has ascribed it to the want of perfect accommodation in the eye, leading to the formation of diffusion images about the proper image of a bright object, so that it encroaches upon the dark space about it, and hence appears larger than it really is. Irradiation increases with the brightness of the object, diminishes as the illumination of the object and that of the field of view approach equality, and vanishes when they become equal.

irradiative (i-rā′di-ā-tiv), *n.* Something which illuminates or emits light.

irradicate (i-rad′i-kāt), *v. t.*; pret. and pp. *irradicated*, ppr. *irradicating*. [< L. *in*, in, + *radicare*, *radicari*, take root: see *radicate*. Cf. *eradicate*.] To fix by the root; fix firmly. *Clissold*.

★ **irrational** (i-rash′ọn-ạl), *a.* and *n.* [= F. *irrationnel* = Pr. *irrational* = Sp. Pg. *irracional* = It. *irrazionale*, *inrazionale*, < L. *irrationalis*, *inrationalis*, not rational, < *in-* priv. + *rationalis*, rational: see *rational*.] **I.** *a.* 1. Not rational; without the faculty of reason; void of understanding; unreasoning.

He hath eaten and lives,
And knows, and speaks, and reasons, and discerns,
Irrational till then. *Milton*, P. L., ix. 766.

Strong passion is brief madness, because the internal commotion of it, usurping consciousness, prevents full and free reflection and adaptation, and, putting the individual out of just ratio with persons and things, makes him *irrational*. *Maudsley*, Mind, XII. 510.

2. Without the quality of reason; contrary to reason; illogical; unreasonable: as, *irrational* motives; an *irrational* project.

It would be amusing to make a digest of the *irrational* laws which bad critics have made for the government of poets. *Macaulay*, Moore's Life of Byron.

There is . . . nothing more *irrational* than to criticize deeds as though the doers of them had the same desires, hopes, fears, and restraint with ourselves.
H. Spencer, Social Statics, p. 253.

We are constantly the dupes of an *irrational* attempt to estimate the universe from a purely human point of view. *Mivart*, Nature and Thought, p. 243.

Conduct prompted by a series of such unconnected impulses we call *irrational*, as being absolutely unsystematized, and in that sense inconsistent.
H. Sidgwick, Methods of Ethics, p. 25.

3. In *math.*: (*a*) In *arith.*, not capable of being exactly expressed by a vulgar fraction, proper or improper; surd. In mathematics *irrational* is a translation of Greek ἄλογον, inexpressible (by a fraction), opposed to ῥητόν. (See *surd*.) Every irrational quantity can, however, be conceived as expressed by an infinite continued fraction or interminate decimal. (*b*) In translations of Euclid, and cognate writings, at once incommensurable with the assumed unit and not having its square commensurable with that of the unit. This is the peculiar meaning given by Euclid to ἄλογος, though Plato uses it in sense (*a*), above. (*c*) In *alg.*, noting a quantity involving a variable raised to a fractional power; or, in a wider sense, noting a quantity not rational, not a sum of products of constants and of variables into one another or into themselves.—4. In *Gr. pros.*, incapable of measurement in terms of the fundamental or primary time or metrical unit.

It was an *irrational* long; and the foot to which it belonged was *irrational* also, the whole length of the foot being expressed by a fractional designation, viz. 3½ short times. *J. Hadley*, Essays, p. 107.

Geometrically irrational. See *geometrically*.—**Irrational function.** See *function*.=**Syn. 1** and **2.** *Silly*, *Foolish*, etc. (see *absurd*); witless, reasonless, thoughtless; brute, brutish; injudicious, illogical.

II. *n.* That which is devoid of reason, as one of the lower animals.

But for the poor shiftless *irrationals*, it is a prodigious act of the great Creator's indulgence that they are all ready furnished with such cloathing as is proper to their place and business. *Derham*, Physico-Theology, iv. 12.

★ **irrationality** (i-rash-ọ-nal′i-ti), *n.* [= Sp. *irracionalidad* = Pg. *irracionalidade* = It. *irrazionalità*; as *irrational* + *-ity*.] 1. The condition of being irrational; want of the faculty or the quality of reason; fatuity: as, the *irrationality* of brutes; the *irrationality* of a scheme.

Who is it here that appeals to the frivolousness and *irrationality* of our dreams? *Baxter*, On the Soul, ii. 187.

The unfading boyishness of hope and its vigorous *irrationality* are nowhere better displayed than in questions of conduct. *R. L. Stevenson*, Virginibus Puerisque, ii.

2. That which is irrational; an irrational thought, action, or thing.

We can see how the human mind arrives by a perfectly natural process at all its later *irrationalities*.
Max Müller, India, p. 236.

Irrationality of dispersion, in *optics*. See *dispersion*, 3.

irrationally (i-rash′ọn-ạl-i), *adv.* In an irrational manner; without reason; in a manner contrary to reason; absurdly.

It may not *irrationally* be doubted whether or no, if a man were raised to the very top of the atmosphere, he would be able to live many minutes, and would not quickly die for want of such air as we are wont to breathe here below. *Boyle*, Works, I. 105.

irrationalness (i-rash′ọn-ạl-nes), *n.* Irrationality.

irrealizable (i-rē′ạ-lī-zạ-bl), *a.* [= F. *irréalisable* = Sp. *irrealizable* = Pg. *irrealisavel;* as *in-*[3] + *realizable.*] Not realizable; incapable of being realized or defined.

The just motion . . . of suns around that mighty, unseen centre, incomprehensible, *irrealizable*, with strange mental effort only divined.
Charlotte Brontë, Villette, xxxvi.

irrebuttable (ir-ẹ̄-but′ạ-bl), *a.* [< *in-*[3] + *rebuttable.*] Not rebuttable; incapable of being rebutted or repelled.

Compare this sixth section with the manful, senseful, *irrebuttable* fourth section. *Coleridge.*

irreceptive (ir-ẹ̄-sep′tiv), *a.* [< *in-*[3] + *receptive.*] Not receptive; incapable of receiving.

irreciprocal (ir-ẹ̄-sip′rọ-kạl), *a.* [< *in-*[3] + *reciprocal.*] Not reciprocal.

The conduction power of the electrical organ of the torpedo was consequently *irreciprocal*.
Nature, XXXIII. 407.

Irreciprocal conduction, in *elect.*, conduction through electrolytes when a reversal of the current causes a change in its magnitude. Also called *unipolar conduction*.

Irreciprocal conduction is said to occur if a reversal of the direction of a current causes any change in its magnitude. *Philosophical Magazine*, XXVI. 127.

irreciprocity (i-res-i-pros′i-ti), *n.* [< *in-*[3] + *reciprocity.*] Lack of reciprocity or reciprocal action. [Rare.]

Here it seems evident that the *irreciprocity* is due to the gradual formation of a badly-conducting film on the anode.
Philosophical Magazine, XXVI. 133.

Irreciprocity of conduction, in *elect.*, inequality of conduction in different polar directions.

This *irreciprocity of conduction* obtained only for strong currents and for those of short duration.
Nature, XXXIII. 407.

irreclaimable (ir-ẹ̄-klā′mạ-bl), *a.* [= Pg. *irreclamavel;* < *in-*[3] + *reclaimable.*] Not reclaimable; incapable of being reclaimed; that cannot be restored or redeemed: as, an *irreclaimable* criminal; *irreclaimable* land.

Such impetuous, ungovernable, *irreclaimable* inclinations to what is vitious.
Glanville, Pre-existence of Souls, x.

As for obstinate, *irreclaimable*, professed enemies, we must expect their calumnies will continue.
Addison, Freeholder.

irreclaimableness (ir-ẹ̄-klā′mạ-bl-nes), *n.* The character of being irreclaimable.

Enormities . . . which are out of his power to atone for, by reason of the death of some of the injured parties, and the *irreclaimableness* of others.
Richardson, Clarissa Harlowe, VIII. 407.

irreclaimably (ir-ẹ̄-klā′mạ-bli), *adv.* So as to be irreclaimable.

Others, *irreclaimeably* persisting in their rebellion, and sinking more and more into the body and the relish of its joyes and pleasures, are still verging to a lower and more degenerate state.
Glanville, Pre-existence of Souls, The Aerial State.

irrecognition (i-rek-ọg-nish′ọn), *n.* [< *in-*[3] + *recognition.*] Lack of recognition; absence of perception or notice.

In all literary history there is no such figure as Dante, no such homogeneousness of life and works, such loyalty to ideas, such sublime *irrecognition* of the unessential.
Lowell, Among my Books, 2d ser., p. 38.

irrecognizable (i-rek′ọg-nī-zạ-bl), *a.* [< *in-*[3] + *recognizable.*] Not recognizable; incapable of being recognized.

irreconcilability (i-rek-ọn-sī-lạ-bil′i-ti), *n.* [= It. *irreconciliabilità;* as *irreconcilable* + *-ity:* see *-bility.*] The quality of being irreconcilable; irreconcilableness.

There co-exists a kindred *irreconcilability* between the sentiments answering to the forms of co-operation required for militancy and industrialism respectively.
H. Spencer, Data of Ethics, p. 135.

irreconcilable (i-rek′ọn-sī-lạ-bl), *a.* and *n.* [= F. *irréconciliable* = Sp. *irreconciliable* = Pg. *irreconciliavel* = It. *irreconciliabile;* as *in-*[3] + *reconcilable.*] **I.** *a.* Not reconcilable; not admitting of reconciliation; that cannot be harmonized or adjusted; incompatible: as, *irreconcilable* enemies or enmities; *irreconcilable* principles.

Since the sense I oppose is attended with such gross *irreconcilable* absurdities, I presume I need not offer any thing further in support of the one, or in disproof of the other. *Rogers.*

That *irreconcilable* schism of perdition and apostacy.
Milton, Church-Government, i. 6.

Tertullian had even held the Christian profession to be *irreconcilable* with the office of a Roman emperor.
Schaff, Hist. Christ. Church, III. § 13.

Irreconcilable paths, in a surface, paths between two fixed points such that one path cannot be gradually changed into the other without passing beyond the boundary of the surface.

II. *n.* One who refuses reconciliation or compromise; specifically, in *politics*, one who adheres to an apparently hopeless political program, and refuses to accept concessions from opponents: as, the Irish or French *irreconcilables*.

Sleep and I have quarrelled; and although I court it, it will not be friends. I hope its fellow-*irreconcilables* at Harlowe-place enjoy its balmy comforts.
Richardson, Clarissa Harlowe, III. 178.

The Opportunists, as the followers of Thiers and Gambetta were now styled, united with the *irreconcilables* in opposition to the party of order. *Encyc. Brit.*, IX. 628.

irreconcilableness (i-rek′ọn-sī-lạ-bl-nes), *n.* The quality of being irreconcilable; irreconcilability; incompatibility; incongruity.

Discourage them from repeating their transgressions, give them a deep sense of the heinous nature of sin, and of God's extreme hatred and utter *irreconcileableness* to it.
Clarke, Evidences, Prop. 13.

irreconcilably (i-rek′ọn-sī-lạ-bli), *adv.* In an irreconcilable manner; so as to preclude reconciliation.

The Bramins are *irreconcileably* divided among themselves upon what are the doctrines of the Shastah.
Mickle, Inq. into the Bramin Philos.

irreconcile† (i-rek′ọn-sīl), *v. t.* [< *in-*[3] + *reconcile.*] To prevent from being reconciled; make incompatible.

As the object calls for our devotion, so it must needs *irreconcile* us to sin. *Jer. Taylor*, Great Exemplar, iii. 15.

irreconciled† (i-rek′ọn-sīld), *a.* [< *in-*[3] + *reconciled.*] Unreconciled; not brought under reconciliation, or into harmony or consistency.

If a servant . . . die in many *irreconciled* iniquities, you may call the business of the master the author of the servant's damnation. *Shak.*, Hen. V., iv. 1, 160.

But gothic, rude,
Irreconcil'd in ruinous design.
W. Thompson, Sickness, ii.

irreconcilement (i-rek′ọn-sīl-mẹnt), *n.* [< *in-*[3] + *reconcilement.*] The state of being unreconciled or irreconcilable.

Such an *irreconcilement* between God and Mammon.
Abp. Wake, Rationale on Texts of Scripture, p. 85.

irreconciliation (i-rek-ọn-sil-i-ā′shọn), *n.* [= Pg. *irreconciliação;* as *in-*[3] + *reconciliation.*] Same as *irreconcilement*.

How *irreconciliation* with our brethren voids all our addresses to God, we need be lessoned no farther than from our Saviour's own mouth. *Prideaux*, Euchologia, p. 71.

irrecordable (ir-ẹ̄-kôr′dạ-bl), *a.* [= It. *irrecordevole*, forgetful; < LL. *irrecordabilis, irrecordabilis*, not to be remembered, < *in-* priv. + *recordabilis*, to be remembered: see *recordable.*] Not recordable; not fit or possible to be recorded or remembered. *Coles*, 1717.

irrecoverable (ir-ẹ̄-kuv′ėr-ạ-bl), *a.* [= F. *irrecouvrable;* as *in-*[3] + *recoverable*[2]. Cf. *irrecuperable.*] **1.** Not recoverable or admitting of recovery; incapable of being recovered: as, an *irrecoverable* debt.

Er. Indeed you are a very good Husband of Time.
Ga. No wonder I am of that, which is the most precious Thing in the World, and when past is *irrecoverable*.
N. Bailey, tr. of Colloquies of Erasmus, I. 90.

2. That cannot be recovered from or made good; irremediable: as, an *irrecoverable* disease; *irrecoverable* danger.

It concerns every man that would not trifle away his soul, and fool himself into *irrecoverable* misery, with the greatest seriousness to enquire. *Tillotson.*

In November this year happened a storm at north-west, with a spring tide, so violent as gave apprehensions of some loss *irrecoverable* to the province of Holland.
Sir W. Temple, Mem. from 1672 to 1679.

irrecoverableness (ir-ẹ̄-kuv′ėr-ạ-bl-nes), *n.* The state of being irrecoverable. *Donne.*

irrecoverably (ir-ẹ̄-kuv′ėr-ạ-bli), *adv.* In an irrecoverable manner; beyond recovery.

Life forsook
My heart, which *irrecoverably* lost
All sense of duty both to thee and Greece.
Glover, Athenaid, xix.

I find, Sir, you are *irrecoverably* fix'd upon this Lady.
Steele, Conscious Lovers, i. 2.

irrecuperable† (ir-ẹ̄-kū′pẹ-rạ-bl), *a.* [= F. *irrécuperable* = Sp. *irrecuperable* = Pg. *irrecuperavel* = It. *inrecuperabile, irrecuperabile*, < LL. *irrecuperabilis, inrecuperabilis*, irrecoverable, < L. *in-* priv. + **recuperabilis*, recoverable: see *recuperable.*] Not recuperable or admitting of recuperation; irrecoverable; irreparable: as, "*irrecuperable* damage," *Sir T. Elyot*, The Governour, i. 27.

Assuring his honour, that he feared the danger, if it were not speedily looked to, would be *irrecuperable*.
Strype, Abp. Parker, an. 1563.

irrecuperably† (ir-ẹ̄-kū′pẹ-rạ-bli), *adv.* In an irrecuperable manner; irrecoverably; irreparably.

irrecurable†, *a.* [< *in-*[3] + *recurable.*] Incurable.

Forced to sustayne a most grevous and *irrecurable* fall.
Ulpian Fulwell, Arte of Flatterie, F 2, b.

irrecured† (ir-ẹ̄-kūrd′), *a.* [< *in-*[3] + *recure* + *-ed*[2].] Incapable of being cured.

Striking his soul with *irrecured* wound.
Rous, Thule (1598). (*Latham.*)

irrecusable (ir-ẹ̄-kū′zạ-bl), *a.* [= F. *irrécusable* = Sp. *irrecusable* = Pg. *irrecusavel*, < LL. *irrecusabilis, inrecusabilis*, not to be refused, < *in-* priv. + *recusabilis*, to be refused, < L. *recusare*, refuse: see *recusant.*] Not recusable; not to be rejected or set aside.

It is a propositional form, *irrecusable*, both as true in itself and as necessary in practice. *Sir W. Hamilton.*

irredeemability (ir-ẹ̄-dē-mạ-bil′i-ti), *n.* [< *irredeemable:* see *-bility.*] Irredeemableness. *Craig.*

irredeemable (ir-ẹ̄-dē′mạ-bl), *a.* [< *in-*[3] + *redeemable.* Cf. OF. *irredimible* = Sp. *irredimible* = Pg. *irredimivel* = It. *irredimibile.*] **1.** Not redeemable; that cannot or need not be redeemed or made good by payment or restitution; not to be restored or escaped: as, *irredeemable* paper money; an *irredeemable* loss; *irredeemable* slavery.

It [the word money] is used to describe not only gold and silver, but bank notes, government notes (redeemable or *irredeemable*), . . . and wealth generally.
Cyc. Pol. Sci., II. 882.

2. Beyond the power of redemption; irreclaimable: as, *irredeemable* criminals or crime.

Wrought for his house an *irredeemable* woe.
Tennyson, Maud, xxiii. 1.

irredeemableness (ir-ẹ̄-dē′mạ-bl-nes), *n.* The quality of being irredeemable.

irredeemably (ir-ẹ̄-dē′mạ-bli), *adv.* In an irredeemable manner; beyond redemption.

But though past time be gone, we are not to consider it *irredeemably* lost. *H. Blair*, Works, III. iii.

irredentism (ir-ẹ̄-den′tizm), *n.* [As *Irredentist* + *-ism.*] The system or political program of the Irredentists.

[Depretis and his supporters declare] its [Pentarchist] protection of Anarchist tendencies, and especially of *irredentism*, to be fraught with danger to peace within and abroad. *New York Evening Post*, June 1, 1886.

Irredentist (ir-ẹ̄-den′tist), *n.* and *a.* [< It. *irredentista*, < *irredenta* (*Italia*), unredeemed (Italy), fem. of *irredento*, < L. *in-*, not, + *redemptus* (> It. *redento*), redeemed, pp. of *redimere*, redeem: see *redeem.*] **I.** *n.* A member of an Italian political party formed in 1878, for bringing about the "redemption" or the incorporation into the kingdom of Italy of all regions situated near Italy where an important part of the population was Italian, but which were still subject to other governments, and hence called *Italia irredenta*.

Capponi himself was not above that pardonable but not very reasonable grievance. He was not an out-and-out *Irredentist* clamouring for Trieste and Istria, the Canton Ticino, Nice, Corsica, and Malta.
Edinburgh Rev., CLXV. 405.

II. *a.* Pertaining to or advocating irredentism.

The ultra-*Irredentist* faction, who would quarrel at one and the same time with England about Malta, with France about Savoy, with Austria about the Tyrol, with Switzerland about the Ticino, and with Turkey and Greece about Albania. *Fortnightly Rev.*, N. S., XLI. 621.

irreducibility (ir-ẹ̄-dū-si-bil′i-ti), *n.* [< *irreducible:* see *-bility.*] The quality or state of being irreducible.

The fleshy tissue proved to be a mass of omentum, which during its many years of *irreducibility* had become rounded and agglutinated. *Medical News*, LIII. 93.

irreducible (ir-ẹ̄-dū′si-bl), *a.* [= Sp. *irreducible* = Pg. *irreduzivel;* as *in-*[3] + *reducible.*] **1.** Incapable of being reduced to a lower amount or degree; not to be diminished or degraded.

What is it that we must hold fast as the *irreducible* minimum of churchmanship? *The American*, XIV. 134.

2. Incapable of being brought into a different state, condition, or form.

The newly mentioned observations seem to argue the corpuscles of air to be *irreducible* unto water.
Boyle, Works, I. 50.

Each specific sensation remains *irreducible* to another.
G. H. Lewes, Probs. of Life and Mind, II. 241.

3. Incapable of being reduced to a desired form or condition by manipulation: as, an *irreducible* hernia or fracture.—**Irreducible case, equation, function, integral**, etc. See the nouns.—**Irreducible circuit**, in *math.* See *reducible circuit*, under *circuit*.

irreducibleness (ir-ē-dū′si-bl-nes), *n.* The quality of being irreducible.

irreducibly (ir-ē-dū′si-bli), *adv.* So as to be irreducible.

irreductibility (ir-ē-duk-ti-bil′i-ti), *n.* [= F. *irréductibilité;* as *irreductible* + *-ity:* see *-bility*.] Absence of reductibility; irreducibleness. [Rare.]

M. Comte's puerile predilection for prime numbers almost passes belief. His reason is that they are a type of *irreductibility;* each of them is a kind of ultimate arithmetical fact. *J. S. Mill.*

irreductible (ir-ē-duk′ti-bl), *a.* [= F. *irréductible* = It. *irreduttibile;* as *in-*[3] + *reductible*.] Not reductible; irreducible. [Rare.]

irreduction (ir-ē-duk′shọn), *n.* The state of being unreduced; failure to reduce: said of a hernia.

This increase in volume was the only cause of *irreduction* [of the hernia]. *Medical News*, LII. 442.

irreflection (ir-ē-flek′shọn), *n.* [= F. *irréflexion* = Sp. *irreflexion;* as *in-*[3] + *reflection*.] Want or absence of reflection; thoughtlessness.

It gave to the course pursued that character of violence, impatience, and *irreflection* which too often belongs to the proceedings of the multitude. *Brougham.*

Abiding *irreflection* is quite consistent with increase of general knowledge. *F. Hall*, Mod. Eng., p. 281.

irreflective (ir-ē-flek′tiv), *a.* [< *in-*[3] + *reflective*.] Not reflective; wanting the quality or the habit of reflection; thoughtless.

From this day I was an altered creature, never again relapsing into the careless, *irreflective* mind of childhood.
De Quincey, Autobiog. Sketches, I. 362.

irreflexive (ir-ē-flek′siv), *a.* [< *in-*[3] + *reflexive*.] Not reflexive.

irreformable (ir-ē-fôr′ma-bl), *a.* [= Sp. *irreformable*, < LL. *irreformabilis, irreformabilis*, unalterable, < *in-* priv. + *reformabilis*, that can be formed again: see *reformable*.] **1.** Not reformable; not capable of being formed anew or again; not subject to revision.

Such definitions of the Roman Pontiff are *irreformable* in their own nature, and not because of the consent of the Church. *Cath. Dict.*, p. 677.

2. Not capable of being reformed or corrected; not susceptible of amendment: as, an *irreformable* drunkard.

irrefragability (i-ref″ra-ga-bil′i-ti), *n.* [= F. *irréfragabilité* = It. *irrefragabilità;* as *irrefragable* + *-ity:* see *-bility*.] The quality of being irrefragable or incapable of refutation.

A solemn, high-stalking man, with such a fund of indignation in him, or of latent indignation; of contumacity, *irrefragability*. *Carlyle*, Misc., IV. 80.

irrefragable (i-ref′ra-ga-bl), *a.* [= F. *irréfragable* = Sp. *irrefragable* = Pg. *irrefragavel* = It. *inrefragabile, irrefragabile*, < LL. *irrefragabilis, irrefragabilis*, irrefragable: see *refragable*.] Not refragable; incapable of being broken down or refuted; incontrovertible; undeniable; not confutable: as, an *irrefragable* argument; *irrefragable* evidence; an *irrefragable* opponent.

What a noble and *irrefragable* testimony was this to the power, to the truth of the Messiah!
Bp. Hall, The Ten Lepers.

Yet did not any of these conceive themselves infallible, or set down their dictates as verities *irrefragable*.
Sir T. Browne, Vulg. Err.

He was an *irrefragable* disputant against the errors . . . which with trouble he saw rising in his colony.
C. Mather, Mag. Chris., ii. 1.

Against so obstinate and *irrefragable* an enemy, what could avail the unsupported allies of genius?
Goldsmith, Polite Learning, ii.

=**Syn.** Unanswerable, indisputable, unquestionable, indubitable, irrefutable.

irrefragableness (i-ref′ra-ga-bl-nes), *n.* The state or quality of being irrefragable; irrefragability.

irrefragably (i-ref′ra-ga-bli), *adv.* In an irrefragable manner; so as to be irrefragable; incontrovertibly.

Herein he was *irrefragably* true, that there cannot be anything more certain and evident to a man that thinks than that he doth think.
Sir M. Hale, Orig. of Mankind, p. 24.

irrefrangible (ir-ē-fran′ji-bl), *a.* [= It. *irrefrangibile;* as *in-*[3] + *refrangible*.] Not refrangible; not to be broken or violated.

An *irrefrangible* law of country etiquette.
Mrs. Craik, Agatha's Husband, xx.

irrefrangibly (ir-ē-fran′ji-bli), *adv.* So as to be irrefrangible; fixedly; inviolably.

They knew . . . that the dragons were welded to their vases more *irrefrangibly* than Prometheus to his rock.
Hugh Conway, A Family Affair, p. 16.

irrefutability (ir-ē-fū-ta-bil′i-ti), *n.* [= F. *irréfutabilité;* as *irrefutable* + *-ity:* see *-bility*.] The quality of being irrefutable.

On the *irrefutability* of which he had privately prided himself. *The Century*, XXXI. 178.

irrefutable (ir-ē-fū′ta-bl), *a.* [= F. *irréfutable* = Pg. *irrefutavel*, < LL. *irrefutabilis, inrefutabilis*, < *in-* priv. + *refutabilis*, refutable: see *refutable*.] Not refutable; incapable of being refuted or disproved.

Yet He not urge them as an *irrefutable* proof, being not willing to lay more stresse upon any thing then 'twil bear.
Glanville, Pre-existence of Souls, xi.

That *irrefutable* discourse of Cardinal Caietan.
Bp. Hall, Honour of Married Clergy, p. 12.

=**Syn.** See list under *irrefragable*.

irrefutably (ir-ē-fū′ta-bli), *adv.* In an irrefutable manner; so as to be irrefutable.

irreg. An abbreviation of *irregular* or *irregularly*.

irregeneracy (ir-ē-jen′e-rā-si), *n.* [< *in-*[3] + *regeneracy*.] Unregeneracy. [Rare.]

irregeneration (ir-ē-jen-e-rā′shọn), *n.* [< *in-*[3] + *regeneration*.] Lack of regeneration; the state of being unregenerate. [Rare.]

irregular (i-reg′ū-lär), *a.* and *n.* [< ME. *irregular*, < OF. *irregulier*, F. *irrégulier* = Pr. *irregular, yregular* = Sp. Pg. *irregular* = It. *irregolare*, < ML. *irregularis*, not regular, < L. *in-* priv. + *regularis*, pertaining to rules (regular): see *regular*.] **I.** *a.* **1.** Not regular; lacking regularity or method in some respect; not conformable to rule, order, symmetry, uniformity, or a fixed principle; deviating from the normal or usual course or state; devious; unmethodical; uneven: as, an *irregular* figure, outline, or surface; *irregular* verbs; *irregular* troops.

They [the inhabitants of Barbary] are *irregular* in their life and actions, exceedingly subiect to choler, speake aloft and proudly, and are often at buffets in the streets.
Purchas, Pilgrimage, p. 638.

The numbers of pindarics are wild and *irregular*, and sometimes seem harsh and uncouth. *Cowley.*

2. Not regular in action or method; not conformed or conforming to regular rules or principles; hence, disorderly; lawless; improper: as, he is given to *irregular* courses.

Leading the men of Herefordshire to fight
Against the *irregular* and wild Glendower.
Shak., 1 Hen. IV., i. 1, 40.

Now that to steal by law is grown an art,
Whom rogues the sires, their milder sons call smart,
And "slightly *irregular*" dilutes the shame
Of what had once a somewhat blunter name.
Lowell, Tempora Mutantur.

Specifically—**3.** In *human anat.*, being of no determinate shape, as a vertebra: said only of bones. Bones were formerly classed unnaturally in four categories, long, short, flat, and irregular. Most bones fall in the last-named category.

4. In *zoöl.*: (*a*) Not having a definite form; bilaterally or radially unsymmetrical; not having the form usual in a group; differing in an unusual manner from neighboring parts: as, an *irregular* third joint of an insect's antenna. (*b*) Not arranged in a definite manner, or varying in position or direction: as, *irregular* marks (that is, marks varying in size or distance from one another); *irregular* punctures or striæ. (*c*) In echinoderms, not exhibiting radial symmetry; exocyclic or petalostichous; spatangoid or clypeastroid: specifically said of the heart-urchins and other sea-urchins of the division *Irregularia*. See cut under *petalostichous*.—**5.** In *bot.*, not having all the members of the same part alike: said of flowers. An irregular flower is one in which the members of some or all of its floral circles—for example, petals—differ from one another in size, shape, or extent of union, as in the bean, the violet, and the larkspur. The term is also used less specifically, and is often not discriminated from *unsymmetrical*.—**Irregular antennæ**, in *entom.*, those antennæ in which one or more joints are very greatly developed beyond the others. But when this irregularity is confined to one sex the antennæ are commonly said to be *deformed*.—**Irregular body.** See *body*.—**Irregular cadence**, an imperfect or deceptive cadence. See *cadence*.—**Irregular determinant**, in the theory of numbers, a determinant of a quadratic form where the forms of the principal genus are not all powers of some one.—**Irregular indorsement, phrase, proof, relation, verb**, etc. See the nouns.=**Syn. 1** and **2.** Unsettled, variable, changeable, mutable, unreliable; exceptional; fitful, capricious. In regard to conduct or ways of proceeding or managing, *irregular* generally expresses more blame than *unmethodical* or *unsystematic*, and less than *anomalous* or *disorderly;* it expresses less of foolishness than *erratic*, less of oddity than *eccentric*, less of carelessness than *desultory*, and less of moral obliquity than *devious* or *crooked*. It expresses the fact of being out of conformity with rule, but implies nothing more with certainty. Yet the word is sometimes used in a sinister sense, as though it were a euphemism for something worse.

II. *n.* One who is not subject or does not conform to established regulations; especially, a soldier who is not in regular service, or a person practising medicine without belonging to the regular profession.

Some of those nations that in the last and present war are famous for furnishing [Austria's] armies with *irregulars* are known to have a great turn for trade.

irresistibly (ir-ē-zis'ti-bli), *adv.* In an irresistible manner; so as to be irresistible.

If the doctrine of evolution had not existed, palæontologists must have invented it, so *irresistibly* is it forced upon the mind by the study of the remains of the Tertiary mammalia which have been brought to light since 1859. *Huxley,* On "The Origin of Species."

irresistless† (ir-ē-zist'les), *a.* [< *in-*[3] + *resistless.* The negative is erroneously duplicated, namely, *in-*[3] and *-less.*] Incapable of being resisted; irresistible. [A barbarous coinage.]

When beauty in distress appears,
An *irresistless* charm it bears.
Valden, In Allusion to Horace, Odes, ii. 4.

Rome, that shall stretch her *irresistless* reign
Wherever Ceres views her golden grain.
Grainger, tr. of Tibullus's Elegies, ii. 5.

irresoluble (i-rez'ō-lū-bl), *a.* [= F. *irrésoluble* = Sp. *irresoluble* = Pg. *irresoluvel* = It. *irresolubile,* < L. *irresolubilis, inresolubilis,* not to be dissolved, < *in-* priv. + (LL.) *resolubilis,* that may be dissolved: see *resoluble.*] **1.** Not resoluble; incapable of being resolved into elements or parts; indissoluble.

It may be here alledged that the productions of chemical analyses are simple bodies, and upon that account *irresoluble.* *Boyle,* Works, IV. 74.

2†. Incapable of being released or relieved.

The *irresoluble* condition of our souls after a known sin committed. *Bp. Hall,* Cases of Conscience, iii. 9.

irresolubleness (i-rez'ō-lū-bl-nes), *n.* The quality of being irresoluble; incapability of or resistance to resolution or separation of parts.

Quercetanus himself, though the grand stickler for the tria prima, has this confession of the *irresolubleness* of diamonds. *Boyle,* Works, I. 514.

irresolute (i-rez'ō-lūt), *a.* [= F. *irrésolu* = Sp. Pg. *irresoluto* = It. *irresoluto, irrisoluto,* < L. *irresolutus, inresolutus,* not loosed, < *in-* priv. + *resolutus,* loosed, resolved: see *resolute.*] Not resolute or firm in purpose; unable to form a resolution; wavering; given to doubt or hesitation.

A lukewarm, *irresolute* Man did never any thing well.
Howell, Letters, ii. 1.

The Scripture therefore alloweth not to the *irresolute* and the inconstant the name of men; they are said to be children, tossed to and fro with every wind of doctrine.
Bp. Atterbury, Sermons, II. xxiii.

=Syn. Vacillating, hesitating, undecided, unsettled, faltering.

irresolutely (i-rez'ō-lūt-li), *adv.* In an irresolute or wavering manner.

irresoluteness (i-rez'ō-lūt-nes), *n.* The state of being irresolute.

irresolution (i-rez-ō-lū'shon), *n.* [= F. *irrésolution* = Sp. *irresolución* = Pg. *irresolução* = It. *irresoluzione;* as *in-*[3] + *resolution,* after *irresolute.*] Lack of resolution; lack of decision or purpose; vacillation.

I was weary of continual *irresolution,* and a perpetual equipoise of the mind. *Johnson,* Rambler, No. 96.

=Syn. Indecision, hesitancy, wavering, faltering.

irresolvability (ir-ē-zol-va-bil'i-ti), *n.* [< *irresolvable:* see *-bility.*] Absence of resolvability; the state or quality of being irresolvable.

irresolvable (ir-ē-zol'va-bl), *a.* [< *in-*[3] + *resolvable.*] Not resolvable; incapable of being resolved.

The *irresolvable* nebulæ which exhibit bright lines in all probability consist . . . of glowing gas without anything solid in them.
J. Croll, Climate and Cosmology, p. 308.

irresolvableness (ir-ē-zol'va-bl-nes), *n.* Irresolvability.

irresolved (ir-ē-zolvd'), *a.* [< *in-*[3] + *resolved.*] Not resolved; irresolute; not settled in opinion; undetermined.

Many ingenious men continue yet *irresolved* in this noble controversy. *Boyle,* Works, III. 198.

While a person is *irresolved,* he suffers all the force of temptation to call upon him.
Stillingfleet, Sermons, IV. xi.

irresolvedly (ir-ē-zol'ved-li), *adv.* Without settled opinion; inconclusively. [Rare.]

Divers of my friends have thought it strange to hear me speak so *irresolvedly* concerning those things which some take to be the elements, and others the principles, of all mixed bodies. *Boyle,* Works, III. 198.

irrespective (ir-ē-spek'tiv), *a.* [< *in-*[3] + *respective.*] **1**†. Not regarding particular circumstances or conditions.

Thus did the Jew, by persuading himself of his particular *irrespective* election, think it safe to run into all sins.
Hammond.

2. Regardless; not taking account; independent: followed by *of* before an object: also often used adverbially, there being no noun to which it can be directly attached: as, to do one's duty, *irrespective of* consequences.

No abstract intellectual plan of life
Quite *irrespective of* life's plainest laws.
Browning, Bishop Blougram's Apology.

Irrespective of the form of government, frequent wars generate permanent military forces.
H. Spencer, Prin. of Sociol., § 520.

3†. Not showing respect; disrespectful.

In irreverend and *irrespective* behaviour towards myself and some of mine.
Sir C. Cornwallis, Supp. to Cabala, p. 101.

irrespectively (ir-ē-spek'tiv-li), *adv.* Without regard to, or not taking into account, other matters or considerations: with *of,* formerly with *to.*

They advance to such a state of strength as to be able to feed on the solid meat of vertue, which is the discharge of our duty to God and man *irrespectively to* humane praise.
W. Montague, Devoute Essays, I. x. § 4.

irrespirable (ir-ē-spīr'a-bl), *a.* [< LL. *irrespirabilis, inrespirabilis,* that cannot be breathed, < L. *in-* priv. + **respirabilis,* that may be breathed: see *respirable.*] Not respirable; unfit for respiration: as, an *irrespirable* atmosphere.

irresponsibility (ir-ē-spon-si-bil'i-ti), *n.* [= F. *irresponsabilité;* as *irresponsible* + *-ity:* see *-bility.*] The character or state of being irresponsible; lack of or freedom from responsibility.

The demands of society and the worry of servants so draw upon the nervous energy of women that they are glad to escape occasionally to the *irresponsibility* of hotel life.
C. D. Warner, Their Pilgrimage, p. 7.

irresponsible (ir-ē-spon'si-bl), *a.* [= F. *irresponsable;* as *in-*[3] + *responsible.*] **1.** Not responsible; not subject to responsibility; not to be held accountable, or called into question: as, an *irresponsible* government; the *irresponsible* control of wealth.

That no unbridled potentate or tyrant, but to his sorrow for the future, may presume such high and *irresponsible* licence over mankind, to havoc and turn upside-down whole kingdoms of men, as though they were no more in respect of his perverse will than a nation of pismires.
Milton, Tenure of Kings and Magistrates.

They left the crown what, in the eye and estimation of law, it had ever been, perfectly *irresponsible.*
Burke, Rev. in France.

2. Not capable of or chargeable with responsibility; unable to respond to obligation, as an insolvent debtor; not subject to or incurring legal responsibility, as an infant or idiot for his acts; not of a responsible nature or character.

irresponsibly (ir-ē-spon'si-bli), *adv.* In an irresponsible manner; so as to be irresponsible.

irresponsive (ir-ē-spon'siv), *a.* [< *in-*[3] + *responsive.*] Not responsive; unanswering.

irresponsiveness (ir-ē-spon'siv-nes), *n.* The state of being irresponsive, or unable or unwilling to answer.

Insensibility to pain, though usual, is liable to still more frequent exceptions, as also is the *irresponsiveness* to the address of persons other than the operator.
E. Gurney, Proc. Soc. Psych. Research, II. 65.

irrestrainable (ir-ē-strā'na-bl), *a.* [< *in-*[3] + *restrainable.*] Not restrainable; incapable of being restrained or held in check. *Prynne,* Treachery and Disloyalty, p. 91.

irresuscitable (ir-ē-sus'i-ta-bl), *a.* [< *in-*[3] + *resuscitable.*] Incapable of being resuscitated or revived.

irresuscitably (ir-ē-sus'i-ta-bli), *adv.* So as not to be resuscitated.

The inner man . . . sleeps now *irresuscitably* at the bottom of his stomach. *Carlyle,* Sartor Resartus, ii. 2.

irretention (ir-ē-ten'shon), *n.* [< *in-*[3] + *retention.*] Absence of retention; the state or quality of being irretentive; want of power to retain.

From *irretention* of memory he [Kant] could not recollect the letters which composed his name.
De Quincey, Last Days of Kant.

irretentive (ir-ē-ten'tiv), *a.* [< *in-*[3] + *retentive.*] Not retentive or apt to retain.

His imagination irregular and wild, his memory weak and *irretentive.* *Skelton,* Deism Revealed, iv.

irretraceable (ir-ē-trā'sa-bl), *a.* [< *in-*[3] + *retraceable.*] Not retraceable.

irretrievability (ir-ē-trē-va-bil'i-ti), *n.* [< *irretrievable:* see *-bility.*] The state or condition

of being irretrievable; incapability of recovery or reparation.

Pathetically shadowing out the fatal *irretrievability* of early errors in life. *De Quincey*, Secret Societies, ii.

irretrievable (ir-ē-trē′va-bl), *a.* [< *in-*[3] + *retrievable.*] Not retrievable; irrecoverable; irreparable: as, an *irretrievable* loss.

The condition of Gloriana, I am afraid, is *irretrievable.* *Spectator*, No. 423.

=**Syn.** See list under *irremediable.*

irretrievableness (ir-ē-trē′va-bl-nes), *n.* The state of being irretrievable.

irretrievably (ir-ē-trē′va-bli), *adv.* Irreparably; irrecoverably.

irreturnable (ir-ē-tėr′na-bl), *a.* [< *in-*[3] + *returnable.*] Not returnable; incapable of returning or of being returned.

Forth *irreturnable* flieth the spoken word. *Mir. for Mags.*, p. 429.

irrevealable (ir-ē-vē′la-bl), *a.* [< *in-*[3] + *revealable.*] Not revealable; incapable of being revealed.

irrevealably (ir-ē-vē′la-bli), *adv.* So as not to be revealed.

irreverence (i-rev′e-rens), *n.* [< ME. *irreverence*, < OF. *irreverence*, F. *irrévérence* = Pr. Sp. Pg. *irreverencia* = It. *irreverenza*, *irriverenza*, *inreverenza*, < L. *irreverentia*, *inreverentia*, irreverence, < *irreveren(t-)s*, *inreveren(t-)s*, irreverent: see *irreverent.*] The quality of being irreverent; lack of reverence or veneration; lack of due regard to the authority and character of a superior or an elder; a manifestation of irreverent feeling.

Irreverence is whan men doon not honour ther as hem oughte to doon. *Chaucer*, Parson's Tale.

Others affirm (if it be not *irreverence* to record their opinion) that even in wit he [Virgil] seems deficient by many omissions. *Davenant*, Gondibert, Pref., To Mr. Hobbes.

Not the slightest *irreverence* was intended in these miracle-plays, which were only dramatic performances tolerated by the mediæval Church. *J. Fiske*, Idea of God, p. 115.

=**Syn.** Disrespect, incivility, discourtesy, rudeness (all toward elders or superiors).

irreverend (i-rev′e-rend), *a.* [< *in-*[3] + *reverend.* Indef. 2 an erroneous form (simulating *reverend*) of *irreverent.*] 1. Not reverend; unworthy of reverence; devoid of dignity or respectability: as, the *irreverend* old age of a miser.—2†. Irreverent.

If any man use immodest speech, or *irreverend* gesture or behaviour, or otherwise be suspected in life, he is likewise admonished, as before. *Strype*, Abp. Grindal, App. ii.

irreverent (i-rev′e-rent), *a.* [< OF. *irreverent*, F. *irrévérent* = Sp. Pg. *irreverente* = It. *irreverente*, *irriverente*, *inreverente*, < L. *irreveren(t-)s*, *inreveren(t-)s*, not reverent, < *in-* priv. + *reveren(t-)s*, reverent: see *reverent.*] Not reverent; manifesting or characterized by irreverence; deficient in veneration or respect: as, to be *irreverent* toward one's superiors or elders; an *irreverent* expression.

There are not so eloquent books in the world as the Scriptures; neither should a man come to any kind of handling of them with uncircumcised lips, as Moses speaks, or with an extemporal and *irreverent*, or over-homely and vulgar language. *Donne*, Sermons, v.

Sir Gawain — nay,
Brother, I need not tell thee foolish words—
A reckless and *irreverent* knight was he.
Tennyson, Holy Grail.

I hope it will not be *irreverent* for me to say that if it is probable that God would reveal his will to others, on a point so connected with my duty, it might be supposed he would reveal it directly to me. *Lincoln*, in Raymond, p. 212.

irreverential (i-rev-e-ren′shal), *a.* [= ML. *irreverentialis* (rare); as *in-*[3] + *reverential.*] Pertaining to or marked by irreverence. [Rare.]

Irreverential pleasure. *George Eliot*, Essays.

irreverently (i-rev′e-rent-li), *adv.* In an irreverent manner; without reverence.

Who can with patience hear this filthy, rascally fool speak so *irreverently* of persons eminent both in greatness and piety? *Milton*, Defence of the People of England.

irreversibility (ir-ē-vėr-si-bil′i-ti), *n.* [< *irreversible:* see *-bility.*] The quality or condition of being irreversible; incapability of reversal or inversion.

irreversible (ir-ē-vėr′si-bl), *a.* [< *in-*[3] + *reversible.*] 1. Not reversible; incapable of being reversed or inverted.—2. Not to be recalled or annulled.

An uncertain sentence, which must stand eternally *irreversible*, be it good or bad. *Jer. Taylor*, Works (ed. 1835), I. 333.

This rejection of the Jews, as it is not universal, so neither is it final and *irreversible.* *Jortin*, Remarks on Eccles. Hist.

irreversibleness (ir-ē-vėr′si-bl-nes), *n.* The state or quality of being irreversible; irreversibility.

irreversibly (ir-ē-vėr′si-bli), *adv.* In an irreversible manner; so as not to be reversed or annulled.

irrevocability (i-rev″ō-ka-bil′i-ti), *n.* [= F. *irrévocabilité* = Sp. *irrevocabilidad* = Pg. *irrevocabilidade* = It. *irrevocabilità;* as *irrevocable* + *-ity:* see *-bility.*] The state of being irrevocable.

irrevocable (i-rev′ō-ka-bl), *a.* [= F. *irrévocable* = Sp. *irrevocable* = Pg. *irrevocavel* = It. *irrevocabile*, *inrevocabile*, < L. *irrevocabilis*, *inrevocabilis*, that cannot be called back, < *in-* priv. + *revocabilis*, that can be called back: see *revocable.*] Not revocable; not to be revoked or recalled; that cannot be repealed or annulled: as, an *irrevocable* decree.

Firm and *irrevocable* is my doom
Which I have pass'd upon her; she is banish'd.
Shak., As you Like it, i. 3, 85.

irrevocableness (i-rev′ō-ka-bl-nes), *n.* Irrevocability.

irrevocably (i-rev′ō-ka-bli), *adv.* In an irrevocable manner; beyond recall; so as to preclude recall or repeal.

irrevoluble† (i-rev′ō-lū-bl), *a.* [< *in-*[3] + *revoluble.*] Not revoluble; having no revolution.

Progressing the datelesse and *irrevoluble* circle of eternity. *Milton*, Reformation in Eng., ii.

irrhetorical (ir-ē-tor′i-kal), *a.* [< *in-*[3] + *rhetorical.*] Not rhetorical; unpersuasive. [Rare.]

irrigable (ir′i-ga-bl), *a.* [< L. as if **irrigabilis*, < *irrigare*, irrigate: see *irrigate.*] Capable of being irrigated; that may be made productive by irrigation.

The question of irrigating the arid but *irrigable* portion of our public domain is destined to become a leading one. *Science*, IV. 158.

irrigate (ir′i-gāt), *v. t.*; pret. and pp. *irrigated*, ppr. *irrigating.* [< L. *irrigatus*, *inrigatus*, pp. of *irrigare*, *inrigare* (> It. *irrigare* = F. *irriguer*), bring water to or upon, wet, irrigate, < *in*, upon, + *rigare*, water, wet, moisten, akin to E. *rain*[1], q. v.] 1. To pass a liquid over or through; moisten by a flow of water or other liquid.

Lister for some years *irrigated* a wound with carbolic lotion during the operation, and at the dressings when it was exposed. *Encyc. Brit.*, XXII. 679.

Specifically—2. To water, as land, by causing a stream or streams to be distributed over it. ★See *irrigation.*

irrigation (ir-i-gā′shon), *n.* [= F. *irrigation* = Pr. *irrigacio* = Pg. *irrigação* = It. *irrigazione*, < L. *irrigatio(n-)*, *inrigatio(n-)*, a watering, < *irrigare*, *inrigare*, irrigate: see *irrigate.*] The act of watering or moistening; the covering of anything with water or other liquid for the purpose of making or keeping it moist, as in local medical treatment; especially, the distribution of water over the surface of land to promote the growth of plants. The irrigation of land is often artificially effected by elaborate and costly means, consisting of machinery for raising the water from streams or reservoirs, and ditches through which to distribute it; and many regions depend upon such artificial irrigation for their productiveness.

By *irrigation* is meant the application of the waters of a running stream by a riparian proprietor in the cultivation of his land by artificial means, and not the overflowing of its natural banks by periodical or extraordinary freshets or swellings of the stream beyond the customary quantity flowing therein. *Washburn*, Eas. and Serv. (3d ed.), p. 308.

Bedwork irrigation, a method of irrigation especially applicable to level ground, in which the earth is thrown into beds or ridges.—**Upward irrigation**, a method of irrigation in which the water rises upward through the soil, instead of being carried off through drains, as in the ordinary circumstances.

irrigator (ir′i-gā-tor), *n.* [< *irrigate* + *-or.*] One who or that which irrigates; specifically, an apparatus, such as a fountain-syringe, for washing a wound or a diseased surface, or a surface to be disinfected.

irriguous (i-rig′ū-us), *a.* [= It. *irriguo*, < L. *irriguus*, *inriguus*, supplied with water, < *in*, in, upon, + *riguus*, watered, < *rigare*, water; cf. *irrigate.*] 1. Watered; watery; moist.

Like Gideon's fleece, *irriguous* with a dew from heaven, when much of the vicinage is dry. *Jer. Taylor*, Works (ed. 1835), I. 610.

With ale *irriguous*, undismay'd I hear
The frequent dun ascend my lofty dome
Importunate. *Warton*, Oxford Ale, p. 127.

2. Of such a nature as to irrigate; affording irrigation.

Rash Elpenor, who in evil hour
Dry'd an immeasurable bowl, and thought
To exhale his surfeit by *irriguous* sleep.
J. Philips, Cider, ii.

[Obsolete or archaic in both uses.]

irrisible (i-riz′i-bl), *a.* [< *in-*[3] + *risible.*] Not risible; incapable of laughter. *Campbell.* [Rare.]

irrision (i-rizh′on), *n.* [= F. *irrision* = Sp. *irrisión* = Pg. *irrisão* = It. *irrisione*, *inrisione*, < L. *irrisio(n-)*, *inrisio(n-)*, a mocking, deriding, < *irridere*, *inridere*, laugh at, mock, deride, < *in*, in, on, to, + *ridere*, laugh; cf. *derision.*] The act of sneering or laughing derisively; mockery; derision. [Obsolete or archaic.]

Then he againe, by way of *irrision*, Ye say very true indeed—That will ye, quoth hee, when a mule shall bring foorth a fole. *Holland*, tr. of Suetonius, p. 212.

To abstain from doing all affronts, . . . and mockings of our neighbour, not giving him appellatives of scorn or *irrision.* *Jer. Taylor*, Works (ed. 1835), I. 197.

Irrisor (i-rī′sor), *n.* [NL., < L. *irrisor*, *inrisor*, a derider, mocker, scoffer, < *irridere*, *inridere*, laugh at: see *irrision.*] 1. The leading and name-giving genus of birds of the family *Irrisoridæ*, founded by Lesson in 1831. *I. erythrorhynchus*, the best-known species, is glossy-blackish, with

Wood-hoopoe (*Irrisor erythrorhynchus*).

coralline bill and feet, and the lateral tail-feathers white-tipped. *Irrisor* (*Scoptelus*) *aterrimus* and *Irrisor* (*Rhinopomastes*) *cyanomelas* are other examples.

2. [*l. c.*] Any bird of the genus *Irrisor* or family *Irrisoridæ:* as, the black *irrisor;* the Namaqua *irrisor.*

Irrisoridæ (ir-i-sor′i-dē), *n. pl.* [NL., < *Irrisor* + *-idæ.*] An African family of picarian birds, related to the *Upupidæ*, having a long, slender, curved bill, as in that family, but the tail long and graduated, the head crestless, and the plumage glossy; the irrisors or wood-hoopoes. These birds are of arboreal and scansorial habits, though not yoke-toed; they are restless and noisy, and emit an offensive odor. There are 6 or 8 well-determined species, of the genera *Irrisor*, *Scoptelus*, and *Rhinopomastes.* See cut under *Irrisor.*

irrisory (i-rī′so-ri), *a.* [= Sp. Pg. It. *irrisorio*, < LL. *irrisorius*, *inrisorius*, mocking, < *irrisor*, *inrisor*, a mocker: see *Irrisor.*] Addicted to laughing derisively or sneering at others.

I wish that, even there, you had been less *irrisory*, less of a pleader. *Landor.*

★**irritability** (ir″i-ta-bil′i-ti), *n.* [= F. *irritabilité* = Sp. *irritabilidad* = Pg. *irritabilidade* = It. *irritabilità*, < L. *irritabilita(t-)s*, *inritabilita(t-)s*, irritability, < *irritabilis*, *inritabilis*, irritable: see *irritable.*] 1. The quality of being irritable; an irritable state or condition of the mind; proneness to mental irritation; irascibility; petulance: as, *irritability* of temper.

Towards Phœbe, as we have said, she was affectionate, . . . yet with a continually recurring pettishness and *irritability.* *Hawthorne*, Seven Gables, vii.

2. In *physiol.*, the property of nerve, muscle, or other active tissue of reacting upon stimuli; in muscles, specifically, the property of contracting when stimulated.

The *irritability* of the nerves and muscles is permanently maintained only so long as both are acted upon in their natural positions by the circulating blood. *Lotze*, Microcosmus (trans.), I. 106.

3. In *bot.*, that endowment of a vegetable organism by virtue of which a motion takes place in it in response to an external stimulus. Such motion may be obvious in a special organ and sudden, as in the sensitive-plant and Venus's fly-trap, or slow, as in the coiling of a tendril; or it may be internal in the protoplasm, of which while living irritability is a fundamental property, and from which, indeed, the outward motion proceeds. "The external stimulus may be mechanical, simply the contact of a foreign body, or electrical, or chemical; a sudden change from light to darkness, or a variation in the intensity of the illumination, sometimes acts as a stimulus." (*Vines*, Physiology of Plants, p. 301.) Irritability is nearly the same as sensitiveness. See *sensitive-plant, protoplasm.*

irritable (ir′i-ta-bl), *a.* [= F. *irritable* = Sp. *irritable* = Pg. *irritavel* = It. *irritabile*, < L. *irritabilis*, *inritabilis*, easily excited, < *irritare*, *inritare*, excite: see *irritate*[1].] 1. Susceptible to mental irritation; liable to the excitement of anger or passion; irascible; petulant.

Some minds corrode and grow inactive under the loss of personal liberty; others grow morbid and *irritable.* *Irving*, Sketch-Book, p. 108.

2. Susceptible to physical irritation; capable of being stimulated to action by external agency; liable to contract, shrink, become inflamed, etc., when excited or stimulated: as, *irritable* nerves; an *irritable* wound.—3. Specifically, in *physiol.* and *bot.*, possessing the property of irritability.

Strictly speaking, the glands ought to be called *irritable*, as the term sensitive generally implies consciousness; but no one supposes that the sensitive plant is conscious.
Darwin, Insectiv. Plants, p. 19.

4. Responding quickly to a stimulus; sensitive; impressible.

One cannot help having an *irritable* brain, which rides an idea to the moon and home again, without stirrups, whilst some folks are getting the harness of words on to its back. *J. H. Ewing*, Dandelion Clocks.

Our modern nerves, our *irritable* sympathies, our easy discomforts and fears, make one think (in some relations) less respectfully of human nature.
H. James, Jr., Little Tour, p. 220.

=Syn. 1. *Passionate*, etc. (see *irascible*); fretful, peevish.

irritableness (ir'i-tạ-bl-nes), *n.* The quality or state of being irritable; irritability.

irritably (ir'i-tạ-bli), *adv.* In an irritable manner; so as to cause or manifest irritation.

irritament† (ir'i-tạ-ment), *n.* [= OF. *iritement* = Sp. *irritamiento* = Pg. *irritamento* = It. *irritamento*, *inritamento*, < L. *irritamentum*, *inritamentum*, an incitement, provocative, < *irritare*, *inritare*, incite: see *irritate*[1].] An irritating cause or irritant; a provocative; an incentive.

Irregular dispensations . . . are . . . the perilous *irritaments* of carnal and spiritual enmity.
N. Ward, quoted in Tyler's Amer. Lit., I. 233.

irritancy[1] (ir'i-tạn-si), *n.* [< *irritan(t)*[1] + *-cy*.] The state of being irritant or of exciting irritation; the quality of irritating.

irritancy[2] (ir'i-tạn-si), *n.* [< *irritan(t)*[2] + *-cy*.] In *Scots law*, the state of being irritant or of no force, or of being null and void. *Imp. Dict.*

irritant[1] (ir'i-tạnt), *a.* and *n.* [= F. *irritant* = Sp. Pg. It. *irritante*, < L. *irritan(t-)s*, *inritan(t-)s*, ppr. of *irritare*, *inritare*, excite: see *irritate*[1].] I. *a.* Irritating; exasperating; specifically, producing pain, heat, or tension; causing inflammation: as, an *irritant* poison.

II. *n.* That which irritates or exasperates; specifically, a therapeutic agent that causes pain, heat, or tension, or a poison that produces inflammation.

Many of the Ranunculaceæ are irritant poisons. . . . Clematis is one of the best known *irritants* of this class.
Lindley, Vegetable Kingdom.

irritant[2] (ir'i-tạnt), *a.* [< LL. *irritan(t-)s*, *inritan(t-)s*, ppr. of *irritare*, *inritare*, make void, invalidate: see *irritate*[2].] Rendering null and void. [Rare.]

The states elected Henry, duke of Anjou, for their king, with this clause *irritant:* that if he did violate any part of his oath, the people should owe him no allegiance.
Sir J. Hayward, Ans. to Doleman, v.

Irritant clause, in *Scots law*, a clause in a deed declaring void specified acts if done by the party holding under the deed.

irritate[1] (ir'i-tāt), *v. t.*; pret. and pp. *irritated*, ppr. *irritating*. [< L. *irritatus*, *inritatus*, pp. of *irritare*, *inritare* (> It. *irritare* = Sp. Pg. *irritar* = F. *irriter*, > E. *irrite*[1]), excite, irritate, incite, stimulate.] 1. To excite to resentment or anger; annoy; vex; exasperate: as, to be *irritated* by an officious or a tedious person.

Not to molest, or *irritate*, or raise
A laugh at his expense, is slender praise.
Cowper, Retirement, l. 318.

2. To excite to automatic action by external agency, as organic tissue; produce motion, contraction, or inflammation in by stimulation: as, to *irritate* the skin by chafing or the nerves by teasing.

When a nerve is *irritated* not far from its termination in a muscle, the effect is but small.
H. Spencer, Prin. of Psychol., § 19.

3†. To give greater force or energy to; excite.

Cold maketh the spirits vigorous, and *irritateth* them.
Bacon.

Music too,
By Spartans lov'd, is temper'd by the law;
Still to her plan subservient melts in notes,
Which cool and soothe, not *irritate* and warm.
Glover, Leonidas, ii.

=Syn. 1. *Provoke*, *Incense*, etc. (see *exasperate*); fret, chafe, nettle, sting, annoy, gall, inflame, excite, anger, enrage.

irritate[1]† (ir'i-tāt), *a.* [< L. *irritatus*, pp.: see the verb.] Excited; exasperated; intensified.

The heat becomes more violent and *irritate*, and thereby expelleth sweat. *Bacon.*

irritate[2]† (ir'i-tāt), *v. t.* [< LL. *irritatus*, *inritatus*, pp. of *irritare*, *inritare*, make void, invalidate, < L. *irritus*, *inritus*, void, invalid: see *irrite*[2].] To render null and void. *Bramhall.*

irritating (ir'i-tā-ting), *p. a.* Causing irritation; vexing; provoking; exasperating.

Poor relations are undeniably *irritating*.
George Eliot, Mill on the Floss, i. 8.

The peasantry of France, though freed from the most oppressive, were still subject to some of the most *irritating* of feudal burdens. *Lecky*, Eng. in 18th Cent., iii.

irritatingly (ir'i-tā-ting-li), *adv.* In an irritating manner or degree; so as to irritate.

Her story, it is right to add, is not only fearfully crude, but *irritatingly* well-intentioned also.
Athenæum, No. 3194, p. 49.

irritation (ir-i-tā'shọn), *n.* [= F. *irritation* = Sp. *irritación* = Pg. *irritação* = It. *irritazione*, *inritazione*, < L. *irritatio(n-)*, *inritatio(n-)*, < *irritare*, *inritare*, excite: see *irritate*[1].] 1. The act of irritating, or the state of being irritated; impatient or angry excitement; provocation; exasperation.

It may appear strange that Marlborough should have continued in command in spite of so many causes of *irritation*, but he was implored by his Whig friends to do so.
Lecky, Eng. in 18th Cent., i.

2. Stimulation; incitement; a stirring up to activity. [Rare.]

Therefore was nothing committed to historie but matters of great and excellent persons & things, that the same by *irritation* of good courages (such as emulation causeth) might worke more effectually.
Puttenham, Arte of Eng. Poesie, p. 33.

The whole body of the arts and sciences composes one vast machinery for the *irritation* and development of the human intellect. *De Quincey.*

3. In *physiol.*, the act of evoking some action, or change of state, in a muscle, nerve, or other living tissue, by some chemical, physical, or pathological agent; the state or action thus evoked.

irritative (ir'i-tā-tiv), *a.* [= F. *irritatif* = Sp. Pg. It. *irritativo;* as *irritate*[1] + *-ive*.] 1. Serving to excite or irritate.

Every irritation produces in the cellular elements some mechanical or chemical change, which change is a "counter-working against the *irritative* cause."
Copland, Dict. Pract. Med.

2. Accompanied with or produced by irritation.—**Irritative fever.** See *fever*[1].

irritatory (ir'i-tā-tō-ri), *a.* [< *irritate*[1] + *-ory*.] Exciting; stimulating; irritating. [Rare.]

The other peradventure is sufficiently grounded for principles of faith, yet is weak by reason either of some passion, or of some *irritatory* and troublesome humour in his behaviour. *Hales*, Golden Remains, p. 45.

irrite[1]†, *v. t.* [< F. *irriter*, < L. *irritare*, incite, irritate: see *irritate*[1].] To irritate; exasperate; influence; provoke.

Irriting and prouoking men unto anger.
Grafton, Edw. V., an. 1.

irrite[2]† (i-rīt'), *a.* [< ME. *irrite*, < OF. *irrite* = Sp. *irrito* = Pg. It. *irrito*, < L. *irritus*, *inritus*, undecided, unfixed, invalid, void, < *in-* priv. + *ratus*, decided, fixed: see *rate*[2].] Invalid; of no force; vain; ineffectual; useless.

These *irrite*, forceless, bugbear excommunications, the ridiculous affordments of a mercenary power, are not unlike those old night-spells which blind people had from mongrel witches. *Rev. T. Adams*, Works, II. 180.

irrorate† (ir'ō-rāt), *v. t.* [< L. *irroratus*, *inroratus*, pp. of *irrorare*, *inrorare*, wet with dew (> It. *inrorare*, *irrorare* = Pg. *irrorar*), < *in*, upon, + *rorare*, distil dew, < *ros* (*ror-*), dew.] To moisten with dew.

irrorate (ir'ō-rāt), *a.* [< L. *irroratus*, pp.: see the verb.] In *zoöl.*, dotted with white or light color, as if with dewdrops; in *entom.*, marked with minute dots of color: said especially of the wings of lepidopters when numerous single scales differ from the ground color.

irrorated (ir'ō-rā-ted), *a.* [< *irrorate* + *-ed*[2].] Same as *irrorate*.

irroration (ir-ō-rā'shọn), *n.* [= F. *irroration;* as *irrorate* + *-ion*.] 1†. The act of bedewing, or the state of being moistened with dew.

If during the discharge the *irroration* should be interrupted, the portion of eggs then excluded will be barren, while the rest will be found to have been fecundated.
Trans. of Spallanzani's Dissertations. (*Latham.*)

2. In *entom.*, an ill-defined color-mark formed by scattered dots or scales, as on a butterfly's wing.

irrotational (ir-ō-tā'shọn-ạl), *a.* [< *in-*[3] + *rotational*.] Not rotational; devoid of rotation.

The equations which form the foundations of the mathematical theory of fluid motions were fully laid down by Lagrange and the great mathematicians of the end of the last century, but the number of solutions of cases of fluid motion which had been actually worked out remained very small, and almost all of these belonged to a particular type of fluid motion, which has been since named the *irrotational* type. *Encyc. Brit.*, III. 43.

Irrotational motion in *hydrodynamics*, of a fluid, a motion in which the infinitesimal parts have no angular velocity of rotation about their own axes—that is to say, if any infinitesimal spherical particle of the fluid were suddenly to become solidified, it would move without turning, although its path would not generally be rectilinear. Though all the particles of a fluid were moving in parallel straight lines, its motion would not necessarily be irrotational; for if parts moving side by side had different velocities, a solidified particle would rotate.

irrubrical (i-rö'bri-kạl), *a.* [< *in-*[3] + *rubrical*.] Not rubrical; contrary to the rubric.

irrugate† (ir'ö-gāt), *v. t.* [< L. *irrugatus*, *inrugatus*, pp. of *irrugare*, *inrugare*, wrinkle, < *in*, in, upon, + *rugare*, wrinkle: see *rugate*.] To lay in folds; wrinkle.

That the swelling of their body might not *irrugate* and wrinckle their faces. *Palace of Pleasure*, I., F. 4. (*Nares.*)

irrupted (i-rup'ted), *a.* [< L. *irruptus*, *inruptus*, pp. of *irrumpere*, *inrumpere*, break or burst in, rush in, < *in*, in, + *rumpere*, break, burst: see *rupture*.] Broken violently; disrupted. [Rare.]

irruption (i-rup'shọn), *n.* [= F. *irruption* = Sp. *irrupcion* = Pg. *irrupção* = It. *irruzione*, < L. *irruptio(n-)*, *inruptio(n-)*, a breaking or bursting in, < *irrumpere*, *inrumpere*, pp. *irruptus*, *inruptus*, break in: see *irrupted*.] A bursting in; a breaking or rushing into a place; a sudden invasion or incursion.

Lest evil tidings, with too rude *irruption*
Hitting thy aged ear, should pierce too deep.
Milton, S. A., l. 1567.

In 1388 the Austrians made an *irruption* into the territory of Glarus with an army of fifteen thousand men.
J. Adams, Works, IV. 318.

A grand *irruption* of angels follows, filling the sky with song and holy gratulation.
Bushnell, Sermons on Living Subjects, p. 12.

=Syn. Foray, raid.

irruptive (i-rup'tiv), *a.* [< *irrupt(ed)* + *-ive*.] Bursting in; rushing in or upon anything.

Storms of wrath and indignation dread
Seem ready to displode *irruptive* on his head.
Whitehouse, Ode to Justice.

Irvingia (ėr-vin'ji-ạ), *n.* [NL. (Hooker, 1860), named after Dr. *Irving*, R. N.] A small genus of dicotyledonous plants, of the family *Simaroubaceæ*. It is characterized by having the calyx 4- or 5-parted, the petals 4 or 5 in number, the stamens 10, and the ovary 2-celled. They are trees with curious annulated branches, alternate simple and entire leaves, and axillary or terminal panicles of small, yellow, odorous flowers. Four species, natives of tropical Africa, Malacca, and Indo-China, are known. *I. Gabonensis*, a tree 40 feet high, is the wild mango, dika-bread, or bread-tree of Africa. The seeds are the part eaten, and also contain an oil o. ..% similar to cocoa-butter, which is used by the natives in cooking.

Irvingism (ėr'ving-izm), *n.* [< *Irving* (see def.) + *-ism*.] The system of religious doctrine and practice peculiar to Edward Irving or the Irvingites, or adherence to that system. See *Irvingite*.

Great writers, of world-wide fame, have devoted themselves to studying Gnosticism and Montanism, but scorn to bestow a thought on Quakerism, *Irvingism*, and above all on Methodism. *Contemporary Rev.*, LIV. 112.

Irvingite (ėr'ving-īt), *n.* [< *Irving* (see def.) + *-ite*[2].] A member of a religious denomination called after Edward Irving (1792–1834), a minister of the Church of Scotland, who was settled in London in 1822, promulgated mystical doctrines, and was excommunicated in 1833. Irving was not the founder of the sect popularly called after him, but accepted and promoted the spread of the principles upon which, after his death, the sect was formed. Its proper name is the *Catholic Apostolic Church*, and it has an elaborate organization derived from its twelve "apostles," the first body of whom was completed in 1835. It recognizes the orders of apostles, prophets, evangelists, pastors or "angels," elders, deacons, etc. It lays especial stress on the early creeds, the eucharist, prophecies, and gift of tongues. It has an extremely ritualistic service and an elaborate liturgy. The adherents are not numerous, and are found chiefly in Great Britain. There are some on the continent of Europe and in the United States.

iry† (īr'i), *a.* [< *ire*[2] + *-y*[1].] Angry.

We flame with that which doth our soules refine;
For in our Soules the *iry* pow'r it is
That makes vs at vnhallowed thoughts repine.
Davies, Microcosmos, p. 74.

is (iz). The third person singular present indicative of the verb *be*. See *be*[1]. The form *is* was formerly, and is still dialectally, used for all persons of the singular, and in negro speech also for all persons of the plural. Such use in Chaucer, as in modern authors, is in imitation of dialect speech.

I *is* as ille a millere as are ye.
Chaucer, Reeve's Tale, l. 125.

Il hail, by God, Aleyn, thou *is* a fonne.
Chaucer, Reeve's Tale, l. 169.

-is[1]†. An obsolete form of *-es*[1].

-is[2]†. An obsolete form of *-es*[2].

isaac (ī′zak), *n.* [A corrupted form of *haysuck*, ★q. v.] The hedge-sparrow. *Halliwell.*

isabel, isabelle (iz′a-bel), *n.* [< F *isabelle* = It. *isabella* = Pg. *isabel* (Sp. *isabelino*, adj.), a color so called; < *Isabelle*, a woman's name. Color terms are often taken from personal or local names without any particular reason; and there is no need to put faith in the stories which connect the name with that of various Isabelles of history.] A yellowish-gray or grayish-buff color; a kind of drab. A mixture by rotating disks of ¾ black, ¼ bright chrome-yellow, and ½ white gives an isabel-yellow. Also *isabella*, *isabel-yellow*.

Isabella, daughter of Philip II. and wife of the Archduke Albert, vowed not to change her linen till Ostend was taken; this siege, unluckily for her comfort, lasted three years; and the supposed colour of the archduchess's linen gave rise to a fashionable colour, hence called l'Isabeau, or the *Isabella;* a kind of whitish-yellow-dingy.
I. D'Israeli, Curios. of Lit., I. 298.

The colour of the Fennec is a very pale fawn, or *isabel* colour, sometimes being almost of a creamy whiteness.
J. G. Wood, Pop. Nat. Hist., p. 73.

isabelita (iz-a-be-lē′tä), *n.* [Sp., dim. of *Isabel*, a woman's name.] A West Indian name of the angel-fish, *Holacanthus ciliaris*.

isabella (iz-a-bel′ä), *n.* [See *isabel*.] Same as *isabel*.

Similarly white, but with the ornamental feathers of the head, breast, and back of a rusty *isabella* color, is the buff-backed cattle-egret. *Stand. Nat. Hist.*, IV. 178.

If, on being removed therefrom and rinsed in cold water, the swatch assumes, when immersed in a solution of acetate of alumina, a deep yellowish tinge (*isabella* colour), the oiling is quite what it should be.
W. Crookes, Dyeing and Calico-printing, p. 324.

isabella-wood (iz-a-bel′ä-wůd), *n.* The red bay, ★*Persea Borbonia*.

isabelle, *n.* See *isabel*.

isabelline (iz a-bel′in), *a.* [= Sp. *isabelino*, < ★NL. *isabellinus;* as *isabel*(*l*) + *-ine*[1].] Resembling isabel; of the hue called isabel.

The upper plumage of every bird . . . is of one uniform *isabelline* or sand color.
Canon Tristram, Ornith. of N. Africa (in the Ibis).

Isabelline bear, the *Ursus isabellinus*, a pale variety of the Syrian bear (*Ursus syriacus*), found in the Himalayas.

isabel-yellow (iz′a-bel-yel″ō), *n.* Same as *isabel*.

isabnormal (ī-sab-nôr′mal), *a.* Same as *isoabnormal*.

isadelphous (ī-sa-del′fus), *a.* [< Gr. *ἴσος*, equal, + *ἀδελφός*, brother.] In *bot.*, having the stamens in the phalanges or bundles equal in number, as some diadelphous flowers.

isagoge† (ī-sa-gō′jē), *n.* [Also *isagogue;* < L. *isagoge*, *isagoga*, < Gr. *εἰσαγωγή*, an introduction, < *εἰσάγειν*, lead in, introduce, < *εἰς*, into, + *ἄγειν*, lead: see *act*.] An introduction.—**The Isagoge of Porphyry**, an introduction to the book of Categories of Aristotle, written by the Neoplatonist Porphyry in the third century A. D. It treats mainly of the five predicables.

isagogic (ī-sa-goj′ik), *a.* [< L. *isagogicus*, < Gr. *εἰσαγωγικός*, introductory, < *εἰσαγωγή*, introduction: see *isagoge*.] Introductory; especially, introductory to the interpretation of the Bible.

The formal, introductory or *isagogic*, studies have a wide range, requiring, perhaps more than any other, educated faculty and the scientific mind.
Contemporary Rev., LI. 208.

isagogical (ī-sa-goj′i-kal), *a.* [< *isagogic* + *-al*.] Same as *isagogic*.

isagogics (ī-sa-goj′iks), *n.* [Pl. of *isagogic:* see *-ics*.] That department of theological study which treats of the books forming the canon of Scripture, individually and collectively, their authorship, the date and place of their composition, their contents, style, inspiration, and any particular questions connected with them. Also called *Biblical introduction*.

isagoguet, *n.* Same as *isagoge*.

Isaianic (ī-zā-yan′ik), *a.* [< *Isaiah* + *-an* + *-ic*.] Pertaining to Isaiah, a Hebrew prophet and the traditional author of the book of Isaiah.

The question of the *Isaianic* or non-*Isaianic* origin of the disputed prophecies (especially xl.–lxvi.) must be decided on grounds of exegesis alone.
Encyc. Brit., XIII. 379.

isandrous (ī-san′drus), *a.* [< Gr. *ἴσος*, equal, + *ἀνήρ* (*ἀνδρ-*), a male (in mod. bot. a stamen).] In *bot.*, having the stamens similar and equal in number to the divisions of the corolla.

isantherous (ī-san′thėr-us), *a.* [< Gr. *ἴσος*, equal, + *ἀνθηρός*, flowery: see *anther*.] In *bot.*, having the anthers equal. *Thomas*, Med. Dict. [Rare.]

isanthous (ī-san′thus), *a.* [< Gr. *ἴσος*, equal, + *ἄνθος*, a flower.] In *bot.*, having regular flowers.

Isanthus (ī-san′thus), *n.* [NL. (F. A. Michaux, 1803), so called in allusion to the nearly regular corolla; < Gr. *ἴσος*, equal, + *ἄνθος*, flower.] A monotypic genus of North American plants, belonging to the family *Menthaceæ*, having a 5-lobed regular bell-shaped calyx, and a corolla with a bell-shaped border and 5 nearly equal spreading lobes. The single species, *I. brachiatus*, the false pennyroyal, is a low, much-branched annual plant, with nearly entire lanceolate leaves and small pale-blue flowers on axillary peduncles. It occurs from Quebec to Minnesota and southward to Georgia and Texas.

isapostolic (ī-sap-os-tol′ik), *a.* [< Gr. *ἴσος*, equal, + *ἀποστολικός*, apostolic: see *apostolic*.] Equal to the apostles: an epithet specifically given in the calendar of the Greek Church to bishops of apostolic consecration (for instance, St. Abercius of Hieropolis), holy and eminent women of the apostolic company (as St. Mary Magdalene and St. Thecla), the first preachers of the Christian faith in a country (as St. Nina in Georgia), and persons of royal or princely rank who have promoted the success of Christianity (as St. Constantine and St. Helena).

Isaria (ī-sā′ri-ä), *n.* [NL. (Elias Fries, 1829), so called in allusion to likeness of organs; < Gr. *ἴσος*, equal.] A genus of fungi of the family *Stilbaceæ*. They are floccose in appearance, with an elongated receptacle. They are found on a great variety of substances; some species, as *I. pulveracea* and *I. Sphingum*, attack and destroy various insects. (*E. L. Trouessart*, Microbes (trans.), pp. 48, 49.) From observations of Tulasne and others, it is now known that some reputed species of *Isaria*, including *I. Sphingum*, *I. farinosa*, and *I. arachnophila*, are really only stages in the development of other genera, especially *Cordyceps*.

Isariacei (ī-sā-ri-ā′sē-ī), *n. pl.* [NL., < *Isaria* + *-aceæ*.] A division of hyphomycetous fungi, or filamentous molds, containing those genera in which the fertile threads are compacted and have deciduous pulverulent spores at their free apices. The spellings *Isariadeæ*, *Isarideæ*, *Isarieæ*, and *Isariei* have been used by different authors, and the group has been called a family, tribe, division, etc., with some variation in its scope.

isarioid (ī-sā′ri-oid), *a.* [< *Isaria* + *-oid*.] In *bot.*, belonging to or resembling the genus *Isaria*.

isathyd (ī′sa-thid), *n.* [< *isat*(*in*) + *hyd*(*rogen*).] A substance formed from isatin by reduction with ammonium sulphid.

isatic (ī-sat′ik), *a.* [< *Isatis*[1] + *-ic*.] Of or pertaining to isatin; derived from isatin: as, *isatic* acid ($C_8H_7NO_3$), an acid formed by the action of caustic alkalis upon isatin.

Isatideæ (ī-sā-tid′ē-ē), *n. pl.* [NL. (A. P. de Candolle, 1821), < *Isatis*[1] (*-id-*) + *-eæ*.] A tribe of plants of the family *Brassicaceæ*, typified by the genus *Isatis*, characterized by having the silique short, indehiscent, inarticulate, often crustaceous, winged, and 1-celled and 1-seeded or rarely 2-seeded.

isatin (ī′sā-tin), *n.* [< *Isatis*[1] + *-in*[2].] A compound ($C_8H_5NO_2$) obtained by oxidizing indigo. It forms hyacinth-red or reddish-orange crystals of a brilliant luster. Its solutions stain the skin, and give it a disagreeable odor.

Isatis[1] (ī′sā-tis), *n.* [NL., < L. *isatis*, < Gr. *ἰσάτις*, an herb with a milky juice used in healing wounds, a coloring plant, woad.] A genus of plants belonging to the family *Brassicaceæ* and tribe *Sinapeæ*, having the pod large, orbicular, oblong or linear, corneous, and with the margin coriaceous or foliaceous. They are annual or perennial erect herbs, with entire leaves, and the cauline sagittate in outline. About 50 species are known. They are natives of Europe, northern Africa, and central and eastern Asia. One species, *I. tinctoria*, called *woad* or *asp-of-Jerusalem*, was cultivated by the ancient Britons to stain the skin blue, but it is now cultivated in few localities. *I. indigotica* is still cultivated as a dye-plant in the north of China.

isatis[2] (ī′sā-tis), *n.* [< NL. *isatis*, a specific name, *Canis isatis*, bestowed by J. G. Gmelin (1760): said to be from a vernacular name.] The white or arctic fox, *Vulpes lagopus*.

The *isatis*, or Arctic fox.
J. D. Godman, Amer. Nat. Hist. (2d ed.), I. 268.

Iscariotical (is-kar-i-ot′i-kal), *a.* [< *Iscariot* (see def.) + *-ic-al*.] Of or pertaining to Judas Iscariot, that one of Christ's twelve apostles who betrayed him; Judas-like; treacherous.

In the Evangelical and reformed use of this sacred censure, no such prostitution, no such *Iscariotical* drifts are to be doubted, as that Spiritual doom and sentence should invade worldly possession.
Milton, Reformation in Eng., ii.

ischt, ischet, *v. i.* See *ish*.

ischæmia, ischæmic. See *ischemia, ischemic*.

ischemia, ischæmia (is-kē′mi-ä), *n.* [NL., < Gr. *ἰσχαιμος*, stanching blood, styptic, < *ἰσχειν*, hold, + *αἷμα*, blood.] In *pathol.*, local anemia produced by vasoconstriction or by other local obstacles to the arterial flow.

Rothmund mentions two . . . cases of *ischæmia* of the retina. *J. S. Wells*, Dis. of Eye, p. 363.

ischemic, ischæmic (is-kē′mik), *a.* [< *ischemia* + *-ic*.] Pertaining to or affected with ischemia.

ischesis (is-kē′sis), *n.* [NL., < Gr. *ἰσχειν*, hold, restrain, a form of *ἔχειν*, hold, have: see *hectic*.] Suppression or retention of a discharge or secretion. *Dunglison*.

ischia, *n.* Plural of *ischium*.

ischiadic (is-ki-ad′ik), *a.* [= Pg. *ischiadico*, < L. *ischiadicus*, < Gr. *ἰσχιαδικός*, of or relating to the hips, having gout in the hips, < *ἰσχιάς* (*ἰσχιαδ-*), gout in the hips, sciatica, prop. adj. (sc. *νόσος*, disease), < *ἰσχίον*, the hip-joint, the hips: see *ischium*.] Same as *ischiatic*.

ischiagra (is-ki-ag′rä), *n.* [< Gr. *ἰσχίον*, the hip-joint, + *ἄγρα*, a taking: see *podagra*, *chiragra*, etc.] In *pathol.*, gout in the hip; ischialgia.

ischial (is′ki-al), *a.* [< *ischium* + *-al*.] Same as *ischiatic*.—**Ischial callosity.** See *callosity*.

ischialgia (is-ki-al′ji-ä), *n.* [< Gr. *ἰσχίον*, hip-joint, + *ἄλγος*, pain.] In *pathol.*, pain in the ★region of the ischium; sciatica.

ischiatic (is-ki-at′ik), *a.* [= Pg. *ischiatico;* var. of *ischiadic*, taken as < Gr. *ἰσχίον*, hip, + *-atic*[1]. Cf. *sciatic, sciatica.*] Of or pertaining to the ischium; sciatic. Also *ischiadic, ischial.*—**Ischiatic symphysis,** a remarkable union of right and left ischia which occurs in some birds, as the American ostrich.

ischiatocele (is-ki-at′ō-sēl), *n.* An improper form of *ischiocele*.

ischiocapsular (is″ki-ō-kap′sū-lär), *a.* [< NL. *ischium* + L. *capsula*, capsule: see *capsule*.] Ischiatic and capsular: applied to that part of the capsular ligament of the hip-joint which is connected with the ischium.

ischiocaudal (is″ki-ō-kâ′dal), *a.* and *n.* [< NL. *ischium*, hip-joint, + L. *cauda*, tail: see *caudal*.] **I.** *a.* Of or pertaining to the ischium and the tail: applied to a muscle connecting these parts.

II. *n.* A muscle which in some animals passes from the ischium to the tail.

ischiocavernosus (is″ki-ō-kav-ėr-nō′sus), *n.*; pl. *ischiocavernosi* (-sī). [NL.: see *ischiocavernous*.] A muscle of the penis, arising chiefly from the ischium, and inserted into the crus penis. Also called *erector penis* and *erector clitoridis*.

ischiocavernous (is″ki-ō-kav′ėr-nus), *a.* [< NL. *ischiocavernosus*, < *ischium* + L. *cavernosum* (*corpus*).] Pertaining to the ischium and to the corpus cavernosum of the penis. *Huxley*, Anat. Vert., p. 346.

ischiocele (is′ki-ō-sēl), *n.* [< Gr. *ἰσχίον*, hip, + *κήλη*, tumor.] In *pathol.*, a hernia through the sciatic notch. Also improperly *ischiatocele*.

ischiocerite (is-ki-os′ė-rīt), *n.* [< Gr. *ἰσχίον*, hip-joint, + *κέρας*, horn, + *-ite*[2].] One of the joints of the developed antenna of a crustacean, borne with the scaphocerite upon the basicerite, and bearing the merocerite. See *antenna*, 1.

A basicerite, to the outer portion of which a flattened plate, . . . here called the scaphocerite, is articulated; while to its inner portion an *ischiocerite* is connected, bearing a merocerite and carpocerite, while the last segment, or procerite, consists of a long multi-articulate filament.
Huxley, Anat. Invert., p. 273.

ischiococcygeal (is″ki-ō-kok-sij′ē-al), *a.* [< *ischiococcygeus* + *-al*.] Pertaining both to the ischium and to the coccyx; ischiocaudal: as, an *ischiococcygeal* muscle.

ischiococcygeus (is″ki-ō-kok-sij′ē-us), *n.*; pl. *ischiococcygei* (-ī). [NL., < *ischium* + *coccygeus*.] A muscle which in some animals connects the ischium and the coccyx.

ischiofibular (is″ki-ō-fib′ū-lär), *a.* [< *ischium* + *fibula* + *-ar*[3].] Of or pertaining to the ischium and the fibula, or connecting these bones, as the long head of the human biceps femoris or biceps femoris muscle.

ischio-iliac (is″ki-ō-il′i-ak), *a.* [< *ischium* + *ilium* + *-ac*.] Pertaining both to the ischium and to the ilium.

ischion (is′ki-on), *n.* [NL.] Same as *ischium*.

ischiopodite (is-ki-op′ō-dīt), *n.* [< Gr. *ἰσχίον*, hip-joint, + *πούς* (*ποδ-*), = E. *foot*, + *-ite*[2].] The third joint of a developed endopodite, between the basipodite and the meropodite. *Milne-Edwards; Huxley.* See cut under *endopodite*.

ischiopubic (is″ki-ō-pū′bik), *a.* [< *ischium* + *pubis* + *-ic*.] 1. Of or pertaining both to the ischium and to the pubis.

When the two ventral pieces are united at the *ischiopubic* symphysis, as they are in the Marsupialia, many Rodents, Artiodactyla, and Perissodactyla, the pelvis is elongated in form. *Gegenbaur*, Comp. Anat. (trans.), p. 486.

2. Containing or consisting of both ischium and pubis; being a pubo-ischium: as, the *ischiopubic* bone of reptiles.

ischiorectal (is″ki-ō-rek′tal), *a.* [< *ischium* + *rectum* + *-al.*] Connecting, situated between, or otherwise pertaining to the ischium and the rectum.—**Ischiorectal fascia, fossa,** etc. See the nouns.

ischiorrhogic (is″ki-ō-rō′jik), *a.* and *n.* [< Gr. *ἰσχιορρωγικός*, limping, lit. with broken hips, < *ἰσχίον*, hip-joint, hip, + *ῥώξ* (*ῥωγ-*), a break, broken bit, < *ῥηγνύναι*, perf. *ἔρρωγα*, break.] **I.** *a.* In *anc. pros.*, noting a variety of iambic trimeter which has not only a spondee or trochee for an iambus in the sixth or last place, as in the choliamb, but a spondee in the fifth place also (⏑ – ⏑ – | ⏑ – ⏑ – | – – – ⏓ for ⏑ – ⏑ – | ⏑ – ⏑ – | ⏑ – ⏑ – ⏓). The word *ischiorrhogic*, literally 'broken at the hip-joint,' was meant to describe the meter as 'lame' (see *choliamb*) or unrhythmical at a point short of the extremity or last foot. This meter was employed, like the choliamb, in scoptic poetry. The word has been used in a transferred sense by Hermann and other modern writers to describe any iambic verse with spondees in the inadmissible (even) places, especially a tripody in the form ⏑ ⏓ ⏑ ⏓ ⏑ ⏓.

II. *n.* A verse or line having this peculiarity.

ischiosacral (is″ki-ō-sā′kral), *a.* [< *ischium* + *sacrum* + *-al.*] Connecting or pertaining to the ischium and the sacrum; sacrosciatic; sacro-ischiac: as, an *ischiosacral* ligament.

ischiotibial (is″ki-ō-tib′i-al), *a.* [< *ischium* + *tibia* + *-al.*] Of or pertaining to the ischium and the tibia, or connecting these bones, as the semitendinosus and semimembranosus muscles of man.

ischiovertebral (is″ki-ō-vėr′tē-bral), *a.* [< *ischium* + *vertebra* + *-al.*] Pertaining both to the ischium and to the spinal column.

The ureter [of the porpoise] lies between the *ischio-vertebral* fascia and the peritonæum.
Huxley, Anat. Vert., p. 346.

ischium (is′ki-um), *n.*; pl. *ischia* (-ä). [NL., also *ischion*, < Gr. *ἰσχίον*, the hip-joint, hip, the hips, perhaps < *ἰσχύς*, strength, force.] 1. In *anat.*, the posterior part of the pelvic arch in vertebrates, the lowermost of the three parts forming the os innominatum. It is the posterior one of two divisions of the distal part of the primitive cartilaginous rod, subsequently expanded and variously modified in shape, and normally ankylosed at the acetabulum with both ilium and pubis to form the os innominatum, with or without additional union with the other pelvic bones. It is sometimes united with its fellow of the opposite side, or with vertebræ. In man it forms the lowermost part of the haunch-bone, on which the body rests in a sitting position. See cuts under *Dromæus*, *innominatum*, and *Ichthyosauria*.

2. In *Crustacea*, the third joint of the normally 7-jointed leg; the ischiopodite.—**Ramus of the ischium,** a branch of the ischium which unites with the ramus of the pubis to bound the obturator foramen.—**Tuber ischii,** the tuberosity of the ischium, upon which the body rests in sitting. See cut under *innominatum*.

Ischnosoma (isk-nō-sō′mä), *n.* [NL., < Gr. *ἰσχνός*, thin, slender, + *σῶμα*, body.] 1. A genus of fishes: same as *Osteoglossum*. *Spix*, 1829.—2. A large and wide-spread genus of staphylinids or rove-beetles: synonymous with *Mycetoporus*. *Stephens*, 1832.—3. A genus of crustaceans. *Sars*, 1866.

ischuretic (is-kū-ret′ik), *a.* and *n.* [< *ischury* + *-etic.*] **I.** *a.* Having the property of relieving ischuria.

II. *n.* A medicine adapted to relieve ischuria.

ischuria (is-kū′ri-ä), *n.* [= F. *ischurie* = Sp. *isciuria* = Pg. *ischuria* = It. *iscuria*, < LL. *ischuria*, < Gr. *ἰσχουρία*, retention of urine, < *ἰσχουρεῖν*, suffer from retention of urine, < *ἴσχειν*, hold, + *οὖρον*, urine.] In *pathol.*, a stoppage of urine, whether due to retention or to suppression.

ischury (is′kū-ri), *n.* Same as *ischuria*.

iset, *n.* An obsolete form of *ice*.

I'se (īz). 1. A vulgar colloquialism in Scotland and the northern part of England for *I shall*.—2. A vulgar contraction for *I is*, as used for *I am*, by negroes and others in the southern United States.

-ise[1]. [Early mod. E. also *-ize;* < ME. *-ise*, < OF. *-ise*, ult. < L. *-itia:* see *-ice.*] A termination of French origin, as in *merchandise:* also spelled *-ice*, as in *cowardice*, and formerly *-ize*, as in *hazardize*, etc.

-ise[2]. [Also sometimes *-ize;* < ME. *-isen*, rare form of *-issen*, *-ishen*, etc.: see *-ish*[2].] A termination of some verbs of French origin, equivalent to and of the same origin as *-ish*[2], as in *advertise*, *divertise*, *franchise*, *enfranchise*, etc. It merges with *-ise*[3], equivalent to *-ize*.

-ise[3]. A termination of verbs, more usually spelled *-ize* (which see).

★**isenergic** (ī-se-nėr′jik), *a.* [< Gr. *ἰσος*, equal, + E. *energic.*] In *physics*, denoting equal energy: as, *isenergic* lines.

isentropic (ī-sen-trop′ik), *a.* and *n.* [< Gr. *ἰσος*, equal, + *ἐντροπή*, a turning about, < *ἐντρέπειν*, turn about, < *ἐν*, in, + *τρέπειν*, turn: see *trope.*]

I. *a.* In *physics*, of equal entropy.—**Isentropic lines,** lines of equal entropy. They denote the successive states of a body in which the entropy remains constant.

II. *n.* An isentropic line: usually in the plural, *isentropics*.

isepipteses (ī-sep-ip-tē′sēz), *n. pl.* [NL., < Gr. *ἰσος*, equal, + *ἐπί*, upon, to, + *πτῆσις*, a flight, < *πέτεσθαι*, fly.] Lines on a chart or diagram connecting the different points simultaneously reached by birds of a given species in their migrations.

isepiptesial (ī-sep-ip-tē′si-al), *a.* [< *isepipteses* + *-ial.*] Of or pertaining to isepipteses.

iserin, iserine (ē′zėr-in), *n.* [= Sp. *iserina;* as *Iser*(*wiese*) (see def.) + *-in*[2], *-ine*[2].] A variety of titanic iron occurring in rounded grains in the diluvium of Iserwiese, a locality of Bohemia.

Isertia (ī-sėr′ti-ä), *n.* [NL. (J. C. D. von Schreber, 1774), named after P. E. *Isert*, a German surgeon.] A genus of South American shrubs or trees, belonging to the family *Rubiaceæ*, and to the tribe *Mussændeæ*, the type of the old tribe *Isertieæ*, having flowers with long tubular corollas, the limb divided into 5 or 6 woolly segments, large opposite and usually coriaceous leaves, and 2 large stipules. The flowers are very showy, being scarlet or sometimes white or yellow.

Isertieæ (ī-sėr-tī′ē-ē), *n. pl.* [NL. (A. P. de Candolle, 1830), < *Isertia* + *-eæ.*] A former tribe of plants of the family *Rubiaceæ*, typified by the genus *Isertia*, which is now included in the tribe *Mussændeæ*. Also *Isertidæ* (Lindley) and *Isertiæ* (Richard).

isht (ish), *v. i.* [< ME. *ischen, isshen, issen, icen,* < OF. *issir, eissir,* < L. *exire*, go out: see *exit* and *issue.*] To go out; issue.

The shippes were a-rived, and the knyghtes *isseden* owte, and alle the other peple. *Merlin* (E. E. T. S.), i. 42.

ish (ish), *n.* [< *ish, v.* Cf. *issue, n.*] Issue; liberty and opportunity of going out.—**Ish and entry.** In *Scots law*, the clause "with free ish and entry," in a charter, imports a right to all ways and passages, in so far as they may be necessary to kirk and market, through the adjacent grounds of the grantor, who is by the clause laid under that burden.

-ish[1] (ish). [< ME. *-ish, -issh, -isch,* < AS. *-isc* = OS. *-isk* = OFries. *-isk* = D. *-sch* = LG. *-isch* = OHG. *-isc*, MHG. G. *-isch* = Icel. *-skr* = Sw. *-sk*, *-isk* = Dan. *-sk* (also Rom., < HG. or LG.: It. Sp. Pg. *-esco* = F. *-esque*, also in part *-ais*, *-ois*, OF. *-ais*, *-eis*, *-ois*, see *-esque*, *-ese*), a common formative of adjectives (which are sometimes in AS. also used as nouns) from nouns, signifying 'of the nature of,' as in *mennisc*, of the nature of man, human (see *mannish*, *mensk*), *folcisc*, popular (< *folc*, folk), etc., or 'of the nativity or country of,' being the reg. formative of patrial adjectives, as in *Englisc*, of the Angles (< *Engle*, *Ængle*, Angles: see *English*), *Frencisc*, French, *Scyttisc*, Scottish, *Grēcisc*, Greekish, etc.] A termination of Anglo-Saxon origin, used as a regular formative of adjectives. (*a*) Of adjectives from common nouns, signifying 'of the nature of,' 'being like' the object denoted by the noun, as animals, as in *apish, bearish, cattish, doggish, eelish, hoggish, mulish, owlish, piggish, snakish, brutish*, etc.; or persons or supposed beings, as *babyish, boyish, childish, girlish, devilish, duncish, foolish, foppish, ghoulish, impish, roguish*, etc.; or places, as *hellish;* or acts or qualities, as *snappish*, etc. In most of these words it has acquired by association with the noun a more or less depreciative or contemptuous force; and so in some other words, as *mannish, womanish*, in which the noun has no depreciative sense. (*b*) Of adjectives from proper nouns of country or people, being the regular formative of patrial adjectives, as in *English, Scottish, Irish, Spanish, Netherlandish, Romish, Swedish, Danish, Greekish*, etc., the suffix in some adjectives of older date being contracted to *-sh* or (especially when *t* precedes) to *-ch*, as in *Welsh* (formerly also *Welch*), *Scotch, Dutch, French*, etc. Some recently formed adjectives of this type, used colloquially or made up on occasion, have often a depreciative or diminutive implication (as in (*c*)), as in *New-Yorkish, Bostonish, Londonish*, etc. (*c*) Of adjectives from adjectives, with a diminutive force, expressed by 'rather,' 'somewhat,' as *blackish, bluish, coldish, coolish, hottish, palish, reddish, tallish, whitish, yellowish*, etc., rather black, somewhat black, blue, cold, etc.; also colloquially in occasional adjectives from nouns, as *fallish, Novemberish*, etc., somewhat like fall, November, etc.

-ish[2]. [< ME. *-ishen, -ischen, -issen,* < OF. *-iss-, -is-*, a term. of the stem of some parts (ppr., etc.) of certain verbs, < L. *-escere, -iscere*, a term. of inceptive verbs, the formative *-esc-, -isc-* (*-sc-*, Gr. *-σκ-*) being ult. cognate with E. *-ish*[1]. See *-esce, -escent*, etc.] A termination of some English verbs of French origin, or formed on the type of such verbs, having no assignable force, but being merely a terminal relic. It occurs in *abolish, astonish, banish, demolish, diminish, establish, finish, minish, punish, stablish*, etc. In some verb appears in another form *-ise*, as in *advertise*. See *-ise*[2].

Ishmaelite (ish′mā-el-īt), *n.* [< *Ishmael* + *-ite*[2].] 1. A descendant of Ishmael, Abraham's son, who, as is related in Genesis (xxi. 14), was driven into the wilderness with his mother, Hagar. His twelve sons were "princes" or heads of tribes. The Arabs regard him as their ancestor.

They had golden earrings, because they were *Ishmaelites*.
Judges viii. 24.

2. One resembling Ishmael, whose hand was "against every man, and every man's hand against him" (Gen. xvi. 12); one at war with society.

Jos's tents and pilau were pleasant to this little *Ishmaelite*. *Thackeray*, Vanity Fair, lxvii.

Ishmaelitish (ish′mā-el-ī-tish), *a.* [< *Ishmaelite* + *-ish*[1].] Like the Ishmaelites; partaking of the nature of an Ishmaelite.

ishpingo (ish-ping′gō), *n.* [Amer. Ind. (?)] The Santa Fé cinnamon (see supplement).

Isiac (ī′si-ak), *a.* [< L. *Isiacus*, < Gr. *Ἰσιακός*, < *Ἰσις*, Isis: see *Isis.*] Relating to Isis: as, the *Isiac* mysteries; *Isiac* priests.—**Isiac table,** a plate of copper, of unknown origin, bearing representations of most of the Egyptian deities, with Isis in the middle. It first came to notice in the collection of Cardinal Bembo, after the sack of Rome by the troops of the emperor Charles V. in 1527. It was assumed to be a genuine relic of Egyptian antiquity. It is now in the royal gallery of Turin. Comparison with the print of it by Vico, published in 1559, shows it to be much mutilated.

isiclet, *n.* An obsolete spelling of *icicle*.

isidia, *n.* Plural of *isidium*.

isidiiferous (ī-sid-i-if′e-rus), *a.* [< NL. *isidium* + L. *ferre* = E. *bear*[1].] Bearing isidia, or isidioid excrescences. Also *isidiophorous*.

They [pycnides] are very common on the margin of the thallus of *isidiiferous* states of Peltigera canina and P. rufescens, where they have often been mistaken for spermogones. *Encyc. Brit.*, XIV. 556.

isidioid (ī-sid′i-oid), *a.* [< NL. *isidium* + Gr. *εἶδος*, form.] Having the form, character, or appearance of isidia, or provided with isidia. Also *isidiose*.

The *isidioid* condition in crustaceous thalli is the basis of the old pseudo-genus Isidium. *Encyc. Brit.*, XIV. 554.

isidiophorous (ī-sid-i-of′ō-rus), *a.* [< NL. *isidium* + Gr. *-φορός*, < *φέρειν* = L. *ferre* = E. *bear*[1].] Same as *isidiiferous*.

isidiose (ī-sid′i-ōs), *a.* [< *isidium* + *-ose.*] Same as *isidioid*.

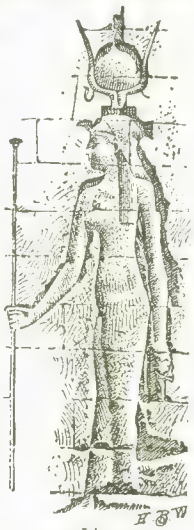
isidium (ī-sid′i-um), *n.*; pl. *isidia* (-ä). [NL.] In *bot.*, one of certain coral-like or wart-like excrescences produced upon the thalli of some foliaceous and crustaceous lichens. They are elevated, stipitate, sometimes branched, but always of the same color and texture as the thallus, and answer the same purpose as soredia.

Nylander observes (Flora, 1868, p. 353) that the *isidia* in the Collemacei (more especially in Collema) "show very clearly under the microscope the entire history of the evolution of the thallus from its first origin from a cellule containing a single gonimium to a minute true nostoc, and ultimately to the perfect texture of a Collema."
Encyc. Brit., XIV. 557.

Isidorian (is-i-dō′ri-an), *a.* [< *Isidorus*, a proper name.] Pertaining to any one of the name of Isidorus or Isidore; specifically, pertaining to St. Isidore, Archbishop of Seville A.D. 600–636, author of the encyclopedic work called the "Origines," and of numerous historical, antiquarian, and theological writings, among them two books on the ecclesiastical offices, containing among other things an account of the Spanish liturgy. A collection of canons and decretals made in his time is known as the *Isidorian collection*, and the interpolated collection (now called the *pseudo-Isidorian* or *false decretals*), made two centuries later, passed in the middle ages by the same name.—**Isidorian liturgy, office, rite.** Same as *Mozarabic rite* (which see, under ★*Mozarabic*).

isinglass (ī′zing-glȧs), *n.* [A corruption, simulating E. *glass*, of MD. *huysenblas*, later *huizenblas* (D. *huisblad*) = G. *hausenblase* = Dan. *husblas* = Sw. *husbloss*, lit. 'sturgeon-bladder,' < MD. *huysen, huizen* = MLG. *husen* = G. *hausen*, etc., sturgeon (see *huso*), + MLG. *blase* = G. *blasen*, etc., bladder: see *blaze*[4].] 1. The purest commercial form of gelatin, a substance of firm texture and whitish color, prepared from the sounds or air-bladders of certain fresh-water fishes. Isinglass is manufactured especially from the sounds of some species of Russian sturgeon, and in the United States from the sounds of cod, hake, squeteague, sea-trout, sturgeon, and other fishes, and from the skins of some of them. An inferior quality is made from clean scraps of hide, etc., or from the purified jelly obtained from skins, hoofs, horns, etc. In the preparation of creams and jellies isinglass is in great request. It is also used in fining liquors of the fermented kind, in purifying coffee,

in making mock pearls, and in stiffening linens, silks, gauzes, etc. With brandy it forms a cement for mending broken porcelain and glass. It is likewise used as an agglutinant to glue together the parts of musical instruments, and for binding many other delicate fabrics. It is used in the manufacture of fine glues and sizes, adhesive plasters, court-plasters, diamond cement, and imitation glass, in refining wines and liquors, in adulterating milk, and in lustering silk ribbons. Grades are known as *lyre, leaf*, and *book isinglass*. In the East Indies, China, and Japan, isinglass, or its equivalent, is prepared from various algæ or seaweeds — the same in part which furnish the material of the bird's-nests prized as a delicacy by the Chinese. Such is the origin of the important *Bengal isinglass* or *agar-agar*. Japanese isinglass is afforded by species of *Gelidium*, and is said to produce a firmer jelly than any other gelatin. These various products are used not only for food, but in the arts for stiffening, varnishing, and gluing.



2. Mica: so called from its resemblance to some forms of the gelatin.—**Book isinglass**, the commercial name for the packages into which isinglass is folded.—**Leaf isinglass**, a variety of isinglass made by cleansing, drying, and scraping the tissues of the sturgeon.—**Long** and **staple isinglass**, the same material as leaf isinglass, but twisted into different forms.—**Ribbon isinglass**, an inferior variety of isinglass.

isinglass-stone (ī'zing-glȧs-stōn), *n.* See *mica*.

ising-star† (ī'zing-stär), *n.* [Irreg. < *ising(lass)* + *star*.] A bit of shining mica. [Poetical.]

Some had lain in the scoop of the rock,
With glittering *ising-stars* inlaid. *Drake*, Culprit Fay.

★ **Isis** (ī'sis), *n.* [L., < Gr. Ἶσις, < Egypt. *Hes*, a deity, the female counterpart of Osiris (Hesiri).] In *Egypt. myth.*, the chief female deity; the sister, wife, and counterpart or female form of Osiris, and the mother of Horus. She is distinguished by the solar disk and cows' horns on her head, often surmounted by a diminutive throne, and bears the lotus scepter. By the Greeks she was identified with Io. Her worship in a modified form, as a nature-goddess, was introduced subsequently to the Alexandrine epoch into Greece, and was very popular at Rome from the end of the republic. The Greek and Roman priests and priestesses of Isis wore a special costume, and had as an attribute a peculiar metallic rattle, the sistrum.

Isis.
Egyptian Cavo-rilievo.

She [Cleopatra]
In the habiliments of the goddess *Isis*
That day appear'd. *Shak.*, A. and C., iii. 6, 16.

Islam (is'lȧm, is-läm'), *n.* [= F. Sp. *Islam* = Turk. *islām*, < Ar. *islām*, obedience to God, submission, the orthodox faith, < *salama*, be free, be safe, be devoted to God. Cf. *Moslem*, *Mussulman*, and *salaam*, from the same source.] 1. The religious system of Mohammed.

They [Ali and Hussein] filled a void in the severe religion of Mahomet, . . . supplied a tender and pathetic side in *Islam*.
M. Arnold, Essays in Criticism, A Persian Passion-Play.

2. The whole Mohammedan world.

Ali was hardly dead before he became enshrined in legend and in myth. . . . Hence the great schism which from the first divided the camp of *Islam*.
J. Darmesteter, The Mahdi (trans.), p. 23.

Islamic (is-lam'ik), *a.* [< *Islam* + *-ic*.] Belonging or relating to Islam.

Persians were the leaders and shapers of *Islamic* culture. *Contemporary Rev.*, LIII. 541.

Islamism (is'lȧm-izm), *n.* [= F. *Islamisme* = Sp. Pg. It. *Islamismo*; as *Islam* + *-ism*.] The faith of Islam; the true faith, according to the Mohammedans; Mohammedanism.

In these reaches I found *Islamism* of a purer form, and the people more learned in civilized ways.
H. O. Forbes, Eastern Archipelago, p. 190.

Islamite (is'lȧm-īt), *n.* [< *Islam* + *-ite*².] A Mohammedan.

Thronging all one porch of Paradise,
A group of Houris bow'd to see
The dying *Islamite*. *Tennyson*, Palace of Art.

Islamitic (is-la-mit'ik), *a.* [< *Islamite* + *-ic*.] Pertaining to Islam or the Islamites; Mohammedan.

Islamize (is'lȧm-īz), *v. t.*; pret. and pp. *Islamized*, ppr. *Islamizing*. [< *Islam* + *-ize*.] To conform to Islam; Mohammedanize.

We find most distinctly-marked African ideas of a Supreme Deity in the West, where intercourse with Moslems has actually *Islamized* or semi-*Islamized* whole negro nations, and the name of Allah is in all men's mouths.
E. B. Tylor, Prim. Culture, II. 302.

★ **island**¹ (ī'lȧnd), *n.* [Prop. *iland*, the *s* having been ignorantly inserted in the 16th century, in conformity with *isle*¹ (which is, however, wholly unrelated, and in which the *s* is also a late insertion: see *isle*¹); early mod. E. *iland*, *ylond* (also occasionally *ylelond*, etc.), < ME. *iland*, *yland*, *ylond*, < AS. *igland*, *īglond*, *īland*, *ēgland*, *ēglond*, *ēigland*, **iégland* (also *eáland*: see below) (= OFries. *ālond*, *eiland*, East Fries. *eiland* = MD. *eyland*, *eylland*, *eiland* = MLG. *eilant*, *elant*, *olant*, *einlant*, *eiglant*, LG. *eiland* = MHG. *eilant*, *einlant*, G. *eiland*: the MHG. G. being prob. < LG.) = Icel. *eyland* = Norw. *øland* = Dan. *øland* (= Sw. *Öland*, Öland), an island, < *īg*, *ēg*, *ēig*, **iég*, an island (OLG. *ey* = Fries. *ooge*, an island, = OHG. *awa*, *auwa*, *ouwa*, *owa*, MHG. *ouwe*, *owe*, G. *aue*, a meadow near water, = Icel. *ey* = Dan. Sw. *ö*, an island), a word existing unrecognized in mod. E. as an element in local names, as in *Angles-ea*, *Angles-ey*, *Aldern-ey*, *Batters-ea*, *Chels-ea*, *Cherts-ey*, *Orkn-ey*, *Thorn-ey*, *Whitn-ey*, etc. (and in Scand. names, *Faroe* (*Farö*), *Öland*, *Thursö*, etc.), as well as in the derived *eyot*, *ait*, an island (see *ait*); prob. orig. an adj., 'belonging to water,' 'in water,' < *eá* (**eahw-*) = OHG. *aha* = Goth. *ahwa* = L. *aqua*, water (see *aqua* and *ewe*²), + *land*, land: see *land*¹. The superfluous second element *land* was appar. added when the word *īg* was passing out of use; the var. *eáland* (as if < *eá*, water, + *land*, land) was an explanatory sophistication of the proper compound *īgland*.] 1. A tract of land surrounded by water, whether of the sea, a river, or a lake: in contradistinction to *mainland* or *continent*. Most of the islands of the world are the unsubmerged higher parts of a district whose lower parts have been depressed beneath the sea. Small islands are formed where sand-reefs are built up by wave-action near low coasts. Volcanic islands occur both in deep oceans and near continents. Coral islands are formed of organic materials. *Continental islands* are those near continents, and especially those of the first two classes named above. *Oceanic islands* are those in open oceans, and are only volcanic or coral.

My sovereign, with the loving citizens,
Like to his *island* girt in with the ocean, . . .
Shall rest in London. *Shak.*, 3 Hen. VI., iv. 8, 20.

2. Something resembling an island: as, an *island* of floating ice.

The shapely knoll,
That softly swell'd and gaily dress'd appears
A flowery *island*, from the dark green lawn
Emerging. *Cowper*, Task, iii. 630.

3. A hill rising out of low ground or swampy land, a small clump of woodland in a prairie, or the like. [Southern and southwestern U. S.]

At the summit of the hill is a beautiful grove, or *island* of timber, where the heroes that fell at the battle of San Jacinto sleep their last sleep.
A Stray Yankee in Texas, p. 252.

Coral island. See *coral*.—**Floating island.** (*a*) An island formed in a lake or other inland water, when of natural origin, by the aggregation of a mass of earth held together by driftwood and interlacing roots. Sometimes such islands are large enough to serve for gardens or pasture-grounds. Artificial floating islands have been formed by depositing lake- or river-mud on rafts of wickerwork covered with reeds. Both natural and artificial floating islands were used for market-gardens by the ancient Mexicans; and artificial ones, secured to the banks of rivers and lakes, abound in southern China, where they are most commonly used for raising rice. (*b*) A meringue of white of egg and sugar floating in divisions upon soft custard.—**Island of Reil**, in *anat.*, a triangular cluster of cerebral convolutions (the gyri operti, or hidden gyri) situated in the Sylvian fissure, immediately out from the lenticular nucleus. See *insula*, and cut under *gyrus*.—**Islands of the Blessed**, or the **Happy Islands**, in *Gr. myth.*, imaginary islands said to lie in the remote western part of the ocean, whither after death the souls of the virtuous were supposed to be transported.

island¹ (ī'lȧnd), *v. t.* [< *island*¹, *n.*] 1. To cause to become or appear like an island; insulate. [Chiefly used in the past participle.]

She distinguished . . . a belt of trees, such as we see in the lovely parks of England, but *islanded* by a screen . . . of a thick bushy undergrowth. *De Quincey*, Spanish Nun.

On a winter morning, when the mists are lying white and low and thin upon the plain, when distant hills rise *islanded* into the air, and the outlines of lakes are just discernible through fleecy haze.
J. A. Symonds, Italy and Greece, p. 112, note.

2. To dot as with islands. [Rare.]

A fair expanse
Of level pasture, *islanded* with groves,
And banked with woody risings.
Wordsworth, Prelude, viii.

Not a cloud by day
With purple *islanded* the dark-blue deep. *Southey*.

Island²†, **Island dog**†. See *Iceland*, *Iceland dog*.

islander¹ (ī'lȧn-dėr), *n.* [= D. *eilander* = G. *eiländer*; as *island*¹ + *-er*¹.] An inhabitant of an island.

That pale, that white-faced shore,
Whose foot spurns back the ocean's roaring tides
And coops from other lands her *islanders*.
Shak., K. John, ii. 1, 25.

Islander²†, *n.* An obsolete form of *Icelander*.

Islandic†, *a.* and *n.* An obsolete form of *Icelandic*.

islandish† (ī'lȧn-dish), *a.* [< *island*¹ + *-ish*¹.] Insular. *Davies*.

Our *Islandish* Monarchy.
Dr. Dee (Arber's Eng. Garner, II. 65).

islandy† (ī'lȧn-di), *a.* [< *island*¹ + *-y*¹.] Pertaining to islands; full of islands. *Cotgrave*.

islay (is'lā), *n.* A small evergreen tree, *Prunus ilicifolia*, a native of the California coast-ranges from San Francisco bay south.

isle¹ (īl), *n.* [Early mod. E. also *ile*, *yle*; < ME. reg. *ile*, *yle*, also *ille*, *ylle*, *ilde*, *ydle*, rarely *isle*, < OF. reg. *ile* (later *isle*, the silent *s* being inserted, as also in later ME., in imitation of the Latin *insula*), or of the earliest form *isle* (the *s* being at the earliest OF. period actually pronounced), F. *île* = Pr. *isla*, *illa*, *ilha* = Sp. *isla* = Pg. *ilha* = It. *isola*, < L. *insula*, an island; supposed to be < *in*, in, + *salum*, the main sea, = Gr. *σάλος*, surge, swell of the sea. The word has no connection with *island*¹, with which it has been confused.] 1. An island. [Now chiefly poetical.]

After hym com Galehaut, the sone of the feire Geaunt that was lorde of the fer oute *ylles*, and brought in his company x^M men. *Merlin* (E. E. T. S.), iii. 577.

Summer *isles* of Eden lying in dark-purple spheres of sea.
Tennyson, Locksley Hall.

2. In *entom.*, same as *islet*, 2.—**Emerald Isle.** See *emerald*.

isle¹ (īl), *v.*; pret. and pp. *isled*, ppr. *isling*. [< *isle*¹, *n.*] **I.** *trans.* To cause to become or appear like an isle; insulate; island. [Poetical.]

Isled in sudden seas of light.
My heart, pierced thro' with fierce delight,
Bursts into blossom in his sight. *Tennyson*, Fatima.

II. *intrans.* To dwell on an isle. *Davies*.

Lion and stoat have *isled* together, knave,
In time of flood. *Tennyson*, Gareth and Lynette.

isle²†, *n.* An old spelling of *aisle*.

isle³†, *n.* [Also (Sc.) *aizle*; < ME. *isyl*, < AS. *ysla*, *ysela*, coals, ashes.] A hot coal; an ember: usually in the plural. [Prov. Eng. and Scotch.]

Isyl of fyre, favilla. *Prompt. Parv.*, p. 266.

Ich haue syneged and gabbe me suluen theroffe and pine me seluen on asshen and on *iselen*.
Old Eng. Homilies (ed. Morris), ii. 65.

islesman (īlz'man), *n.*; pl. *islesmen* (-men). An islander; specifically [*cap.*], an inhabitant of the Hebrides or Western Islands of Scotland.

The *Isles-men* carried at their backs
The ancient Danish battle-axe.
Scott, Marmion, v. 5.

Isles of Shoals duck. See *duck*².

★ **islet** (ī'let), *n.* [< OF. *islet*, *illet*, m., *islete*, *islette*, *illette*, f., = Sp. *isleta* = It. *isoletta*, f., < ML. *insuletum*, n., dim. of L. *insula*, an island: see *isle*¹ and *-et*.] 1. A little isle or island.

Where *islets* have been formed on the reef, that part which I have called the "flat," and which is partly dry at low water, appears similar in every atoll.
Darwin, Coral Reefs, p. 33.

The cressy *islets* white in flower. *Tennyson*, Geraint.

2. Any small spot or space surrounded by something of different character or color: as, an *islet* of verdure in a desert; the *islets* on an insect's wing.

A but less vivid hue
Than of that *islet* in the chestnut-bloom
Flamed in his cheek. *Tennyson*, Aylmer's Field.

ism (izm), *n.* [< *-ism*, this suffix being commonly used in words expressing doctrine, theory, or practice.] A doctrine, theory, system, or practice having a distinctive character or relation: chiefly used in disparagement: as, this is the age of *isms*; to set up an *ism*.

It has nothing to do with Calvinism nor Arminianism nor any of the other *isms*. *Southey*, Letters (1809), II. 182.

This is Abbot Samson's Catholicism of the twelfth century — something like the *ism* of all true men in all true centuries, I fancy. Alas, compared with any of the *Isms* current in these poor days, what a thing!
Carlyle, Past and Present, ii. 15.

That land [New England] in which every *ism* of social or religious life has had its origin — that land whose hills and valleys are one blaze and buzz of material and manufacturing production. *H. B. Stowe*, Oldtown, p. 458.

-ism. [= F. *-isme* = Sp. Pg. It. *-ismo* = D. G. *-ismus* = Dan. *-isme* = Sw. *-ism*, < L. *-ismus*, < Gr. *-ισμός*, term. of nouns signifying the practice or teaching of a thing, from verbs in *-ίζειν*, being < *-ιζ-* + *-μος*, a common noun-formative: see *-ize*.] A suffix implying the practice, system, doctrine, theory, principle, or abstract idea of that which is signified or implied by the word to which it is subjoined: as, *dogmatism*, *spiritualism*, *socialism*, *Atticism*, *Americanism*, *Gallicism*, *terrorism*, *vandalism*, *republicanism*, *Mormonism*, being especially common in nouns so formed from names

of persons and designating theories, as *Benthamism, Comtism, Darwinism*, etc., or theories associated with practice, especially in words of temporary use, as *Cæsarism, Jacksonism, Grantism*, etc., such temporary words being formed as occasion requires, in unlimited numbers. Such words are usually accompanied by a noun of the agent in *-ist*, and an adj. in *-istic*, and often by a verb in *-ize*. See these suffixes.

Ismailian, Ismaelian (is-mā-il'i-an, -el'i-an), *n.* [< *Ismail, Ismael* (see def.), + *-ian*.] A member of a sect of Shiite Mohammedans who maintained that Ismail was the seventh and last of the true imams, and that their chief was his vicegerent on earth. Their doctrines, like those of their existing representatives, the Druses and Ansars of Syria, departed widely from orthodox Mohammedanism, and were made known in detail only to the initiated. The Ismailians founded the Fatimite dynasty of Egypt and Syria (see *Fatimite*), and the sect of Assassins was an offshoot from them.

Ismailism, Ismaelism (is'mā-il-izm, -el-izm), *n.* [< *Ismail, Ismael*, + *-ism*.] The doctrinal system of the Ismailians.

Under the Fatimite Caliph Hákim, a new religion sprang out of *Ismailism*, that of the Druses, so called from its inventor, a certain Darazi or Dorzi. *Encyc. Brit.*, XVI. 594.

Ismailite, Ismaelite (is'mā-il-īt, -el-īt), *n.* [< *Ismail, Ismael*, + *-ite*[2].] Same as *Ismailian*.

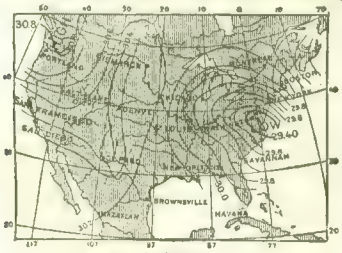
Ismailitic, Ismaelitic (is″mā-i-lit'ik, -el-it'ik), *a.* [< *Ismailite, Ismaelite*, + *-ic*.] Pertaining to Ismailism.

The eminent men who revealed to the poet in Cairo the secrets of the *Isma'ilitic* faith. *Encyc. Brit.*, XVII. 238.

ismatic (iz-mat'ik), *a.* [< *ism* + *-atic*[2].] Pertaining to isms or an ism; addicted to isms or theories. [Rare.]

ismatical (iz-mat'i-kal), *a.* [< *ismatic* + *-al*.] Same as *ismatic*. [Rare.]

ismaticalness (iz-mat'i-kal-nes), *n.* The quality of being addicted to isms or theories. [Rare.]



The Ism is the difficulty. This governs their action; this they would thrust upon us. Their *Ismaticalness* conceals and extrudes the Christian. *S. Judd*, Margaret, iii.

iso-. [L., etc., *iso-*, < Gr. *ἰσο-*, combining form of *ἴσος*, Attic *ἶσος*, Epic also *ἔισος*, equal, the same (in number, size, appearance, etc.), like.] An element in some words of Greek origin, meaning 'equal.'

isoabnormal (ī″sō-ab-nôr'mal), *n.* [< Gr. *ἴσος*, equal, + E. *abnormal*.] A line on the earth's surface connecting places which have the same anomaly, or deviation of the observed from the normal datum. The observed local anomalies are assumed to have been reduced to a uniform altitude above sea-level in order to eliminate the influence of altitude. Isoabnormals of pressure, temperature, wind, and rainfall are of ordinary occurrence. Also *isabnormal*.

Dove has published an elaborate set of maps constructed on this principle, in which he shows by means of system of Thermic *Isabnormals* the deviations from the mean of each month, and of the year, on the different parts of the globe. *Buchan*, Handy-book of Meteorology, p. 126.

isobar (ī'sō-bär), *n.* [< Gr. *ἴσος*, equal, + *βάρος*, weight: see *barometer*.] In *meteor.*, a line connecting places on the surface of the globe at which the barometric pressure is the same. For places not situated at the sea-level, a correction must be applied to each barometric observation corresponding

Isobars.

to the elevations of the stations, before the isobar connecting such stations can be drawn. Isobars are drawn upon some kind of map or chart of the regions covered by the observations. Isobars may be such as indicate the distribution of barometric pressure at a certain specified day and hour, or they may give the mean pressure for any period of time, as for the entire year or for the summer or winter months. When the altitudes are not accurately known, barometric isoabnormals are substituted; if 30 inches or 760 mm. be added to these they simulate isobars and were so called by Leverrier (1863); but this usage is now rare. Also called *isobarometric line*.

isobaric (ī-sō-bar'ik), *a.* [< *isobar* + *-ic*.] Indicating equal weight or pressure, especially the pressure of the atmosphere: in the latter use equivalent to *isobarometric*.—**Isobaric surface**, a surface in the air all points of which have the same barometric pressure. The line of intersection of an isobaric surface with one surface not parallel to it is an isobaric line or isobar.

isobarism (ī'sō-bär-izm), *n.* [< *isobar* + *-ism*.] Equality or similarity of weight.

isobarometric (ī-sō-bar-ō-met'rik), *a.* [< Gr. *ἴσος*, equal, + E. *barometric*.] In *phys. geog.*, indicating equal barometric pressure. Also *isobaric*.—**Isobarometric line.** Same as *isobar*.

isobathytherm (ī-sō-bath'i-thėrm), *n.* [< Gr. *ἴσος*, equal, + *βαθύς*, deep, + *θέρμη*, heat.] A line connecting points in a vertical section of any part of the ocean which have the same temperature. *Sir C. W. Thomson*, 1876.

isobathythermal (ī-sō-bath-i-thėr'mal), *a.* [< *isobathytherm* + *-al*.] Of or pertaining to an isobathytherm; isobathythermic.

isobathythermic (ī-sō-bath-i-thėr'mik), *a.* [< *isobathytherm* + *-ic*.] Relating to an isobathytherm; having the same degree of temperature at the same depth of the sea.

isobilateral (ī″sō-bī-lat'e-ral), *a.* [< Gr. *ἴσος*, equal, + E. *bilateral*.] In *bot.*, having the flanks of the organ flattened surfaces: applied to a particular kind of bilaterally symmetrical organs, as the leaves of some species of *Iris*, in contradistinction from *bifacial* or *dorsiventral* organs, or those with an evident upper and under surface, as in most leaves.

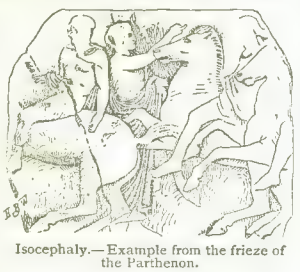
isobrious (ī-sob'ri-us), *a.* [< Gr. *ἴσος*, equal, + *βριᾶν*, be strong, make strong.] In *bot.*, growing or seeming to grow with equal vigor in both lobes: applied to a dicotyledonous embryo. Also *isodynamous*.

isobront (ī'sō-bront), *n.* [< Gr. *ἴσος*, equal, + *βροντή*, thunder.] A line on a map or chart connecting those places at which a given peal of thunder is heard simultaneously.

The *isobronts*, or the lines uniting the places where the first peal of thunder was simultaneously heard. *Sci. Amer. Supp.*, p. 9154.

Isocardia (ī-sō-kär'di-ä), *n.* [< Gr. *ἴσος*, equal, + *καρδία* = E. *heart*.] A genus of heart-cockles, of the family *Isocardiidæ*. They have a cordate ventricose shell, with separated involute divergent beaks, the cardinal teeth 2 and the laterals 1 or 2 in each valve. The extinct species are numerous, and there are five living species. *I. cor* is an example. *Glossus* is a synonym.

Heart-cockle (*Isocardia cor*).



Isocardiidæ (ī″sō-kär-dī'i-dē), *n. pl.* [NL., < *Isocardia* + *-idæ*.] A family of siphonate bivalve mollusks, named from the genus *Isocardia*; the heart-cockles. They have the shell cordiform and ventricose, and the beaks sometimes subspiral, 2 cardinal and 1 or 2 lateral teeth in each valve, the muscular impressions narrow, and the pallial line simple. *Isocardia cor*, the heart-shell or ox-horn cockle, occurs in the European seas. *Glossidæ* is a synonym. Also *Isocardiadæ*.

Isocarpæ (ī-sō-kär'pē), *n. pl.* [NL., < Gr. *ἴσος*, equal, + *καρπός*, fruit.] A division sometimes made of dicotyledonous sympetalous plants, consisting of those in which the carpels are of the same number as the divisions of the calyx and corolla, as in the *Ericaceæ, Primulaceæ*, etc.

Isocarpeæ (ī-sō-kär'pē-ē), *n. pl.* [NL. (Kützing, 1843), < Gr. *ἴσος*, equal, + *καρπός*, fruit, + *-eæ*.] The first of the two classes into which Kützing divided all algæ. It included the tribes *Gymnospermeæ* and *Angiospermeæ*.

isocellular (ī-sō-sel'ū-lär), *a.* [< Gr. *ἴσος*, equal, + NL. *cellula*, cell.] Consisting of equal or similar cells: as, an *isocellular* protozoan: opposed to *heterocellular*.

isocephaly (ī-sō-sef'a-li), *n.* [< Gr. *ἴσος*, equal, + *κεφαλή*, the head.] A rule or principle illustrated in ancient Greek art, in accordance with which, for the sake of symmetry, natural proportions were somewhat sacrificed in certain reliefs, etc., notably in friezes, and the heads of all the figures, whether mounted or on foot, standing or seated, were carved upon nearly the same level. Also *isokephaly*.

Isocephaly.—Example from the frieze of the Parthenon.

isocercal (ī-sō-sėr'kal), *a.* [< Gr. *ἴσος*, equal, + *κέρκος*, tail.] Having the end of the vertebral column straight, as in the eel, and not bent up.

The *isocercal* tail without a caudal fin. *Stand. Nat. Hist.*, III. 121.

isocercy (ī'sō-sėr-si), *n.* [< Gr. *ἴσος*, equal, + *κέρκος*, tail.] In *ichth.*, the condition of having an isocercal tail.

isochasm (ī'sō-kazm), *n.* [< Gr. *ἴσος*, equal, + *χάσμα*, a gap, chasm.] An isochasmic line.

isochasmic (ī-sō-kaz'mik), *a.* [< *isochasm* + *-ic*.] Indicating equality as regards frequency of any event, specifically, of auroral displays.—**Isochasmic curves**, imaginary lines passing through points having the same annual number of events.

It will be noticed that, eastward from England, the *isochasmic curves* tend rapidly northward, Archangel being only on the same auroral parallel as Newcastle. *Encyc. Brit.*, III. 97.

isochela (ī-sō-kē'lä), *n.*; pl. *isochelæ* (-lē). [< Gr. *ἴσος*, equal, + *χηλή*, claw.] In sponges, an anchorate or anchor-shaped flesh-spicule; a curved spicule with equal ends extended on the surface of a rotation ellipsoid, and having both these ends flat and expanded. See cut under *ancora*[1].

isochimal (ī'sō-kī-mal), *a.* [< *isochime* + *-al*.] Of the same mean winter temperature. Also spelled *isocheimal*.—**Isochimal line.** Same as *isochime*.

isochime (ī'sō-kīm), *n.* [< Gr. *ἴσος*, equal, + *χεῖμα*, winter: see *hiemal*.] In *meteor.*, a line drawn on the map through places on the surface of the globe which have the same mean winter temperature. Also spelled *isocheim*.

isochimenal (ī-sō-kī'me-nal), *a.* Same as *isochimal*.

isochimonal, isocheimonal (ī-sō-kī'mō-nal), *a.* [< Gr. *ἴσος*, equal, + *χειμών*, winter, + *-al*.] Same as *isochimal*.

isochor (ī'sō-kôr), *n.* [< Gr. *ἴσος*, equal, + *χώρα*, space, room.] A curve of equal volume upon a diagram in which the rectangular coördinates represent pressure and temperature.

isochoric (ī-sō-kor'ik), *a.* [< *isochor* + *-ic*.] Pertaining to equal volume or density: as, an *isochoric* curve.

isochromatic (ī″sō-krō-mat'ik), *a.* [< Gr. *ἴσος*, equal, + *χρῶμα*(*τ*-), color: see *chromatic*.] 1. Having the same color: said of the two series of oval curves of the interference figures of biaxial crystals. Each curve in the one series has one corresponding to it both in form and color in the other. The two curves or lines that have the same tint are called *isochromatic lines*. See *interference figures*, under *interference*, 5.

Beside these [dark bands], there are also variable bands, which correspond to the brushes which cross the *isochromatic* curves. *Spottiswoode*, Polarisation, p. 78.

2. In *photog.*, same as *orthochromatic*.

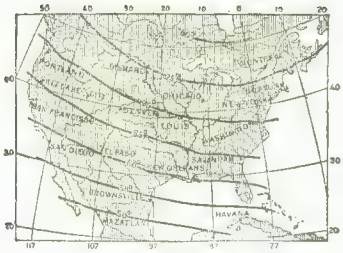
isochronal (ī-sok'rō-nal), *a.* [As *isochron-ous* + *-al*.] Uniform in time; of equal time; performed in equal times. Two pendulums which vibrate in the same time are isochronal; also, the vibrations of a pendulum in the curve of a cycloid have the same property, being all performed in the same time, whether the arc be large or small. Also *isochronous*.—**Isochronal line**, a line in which a heavy body descends without acceleration or retardation.

isochronally (ī-sok'rō-nal-i), *adv.* So as to be isochronal; with uniformity or equality of time. Also *isochronously*.

isochronic (ī-sō-kron'ik), *a.* [As *isochronous* + *-ic*.] Occurring at regular intervals of time.

isochronism (ī-sok'rō-nizm), *n.* [As *isochronous* + *-ism*.] The character of being isochronous; the property of a pendulum by which it performs its vibrations in equal times.

isochronon (ī-sok'rō-non), *n.* [< Gr. *ἰσόχρονον*, neut. of *ἰσόχρονος*, equal in time: see *isochronous*.] An equal time-keeper; a clock designed to keep perfectly accurate time.



isochronous (ī-sok'rō-nus), *a.* [< Gr. *ἰσόχρονος*, equal in age or time, < *ἴσος*, equal, + *χρόνος*, time: see *chronic*.] Same as *isochronal*.

isochronously (ī-sok'rō-nus-li), *adv.* Same as *isochronally*.

isochroous (ī-sok'rō-us), *a.* [< Gr. *ἰσόχροος*, like-colored, < *ἴσος*, equal, + *χρόα*, color.] Being of the same color throughout; whole-colored.

isoclinal (ī-sō-klī'nal), *a.* and *n.* [As *isocline* + *-al*.] I. *a.* Of equal inclination: applied in geology to strata which incline or dip in the same direction in tightly compressed folds.

The flexures are often so rapid that after denudation of the tops of the arches the strata are *isoclinal*, or appear to be dipping all in the same direction. *A. Geikie*, Text Book of Geology, p. 930.

Isoclinal Lines.

Isoclinal lines, in *magnetism*, lines drawn upon a map through points at all of which the dip of the needle is the same at any given epoch.

II. *n.* Same as *isocline*.

The directions of the isogonals, *isoclinals*, and lines of equal horizontal force have been found.
Nature, XXXIX. 565.

Also *isoclinic*.

isocline (ī′sō-klīn), *n.* [< Gr. *ἴσος*, equal, + *κλίνειν*, incline: see *cline*.] In *geol.*, a fold in which the strata are so appressed that the limbs or flanks (the parts on each side of the axis of the fold) are isoclinal, or dip in the same direction. See *monocline*. Also called *overturn*, or *overturned anticlinal*.

isoclinic (ī-sō-klin′ik), *a.* and *n.* [< *isocline* + *-ic*.] Same as *isoclinal*.

The *isoclinic* lines of the globe run round the earth like the parallels of latitude, but are irregular in form.
S. P. Thompson, Elect. and Mag., p. 117.

The whole region . . . would have to be surveyed in order to permit the tracing out of *isoclinics*.
Science, IX. 217.

isoclinostat (ī-sō-klī′nō-stat), *n.* [< Gr. *ἴσος*, equal, + *κλίνειν*, incline, + *στατός*, verbal adj. of *ἱστάναι*, stand: see *static*.] A link-work for dividing any angle into equal parts. Also *isoklinostat*.

isocolic (ī-sō-kō′lik), *a.* [< *isocolon* + *-ic*.] **1.** In *rhet.*, containing successive clauses of equal length: as, an *isocolic* period.—**2.** In *anc. pros.*, consisting of series or members all of the same magnitude: as, an *isocolic* system. See *isocolon*.

isocolon (ī-sō-kō′lon), *n.*; pl. *isocola* (-lạ). [< Gr. *ἰσόκωλον*, neut. of *ἰσόκωλος*, of equal members or clauses, < *ἴσος*, equal, + *κῶλον*, a member, limb, clause: see *colon*[1].] **1.** In *rhet.*: (*a*) A figure which consists in the use of two or more clauses (cola) in immediate succession having the same length or number of syllables. If the equality is only approximate, the figure is properly called *parison* or *parisosis*. (*b*) A period containing successive clauses of equal length. —**2.** In *anc. pros.*, a period or system consisting ★of cola or series of the same length throughout.

isocrymal (ī′sō-krī-mal), *n.* [< *isocryme* + *-al*.] A line, imaginary or drawn upon a map or chart of any region, connecting points at which the temperature is the same during some specified coldest portion of the year. The word was introduced by J. D. Dana, and used by him with reference to the mean temperature of the ocean surface "for the coldest thirty consecutive days of the year."

It is unnecessary to remark particularly upon the fitness of the other *isocrymals* for the purpose of illustrating the geographical distribution of marine species.
Dana, Amer. Jour. Sci. (2), xvi. 157.

isocryme (ī′sō-krīm), *n.* [< Gr. *ἴσος*, equal, + *κρυμός*, cold, chill (cf. *κρύος*, cold, frost): see *crystal*.] Same as *isocrymal*.

The *isocryme* of 68° is the boundary line of the coral-reef seas. *Dana*, Amer. Jour. Sci. (2), xvi. 156.

isocyclous (ī-sō-sī′klus), *a.* [< NL. *isocyclus*, < Gr. *ἴσος*, equal, + *κύκλος*, circle: see *cycle*[1].] Composed of successive equal or similar rings.

isocyclus (ī-sō-sī′klus), *n.* [NL., < Gr. *ἴσος*, equal, + *κύκλος*, circle.] An animal the body of which consists of a series of equal or similar rings. *Sir R. Owen.*

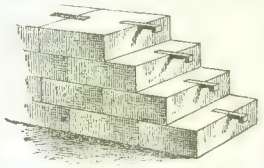
isodactylous (ī-sō-dak′ti-lus), *a.* [< NL. *isodactylus*, < Gr. *ἴσος*, equal, + *δάκτυλος*, digit.] In *zoöl.*, having the toes or digits of equal length or otherwise alike: its opposite is *anisodactylous*.

Isodia (ī-sō′di-ạ), *n. pl.* [< MGr. *εἰσόδια*, neut. pl. of Gr. *εἰσόδιος*, pertaining to entrance, < *εἴσοδος*, entrance, in MGr. the feast of the entrance of the Virgin Mary into the temple, < *εἰς*, into, + *ὁδός*, way.] In the *Gr. Ch.*, the feast of the Presentation of the Theotocos or Blessed Virgin Mary in the temple, observed November ★21st. See *presentation*. Also written *Eisodia*.

isodiabatic (ī-sō-dī-ạ-bat′ik), *a.* [< Gr. *ἴσος*, equal, + *διαβατικός*, able to pass through, < *διάβατος*, verbal adj. of *διαβαίνειν*, pass through: see *diabaterial*.] Pertaining to the transmission to or from a body of equal quantities of heat. Thus, isodiabatic parts of isothermal curves are parts which represent changes of pressure and density of the same body during the transmission of equal quantities of heat, the temperature remaining constant.

isodiametric (ī-sō-dī-ạ-met′rik), *a.* [< Gr. *ἴσος*, equal, + *διάμετρος*, diameter: see *diameter*.] Having equal diameters, or being of equal diameter. Specifically—(*a*) In *crystal.*, pertaining to crystals having equal lateral axes, as crystals of the tetragonal or hexagonal systems, which are optically uniaxial. (*b*) In *bot.*, having the diameter similar throughout, as organs or cells.

isodiametrical (ī-sō-dī-ạ-met′ri-kạl), *a.* [< *isodiametric* + *-al*.] Same as *isodiametric*.



There are cells which are especially concerned in assimilation, and which may be either *iso-diametrical* or elongated in a direction either parallel to or at right angles with the axis. *Jour. Roy. Micros. Soc.*, 2d ser., VI. i. 109.

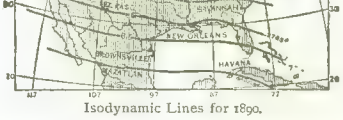
isodicon (ī-sod′i-kon), *n.*; pl. *isodica* (-kạ). [< MGr. *εἰσοδικόν*, neut. of *εἰσοδικός*, pertaining to the entrance, < Gr. *εἴσοδος*, entrance: see *Isodia*.] In the *Gr. Ch.*, a troparion or brief anthem succeeding the third antiphon and accompanying the *Little Entrance*. See *entrance*. Also written *eisodicon*.

isodimorphism (ī″sō-dī-môr′fizm), *n.* [< Gr. *ἴσος*, equal, + E. *dimorphism*.] In *crystal.*, isomorphism between the members of two dimorphous groups.

isodimorphous (ī″sō-dī-môr′fus), *a.* [< Gr. *ἴσος*, equal, + E. *dimorphous*.] In *crystal.*, having the quality of isodimorphism.

isodomon, isodomum (ī-sod′ō-mon, -mum), *n.* [< Gr. *ἰσόδομον*, neut. of *ἰσόδομος*, built alike, < *ἴσος*, equal, + *δέμειν*, build, > *δόμος*, *δομή*, a building: see *dome*[1].] One of the varieties of masonry used in the best period of Greek architecture, in which the blocks forming the courses were of equal thickness and equal length, and so disposed that the vertical joints of an upper course came over the middle of the blocks in the course below it. See *pseudisodomon*.

Isodomon, with blocks secured by dowels.



isodomous (ī-sod′ō-mus), *a.* [< *isodomon* + *-ous*.] Of the nature of isodomon.

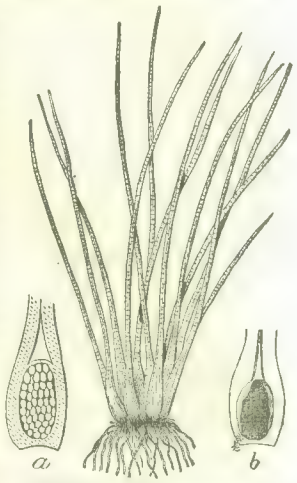
A great part of the city-wall, built in fine Hellenic *isodomous* masonry, and a large square central fortress with a circular projecting tower, are the only remains now trace-★able. *Encyc. Brit.*, XVIII. 735.

isodont (ī′sō-dont), *a.* [< Gr. *ἴσος*, equal, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] Having the teeth all alike, as a cetacean; having the characters of the *Isodontia*.

Isodontia (ī-sō-don′shi-ạ), *n. pl.* [NL., < Gr. *ἴσος*, equal, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] In Blyth's edition of Cuvier, an order of placental mammals, consisting of the *Cetacea* of Cuvier minus the herbivorous cetaceans (sirenians) of that author; one of two orders constituting Blyth's zoöphagous type of mammals. [Not ★in use.]

isodynamic (ī″sō-dī-nam′ik), *a.* and *n.* [< Gr. *ἰσοδύναμος*, having equal power or force: see *isodynamous*.] **I.** *a.* Having equal power or force; relating to equality of force.—**Isodynamic lines**, in *magnetism*: (*a*) Lines connecting those places where

Isodynamic Lines for 1890.



the intensity of the force of terrestrial magnetism is equal. They have a certain general resemblance in form and position to the isoclinal lines. (*b*) Lines drawn to indicate regions having winds of a specified force or strength as indicated by the wind-pressure.

II. *n.* An isodynamic line.

isodynamous (ī-sō-dī′na-mus), *a.* [< Gr. *ἰσοδύναμος*, having equal power or force, < *ἴσος*, equal, + *δύναμις*, power, force: see *dynam*, *dynamic*.] Having equal force; of equal size; in *bot.*, same as *isobrious*.

Isoëtaceæ (ī-sō-ē-tā′sē-ē), *n. pl.* [NL., < *Isoëtes* + *-aceæ*.] A family of vascular cryptogamous plants, of the order *Lycopodiales*, containing the single genus *Isoëtes*.

Isoëtes (ī-sō′e-tēz), *n.* [NL., < L. *isoetes*, small houseleek or aye-green, < Gr. *ἰσοετής*, equal in years (neut. *τὸ ἰσοετές*, an annual plant), < *ἴσος*, equal, + *ἔτος*, a year.] A genus of vascular cryptogamous plants, belonging to the family *Isoëtaceæ*. They are small grass-like or rush-like aquatic or semi-aquatic plants, in which the plant-body consists of an exceedingly restricted stem, which gives off a dense mass of roots from below and sends up a compact tuft of leaves above. The sporangia are sessile in the axils of the leaves, and some contain macrospores (megaspores) and some microspores. The genus comprises about 60 species, and has a very wide geographical distribution, occurring in Europe, Asia, Australasia, Africa, and North and South America. The species, which are generally known as *quillworts*, are of no especial value. *I. lacustris* is known in England as *Merlin's-grass*. Some half-dozen species have been found in a fossil state, chiefly in the Tertiary of Europe, but one occurs in the Eocene of Colorado, one in the Upper Jurassic of Bavaria, and another in the Oölite of Yorkshire, England. These lower forms are usually distinguished by the name *Isoëtites*.

Quillwort (*Isoëtes Engelmanni*).
a, sporangium cut longitudinally, showing the macrospores or megaspores; *b*, sporangium cut longitudinally, showing the microspores.

isogamous (ī-sog′ạ-mus), *a.* [< Gr. *ἴσος*, equal, + *γάμος*, marriage.] Characterized by isogamy. The isogamous algæ are the *Zygnemaceæ*, *Desmidiaceæ*, etc.

isogamy (ī-sog′ạ-mi), *n.* [< Gr. *ἴσος*, equal, + *γάμος*, marriage.] The conjugation of two similar gametes in which no differentiation of sex can be distinguished. Compare *oögamy*.

isogenous (ī-soj′e-nus), *a.* [< Gr. *ἰσογενής*, equal in kind, < *ἴσος*, equal, + *γένος*, kind: see *-genous*.] Of the same or a similar origin; homologous, in a broad sense, as formed from the same or corresponding tissues of the embryo. Thus, parts of the nervous system of worms, mollusks, and vertebrates are *isogenous*, being derived from the epiblast.

isogeny (ī-soj′e-ni), *n.* [As *isogen-ous* + *-y*.] In *biol.*, similarity or identity of origin; origination in or derivation from the same or corresponding tissues; evolutionary homology, in a broad sense.

It is well to use words which will express our meaning exactly, and hence a general homology may be indicated by the word *isogeny*, indicating a general similarity of origin. *Stand. Nat. Hist.*, I., Int., p. xvii.

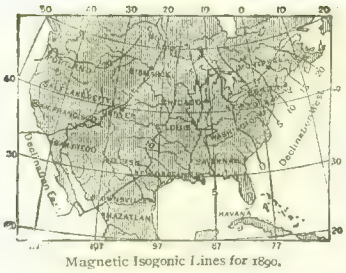
isogeotherm (ī-sō-jē′ō-thėrm), *n.* [< Gr. *ἴσος*, equal, + *γῆ*, the earth, + *θέρμη*, heat.] In *phys. geog.*, an imaginary line or surface under the earth's surface passing through points having the same temperature.

isogeothermal (ī-sō-jē-ō-thėr′mal), *a.* [< *isogeotherm* + *-al*.] In *phys. geog.*, pertaining to or having the nature of an isogeotherm.

isogeothermic (ī-sō-jē-ō-thėr′mik), *a.* [< *isogeotherm* + *-ic*.] Same as *isogeothermal*.

isognathous (ī-sog′nā-thus), *a.* [< Gr. *ἴσος*, equal, + *γνάθος*, jaw.] In *odontog.*, having the molar teeth alike in both jaws: opposed to *anisognathous*.

isogon (ī′sō-gon), *n.* [= Sp. It. *isogono*; < Gr. *ἰσογώνιος*, having equal angles, < *ἴσος*, equal, + *γωνία*, angle.] In *math.*, a figure whose angles ★are equal.



isogonal (ī-sog′ō-nal), *a.* and *n.* [< *isogon* + *-al*.] **I.** *a.* Having equal angles.

★ **II.** *n.* An isogonic line.

isogonic[1] (ī-sō-gon′ik), *a.* [< *isogon* + *-ic*.] Having equal angles.—**Isogonic lines**, in *magnetism*, lines on the earth's surface at every point of which the deviation of the magnetic needle from the true north is the same for a given epoch. See cut on following page.

On the globe the *isogonic lines* run for the most part from the north magnetic pole to the south magnetic polar region. *S. P. Thompson*, Elect. and Mag., p. 117.

isogonic[2] (ī-sō-gon′ik), *a.* [< Gr. *ἴσος*, equal, + *γόνος*, offspring.] In *biol.*, exhibiting isogonism; producing structurally identical generative individuals from different stocks, as hydroids of different families may do.

Magnetic Isogonic Lines for 1890.

isogoniostat (ī-sō-gō'ni-ō-stat), *n.* [< Gr. *ἰσογώνιος*, equiangular (see *isogon*), + *στατός*, verbal adj. of *ἱστάναι*, stand: see *static*.] A linkwork for regulating the motion of a train of ★prisms.

isogonism (ī-sog'ō-nizm), *n.* [< *isogon-ic*[2] + *-ism*.] In *biol.*, production of similar or identical sexual organisms or reproductive parts from diverse stocks.

Medusæ of identical structure, which one would place in the same genus, may form the sexual generations of hydroid stocks belonging to different families (*isogonism*).
Claus, Zoölogy (trans.), I. 240.

isogram (ī'sō-gram), *n.* [< Gr. *ἴσος*, equal, + *γράμμα*, that which is drawn or written: see *gram*[2], and cf. *diagram*, etc.] A diagram exhibiting a family of curves for the purpose of showing a relation between three variables.

isographic (ī-sō-graf'ik), *a.* [< *isography* + *-ic*.] Of or pertaining to isography.

isographically (ī-sō-graf'i-kal-i), *adv.* In an isographic manner; as regards, or by means of, isography.

The laborious process of *isographically* charting the whole of Argelander's 324,000 stars.
A. M. Clerke, Astron. in 19th Cent., p. 437.

isography (ī-sog'ra-fi), *n.* [< Gr. *ἰσόγραφος*, writing like, < *ἴσος*, equal, + *γράφειν*, write.] The imitation of handwriting.

Isogynæ (ī-soj'i-nē), *n. pl.* [NL., < Gr. *ἴσος*, equal, + *γυνή*, female (in mod. bot. a pistil).] A division of dicotyledonous plants, including the *Primulaceæ*, *Ericaceæ*, etc., in which the carpels equal the sepals and petals in number. They are coextensive with the *Isocarpæ*.

isogynous (ī-soj'i-nus), *a.* [< Gr. *ἴσος*, equal, + *γυνή*, female (in mod. bot. pistil).] In *bot.*, having the pistils, or the carpels of which the single pistil is composed, equal in number to the sepals.

isogyrous (ī-sō-jī'rus), *a.* [< Gr. *ἴσος*, equal, + *γυρός*, round: see *gyre*.] In *bot.*, forming a complete spire. [Rare.]

isohalsine (ī-sō-hal'sin), *n.* [Irreg. < Gr. *ἴσος*, equal, + *ἅλς*, salt, + *-ine*[1].] A line connecting points of equal salinity in the waters of the ocean. Such lines may be drawn to indicate either the distribution of the saline matter (about three fourths of which in the main ocean consists of common salt) at and near the surface, or its variations in depth. In the latter case, the isohalsines are plotted upon a plane surface representing a vertical section of the ocean between the desired points.

isohyetal (ī-sō-hī'e-tal), *a.* and *n.* [< Gr. *ἴσος*, equal, + *ὑετός*, rain: see *hyetal*.] **I.** *a.* Marking equality of rainfall: as, an *isohyetal* curve. Isohyetal lines may be drawn to connect places having the same amount of annual or of seasonal rainfall. An isohyetal map or chart is more generally called a *rainfall chart*.

II. *n.* An isohyetal line or curve.

isokephaly (ī-sō-kef'a-li), *n.* See *isocephaly*.

isoklinostat, *n.* See *isoclinostat*.

isolable (is'ō- or ī'sō-la-bl), *a.* [< *isol-ate* + *-able*.] That can be isolated; specifically, in *chem.*, capable of being obtained pure, or uncombined with any other substance.

It [identity] is quite accurately distinguishable from difference in known matter, but it is not *isolable* from difference.
B. Bosanquet, Mind, XIII. 359.

isolate (is'ō- or ī'sō-lāt), *v. t.*; pret. and pp. *isolated*, ppr. *isolating*. [With suffix *-ate*[2], < F. *isoler* = Pg. *isolar*, < It. *isolare*, < ML. *insulare*, pp. *insulatus*, detach, separate: see *insulate*.] 1. To set or place apart; detach or separate so as to be alone: often used reflexively: as, he *isolated himself* from all society.

It is . . . possible to dissect out a nerve with a muscle attached, to keep it alive for a time, and thus to inquire what an *isolated* nerve will do.
G. T. Ladd, Physiol. Psychology, p. 56.

2. In *elect.*, same as *insulate*, 3.—3. In *chem.*, to obtain (a substance) free from all its ★combinations.

isolate (is'ō- or ī'sō-lāt), *a.* [< *isolate*, *v.*] Isolated; detached.

The New Moon swam divinely *isolate*
In maiden silence. *Lowell*, Endymion, i.

isolated (is'ō- or ī'sō-lā-ted), *p. a.* 1. Standing detached from others of a like kind; placed by itself or alone.

I am not teaching man's *isolated* energy.
Channing, Perfect Life, p. 17.

2. In *chem.*, pure; freed from combination.—**Isolated bitangent.** See *bitangent*.

isolating (is'ō- or ī'sō-lā-ting), *p. a.* Employing the principle or producing the effect of isolation: specifically applied in philology to monosyllabic languages in which each word is a simple, uninflected root.

Such languages [agglutinative], constituting the small minority of human tongues, are wont to be called *isolating*, i. e. using each element by itself, in its integral ★form. *Whitney*, Encyc. Brit., XVIII. 774.

isolation (is-ō- or ī-sō-lā'shon), *n.* [= F. *isolation*; as *isolate* + *-ion*.] The act of isolating or the state of being isolated or alone.

Isolation from the rest of mankind.
Milman, Latin Christianity, viii. 5.

O God-like *isolation* which art mine,
I can but count thee perfect gain.
Tennyson, Palace of Art.

isolator (is'ō- or ī'sō-lā-tor), *n.* [< *isolate* + *-or*.] An insulator.

isologous (ī-sol'ō-gus), *a.* [< Gr. *ἴσος*, equal, + *λόγος*, ratio, proportion: see *logos*.] Having similar proportions or relations: specifically applied in chemistry to a series of hydrocarbons each member of which differs in composition from the next above it in the same series by having two less hydrogen atoms. Thus, ethane (C_2H_6), ethylene (C_2H_4), and acetylene (C_2H_2) form an *isologous* series.

The number of *isologous* groups actually known and studied is comparatively small.
W. A. Miller, Elem. of Chem., § 1122.

isologue (ī'sō-log), *n.* [< Gr. *ἴσος*, equal, + *λόγος*, ratio, proportion.] A member of an isologous series of hydrocarbons.

isomastigate (ī-sō-mas'ti-gāt), *a.* [< Gr. *ἴσος*, equal, + *μάστιξ* (*μαστιγ-*), a whip.] Having the flagella alike or similar, as an infusorian, in which there may be two or more such flagella: distinguished from *heteromastigate*.

isomer (ī'sō-mėr), *n.* [< Gr. *ἰσομερής*, having equal parts: see *isomerous*.] In *chem.*, a compound that exhibits the relation of isomerism with reference to some other compound. Also *isomeride*.

Isomera (ī-som'e-rä), *n. pl.* [NL.: see *isomerous*.] A primary division of coleopterous insects, characterized by having (with a very few exceptions) the same number of tarsal joints on the posterior legs as on the others. The *Isomera* include the five series *Adephaga*, *Clavicornia*, *Serricornia*, *Lamellicornia*, and *Phytophaga*.

isomere (ī'sō-mēr), *n.* [< Gr. *ἰσομερής*, having equal parts: see *isomerous*. Cf. *isomer*.] In *zoöl.*, a part or segment of the limb of one animal which is homologous with or corresponds to a part in another animal. Thus, the distal end of a bird's tibia is an *isomere* of proximal tarsal bones of a mammal. See *isotome*, and *membral segment* (under *membral*).

The lines . . . are isotomes, cutting the limbs into morphologically equal parts, or *isomeres*.
Coues, Key to N. A. Birds, p. 229.

isomeria (ī-sō-mē'ri-ä), *n.* [NL., < Gr. *ἰσομερής*, having equal parts: see *isomerous*.] A distri★bution into equal parts. *Kersey*, 1708.

isomeric (ī-sō-mer'ik), *a.* [< *isomer-ous* + *-ic*.] 1. In *chem.*, of a substance, characterized by isomerism in relation to another substance.

As I learn from one of our first chemists, Prof. Frankland, protein is capable of existing under probably at least a thousand *isomeric* forms.
H. Spencer, Prin. of Biol., App., p. 483.

2. In *zoöl.*, of, pertaining to, or forming an isomere: as, *isomeric* segments of the limbs.

isomerical (ī-sō-mer'i-kal), *a.* [< *isomeric* + *-al*.] Same as *isomeric*.

isomerically (ī-sō-mer'i-kal-i), *adv.* In an isomeric manner; as regards isomerism.

isomeride (ī-som'e-rid or -rīd), *n.* [< *isomer-ous* + *-ide*[2].] Same as *isomer*.

isomerism (ī-som'e-rizm), *n.* [< *isomer-ous* + *-ism*.] In *chem.*, identity of percentage composition with difference of physical or of both chemical and physical properties. The difference may be one of molecular weight (polymerism), or of order of union of atoms in the molecule (metamerism), or of position of the atoms in space (stereo-isomerism). The term *physical isomerism* is sometimes applied to difference only in the cohesive relations of identical molecules. See additional information under *isomerism* in the supplement.

"It is of consequence how the atoms of a compound are arranged . . . ," and hence there may be very many totally different substances composed of the same ultimate atoms. This is in fact the whole philosophy of *isomerism*.
Watts's Dict. of Chem., III. 423.

Allotropy stands in the same relation to elements that *isomerism* does to compounds.
Frankland and Japp, Inorganic Chemistry, p. 111.

isomeromorphism (ī-sō-mer-ō-môr'fizm), *n.* [< Gr. *ἰσομερής*, having equal parts (see *isomerous*), + *μορφή*, form, + *-ism*.] In *crystal.*, isomorphism between substances having the same atomic proportions.

isomerous (ī-som'e-rus), *a.* [< Gr. *ἰσομερής*, having equal parts or shares, < *ἴσος*, equal, + *μέρος*, part, share.] 1. In *bot.*, composed each of an equal number of parts, as the members of the several circles of a flower.—2. In *chem.*, having the property of chemical isomerism.—3. In *entom.*, having the same number of tarsal joints of all the legs. When the number is not stated, isomerous tarsi are understood to be five-jointed or pentamerous. See *Isomera*.—4. In *odontog.*, having the same number of ridges: specifically applied to molar teeth whose transverse ridges do not increase in number on successive teeth, as in the extinct mastodons: opposed to *anisomerous* and *hypisomerous*. *Falconer*.

isomery (ī'sō-mer-i), *n.* [< NL. *isomeria*, q. v.] ★Isomerism.

isometric (ī-sō-met'rik), *a.* [< Gr. *ἰσόμετρος*, of equal measure, < *ἴσος*, equal, + *μέτρον*, measure.] 1. Of equal measure.

In The Princess we also find Tennyson's most successful studies upon the model of the Theocritan *isometric* verse.
Stedman, Vict. Poets, p. 166.

2. In *crystal.*, pertaining to that system which is characterized by three equal axes at right angles to one another. The seven holohedral forms under this system are the cube, regular octahedron, rhombic dodecahedron, tetrahexahedron, tetragonal and trigonal trisoctahedron, and hexoctahedron. The tetrahedron and pyritohedron are the most common hemihedral forms. Also called *monometric*, *regular*, *tessular*, *cubic*. See *crystallography*.—**Isometric perspective** or **projection**, a method of drawing figures of machines, etc. It is an orthogonal projection on lines equally inclined to the three principal axes of the body to be represented.

isometrical (ī-sō-met'ri-kal), *a.* [< *isometric* + *-al*.] Same as *isometric*.

isometrograph (ī-sō-met'rō-gráf), *n.* [< Gr. *ἴσος*, equal, + *μέτρον*, measure, + *γράφειν*, write.] An instrument for accurately spacing and drawing lines at equal distances from each other, as in cross-hatching sections in mechanical drawing. It consists of mechanism which moves a straight-edge or ruler a definite distance parallel to itself, so that lines drawn along the edge of the ruler are equally spaced.

isomorph (ī'sō-môrf), *n.* [< Gr. *ἴσος*, equal, + *μορφή*, form.] 1. A substance which exhibits isomorphism.—2. In *zoöl.*, an organism which has the same form as another, and thus resembles it, though belonging to a different group.

There are sandy forms [of the *Reticularia*] which it is difficult to separate from imperforate Lituolidea and are nevertheless perforate, in fact are "sandy *isomorphs* of Lagena, Nodosaria, Globigerina, and Rotalia."
E. R. Lankester, Encyc. Brit., XIX. 849.

isomorphic (ī-sō-môr'fik), *a.* [< *isomorph-ous* + *-ic*.] 1. Same as *isomorphous*.—2. In *biol.*, being of the same or like form; morphologically alike; equiformed.

Dicholophus . . . has assumed peculiar raptorial characters *isomorphic* with those of Gypogeranus, which is a true bird of prey. *Nature*, XXXIX. 180.

isomorphism (ī-sō-môr'fizm), *n.* [< *isomorph-ous* + *-ism*.] A similarity of crystalline form: as, (*a*) between substances of analogous composition or atomic proportions, as the members of a group of compounds like the sulphates of barium, strontium, and lead; (*b*) between compounds of unlike composition or atomic proportions. The first of these is isomorphism proper, and is sometimes distinguished as *isomerous* or *isomonic isomorphism*; the second as *heteromerous* or *heteromonic isomorphism*, or simply as *homœomorphism*.—**Holohedral isomorphism**, in *math.*, the identity of the form of two ★groups.

isomorphous (ī-sō-môr'fus), *a.* [< Gr. *ἴσος*, equal, + *μορφή*, form.] Exhibiting the property of isomorphism. Also *isomorphic*.

Notwithstanding the possibility, in the case of certain carbonates, of substituting *isomorphous* constituents for one another, it cannot be pretended that any evidence as yet breaks down the list of chemical elements.
J. Martineau, Materialism, p. 127.

Isomorphous group. (*a*) A group of substances having analogous composition and closely related crystalline form. Thus, in mineralogy, the carbonates of calcium, magnesium, iron, manganese, and zinc (respectively $CaCO_3$, $MgCO_3$, $FeCO_3$, $MnCO_3$, $ZnCO_3$) form an isomorphous group, all crystallizing in the rhombohedral system, and with nearly the same angles, the angle of the cleavage rhombohe-

dron varying from 105° to 107½°. Between the members of an isomorphous group intermediate compounds may occur, regarded as isomorphous mixtures of the two unlike molecules. Thus, dolomite, the carbonate of calcium and magnesium, may be considered as formed by the union of the calcium carbonate molecules with those of magnesium carbonate. (*b*) *pl.* In *math.* See *group*[1].

Isomya (ī-sō-mī′ä), *n. pl.* [NL., < Gr. *ἴσος*, equal, + *μῦς*, a mouse, a muscle, = E. *mouse*. Cf. *Dimyaria*.] Isomyarian mollusks; *Dimyaria* proper, one of three orders into which lamellibranchs have been divided: distinguished from *Heteromya* and *Monomya*. They are divided into *Integropallia* and *Sinupallia*.

isomyarian (ī′sō-mī-ā′ri-an), *a.* [< *Isomya* + *-arian*.] Having two adductor muscles of the same size or nearly so, as most bivalve mollusks; perfectly dimyarian; of or pertaining to the *Isomya*.

ison (ī′son), *n.* [< Gr. *ἴσον*, neut. of *ἴσος*, equal: see *iso-*.] In the music of the Greek Church, the sign for the key-note.

Isonandra (ī-sō-nan′drä), *n.* [NL., irreg. < Gr. *ἴσος*, equal, + *ἀνήρ* (*ἀνδρ-*), male (mod. bot. stamen).] A small genus of sympetalous plants, of the family *Sapotaceæ*. The flowers are tetramerous, the corolla-tube is elongated, the stamens are 8 in number and nearly equal, and the seeds are albuminous. They are evergreen trees with entire leaves, natives of southern India, Ceylon, and the adjacent islands. The best-known species is *I. lanceolata*. The gutta-percha trees, *Palaquium Gutta*, *P. polyanthum*, and *P. obovatum*, have been referred to this genus by some authors.

Isonandreæ (ī-sō-nan′drē-ē), *n. pl.* [NL. (Radlkofer, 1887), < *Isonandra* + *-eæ*.] A tribe of plants of the family *Sapotaceæ*, now included in the tribe *Palaquiceæ*.

isonephelic (ī′sō-ne-fel′ik), *a.* [< Gr. *ἴσος*, equal, + *νεφέλη*, cloud: see *nebula*.] Indicating equality as regards the prevalence of clouds.—**Isonephelic line**, in *meteor.*, an imaginary line over the earth's surface passing through points which have the same degree of cloudiness of the sky for a given period (month or year).

A chart of the world showing lines of equal annual cloudiness (*isonephelic*) is given by Renan.
Smithsonian Report, 1881, p. 290.

isonomia (ī-sō-nō′mi-ä), *n.* [< Gr. *ἰσονομία*, equality of rights: see *isonomy*.] Equality before the law; uniformity of rights.

There is no part of our constitution so admirable as this equality of civil rights, this *isonomia* which the philosophers of ancient Greece only hoped to find in democratical government. *Sir E. Creasy*, Eng. Const., p. 200.

isonomic (ī-sō-nom′ik), *a.* [< Gr. *ἰσονομικός*, < *ἰσονομία*, equality of laws: see *isonomy*.] 1. Of or pertaining to isonomy; the same or equal in law or right.—2. One in kind or origin: specifically applied in chemistry to isomorphism subsisting between two compounds of like composition: opposed to *heteronomic*.

isonomy (ī-son′ō-mi), *n.* [< Gr. *ἰσονομία*, equal distribution, equality of rights or laws, < *ἰσόνομος*, equally distributed, having equal rights, < *ἴσος*, equal, + *νόμος*, distribution, custom, law: see *nome*.] Equality as regards rights and privileges; isonomia.

Philolaus . . . introduced an *isonomy* into the oligarchy, and so enabled it to hold its ground.
Von Ranke, Univ. Hist. (trans.), p. 135.

isonym (ī′sō-nim), *n.* [< Gr. *ἰσώνυμος*, having the same name, < *ἴσος*, equal, + *ὄνομα*, *ὄνυμα*, name.] In *philol.*, a paronym.

isonymic (ī-sō-nim′ik), *a.* [< *isonym* + *-ic*.] In *philol.*, paronymic.

isonymy (ī-son′i-mi), *n.* [< Gr. *ἰσωνυμία*, sameness of name, < *ἰσώνυμος*, having the same name: see *isonym*.] Same as *paronymy*.

isopathy (ī-sop′a-thi), *n.* [< Gr. *ἴσος*, equal, + *πάθος*, suffering, disease.] The theory that disease may be cured by the product of the disease, as smallpox by minute doses of variolous matter; also, the theory that a diseased organ may be cured by eating the same organ of a healthy animal.

isoperimetrical (ī-sō-per-i-met′ri-kal), *a.* [< *isoperimetry* + *-ic-al*.] 1. Of or pertaining to isoperimetry.—2. Having equal boundaries: as, *isoperimetrical* figures or bodies.

isoperimetry (ī′sō-pe-rim′e-tri), *n.* [< Gr. *ἴσος*, equal, + *περίμετρον*, circumference: see *perimeter*.] In *geom.*, the science of figures having equal perimeters or boundaries. The problem to determine among all curves having their extremities at two given points and a given length that one which incloses the maximum area is the problem of isoperimetry; and the name is extended to every problem involving the calculus of variations in the same way.

isopetalous (ī-sō-pet′a-lus), *a.* [< Gr. *ἴσος*, equal, + *πέταλον*, a leaf (petal): see *petal*.] Having equal petals. *Thomas*, Med. Dict.

isophorous (ī-sof′ō-rus), *a.* [< Gr. *ἰσοφόρος*, bearing or drawing equal weights, equal in strength, < *ἴσος*, equal, + *φέρειν* = E. *bear*[1].] In *bot.*, an epithet used by Lindley to express the relation to a species of its abnormal forms when they are sufficiently habitual to have been taken for distinct plants. Thus, the assumed genus of orchids *Aclinia* is now regarded as an *isophorous* form of *Dendrobium*.

isopiestic (ī′sō-pi-es′tik), *a.* [< Gr. *ἴσος*, equal, + *πιεστός*, verbal adj. of *πιέζειν*, press, squeeze.] Isobaric; denoting equal pressure.

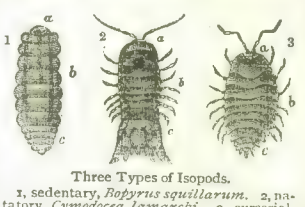
Isopleura (ī-sō-plö′rä), *n. pl.* [NL., neut. pl. of *isopleurus*: see *isopleurous*.] A prime division of gastropods containing those which are equal-sided or bilaterally symmetrical: contrasted with *Anisopleura*. The isopleural gastropods are chiefly represented by the chitons, but also include such worm-like forms as *Chætoderma* and *Neomenia*. Ranked as a superorder, the *Isopleura* have been divided into three orders, *Polyplacophora*, *Chætodermæ*, and *Neomenoidea*.

isopleural (ī-sō-plö′ral), *a.* [As *isopleur-ous* + *-al*.] Having the right and left sides equal; bilaterally symmetrical, as most animals; of or pertaining to the *Isopleura*.

isopleurous (ī-sō-plö′rus), *a.* [< NL. *isopleurus*, < Gr. *ἰσόπλευρος*, having equal sides, equilateral, < *ἴσος*, equal, + *πλευρά*, side.] Same as *isopleural*.

Isoplexis (ī-sō-plek′sis), *n.* [NL. (Lindley, 1821), < Gr. *ἴσος*, equal, + *πλῆξις*, a stroke, < *πλήσσειν*, strike, cut.] A genus of *Scrophulariaceæ*, made by some authors a section of *Digitalis*, but distinguished by a shrubby habit and by the fact that the upper lip of the corolla equals the lower. The two species, *I. Sceptrum* from Madeira and *I. Canariensis* from the Canaries, cultivated in greenhouses, bear terminal racemes of showy yellow or orange-colored flowers.

isopod (ī′sō-pod), *a.* and *n.* [< NL. *isopus* (*isopod-*), < Gr. *ἴσος*, equal, + *πούς* (*ποδ-*) = E. *foot*.] **I.** *a.* Having the feet all alike, or similar in character; specifically, pertaining to the *Isopoda* or having their characters. Also *isopodous*.



Blind Isopod (*Cæcidotea stygia*), Mammoth Cave, Kentucky.

II. *n.* An isopod crustacean; any one of the *Isopoda*.

Also *isopodan*, *isopode*.

Isopoda (ī-sop′ō-dä), *n. pl.* [NL., neut. pl. of *isopus* (*isopod-*), equal-footed: see *isopod*.] An order of arthrostracous or edriophthalmous (sessile-eyed) crustaceans, with 7 free thoracic somites bearing as many pairs of legs, which are alike in size and direction, whence the name; the *Polygonata* of Fabricius. The body is usually broad and depressed, and more or less arched; the head is almost always distinct from the thorax, except from the first thoracic ring, with which it is united; and the abdomen is short-ringed and often reduced. There are no branchial thoracic vesicles, the respiratory function being carried on by the peculiarly modified laminar legs of the abdomen. The thoracic legs of the females may be modified to form brood-pouches for the eggs by means of delicate membranous plates called *oösteg̃ites*. The sexes are distinct, except in *Cymothoidæ*. Isopods are found in both salt and fresh water, and also on land. The terrestrial isopods, family *Oniscidæ*, are known as *sow-bugs*, *wood-lice*, and *slaters*. The gribble, *Limnoria terebrans*, is a marine form. Many *Isopoda* are ectoparasitic, as the *Cymothoidæ* on the gills and in the mouth of fishes, and the *Bopyridæ* in the gills of prawns. The order was divided by Milne-Edwards into three sections, *Sedentaria*, *Natatoria*, and *Cursoria*, according to the habits of the animals. By Claus the *Isopoda* are made a suborder of *Arthrostraca*, and divided into two tribes, *Anisopoda* (which resemble amphipods) and *Euisopoda*, or genuine isopods. Others reckon about ten families, not separated into suborders. Leading types are *Tanaidæ* and *Anceidæ* on the one hand, and on the other *Cymothoidæ*, *Sphæromidæ*, *Idoteidæ*, *Asellidæ*, *Bopyridæ*, and *Oniscidæ*.

Three Types of Isopods.
1, sedentary, *Bopyrus squillarum*. 2, natatory, *Cymodocea lamarcki*. 3, cursorial, *Oniscus asellus*, a common wood-louse or sow-bug: *a*, head; *b*, thorax; *c*, abdomen.

isopodan (ī-sop′ō-dan), *a.* and *n.* [< *isopod* + *-an*.] Same as *isopod*.

The size of the body far transcends the ordinary *Isopodan* limit. *Encyc. Brit.*, VI. 659.

isopode (ī′sō-pōd), *a.* and *n.* Same as *isopod*.

isopodiform (ī-sō-pod′i-fôrm), *a.* [< NL. *isopus* (*isopod-*), isopod, + L. *forma*, form.] Formed like an isopod; resembling an isopod in form: specifically applied to six-footed, oblong, flattened larvæ with a distinct thoracic shield, long antennæ, and caudal bristles or plates, as those of the roaches.

isopodimorphous (ī-sō-pod-i-môr′fus), *a.* [< NL. *isopus* (*isopod-*), isopod, + Gr. *μορφή*, form.] Same as *isopodiform*.

isopodous (ī-sop′ō-dus), *a.* [As *isopod* + *-ous*.] Same as *isopod*.

isopogonous (ī-sō-pog′ō-nus), *a.* [< Gr. *ἴσος*, equal, + *πώγων*, beard, barb.] Equally webbed: said of feathers whose inner and outer webs are alike in size and shape: opposed to *anisopogonous*.

isopolity (ī-sō-pol′i-ti), *n.* [< Gr. *ἰσοπολιτεία*, equality of civic rights, < *ἰσοπολίτης*, a citizen with equal rights, < *ἴσος*, equal, + *πολίτης*, a citizen: see *polity*.] Equal rights of citizenship in different communities; mutual political rights.

Niebuhr . . . establishes the principle that the census comprehended all the confederate cities which had the right of *isopolity*. *Milman*.

Between America and England . . . one would be glad if there could exist some *isopolity*.
Clough, To C. E. Norton, Sept. 21, 1853.

Isoptera (ī-sop′te-rä), *n. pl.* [NL., neut. pl. of *isopterus*: see *isopterous*.] The termites or white ants regarded as an order of insects. They have large, equal, and naked wings not folded in repose, well-developed manducatory jaws, and short many-jointed antennæ. The larvæ and pupæ resemble the neuters; the latter are wingless. This suborder is represented by the family *Termitidæ* alone.

isopterous (ī-sop′te-rus), *a.* [< NL. *isopterus* (cf. Gr. *ἰσόπτερος*, poet., swift as flight), < Gr. *ἴσος*, equal, + *πτερόν*, wing.] Having the wings equal; specifically, pertaining to the *Isoptera* or white ants, or having their characters.

isopurpuric (ī′sō-pėr-pū′rik), *a.* [< Gr. *ἴσος*, equal, + L. *purpureus*, purple: see *purple*.] Same as *purpuric*.—**Isopurpuric acid**, $C_8H_5N_5O_6$, an acid not known in the free state, but forming a potassium salt when strong solutions of picric acid and potassium cyanide are mixed. It was formerly used as a dye, under the name of *grenat soluble*.

isopurpurin (ī-sō-pėr′pū-rin), *n.* [< *isopurpur-(ic)* + *-in*[2].] A coal-tar color ($C_{14}H_5O_2(OH)_3$) used in dyeing, closely allied to alizarin, formed by heating beta-anthraquinon disulphonic acid with caustic soda and potassium chlorate. It is sold in commerce under the name of *alizarin*, and produces the yellow shade of red, while true alizarin gives bluish shades of red. Also called *anthrapurpurin*.

Isopyreæ (ī-sō-pī′rē-ē), *n. pl.* [NL. (Reichenbach, 1837), < *Isopyrum* + *-eæ*.] A former tribe of plants of the family *Ranunculaceæ*, typified by the genus *Isopyrum*: now merged in the tribe *Helleboreæ*.

Isopyrum (ī-sō-pī′rum), *n.* [NL. (Linnæus), < L. *isopyrum*, < Gr. *ἰσόπυρον*, a plant not identified (*Fumaria capreolata*?), < *ἴσος*, equal, + *πυρός*, wheat (or *πῦρ* = E. *fire*).] A genus of plants of the family *Ranunculaceæ*, the type of the old tribe *Isopyreæ*. They are slender smooth herbs with perennial root, bi- to triternately compound leaves, and solitary or loosely panicled white flowers. About 27 species are known in the north temperate portions of both hemispheres.

isorrhythmic (ī-sō-rith′mik), *a.* [< Gr. *ἴσος*, equal, + *ῥυθμός*, rhythm: see *rhythm*.] In *anc. pros.*, having the same number of moræ or units of time in thesis and arsis: as, an *isorrhythmic* measure or foot; characterized by such proportion (1:1) of thesis and arsis: as, the *isorrhythmic* class of feet; *isorrhythmic* movement. The *isorrhythmic class* (of feet) consists of the tetrasemic feet, namely: the dactyl (– | ⏑ ⏑), the anapest (⏑ ⏑ | –), and the spondee (– | –).

isosceles (ī-sos′e-lēz), *a.* [< L. *isosceles*, < Gr. *ἰσοσκελής*, with equal legs (*ἰσοσκελὲς τρίγωνον*, a triangle with two sides equal), < *ἴσος*, equal, + *σκέλος*, leg.] Having two legs or sides equal: as, an *isosceles* triangle.

Isosceles Triangle.

Isosceles (ī-sos′e-lēz), *n.* [NL.: see *isosceles*, *a.*] A genus of cerambycid longicorn beetles. *Newman*, 1842.

isoseismal (ī-sō-sīs′mal), *n.* and *a.* [< Gr. *ἴσος*, equal, + *σεισμός*, a shaking, an earthquake: see *seismic*.] **I.** *n.* A curve or line connecting points at which an earthquake-shock is felt with equal intensity, or at which there is an "equal overthrow" (*Mallet*). See *homoseismal*.

II. *a.* Belonging or related to an isoseismal; having the character of an isoseismal: as, an *isoseismal* curve.

isoseismic (ī-sō-sīs′mik), *a.* Same as *isoseismal*.

Isosoma (ī-sō-sō′mă), *n.* [NL., < Gr. *ἰσόσωμος*, of a like body, < *ἴσος*, equal, + *σῶμα*, body.] 1. A genus of hymenopterous insects of the family *Chalcididæ* and subfamily *Eurytominæ*, containing plant-feeding forms furnishing an exception to the rule in this parasitic family. *I. hordei* is known as the *joint-worm fly*. *Walker*, 1832.—2. A genus of *Elateridæ* or click-beetles, containing one species, *I. elateroides*, from the Caucasus. *Ménétries*, 1832.

Isospondyli (ī-sō-spon′di-lī), *n. pl.* [NL., pl. of *isospondylus*: see *isospondylous*.] An order of physostomous fishes with no precoracoid arch, the scapular arch suspended to the cranium, a symplectic bone, the pterotic and anterior vertebræ simple, and the parietals separated by the supraoccipital. The order includes most soft-rayed fishes, the most primitive of the bony fishes. *Cope*, 1870.

isospondylous (ī-sō-spon′di-lus), *a.* [< NL. *isospondylus*, < Gr. *ἴσος*, equal, + *σπόνδυλος*, vertebra.] Having the characters of the *Isospondyli*; pertaining to the *Isospondyli*.

isospore (ī′sō-spōr), *n.* [< Gr. *ἴσος*, equal, + *σπόρος*, a seed: see *spore*.] A spore of any homosporous fern: as employed by Rostafinski, the same as *zygosperm*.

Isosporia (ī-sō-spō′ri-ạ), *n. pl.* [NL. (Baker), < Gr. *ἴσος*, equal, + *σπορά*, a seed.] A series of vascular cryptogamous plants, including the *Filices*, *Equisetaceæ*, and *Lycopodiaceæ*, in which the spores are said to be all of one kind. Later investigation has shown that this classification is incorrect, since there are both isosporous (homosporous) and heterosporous *Filices*, *Equisetaceæ*, and *Lycopodiaceæ*. See *homosporous*.

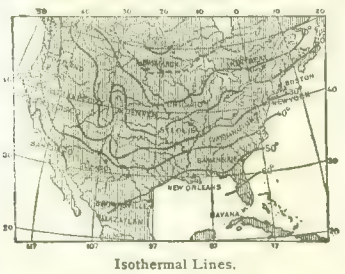
isosporous (ī-sos′pō-rus), *a.* [< Gr. *ἴσος*, equal, + *σπορά*, a seed: see *spore*.] Same as *homosporous*.

isostatic (ī-sō-stat′ik), *a.* [< Gr. *ἴσος*, equal, + *στατικός*, stable.] In hydrostatic equilibrium from equality of pressure. Thus, the earth's crust is conceived to be formed of elementary conical prisms of equal weight, and hence the crust is isostatic, or in an isostatic condition.

isostemonous (ī-sō-stem′ō-nus), *a.* [< Gr. *ἴσος*, equal, + *στήμων*, a stamen.] In *bot.*, having the stamens equal in number to the sepals or petals, or to the ground-plan of the flower.

isostemony (ī-sō-stem′ō-ni), *n.* [As *isostemonous* + *-y*.] The state or condition of being isostemonous.

isotely (ī′sō-tel-i), *n.* [< Gr. *ἰσοτέλεια*, equality of tax and tribute, < *ἰσοτελής*, paying alike, < *ἴσος*, equal, + *τέλος*, tax, tribute.] In ancient Athens, equality before the law with citizens, granted to an alien; immunity from the disadvantages of alienage.



The two brothers returned to Athens. . . . Though not possessing the right of citizenship, they possessed the *isotely*. *Whiton*, Notes on Lysias, p. 52.

isotheral (ī′sō-thēr-ạl), *a.* [< *isothere* + *-al*.] Of, pertaining to, or of the nature of an isothere; indicating the distribution of summer temperature by means of isotheres: as, an *isotheral* chart; *isotheral* lines.

isothere (ī′sō-thēr), *n.* [< Gr. *ἴσος*, equal, + *θέρος*, summer.] An imaginary line over the earth's surface passing through points which have the same mean summer temperature.

isotherm (ī′sō-thèrm), *n.* [< Gr. *ἴσος*, equal, + *θέρμη*, heat.] A line connecting points on the earth's surface having the same temperature. The temperatures are assumed to be previously reduced to a uniform altitude at or above sea-level. The isotherm of the winter months is sometimes designated as the *isochimal* or *isochimenal*; that of the summer months as the *isotheral*; that of the whole year as the *annual*; that of the average of many years as the *normal annual*.

isothermal (ī-sō-thèr′mạl), *a.* and *n.* [< Gr. *ἴσος*, equal, + *θέρμη*, heat (see *isotherm*), + *-al*.] **I.** *a.* Of the same degree of heat; of the same temperature; in *meteor.*, pertaining to or marking equality of atmospheric temperature;

Isothermal Lines.

exhibiting the geographical distribution of temperature: as, the *isothermal* relations of different continents; an *isothermal* chart. Also *isothermous*.—**Isothermal coördinates.** See *coördinate*.—**Isothermal line,** an isotherm.—**Isothermal surface,** a surface every point of which has the same temperature. The line of intersection of an isothermal surface with any level surface is an isothermal line.—**Isothermal zones,** spaces on opposite sides of the equator having the same mean temperature, and bounded by corresponding isothermal lines.

II. *n.* An isothermal line; an isotherm.

Isotherms, isothermal lines, or lines of equal temperature. *A. Geikie*, Phys. Geog., p. 60.

isothermobath (ī-sō-thèr′mō-bath), *n.* [< Gr. *ἴσος*, equal, + *θέρμη*, heat, + *βάθος*, depth.] A line drawn through points of equal temperature in a vertical section of the ocean. *Sir C. Wyville Thomson*, 1876.

isothermous (ī-sō-thèr′mus), *a.* Same as *isothermal*.

isotherombrose (ī″sō-the-rom′brōs), *a.* [< Gr. *ἴσος*, equal, + *θέρος*, summer, + *ὄμβρος*, rain: see *imbricate*.] In *meteor.*, characterized by an equal amount of rainfall in summer; noting lines connecting places on the surface of the globe where this condition exists.

Isotoma (ī-sot′ō-mạ), *n.* [NL., < Gr. *ἴσος*, equal, + *τομή*, a cutting, < *τέμνειν*, *ταμεῖν*, cut.] 1. In *entom.*: (*a*) A genus of beetles of the family *Lagriidæ*, containing a few South American species. *Blanchard*, 1845. (*b*) A genus of thysanurous insects, of which *I. arborea* is the typical form. There are a number of other species. *Bourlet*, 1839.—2. In *bot.*, a genus of herbaceous plants of the family *Campanulaceæ*. The flowers are axillary, with a nearly regular salver-shaped corolla; the tube is very long and slender, and only slightly split or not at all; and the stamens are inserted toward the top. About 8 species are known, of which the most noteworthy is *I. longiflora*, called by the Spanish-Americans *reventa-cavallos*, because fatal to horses. It acts upon the human system as a violent cathartic, with fatal results.

isotome (ī′sō-tōm), *n.* [< Gr. *ἴσος*, equal, + *τομή*, a cutting, < *τέμνειν*, *ταμεῖν*, cut.] In *zoöl.*, an imaginary line drawn through the same joint, or between the same segments, of the same limb in different animals, to indicate those segments which are homologous. Thus, the tibiotarsal isotome passes through the ankle-joint of man, the hock of a horse, and the lower end of the tibia of a bird. *Coues*, 1884. See *isomere*.

isotomous (ī-sot′ō-mus), *a.* [< *isotome* + *-ous*.] Of or pertaining to an isotome: as, *isotomous* segments of a man, horse, and bird. *Coues*.

isotonic (ī-sō-ton′ik), *a.* [< Gr. *ἰσότονος*, having equal accent (or tone), < *ἴσος*, equal, + *τόνος*, tone, accent: see *tone*.] Having or indicating equal tones.—**Isotonic system or temperament,** in *music*, the system of equal temperament. See *temperament*.

isotrope (ī′sō-trōp), *a.* [< Gr. *ἴσος*, equal, + *τροπή*, a turning, < *τρέπειν*, turn.] Same as *isotropic*.

isotropic (ī-sō-trop′ik), *a.* [As *isotrope* + *-ic*. Cf. *tropic*.] 1. Having the same properties in all directions: said of a medium with respect to elasticity, conduction of heat or electricity, or radiation of heat and light. Thus, all crystallized substances belonging to the isometric system are *isotropic* with respect to heat and light.

The substance of a homogeneous solid is called *isotropic* when a spherical portion of it, tested by any physical agency, exhibits no difference in quality however it is turned. *W. Thomson*, Encyc. Brit., VII. 804.

2. Having equal, common, or non-specific developmental capacity.

The conclusion [is] that the nervous system, and correspondingly other organs, may develop from any portion of the egg-substance—in short, that the egg is *isotropic*. *Encyc. Brit.*, XX. 416.

isotropous (ī-sot′rō-pus), *a.* [As *isotrope* + *-ous*.] Same as *isotropic*.

In a previous note . . . the author studied the problem connected with the cooling of a homogeneous and *isotropous* solid body. *Nature*, XXXIX. 239.

isotropy (ī′sō-trō-pi), *n.* [As *isotrope* + *-y*.] The state or property of being isotropic.

There is involved no assumption as to the homogeneity or *isotropy* of the dielectric medium. *Philosophical Mag.*, XXVI. 243.

Metatatic isotropy, the isotropy of a solid for which any three orthogonal axes are metatatic.

isotype (ī′sō-tīp), *n.* [< Gr. *ἰσότυπος*, shaped alike (having the same type), < *ἴσος*, equal (parallel), + *τύπος*, type, form.] In *zoögeog.*, a form common to two or more countries: applied to representatives of the same genus or family occurring in different countries. *T. Gill*, Smithsonian Report, 1881, p. 460.

isotypic (ī-sō-tip′ik), *a.* [< *isotype* + *-ic*.] Having the character of an isotype.

isozoöid (ī-sō-zō′oid), *n.* [< Gr. *ἴσος*, equal, + *zoöid*.] In *zoöl.*, the opposite of *allozoöid*.

ispaghul-seed (is′pa-gul-sēd), *n.* [E. Ind.] The seed of *Plantago ovata*, a native of northwestern India. These seeds are grayish-pink in color, and are used to prepare a highly esteemed mucilaginous drink. Also called *spogel-seed*.

ispida (is′pi-dạ), *n.* [NL. (Gesner, 1555), appar. improp. for *hispida*, < L. *hispidus*, rough, shaggy: see *hispid*.] 1†. One of sundry slender-billed birds, especially the kingfisher or halcyon and the bee-eater or apiaster.—2. The technical specific name of the small kingfisher of Europe, *Alcedo ispida*.—3. [*cap.*] A genus of kingfishers, equivalent to the modern family *Alcedinidæ*, variously restricted by subsequent authors, and now disused. *Brisson*, 1760.

ispravnik (is-prav′nik), *n.* [Russ. *ispravnikŭ* (see def.), < *ispravnuiĭ*, exact, correct; cf. *ispravlyatĭ*, correct, repair, exercise (a function).] The chief police officer of a Russian uyezd or rural district, and the presiding judge of the district police court. His duties are partly judicial and partly executive, and in some parts of the empire, particularly in the remoter parts, his powers are virtually those of a local governor.

I-spy (ī′spī′), *n.* [So called from the exclamation of the seeker ("it"), "*I spy*" (So-and-so), when he discovers a hidden player.] A children's game, the same as hide-and-seek. Also, with unoriginal aspiration, *hi-spy*, *hy-spy*.

O, the curly-headed varlets! I must come to play at Blind Harry and *Hy-Spy* with them. *Scott*, Guy Mannering, lviii.

Israelite (iz′rā-el-īt), *n.* [< LL. *Israelita*, usually in pl. *Israelitæ*, < Gr. *Ἰσραηλίτης*, a descendant of Israel, < *Ἰσραήλ*, < Heb. *Yisrāēl*, Israel, orig. another name of Jacob, then collective name for the Jews.] A descendant of Israel or Jacob; one of "the children of Israel"; a Hebrew; a Jew. *Israelites* was the name of the whole people of Israel down to the death of Saul, when it came to be restricted to those northern tribes who rebelled against David, and more definitely applied to the ten tribes that set up a separate monarchy on the death of Solomon. After the captivity the name again came to be the appellation of the reunited branches of the nation, but was gradually supplanted by the term *Jew*, especially among foreigners.

The Hebrews that were with the Philistines before that time, . . . even they also turned to be with the *Israelites* that were with Saul and Jonathan. 1 Sam. xiv. 21.

I also am an *Israelite*, of the seed of Abraham, of the tribe of Benjamin. Rom. xi. 1.

New Israelite, a member of a certain English sect: same as *Southcottian*.

Israelitic (iz″rā-e-lit′ik), *a.* [< LL. *Israeliticus*, < *Israelita*, Israelite: see *Israelite*.] Pertaining to the Israelites; Jewish; Hebrew.

These books give us a fairly trustworthy account of *Israelitic* life and thought in the times which they cover. *Huxley*, Nineteenth Century, XIX. 347.

Israelitish (iz″rā-e-lī′tish), *a.* [< *Israelite* + *-ish*[1].] Belonging to the Israelites; of the Jewish race.

And the son of an *Israelitish* woman, whose father was an Egyptian, went out among the children of Israel. Lev. xxiv. 10.

isset, *v. i.* [See *ish*.] To go out; issue.

isshuet, *n.* A Middle English form of *issue*.

Issida (is′i-dạ), *n. pl.* [NL., < *Issus* + *-ida*.] The *Issidæ* rated as a subfamily of *Fulgoridæ*.

Issidæ (is′i-dē), *n. pl.* [NL., < *Issus* + *-idæ*.] A family of homopterous insects, typified by the genus *Issus*. It contains thickset robust bugs, many of which are rough, resembling bits of bark, and thus exhibit protective mimicry. They are widely distributed in temperate and tropical countries, and are classified under about 50 genera and more than 200 species.

Issidioromys (is″i-dī-or′ō-mis), *n.* [NL., supposed to be an error for **Isidoromys*, < L. *Isidorus*, a man's name (referring to *Isidore* Geoffroy St. Hilaire), + Gr. *μῦς* = E. *mouse*.] A notable genus of fossil myomorphic rodents from the European Tertiary, referred to the family *Caviidæ*, having rootless molars whose crowns are divided into cordate lobes by reëntering enamel-folds. *Croizet*, 1840.

issuable (ish′ö-ạ-bl), *a.* [< *issue* + *-able*.] 1. Capable of issuing, or liable to be issued.—2. In *law*, pertaining to an issue or issues; that admits of issue being taken upon it; in which issues are made up: as, an *issuable* plea; an *issuable* term.

For now the course is, to make the sheriff's venire returnable on the last return of the same term wherein issue is joined, viz. Hilary or Trinity terms: which, from the making up of the issues therein, are usually called *issuable* terms. *Blackstone*, Com., III. xxiii.

Issuable plea, a plea upon which a plaintiff may take issue and go to trial upon the merits.

issuably (ish′ö-ạ-bli), *adv.* In an issuable manner; so as to raise an issue on the merits: as, "pleading *issuably*," *Burrill*.

issuance (ish'ö-ans), *n.* [< *issuan(t)* + *-ce.*] The act of issuing or giving out: as, the *issuance* of rations.

issuant (ish'ö-ant), *a.* [< *issue* + *-ant.*] Emerging: in *her.*, said of a beast of which only the upper half is seen. Especially —(*a*) When emerging from the lower edge or bottom of a chief, and therefore borne upon the chief: as, a chief gules, a demi-lion *issuant* argent. In this sense contrasted with *ascendant*, which means rising from the bottom of a shield or from the outer edge of a fesse, etc., and with *jessant* and *naissant*, which mean rising from the middle of an ordinary, as a fesse, and usually borne partly on the ordinary and partly on the field above it. (*b*) Rising out of any other bearing, or from the bottom of the escutcheon. [Rare in this sense.]—**Issuant and revertant**, in *her.*, coming into sight and disappearing: said of two beasts of which the upper part of one and the lower part of the other are visible, as when one of them rises from the base of the shield ★and the other disappears at the top.

Lion issuant.

issue (ish'ö), *n.* [< ME. *issue, issu, isshue, ischewe, yssewe,* < OF. *issue, eissue, essue,* F. *issue,* a going out, egress, outlet, final event, < *issu,* pp. of *issir, eisser,* < L. *exire,* go out: see *exit.* Cf. *ish.* The noun is in later senses partly from the verb.] **1.** A going, passing, or flowing out; passage from within outward; an outgoing, outflow, or flux.

With my mouthe if I laugh moch or lite,
Myn yen sholde make a contynaunce vn-trewe,
Myn hert also wolde haue ther-of despite,
The wepyng teres haue so large *yssewe.*
Political Poems, etc. (ed. Furnivall), p. 53.

A woman which was diseased with an *issue* of blood twelve years came behind him. Mat. ix. 20.

2. Means of egress; an opening or outlet; a passage leading outward; a vent.

Than thei gan to repeire a softe paas till thei come to the *issu* of the foreste, and than gan it to shewe day.
Merlin (E. E. T. S.), ii. 357.

The foliage closed so thickly in front that there seemed to be no *issue.* *R. L. Stevenson,* Inland Voyage, p. 120.

3. Specifically, in *med.*, a vent for the passage of blood or morbid matter; a running sore, accidental or made as a counter-irritant.

When any man hath a running *issue* out of his flesh, because of his *issue* he is unclean. Lev. xv. 2.

Issues over the spine have been found useful in chronic spinal disease. *Quain,* Med. Dict., p. 314.

4. An outcome; a result; the product of any process or action; that which occurs as a consequence; ultimate event or result: as, a happy *issue* of one's labors; the *issues* of our actions are hidden from us.

A blisfull begynnyng may boldly be said,
That ffolow to the fer end and hath a faire *yssue.*
Destruction of Troy (E. E. T. S.), l. 2257.

Learning and philosophy . . . had . . . the power to lay the mind under some restraint, and make it consider the *issue* of things. *Bacon,* Moral Fables, vi., Expl.

Spirits are not finely touch'd
But to fine *issues.* *Shak.,* M. for M., i. 1, 37.

A Fact is the end or last *issue* of spirit.
Emerson, Nature.

5. Offspring; progeny; a child or children; descendant or descendants: as, he had *issue* a son; *issue* of the whole or of the half blood.

Thare es none *ischewe* of us on this erthe sprongene.
Morte Arthure (E. E. T. S.), l. 1943.

Was Milan thrust from Milan that his *issue*
Should become kings of Naples?
Shak., Tempest, v. 1, 206.

Might I dread that you,
With only Fame for spouse and your great deeds
For *issue,* yet may live in vain?
Tennyson, Princess, iii.

6. Produce or proceeds; yield, as of land or other possessions: as, the *issues,* rents, and profits of an estate.

He was first of Inglond that gaf God his tithe,
Of *isshues* of bestes, of landes, or of tithe.
Rob. of Brunne, p. 19.

7. The act of sending or giving out; a putting or giving forth; promulgation; delivery; emission: as, the *issue* of commands by an officer, or of rations to troops; the *issue* of a book, or of bank-notes.

The booking-office is not opened for the *issue* of tickets until perhaps a quarter of an hour before the time fixed for the departure of the train.
Saturday Rev., Jan., 1874, p. 14.

Issue is also applied to the mere attempt to dispose of old stock at a reduced price, where no reprint takes place.
N. and Q., 7th ser., II. 479.

The codification of Bavarian law and the *issue* of the Golden Bull were . . . attempts in the direction of civilisation in accordance with the highest existing ideal.
Stubbs, Medieval and Modern Hist., p. 211.

8. That which is sent out, promulgated, or delivered; the quantity sent forth at one time, or within a certain period: as, a large *issue* of bank-notes; the daily *issues* of a newspaper.

No undeserving favourite doth boast
His *issues* from our treasury.
Ford, Perkin Warbeck, iv. 4.

To restrict *issues,* or forbid notes below a certain denomination, is no less injurious than inequitable.
H. Spencer, Social Statics, p. 434.

The vast development of stereotyping has made the word *issue* a partial substitute for the word "edition."
N. and Q., 7th ser., II. 478.

9. A matter of which the result is to be decided; that which is to be determined by trial or contention; a conclusion held in abeyance for consideration or debate; a choice between alternatives: as, the *issues* of the day; a dead *issue.*

Thus was raised a simple *issue* of law to be decided by the court. *Macaulay,* Hist. Eng., vi.

In this act . . . they have forced upon the country the distinct *issue,* "immediate dissolution or blood."
Lincoln, in Raymond, p. 141.

The years have never dropped their sand
On mortal *issue* vast and grand
As ours to-day. *Whittier,* Anniversary Poem.

10. In *law:* (*a*) The close or result of pleadings in a suit, by the presentation of a controverted point to be determined by trial. It is either an *issue of law,* to be determined by the court, or *of fact,* to be determined by a jury or by the court. (*b*) The controversy on any material fact, affirmed on one side and denied on the other, in a trial. (*c*) The sending out or authoritative delivery of a document: as, the *issue* of execution.—**At issue.** (*a*) In controversy; opposing or contesting; hence, at variance; disagreeing; inconsistent; inharmonious.

Face, voice
As much *at issue* with the summer day
As if you brought a candle out of doors.
Mrs. Browning, Aurora Leigh, ii.

(*b*) In dispute; under discussion.

A third point *at issue* between Carlyle and many is what he has baptised Anti-rose-waterism in Cromwell.
Colburn's New Mag., N. S., VIII. 206.

(*c*) Specifically, in *law,* the condition of a cause when the point in controversy has been arrived at by pleading.—**Bank of issue.** See *bank*[2].—**Collateral issue.** See *collateral.*—**Distributive finding of the issue.** See *distributive.*—**Feigned issue.** See *feign.*—**General issue,** in *law,* a simple denial of the whole charge or complaint, or of the main substance of it, in the form of a denial, as "not guilty" or "not indebted," as distinguished from a special denial (see *special issue,* below), and from allegations conflicting with particular averments, and from special pleas of other facts in avoidance.—**Immaterial issue,** an issue which cannot be decisive of any part of the litigation, as distinguished from a *material issue,* or one taken upon a fact which cannot be admitted without determining at least some part of the rights in controversy. Thus, if in an action for the price of goods sold defendant without denying the purchase should merely deny that it was on the day alleged by plaintiff, the issue would be immaterial; but if he should set up that the sale was on a credit still unexpired, issue joined upon this allegation would be material.—**Issue roll,** in old English legal practice, the roll of parchment on which the pleadings were entered, in anticipation of trial; hence, in somewhat later times, the pleadings in a cause, collected and fastened or folded together for the same purpose.—**Joinder of issue, joinder in issue,** the act of joining issue in pleading; the document by which one party signifies to the adversary that he rests the cause for trial on the point at issue on the pleadings.—**Note of issue,** in *law,* a memorandum showing issue joined in a cause, which informs the clerk that it is ready for trial.—**Special issue,** an issue taken by denying a particular part of the adversary's allegations, as distinguished from the issue presented by a general denial.—**To join issue, to take issue,** said of two parties who take up an affirmative and a negative position respectively on a point in debate.

Were our author's arguments enforced against deists or atheists only, we should heartily *join issue.*
Goldsmith, Criticisms.

To pool issues, to unite for the promotion of individual interests or objects by joint action; combine for mutual advantage. [U. S.]—**Syn. 4.** Consequence, result, upshot, conclusion, termination.—**5.** *Progeny,* etc. See *offspring.*

issue (ish'ö), *v.*; pret. and pp. *issued,* ppr. *issuing.* [< ME. *issuen, yssuen;* < *issue, n.*] **I.** *intrans.* **1.** To pass from within outward; go or pass out; go forth.

Fele fightyng folke of the fuerse comyns, . . .
At Ector thai asket leue, & *yssuit* furth somyn [together].
Destruction of Troy (E. E. T. S.), l. 6222.

For, I protest, we are well fortified,
And strong enough to *issue* out and fight.
Shak., 1 Hen. VI., iv. 2, 20.

2. To proceed as progeny; be derived or descended; spring.

Of thy sons that shall *issue* from thee. 2 Ki. xx. 18.

Thy father
Was Duke of Milan; and his only heir
And princess—no worse *issued.*
Shak., Tempest, i. 2, 59.

3. To be produced as an effect or result; grow or accrue; arise; proceed: as, rents and profits *issuing* from land.

4. To come to a result or conclusion; reach an end; close; terminate: with *in* before an object: as, we know not how the cause will *issue;* the negotiations *issued in* a firm peace.

Her effort to bring tears into her eyes *issued in* an odd contraction of her face.
George Eliot, Mill on the Floss, i. 9.

The child *issues in* the man as his successor, and the child and the man *issue in* the old man.
J. H. Newman, Gram. of Assent, p. 131.

5. In *law:* (*a*) To come to a question in fact or law on which the parties join in resting the decision of the cause. (*b*) To go forth as authoritative or binding: said of an official instrument, as a mandamus, proclamation, or license. [In this sense often used in the future, implying that the court has the right to issue the writ, and will do so upon application: as, a writ of prohibition *will issue* to forbid an inferior court from entertaining a suit of which it has no jurisdiction.]

II. *trans.* **1.** To send out; deliver for use; deliver authoritatively; emit; put into circulation: as, to *issue* provisions; to *issue* a writ or precept; to *issue* bank-notes or a book.

After much dispute and even persecution there was *issued* in 1555 a decree establishing toleration to all.
Brougham.

Arundel found time to *issue* a series of constitutions against them [Lollards] in 1409. *Stubbs,* Const. Hist., § 404.

2†. To bring to an issue; terminate; settle.

It is our humble request, that in case any difference grow in the general court, between magistrates and deputies, . . . which cannot be presently *issued* with mutual peace, that both parties will be pleased to defer the same to further deliberation.
Winthrop, Hist. New England, II. 255.

Endeavour to *issue* those things, in the wisdom and power of God, which will be a glorious crown upon your ministry. *Penn,* Rise and Progress of Quakers, vi.

issueless (ish'ö-les), *a.* [< *issue, n.,* + *-less.*] Having no issue or progeny; lacking children.

Ah! if thou *issueless* shalt hap to die,
The world will wail thee, like a makeless wife.
Shak., Sonnets, ix.

issue-pea (ish'ö-pē), *n.* A pea or similar round body employed for the purpose of maintaining irritation in a wound of the skin called an *issue.* See *issue, n.,* 3.

issuer (ish'ö-ėr), *n.* One who issues or emits: as, the *issuer* of a proclamation, a promissory note, etc.

Issus (is'us), *n.* [NL. (Fabricius, 1803), < L. *Issus,* Gr. Ἰσσός, a city of Cilicia, on the Mediterranean.] The typical genus of insects of the family *Issidæ.* The fore wings are rather flat, broadest near the base, convex on the fore border, smaller and rounded at the tip. Upward of 60 species are found, in all parts of the world. Those of North America are small and inconspicuous. A leading one is *I. coleoptratus,* widely distributed in Europe.

-ist. [= F. *-iste* = Sp. Pg. It. *-ista,* < L. *-ista, -istes,* < Gr. *-ιστής,* a termination of nouns of agent from verbs in *-ίζειν,* < *-ιδ-* + *-της,* common formative of nouns of agent. See *-ize, -ism.*] A termination of Greek origin, existing in many English words derived from the Greek or formed on Greek analogy, denoting an agent (one who does or has to do with a thing), and corresponding usually to nouns in *-er*[1], with which in some cases they interchange. Such nouns are either (*a*) of pure Greek formation, as *Atticist, baptist, evangelist, exorcist,* etc., or formed of Greek elements, as *etymologist, philologist, physicist, dramatist, economist,* etc. (with equivalent *etymologer, philologer,* etc.), or (*b*) formed from a Latin or Romance base, as *annalist, artist, jurist, legist, moralist, pietist, quietist, realist, specialist,* etc., especially with reference to political or social theories or practices, as *abolitionist, federalist, unionist, protectionist, socialist, nihilist, corruptionist, fusionist,* etc., or (*c*) formed from an English word (whether native or naturalized), as *harpist, druggist, violinist,* etc.; so also *saloonist,* etc. Words of the first two classes are very numerous, new formations being made with great freedom. In the last use the suffix is but sparingly used, the formative *-er*[1] or some other being preferred. In vulgar use words in *-ist* are often employed, humorously or for the nonce, where properly only *-er* is permissible, as in *shootist, singist, walkist,* etc., for *shooter, singer, walker,* etc. In some instances, as *scientist,* for example, the formation is irregular, and the words are condemned by purists.

isthmt, isthimt, *n.* [< OF. *isthme:* see *isthmus.*] An isthmus. *Davies.*

Logh Nesse, . . . from which, by a verie small *Isthim* or partition of hils, the Logh Lutea or Louthia . . . is divided. *Holland,* tr. of Camden, ii. 50.

isthmian (ist'- or is'mi-an), *a.* [= F. *Isthmien,* < L. *Isthmius,* < Gr. Ἰσθμιος, pertaining to the Isthmus of Corinth, < Ἰσθμός, the Isthmus of Corinth: see *isthmus.*] **1.** Of or pertaining to an isthmus.—**2.** [*cap.*] Specifically, of or pertaining to the Isthmus of Corinth, between the Peloponnesus and the mainland of Greece.—

Isthmian games, games in honor of Poseidon anciently celebrated in the Isthmian sanctuary, on the Isthmus of Corinth, constituting the second in importance of the four great national festivals of Greece. They took place in April and May in the first and third years of each Olympiad, and included the same contests as the Olympian games, athletic, poetic, and musical. The victors were crowned with wreaths of pine-leaves, which were the only prizes.—**Isthmian sanctuary,** a sacred precinct on the northeast shore of the Isthmus of Corinth, inclosed by walls and containing rich temples, altars, a theater, a stadium, and many other public and private monuments, within which the Isthmian games were celebrated from time immemorial until the prevalence of the Christian religion.

isthmiate (ist'- or is'mi-āt), *a.* [< *isthmus* + *-i-ate.*] In *zoöl.*, having a narrow part connecting two broader portions.—**Isthmiate thorax,** in *Coleoptera*, a thorax having a narrowed space between the prothorax and the elytra, either in consequence of the former being constricted behind, or because the anterior part of the mesothorax is not covered by the prothorax.

isthmitis (ist- or is-mī'tis), *n.* [NL., < *isthmus*, 3, + *-itis.*] Inflammation of the throat.

isthmoid (ist'- or is'moid), *a.* [< Gr. *ἰσθμοειδής*, like an isthmus, < *ἰσθμός*, an isthmus, + *εἶδος*, form.] Resembling an isthmus; specifically, ★resembling the isthmus faucium.

isthmus (ist'- or is'mus), *n.* [Formerly also *isthmos* (and *isthm*, q. v.); = F. *isthme* = Pg. *isthmo* = Sp. It. *istmo*, < L. *isthmus*, < Gr. *ἰσθμός*, a narrow passage, a narrow strip of land between two seas (esp. the Isthmus of Corinth); akin to *ἴθμα*, a step, < *ἰέναι* (= L. *ire*), go: see *go.*] **1.** A narrow strip of land bordered by water and connecting two larger bodies of land, as two continents, a continent and a peninsula, or two parts of an island. The two isthmuses of most importance are that of Suez, connecting Asia and Africa, and that of Panama or Darien, connecting North and South America. The isthmus most famous in ancient times is that of Corinth, called distinctively *the Isthmus*, separating the Peloponnesian peninsula from the mainland of Greece. A small isthmus is often called a *neck.*

> There want not good Geographers who hold that this Island was tied to France at first . . . by an *Isthmos* or neck of land 'twixt Dover and Bullen.
> *Howell*, Pref. to Cotgrave's French Dict. (ed. 1673).

2. In *bot.* and *zoöl.*, some connecting part or organ, especially when narrow or joining parts larger than itself.—**3.** The contracted passage from the cavity of the mouth into that of the pharynx. It is bounded above by the pendulous veil of the palate and uvula, at the sides by the pillars of the fauces, and below by the base of the tongue. More fully called *isthmus faucium*, isthmus of the fauces.—**Isthmus cerebri,** the isthmus of the brain; the narrow part intervening between the cerebrum and the cerebellum.—**Isthmus of the thyroid gland,** a contracted part of this gland, lying across the middle line of the windpipe, and connecting the two lateral lobes which chiefly compose the thyroid body.

-istic. [< *-ist* + *-ic.*] A termination of adjectives (and in the plural of nouns from adjectives) formed from nouns in *-ist*, and having reference to such nouns, or to associated nouns in *-ism*, as in *deistic, theistic, euphuistic, euphemistic, puristic, linguistic, subjectivistic, objectivistic*, etc. In nouns it has usually a plural form, as in *linguistics.*

-istical. [< *-istic* + *-al.*] Same as *-istic.*

Istiophorus (is-ti-of'ō-rus), *n.* See *Histiophorus*, 1 and 2.

Istiurus (is-ti-ū'rus), *n.* See *Histiurus*, 1.

istle (is'tle), *n.* [Also *ixtle:* < Nahuatl *ixtli.*] ★A valuable fiber produced principally from *Bromelia sylvestris*, a kind of wild pineapple. It is called *pita* in Central America, and *silk-grass* in British Honduras. These names, with the exception of the last, are also applied to the fiber obtained from various species of *Agave*, particularly *A. rigida*, but the species are much confused. *Bromelia sylvestris*, which is extensively cultivated in Mexico, produces leaves 1 to 3 inches wide and 5 to 8 feet long, which yield a very strong fiber extensively used in the manufacture of bagging, carpets, hammocks, cordage, nets, belts, etc. See *henequen.*

istle-grass (is'tle-gràs), *n.* The plant, *Bromelia sylvestris*, which yields the fiber istle.

Istrian (is'tri-an), *a.* and *n.* [< *Istria* (see def.) + *-an.*] **I.** *a.* Of or pertaining to Istria, a crownland belonging to the Cisleithan division of Austria-Hungary, situated near the head of the Adriatic sea.

> The *Istrian* shore has lost its beauty, though the *Istrian* hills, now and then capped by a hill-side town, and the higher mountains beyond them, tell us something of the character of the inland scenery.
> *E. A. Freeman*, Venice, p. 98.

II. *n.* A native or an inhabitant of Istria. The Istrians are Slavs and Italians, the former being much the more numerous.

it (it), *pron.* [< ME. *it, yt, hit, hyt,* < AS. *hit* (gen. *his*, dat. *him*), neut. of *hē*, he: see *he*[1].] **1.** A personal pronoun, of the third person and neuter gender, corresponding to the masculine *he* and the feminine *she*, and having the same plural forms, *they, their, them.* (*a*) A substitute for the name of an object (previously mentioned, or understood from the context or circumstances) not regarded as possessing sex, or without regard to the sex, or for an abstract noun, a phrase, or a clause: as, *it* (a stone) is very heavy; feed *it* (an infant) with a spoon; the moon was red when *it* rose; the horse stumbles when *it* (or *he*) is driven fast; how did *it* (an event) happen? *It* is often used vaguely for a thing, notion, or circumstance not definitely conceived, or left to the imagination: as, how far do you call *it?* plague take *it!* you'll catch *it!*

> How is *it* with our general? *Shak.*, Cor., v. 5.

(*b*) As the nominative of an impersonal verb or verb used impersonally, when the thing for which it stands is expressed or implied by the verb itself: as, *it* rains (the rain rains or is falling); *it* is blowing (the wind is blowing). (*c*) As the grammatical subject of a clause of which the logical subject is a phrase or clause, generally following, and regarded as in apposition with *it:* as, *it* is said that he has won the prize; he is poor, *it* is true, but he is honest; *it* behooves you to bestir yourself; *it* is they that have done this mischief.

> 'Tis these that gave the great Apollo spoils. *Pope.*

(*d*) After an intransitive verb, used transitively for the kind of action denoted or suggested by the verb: as, to foot *it* all the way to town.

> Come, and trip *it* as you go,
> On the light fantastic toe.
> *Milton*, L'Allegro, l. 33.
>
> Whether the charmer sinner *it* or saint *it*,
> If folly grow romantic I must paint it.
> *Pope*, Moral Essays, ii. 15.

(*e*) The possessive case, originally *his* (see *he*[1]), now *its;* the form *it* without the possessive suffix having been used for a time in works written during the period of transition from the use of *his* to that of *its.*

> That which groweth of *it* [now *its*] own accord.
> Lev. xxv. 5 (ed. 1611).
>
> *It* knighthood shall do worse. It shall fright all *it* friends with borrowing letters. *B. Jonson.*

2. In children's games, that player who is called upon to perform some particular task, as in I-spy or tag the one who must catch or touch the other players: as, he's *it;* who's *it?* [In old usage the substantive verb after *it* often agrees with the succeeding nominative in the first or second person: ★as, "*It am I*, fader," in Chaucer.]

It. A common abbreviation of *Italian.*

-it[1], **-it**[2]. A dialectal (Scotch) form of *-ed*[1], *-ed*[2].

> Vain of *Italian* hearts, *Italian* souls.
> *Pope*, Dunciad, iv. 300.

Italian architecture, the architectural styles developed in and characteristic of Italy; specifically, the architecture of the Italian Renaissance, which was developed through study of ancient Roman models by Brunelleschi and a few great contemporaries in the fifteenth century, and quickly disseminated its influence throughout Europe.

Italian Architecture.—Church of Sta. Maria della Salute, Venice; constructed 1632.

Among the rare merits of this architecture are its liberal application of the hemispheroidal dome, and the impressive proportions of many of its palace façades, which show a great projecting cornice crowning an imposing arrangement of architectural masses. Much of the carved ornament of the first decades of the style is delicate and refined; but it soon degenerated to the most offensive and pretentious vulgarity and coarseness. See *Lombard architecture* (under *Lombard*) and *Italian Gothic* (below).—**Italian cloth,** a kind of jean with satin face, employed chiefly for linings.—**Italian ferret,** a kind of silk braid or binding.—**Italian Gothic,** the Pointed architecture (see *Gothic, a.*, 3) of Italy during the thirteenth and fourteenth centuries. The style is based upon the Romanesque as developed in Italy, which does not differ essentially from the Romanesque of France and other countries, though it made more liberal use of ranges of somewhat small columns (see cut under *belfry*), and tended to the elaboration of surface-effects of color, owing to the abundant presence of beautifully tinted building-marbles. The Italian Pointed forms were influenced by those of northern Europe, but these were profoundly modified by the Italian architects. The exteriors of their buildings, particularly the façades, are hardly more than beautiful screens, having little or no connection with the systems of construction employed in the buildings themselves. There are no flying buttresses, for the carefully studied northern system of vaulting was never adopted in Italy; the walls are in general comparatively flat, with few projections, the rich and delicate sculpture being placed generally immediately about the windows and doors, and the large wall-spaces being treated in colored marbles, incrustation, mosaic, or painting in fresco; tracery seldom occurs in the windows, except as plate-tracery, often pierced with subtle study of effect. Every district in Italy produced its own school of Pointed architecture, each admirable in its own way. (See *Venetian architecture*, under *Venetian.*) The Pointed architecture of Sicily is not properly Italian; it approaches more closely the northern style of the Norman French conquerors, but is affected by the Saracenic traditions which abounded on the island, and influenced by Byzantine models, particularly in its carvings and in its wealth of mosaics.—**Italian iron, millet,** etc. See the nouns.—**Italian painting,** the art of painting as developed and practised in Italy; specifically, the group of schools which had their origin in ancient Roman tradition and in the imitation of Byzantine models in the early middle ages, received their first vital impulse from Giotto in the beginning of the fourteenth century, and culminated in the great masters of the Renaissance—Tintoret, Titian, Paul Veronese, and Raphael. Until the close of the fourteenth century the consistent object of this painting was to manifest to the unlettered the miraculous things chronicled in the Holy Writ and accomplished by the sanctification of religious faith. With the fifteenth century the modern spirit of naturalism appeared in art, and made its way until by the last half of that century the religious and didactic spirit had vanished, and pictures had come to be painted in the mere cult of outward beauty, and for the personal glory and profit of the painter. For some of the chief schools of Italian painting, see *Bolognese, Roman, Sienese, Umbrian, Venetian.* See also *Florentine painting*, under *Renaissance.*—**Italian sixth,** in *music*, a chord of the extreme sixth, containing the major third of the bass. See figure.—**Italian string,** a superior kind of catgut violin-string, made in Italy.—**Italian warehouse,** a shop where Italian groceries and fruits are sold.—**Italian-warehouseman,** a dealer in fine groceries, including macaroni, vermicelli, dried fruits, olive-oil, etc.

II. *n.* 1. A native of Italy, or one of the Italian race.—2. The language spoken by the inhabitants of Italy, whether the literary speech or one of the popular dialects.

His name's Gonzago; the story is extant, and writ in choice *Italian*. *Shak.*, Hamlet, iii. 2, 272.

Abbreviated *It.*, *Ital.*

Italianate† (i-tal′yan-āt), *v. t.* [< *Italian* + *-ate*[2].] To render Italian or conformable to Italian principles or manners; Italianize.

If some yet do not well vnderstand what is an English man *Italianated*, I will plainlie tell him. *Ascham*, The Scholemaster, p. 78.

If any Englishman be infected with any misdemeanour, they say with one mouth he is *Italianated*. *Lyly*, Euphues.

Italianate (i-tal′yan-āt), *a.* [< *Italian* + *-ate*[1].] Italianized; having become like an Italian: applied especially to fantastic affectation of fashions borrowed from Italy. [Rare.]

All his words,
His lookes, his oathes, are all ridiculous,
All apish, childish, and *Italianate*.
Dekker, Old Fortunatus.

An Englishman *Italianate*
Is a devil incarnate.
Quoted in *S. Clark's* Examples (1670).

With this French page and *Italianate* serving-man was our young landlord only waited on. *Middleton*, Father Hubbard's Tales.

He found the old minister from Haddam East Village *Italianate* outwardly in almost ludicrous degree. *Howells*, Indian Summer, p. 173.

Italianisation, Italianise, etc. See *Italianization*, etc.

Italianism (i-tal′yan-izm), *n.* [< *Italian* + *-ism.*] A word, phrase, idiom, or manner peculiar to the Italians; Italian spirit, principles, or taste.

It was, perhaps, an ungracious thing to be critical, among all the appealing old *Italianisms* round me. *H. James, Jr.*, Trans. Sketches, p. 178.

Italianity (i-tal-yan′i-ti), *n.* [< *Italian* + *-ity.*] Italianism. [Rare.]

The "Venetian," in spite of its peculiar *Italianity*, has naturally special points of contact with the other dialects of Upper Italy. *Encyc. Brit.*, XIII. 494.

Italianization (i-tal″yan-i-zā′shon), *n.* [< *Italianize* + *-ation.*] The act or process of rendering or of being rendered Italian. Also spelled *Italianisation*.

The border dialects, being numerous and very diverse in character, present a very strong concentrated drift towards *italianization*. *Amer. Jour. Philol.*, IV. 488.

Italianize (i-tal′yan-īz), *v.*; pret. and pp. *Italianized*, ppr. *Italianizing*. [< *Italian* + *-ize.*] **I.** *intrans.* To play the Italian; speak Italian.

II. *trans.* To render Italian; impart an Italian quality or character to.

Also spelled *Italianise*.

Italianizer (i-tal′yan-ī-zėr), *n.* One who promotes the influence of Italian principles, tastes, manners, etc. Also spelled *Italianiser*.

Italic (i-tal′ik), *a.* and *n.* [Formerly also *Italick*; = F. *Italique* = Sp. *Itálico* = Pg. It. *Italico*, < L. *Italicus*, Italian, < *Italia*, Italy, *Italus*, an Italian: see *Italian.*] **I.** *a.* 1. Of or pertaining to ancient Italy or the tribes, including the Romans, which inhabited it, or to their languages.

The Latin was the only *Italic* dialect known to the Middle Ages which possessed an alphabetic system. *G. P. Marsh*, Hist. Eng. Lang., p. 15.

2. Of or pertaining to modern Italy. [Rare.]

All things of this world are . . . as unpleasant as the lees of vinegar to a tongue filled with the spirit of high *Italic* wines. *Jer. Taylor*, Works (ed. 1835), I. 65.

Specifically—(*a*) In *arch.*, same as *Composite*, 3. (*b*) [*l. c.* or *cap.*] Of Italian origin: designating a style of printing-types the lines of which slope toward the right (thus, *italic*), used for emphasis and other distinctive purposes. The italic character was first made and shown in type by Aldus Manutius, a notable printer of Venice, in an edition of Virgil, 1501, and by him dedicated to Italy. The first italic had upright capitals, but later French type-founders inclined them to the same angle as the small letters. In manuscript italic is indicated by underscoring the words with a single line.—**Italic school of philosophy.** Same as *Pythagorean school of philosophy* (which see, under *Pythagorean*).—**Italic version of the Bible,** or *Itala*, a translation of the Bible into Latin, based upon a still older version, called the *Old Latin*, and made probably in the time of Augustine (A. D. 354–430). The corruption of the text of this and the other Latin versions led to the revision called the Vulgate, the work of Jerome. See *Vulgate*.

II. *n.* [*l. c.*] In *printing*, an italic letter or type: usually in the plural: as, this is to be printed in *italics*. Abbreviated *ital.*

Italicism (i-tal′i-sizm), *n.* [< *Italic* + *-ism.*] An Italianism.

italicization (i-tal″i-si-zā′shon), *n.* [< *italicize* + *-ation.*] The act of underscoring words in writing, or of printing words underscored in italic type; italicizing. Also spelled *italicisation*.

The *italicisation* is mine. *The Academy*, March 17, 1888, p. 184.

italicize (i-tal′i-sīz), *v. t.*; pret. and pp. *italicized*, ppr. *italicizing*. [< *italic* + *-ize.*] To print in italic type, or underscore with a single line in writing: as, to *italicize* emphatic words or sentences; in old books all names were commonly *italicized*. Also spelled *italicise*.

italicizing (i-tal′i-sī-zing), *n.* [Verbal n. of *italicize*, *v.*] Same as *italicization*, and more common.

Italiot, Italiote (i-tal′i-ot, -ōt), *n.* and *a.* [< Gr. Ἰταλιώτης, < Ἰταλία, Italy: see *Italian.*] **I.** *n.* In *anc. hist.*, an Italian Greek; a person of Greek birth or descent living in Italy; an inhabitant of Magna Græcia.

II. *a.* In *anc. hist.*, of or belonging to the Greek settlements in southern Italy.

He sought to reconcile Ionian monism with *Italiote* dualism. *Encyc. Brit.*, XVIII. 315.

Our author evidently feels that this parallel progress of the *Italiot* Greeks tells against his argument. *J. Hadley*, Essays, p. 15.

Italish†, *a.* [< *Ital(ic)* + *-ish.* Cf. *Italic.*] Italian; in the Italian manner.

All this is true, though the feat handling thereof be altogether *Italish*. *Bp. Bale*, Select Works, p. 9.

Italo-Byzantine (it′ä-lō-biz′an-tin), *a.* In *art*, noting the Byzantine styles as developed and practised in Italy; combining Byzantine and Italian characteristics.

Numerous fragments of ornaments and animals in the same *Italo-Byzantine* style are set into the wall of the atrium of the church of Santa Maria della Valle. *C. C. Perkins*, Italian Sculpture, Int., p. xii.

ita-palm (it′ä-päm), *n.* [< *ita*, nat. Brazilian, + E. *palm*[2].] A tall palm, *Mauritia flexuosa*, common along the Amazon, Rio Negro, and Orinoco rivers, where it sometimes presents the appearance of forests rising out of the water. The outer part of the leaves is made into a stout cord; the fermented sap yields a palm-wine; and the inner part of the stem furnishes a starchy substance similar to sago.

itch (ich), *v. i.* [< ME. *icchen*, *iken*, *ykyn*, earlier *ziken*, *zeken* (cf. E. dial. *yuck*, *yuik*), < AS. *giccan* = D. *jeuken* = MLG. *joken*, *jucken*, LG. *jocken* = OHG. *jucchan*, *juchan*, *juchen*, *jucken*, MHG. G. *jucken*, itch.] 1. To feel a peculiar irritation or tingling of the skin, producing an inclination to scratch the part so affected.

Oure body wole *icche*, oure bonis wole ake,
Oure owne fleisch wole ben oure foo.
Hymns to Virgin, etc. (E. E. T. S.), p. 80.

Mine eyes do *itch*;
Doth that bode weeping?
Shak., Othello, iv. 3, 58.

Hence—2. To experience a provoking, teasing, or tingling desire to do or to get something.

Princes commend a private life; private men *itch* after honour. *Burton*, Anat. of Mel., To the Reader, p. 35.

Plain truths enough for needful use they found:
But men would still be *itching* to expound.
Dryden, Religio Laici, l. 410.

An itching palm, a grasping disposition; a longing for acquisition; greed of gain.

Let me tell you, Cassius, you yourself
Are much condemn'd to have *an itching palm*,
To sell and mart your offices for gold.
Shak., J. C., iv. 3, 10.

★ **itch** (ich), *n.* [< *itch*, *v.*] 1. A tingling sensation of irritation in the skin, produced by disease (see def. 2) or in any other way.—2. An inflammation of the human skin, caused by the presence of a minute mite, *Sarcoptes scabiei* (see *itch-mite*), presenting papules, vesicles, and pustules, and accompanied with great itching; scabies.

The *Itch*, the Murrein, and Alcides-grief,
In Ver's hot-moysture doe molest vs chief.
Sylvester, tr. of Du Bartas's Weeks, ii., The Furies.

Itches, blains,
Sow all the Athenian bosoms; and their crop
Be general leprosy! *Shak.*, T. of A., iv. 1, 23.

Hence—3. An uneasy longing or propensity; a teasing or tingling desire: as, an *itch* for praise; an *itch* for scribbling.

This *itch* of book-making . . . seems no less the prevailing disorder of England than of France. *Goldsmith*, Criticisms.

There is a spice of the scoundrel in most of our literary men; an *itch* to filch and detract in the midst of fair speaking and festivity. *Landor.*

Bakers', bricklayers', grocers', etc., **itch.** See the qualifying words.—**Dhobie's** or **washerman's itch.** See *dhobie*.

itchful† (ich′fûl), *a.* [< *itch* + *-ful.*] Itchy. *Palsgrave.*

itchiness (ich′i-nes), *n.* The quality or state of being itchy; sensation of itching; tendency to itch.

This *itchiness* is especially marked if the lid and cheeks become excoriated and inflamed. *J. S. Wells*, Dis. of Eye, p. 675.

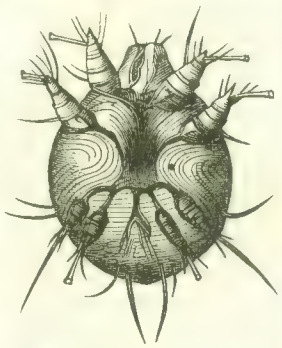
itching (ich′ing), *n.* [Verbal n. of *itch*, *v.*] 1. The sensation caused by a peculiar irritation with pricking, tingling, or tickling in the skin.

It [eczema] is chiefly obnoxious through its *itching*, which is sometimes so great as to produce violent excitement of the nervous system. *Quain*, Med. Dict.

Hence—2. A morbid, irritating, or tantalizing desire to have or to do something.

The *itching* of Scribblers was the scab of the Time. *Howell*, Letters, ii. 48.

All fools have still an *itching* to deride,
And fain would be upon the laughing side,
Pope, Essay on Criticism, l. 32.



itching-berry (ich′ing-ber″i), *n.* The fruit of the dogrose, *Rosa canina:* so called because the hairy seeds produce irritation of the skin.

itch-insect (ich′in″sekt), *n.* An itch-mite.

itchless (ich′les), *a.* [< *itch* + *-less.*] Free from itch; not itching.

One rubs his *itchless* elbow, shrugs and laughs. *Quarles*, Emblems, i. 9.

itch-mite (ich′mīt), *n.* A mite which burrows in the skin, and causes the disease called the itch or scabies. There are several species, having similar traits, and all belonging to the order *Acarida*, *Acaridea*, or *Acarina*, of the class *Arachnida*. The genuine itch-mite is *Sarcoptes scabiei*. The female is about $\frac{1}{60}$ of an inch long, the male much smaller; the body is oval or rounded, without eyes, and with 4 pairs of short 3-jointed legs, the anterior 2 pairs ending in a sucking-disk, the posterior 2 pairs ending, in the female, in a long filament. Its favorite haunts are between the fingers, the flexor side of the wrists and elbows, and the region of the groin. It can be transferred from person to person.

Under Side of Itch-mite (*Sarcoptes scabiei*), highly magnified.

itchweed (ich′wēd), *n.* The American false hellebore, *Veratrum viride*.

itchy (ich′i), *a.* [< *itch* + *-y*[1].] 1. Characterized by or having an itching sensation.

Takes the coming gold
Of insolent and base ambition,
That hourly rubs his dry and *itchy* palms.
B. Jonson, Cynthia's Revels, iii. 2.

Excess, the scrofulous and *itchy* plague,
That seizes first the opulent.
Cowper, Task, iv. 582.

2. Having the itch: as, an *itchy* beggar.

-ite[1]. [= F. *-i*, *-it*, m., *-ite*, f., = Sp. Pg. It. *-ito*, m., *-ita*, f., < L. *-ītus*, *-ītus*, m., *-īta*, *-ĭta*, f., *-ītum*, *-ĭtum*, n., term. of the pp. of verbs in *-ēre*, *-ĕre*, or *-ire*, being the pp. suffix *-tus* (= E. *-d*[2], *-ed*[2]), with a preceding original or supplied vowel: see *-ate*[1], *-ed*[2].] A termination of some English adjectives and nouns from adjectives, and of some verbs, derived from the Latin, as in *apposite*, *composite*, *opposite*, *exquisite*, *requisite*, *erudite*, *recondite*, etc. Its use in verbs, as in *expedite*, *extradite*, *ignite*, *unite*, and in nouns not directly from adjectives, as in *granite*, is less common. When the vowel is short, the termination is often merely *-it*, as in *deposit*, *reposit*, *posit*, *merit*, *inhabit*, *prohibit*, etc. It is not used or felt as an English formative. In a few words, as *appetite*, *audit*, from Latin nouns of the fourth declension,

★ no adjective form intervenes.

-ite[2]. [< F. *-ite* = Sp. Pg. It. *-ita*, < L. *-ĭta*, *-ītes*, < Gr. *-ίτης*, fem. *-ῖτις*, an adj. suffix, 'of the nature of,' 'like,' used esp. in patrial and mineral names.] A suffix of Greek origin, indicating origin or derivation from, or immediate relation with, the person or thing signified by the noun to which it is attached. Specifically—(*a*) Noting a native or resident of a place: as, *Stagyrite*, a na-

tive of Stageira: *Sybarite*, a native of Sybaris, etc. (*b*) Noting a descendant of a person or member of a family or tribe, as *Canaanite*, *Israelite*, *Moabite*, *Hittite* etc. (*c*) Noting a disciple, adherent, or follower of a person, a doctrine, a class, an order, etc., as *Rechabite*, *Carmelite*, *Campbellite*, *Hicksite*, etc., or (with *-it*) *Jesuit*. (*d*) In *mineral.*, noting rocks, minerals, or any natural chemical compound, or mechanical aggregation of substances, as *syenite*, *calcite*, *dolomite*, *quartzite*, etc. It has no connection with *-lite* (which see). (*e*) In *chem.*, denoting a salt of an acid the name of which ends in the suffix *-ous*, and which contains a relatively smaller proportion of oxygen, as distinguished from *-ate*, denoting a salt of an acid the name of which ends in the suffix *-ic*, and which contains a relatively larger proportion of oxygen: thus, a sulphite is a salt of sulphurous acid, and a sulphate one formed from sulphuric acid. (*f*) In *anat.* and *zoöl.*, noting that which is part and parcel or a necessary component of any part or organ: as, *sternite*, a piece or segment of the sternum; *pleurite*, *tergite*, *podite*, a part of the side, back, leg. (*g*) In *paleon.* and *paleobot.*, noting fossilization or petrifaction: as, *ichnite*, *trilobite*. Compare def. (*d*).

Itea (it′e-ä), *n.* [NL. (Linnæus), < *itéa*, a willow, = AS. *withig*, a willow, E. *withe*, *withy*, a twig: see *withe*, *withy*.] A small genus of plants belonging to the family *Escalloniaceæ*, formerly referred to the *Saxifragaceæ*. The petals are linear, the ovary is half-superior and 2-celled, the styles are 2-parted, and the capsule is 2-beaked. They

Emerson, History.

itinerancy (ī-tin′ę-ran-si), *n.* [< *itineran(t)* + *-cy*.] 1. The act of traveling from place to place; especially, a going about from place to place in the discharge of duty or the prosecution of business: as, the *itinerancy* of circuit judges or of commercial travelers. — 2. Especially, in the *Meth. Ch.*, the system of rotation governing the ministry of that church. In parts of the western United States and in England several communities are grouped into "circuits," and each "circuit" is ministered to by itinerant preachers or "circuit-riders."

Methodism, with its "lay ministry" and its *itinerancy*, could alone afford the ministrations of religion to this overflowing population. *Stevens*, Hist. Methodism.

itinerant (ī-tin′ę-rant), *a.* and *n.* [< LL. *itineran(t-)s*, ppr. of *itinerari*, travel, journey: see *itinerate*.] **I.** *a.* Traveling from place to place; wandering; not settled; strolling; specifically, going from place to place, especially on a circuit, in the discharge of duty: as, an *itinerant* preacher; an *itinerant* judge.

In the Winter and Spring time he usually rode the Circuit as a Judge *Itinerant* through all his Provinces, to see justice well administerd. *Milton*, Hist. Eng., v.

I believe upon a good deal of evidence that these ancient kings were *itinerant*, travelling or ambulatory personages.
Maine, Early Law and Custom, p. 179.

Itinerant bishop. See *bishop*.

II. *n.* One who travels from place to place; a traveler; a wanderer; specifically, one who travels from place to place, especially on a circuit, in the discharge of duty or the pursuit of business, as an itinerant judge or preacher, or a strolling actor.

Glad to turn *itinerant*,
To stroll and teach from town to town.
S. Butler, Hudibras, III. ii. 92.

Vast sums of money were lavishly bestowed upon these secular *itinerants*, which induced the monks and other ecclesiastics to turn actors themselves.
Strutt, Sports and Pastimes, p. 233.

Inns for the refreshment and security of the *itinerants* were scattered along the whole line of the route from France. *Prescott*, Ferd. and Isa., i. 6.

Before our chins were worth *iulan* down.
Middleton, Changeling, i. 1.

Iva (ī′vä), *n.* [NL.: see *ivy*[2].] 1. A specific name of the ground-pine *Ajuga Iva* or *A. Chamæpitys*. — 2. [So named by Linnæus as resembling the ground-pine, *Ajuga Iva*, in smell.] A genus of plants of the family *Ambrosiaceæ* or ragweed family. They are herbs or shrubs with entire dentate or dissected leaves, at least the lower ones opposite, and small spicately, racemosely, or paniculately disposed or scattered and commonly nodding heads, which incline to be polygamo-dioecious through abortion of the ovaries. About twelve species are known, from North and South America and the West Indies. The maritime species, particularly *I. frutescens*, are called *marsh-elder* or *high-water shrub*.

ivaarite (iv-ä′-ä′rīt), *n.* [< *Ivaara* (see def.) + *-ite*[2].] A mineral from Ivaara in Finland, resembling and perhaps identical with schorlomite.

ive[1]†, *n.* An obsolete form of *ivy*[1].

ive[2]†, *n.* See *ivy*[2].

-ive. [ME. *-ive*, *-if* = OF. *-if*, m., *-ive*, f., = Sp. Pg. It. *-ivo*, m., *-iva*, f., < L. *-ivus*, m., *-iva*, f., *-ivum*, neut., a common term. of adjectives formed from verbs, either from the inf. stem, as in *gradivus*, or from the perfect-participle stem, as in *activus*, active, *passivus*, passive, *relativus*, relative, etc., the sense being nearly equiv. to that of a present participle, as in the examples cited, or instrumental, 'serving to do' so and so, as in *nominativus*, serving to name, etc.] A termination of Latin origin, forming adjectives from verbs, meaning 'doing' so and so, or 'serving to do' so and so, or otherwise noting an adjective status, as in *active*, acting, *passive*, suffering, *demonstrative*, serving to show, *formative*, serving to form, *purgative*, serving to purge, *adoptive*, *collective*, *festive*, *furtive*, *native*, *infinitive*, *relative*, etc. Many such adjectives are also used as nouns, as in some of the examples cited. The termination is commonly attached in Latin to the past-participle stem in *-at-*, *-et-*, *-it-*, *-s-*, and hence appears in English most frequently in such

connections, *-ative*, *-itive* (these being also usable as English formatives), *-ive*, rarely *-etive*. The associated noun is in *-iveness* (*activeness*, etc.) or *-ivity* (*activity*, etc.).

Iveæ (ī′vē-ē), *n. pl.* [NL. (Cassini, 1834), < *Iva* + *-eæ*.] A former tribe of plants, typified by the genus *Iva*, and containing also the genera *Pinillosia*, *Tetranthus*, and *Euphrosyne*. It is now referred to the family *Ambrosiaceæ*.

ivelt, *a.* and *n.* A Middle English form of *evil*[1].

ivent, *n.* [Also *ivin*; < ME. *iven*, *yven*, < AS. *ifegn* (= MD. *ieven*, *iven*), a var. of *ifig*, ivy: see *ivy*[1]. Cf. *hollen* and *holly*[1].] Ivy.

ivert, *n.* A Middle English form of *ivory*[1].

ivied (ī′vid), *a.* [Also *ivyed*; < *ivy*[1] + *-ed*[2].] Covered with ivy; overgrown with ivy.

> Upon an *ivied* stone
> Reclined his languid head. *Shelley*, Alastor.

ivint, *n.* See *iven*.

ivoride (ī′vō-rīd), *n.* [< *ivory* + *-ide*.] A substance made in imitation of ivory.

ivoried (ī′vō-rid), *a.* [< *ivory*[1] + *-ed*[2].] **1.** Colored and finished to resemble ivory: said of cardboard, wood, and other materials.—**2.** Furnished with teeth. [Rare.]

ivorist (ī′vō-rist), *n.* [< *ivory*[1] + *-ist*.] A worker in ivory.

-ivorous. See *-vorous*.

ivory[1] (ī′vō-ri), *n.* and *a.* [Early mod. E. also ★*ivorie*; < ME. *ivory*, *ivorie*, *yvory*, *yvorie*, *evorye*, also *ivore*, *yvore*, *ivoure*, *ivere*, *yvere*, *yver*, *evour*, < OF. *ivurie*, **ivorie*, later *ivoire*, F. *ivoire* = Pr. *evori*, *avori*, *bori* = It. *avorio*, *avoro*, < ML. *eboreum*, ivory, prop. neut. of L. *eboreus*, of ivory, < *ebur*, ivory: see *eburnine*.] **I.** *n.*; pl. *ivories* (-riz). **1.** The hard substance, not unlike bone, of which the teeth of most mammals chiefly consist; specifically, a kind of dentine valuable for industrial purposes, as that derived from the tusks of the elephant, hippopotamus, walrus, narwhal, and some other animals. Ivory is simply dentine or tooth-substance of exceptional evenness, toughness, and elasticity, due to the fineness and regularity of the dentinal tubules which radiate from the axial pulp-cavity to the periphery of the tooth. The most valuable ivory is that obtained from elephants' tusks, in which the tubules make many strong bends at regular intervals, resulting in a pattern peculiar to the proboscidean mammals. In its natural state the ivory of a tusk is coated with cement; and besides the fine angular radiating lines, it shows on cross-section a series of contour-lines concentric with the axis of the tooth, arranged about a central grayish spot which represents the calcified pulp. The appearance of these contour-lines is due to the regular arrangement of minute spaces called *interglobular*. Ivory in comparison with ordinary dentine is specially rich in organic matter, containing 40 per cent. or more. Tusks of extinct mammoths, furnishing fossil ivory, have been found 12 feet long and of 200 pounds weight. Those of the African elephant, furnishing the best ivory, as well as by far the greater portion of the ivory used in the arts, sometimes reach a length of 9 feet and a weight of 160 pounds. Those of the Indian elephant are never so large as this; and in either case tusks average much smaller, probably under 50 pounds. Elephants' tusks are incisors, but the large teeth of the hippopotamus and walrus which furnish ivory are canines. A substance which sometimes passes for ivory, but is really bone, is derived from the very hard or petrosal parts of the ear-bones of whales.

> Vpon a braunche of this pyne was hanged by a cheyne of siluer an horne of *yvorie* as white as snowe.

ivory-brown (ī′vō-ri-broun′), *n.* See *brown*.

ivory-gull (ī′vō-ri-gul), *n.* A small arctic gull, pure white all over when adult, with rough

Ivory-gull (*Larus eburneus*).

black feet, technically called *Larus eburneus*, *Pagophila eburnea*, or *Gavia alba*.

ivory-gum (ī′vō-ri-gum), *n.* Same as *ivy-gum* ★(which see, under *gum*[2]).

ivory-nut (ī′vō-ri-nut), *n.* The seed of *Phytelephas macrocarpa*, a low-growing palm, native of South America. The seeds are produced, 4 to 9 together, in hard clustered capsules, each head weighing about 25 lbs. when ripe. Each seed is about as large as a hen's egg; the albumen is close-grained and very hard, resembling the finest ivory in texture and color; it is hence called *vegetable ivory*, and is often wrought into ornamental work. It is also known as *corozo*.

ivory-palm (ī′vō-ri-päm), *n.* The tree which bears the ivory-nut.

ivory-paper (ī′vō-ri-pā″pėr), *n.* A fine quality of calendered printing-paper.

ivory-paste (ī′vō-ri-pāst), *n.* The material used in making ivory-porcelain, having a peculiar dull luster, due to the depolishing of the vitreous glaze.

ivory-porcelain (ī′vō-ri-pōrs″lān), *n.* In *ceram.*, a fine ware with an ivory-white glaze, manufactured at the Royal Worcester factory, and first shown at the London exhibition of 1862. It is a modification of Parian ware, and is used for similar purposes, but is more decorative because of the glaze.

ivory-shell (ī′vō-ri-shel), *n.* The shell of the gastropods of the genus *Eburna* (which see).

ivory-tree (ī′vō-ri-trē), *n.* A moderately large tree of India, *Balfouria tinctoria* (*Nerium tinctorium* of Roxburgh): so called from the wood, which is beautifully white, hard, and close-grained, resembling ivory and used for turning. The name is also applied to other species of the genus used for the same purpose.

ivorytype (ī′vō-ri-tīp), *n.* [< *ivory*[1] + *type*.] In *photog.*, same as *hellenotype*.

ivory-white (ī′vō-ri-hwīt′), *n.* Ancient creamy-white Chinese porcelain, imitated in Japan and by the modern Chinese.

ivory-yellow (ī′vō-ri-yel′ō), *n.* A very pale and rather cool yellow, almost white, resembling the color of ivory. A rotating color-disk composed of ⅓ white, ⅓ bright chrome-yellow, and ⅓ emerald-green will give what is called *ivory-yellow*. The mixture of chrome-yellow and green in these proportions without the white would appear as a lemon-yellow cooler than gamboge; but the handsomest ivory-yellow is a little whiter.

ivour†, **ivoure**†, *n.* Middle English forms of *ivory*[1].

ivray†, *n.* [< F. *ivraie* (= Pr. *abriaga*, drunkenness) (in allusion to the supposed intoxicating quality of the seeds), < L. *ebriacus*, drunken, < *ebrius*, drunken: see *ebrious*.] The darnel, *Lolium temulentum*.

ivy[1] (ī′vi), *n.*; pl. *ivies* (ī′viz). [Early mod. E. also *ivie*, *ive*; < ME. *ivy*, < AS. *ifig*, ivy; early mod. E. also *iven*, etc. (see *iven*), < AS. *ifegn*, ivy; = OHG. *ebah*, MHG. *ebich*, ivy; also in a deriv. form, OHG. *ebawi*, *ebahewi*, MHG. *ebehöu*, *ephöu*, *epföu*, G. *epheu*, ivy. The G. forms appar. simulate G. *heu*, hay, and are also confused with the forms of *eppich* (OHG. *ephi*, etc.), parsley, in mod. G. also ivy, < L. *apium*, parsley.] An epiphytic climbing plant of the genus *Hedera* (*H. Helix*), of the family *Araliaceæ*, and the type of the tribe *Hederæ*. The leaves are smooth and shining, varying much in form, from oval entire to 3- and 5-lobed; and their perpetual verdure gives the plant a beautiful appearance. The flowers are greenish and inconspicuous, disposed in globose umbels, and are succeeded by deep-green or almost black berries. *H. Helix* (the common ivy) is found throughout almost the whole of Europe, and in many parts of Asia and Africa. It is plentiful in Great Britain, growing in hedges and woods, and on old buildings, rocks, and trunks of trees. A variety called the *Irish ivy* is much cultivated on account of the large size of its foliage and its very rapid growth. The ivy attains a great age, the stem ultimately becoming several inches thick and capable of supporting the weight of the plant. The wood is soft and porous, and when cut into very thin plates is used for filtering liquids. In Switzerland and the south of Europe it is employed for making various useful articles. The ivy has been celebrated from remote antiquity, and was held sacred in some countries, as Greece and Egypt.—**American ivy,** *Parthenocissus quinquefolia*.—**Barren ivy,** a creeping and flowerless variety of ivy.—**Black ivy,** the common ivy, *Hedera Helix*: so called in allusion to its sometimes nearly black berries.—**German ivy,** a species of groundsel, *Senecio mikanioides*.—**Indian ivy,** a plant of the genus *Scindapsus*, family *Araceæ*. It is an East Indian herb, with perforated or pinnately divided leaves and a climbing stem.—**Irish ivy.** See above.—**Japanese ivy,** *Parthenocissus tricuspidata*.—**Kenilworth ivy,** or **Colosseum ivy,** a handsome scrophulariaceous vine, *Cymbalaria Cymbalaria*, used in hanging-baskets, etc. Also called *ivy-leafed toad-flax* and *ivywort*.—**Poison ivy,** the poison-oak, *Rhus toxicodendron*. (See also *ground-ivy*.)

ivywort (ī'vi-wèrt), *n.* 1. Same as *Kenilworth ivy* (which see, under *ivy*[1]).—2. A plant of the ivy family.

iwt, *n.* A Middle English form of *yew*.

iwart, *a.* A Middle English form of *aware*.

iwist, ywist (i-wis′), *adv.* [< ME. (*a*) *iwis, ywis, iwys, ywys* (= MHG. *gewis* = Sw. *visst* = Dan. *vist*), certainly, prop. neut. of the adj. (see below), which is not used as an adj. in ME.; (*b*) *iwisse, ywisse, iwysse* (= D. *gewis* = OHG. *gawisso, giwisso*, MHG. *gewisse*, G. *gewiss*), adv., certainly (cf. also ME. *iwisliche*, < AS. *gewislīce* = D. *gewisselijk* = OHG. **gawislīhho, gwislicho*, MHG. *gewislīche*, G. *gewisslich*, certainly), < AS. *gewis, gewiss* (= D. *gewis, wis* = OHG. *giwis*, MHG. *gewis*, G. *gewiss* = Icel. *vīss* = Sw. *viss* = Dan. *vis*), certain, < *ge-*, a generalizing suffix (see *i-*), + **wis* = Goth. **wis* (for **wiss*) in neg. *unwis*, uncertain, orig. pp. of the pret.-pres. verb represented by AS. *witan*, know: see *wit*, *v.* The word, being commonly written in ME. with the prefix separated, *i wis*, came to be understood as the pronoun *I* with a verb, "*wis*," explained in dictionaries, with reference to *wit*, as 'know,' appar. taken to mean 'think' or 'guess,' but there is no such verb.] Certainly; surely; truly; to wit. This word, very common in Middle English, lost somewhat of its literal force, and became in later use a term of slight emphasis, often meaningless. In the later ballads, and hence archaically in modern use, it is thrown in parenthetically, often as a metrical expletive, and is commonly printed as two words, *I wis*, taken to mean 'I think' or 'I guess.' See the etymology.

Ful sorful was his hert *iwis*. *Metr. Homilies*, p. 88.

And soe fast he smote at John Steward,

I wis, in all the senate
There was no heart so bold.
Macaulay, Horatius.

iwist, ywist, *n.* [ME. (= MHG. *gewis*), certainty; < *gewis*, adv. (orig. adj.): see *iwis, adv.*] Certainty: used in the adverbial phrases *mid iwisse*, or *to iwisse*, for certain, certainly.

Thou art suete *myd ywisse*.
Spec. of Lyric Poems (ed. Wright), p. 57.

He gan hire for to kesse
Wel ofte *mid ywisse*.
King Horn (E. E. T. S.), l. 432.

iwislichet, *adv.* See *iwis*.

iwitt, *v.* See *wit*.

iwitnesset, *n.* See *witness*.

Ixia (ik'si-ạ), *n.* [NL., so called with ref. to the clammy juice, < Gr. *ἰξός* = L. *viscus*, birdlime, mistletoe: see *viscus, viscous*.] A genus of South African plants, of the family *Iridaceæ*, type of the tribe *Ixieæ*. They have narrow sword-shaped leaves, and slender simple or branched stems, bearing spikes of large, showy, variously colored flowers. The beauty and elegance of the flowers give them a high place among ornamental plants. The blackberry-lily, formerly called *Ixia (Pardanthus) Chinensis*, is *Belamcanda Chinensis*.

ixia-lily (ik'si-ạ-lil″i), *n.* A plant of the genus *Ixiolirion*.

Ixieæ (ik-sī'ē-ē), *n. pl.* [NL., < *Ixia* + *-eæ*.] A tribe of plants of the family *Iridaceæ*, typified by the genus *Ixia*, and characterized by their coated bulbs and numerous sessile 1-flowered spathes, the flower being 2-bracted and sessile within the spathe. As restricted by Pax the tribe embraces only 6 genera, all South African.

Ixiolirion (ik″si-ō-lir'i-on), *n.* [NL., < *Ixia*, q. v., + Gr. *λείριον*, a lily: see *lily*.] A small genus of monocotyledonous plants of the family *Amaryllidaceæ*, tribe *Amaryllideæ*, having tunicate bulbs, simple erect stems, and irregular umbels of pretty blue or violet flowers with a 6-parted funnel-shaped perianth. Only two species are admitted by Engler and Prantl, natives of central and western Asia. The plants are called *ixia-lilies*.

ixiolite (ik'si-ō-līt), *n.* [< Gr. 'Ιξίων, Ixion, a mythical king of Thessaly, bound, for his crimes, to an ever-revolving wheel in Tartarus (where also Tantalus was tortured: see *tantalite*), + *λίθος*, a stone.] In *mineral.*, a kind of tantalite from Kimito in Finland.

Ixodes (ik-sō'dēz), *n.* [< Gr. *ἰξώδης*, like birdlime, sticky, < *ἰξός*, bird-lime (see *Ixia*), + *εἶδος*, form.] The typical and largest genus of *Ixodidæ*, founded by Latreille in 1796, embracing eyeless species best known as ticks. They are flat in the normal state, but swell up when distended with blood, becoming more or less globular. They adhere very firmly to the skin of man and beast, requiring some force to pull them away, but if undisturbed drop off upon repletion. *I. ricinus*, the cosmopolitan dog-tick, is a characteristic example. One of the best-known in the United States is *I. (Dermacentor) electus*, the white-spotted tick. See cut under *Acarida*.

Ixodidæ (ik-sod'i-dē), *n. pl.* [< *Ixodes* + *-idæ*.] A family of tracheate *Acarida*, typified by the genus *Ixodes*, and comprising all those mites which are properly called ticks. The skin is tough and leathery, and in the female capable of great distention. The rostrum and mandibles are fitted for sucking, and the tarsi have two claws and a sucking-disk. In their early stages the *Ixodidæ* are herbivorous and not parasitic; but the adults fasten themselves to various animals and suck blood. There are about 12 genera, and the species are numerous.

ixolyte (ik'sō-līt), *n.* [< Gr. *ἰξός*, bird-lime (see *Ixia*), + *λύειν*, dissolve.] A mineral resin of a greasy luster found in bituminous coal, which becomes soft and tenacious when heated. Also *ixolyte*.

Ixonantheæ (ik-sō-nan'thē-ē), *n. pl.* [NL. (Endlicher, 1850), < *Ixonanthes* + *-eæ*.] A tribe of plants of the family *Linaceæ*, typified by the genus *Ixonanthes*, having the petals contorted and persistent, and the capsules septicidally dehiscent.

Ixonanthes (ik-sō-nan'thēz), *n.* [NL. (Jack, 1820), irreg. < Gr. *ἰξός*, bird-lime, mistletoe (see *Ixia*), + *ἄνθος*, flower.] A small genus of smooth trees, of the family *Linaceæ*, type of the tribe *Ixonantheæ*, having the petals 10 to 20 in number and perigynous, and the fruit often with false partitions. They have alternate, coriaceous, entire or remotely crenate or serrate leaves, and small flowers in usually axillary dichotomous cymes. The six or eight species known are natives of tropical Asia.

Ixora (ik'sō-rạ), *n.* [NL. (Linnæus), < *Iswara* (< Skt. *īçvara*, master, lord, prince, < √ *īç*, own, be master; cf. AS. *āgan*, E. *owe*), given as the name of a Malabar deity to whom the flowers are offered.] 1. A genus of plants of the family *Rubiaceæ*, type of the tribe *Ixoreæ*. It consists of tropical shrubs or small trees, chiefly of the old world, numbering about 100 species. The flowers have the corolla salver-shaped, contorted, the stamens exserted; and they are disposed in trichotomously branching corymbs. The leaves are coriaceous and evergreen. Many species are cultivated for the elegance, and in some cases fragrance, of their flowers. Several species have a medicinal use. Certain species, very hard-wooded, are called *iron-tree*. *I. ferrea* of the West Indies is called *hardwood-tree* or (with other species) *wild jasmine*. It is also called *hackia* (which see). Two extinct species have been discovered in the Tertiary deposits of Europe, and three other closely allied forms from a bed of the same age on the island of Labuan, off the coast of Borneo, have been described under the name *Ixorophyllum*.

2. [*l. c.*] A plant of this genus.

Ixoreæ (ik-sō'rē-ē), *n. pl.* [NL. (Bentham and Hooker, 1873), < *Ixora* + *-eæ*.] A tribe of plants of the family *Rubiaceæ*, of which the genus *Ixora* is the type, and to which the coffee-plant belongs. It includes 14 genera, natives of the tropics of both hemispheres. The plants of this tribe are trees or shrubs with entire stipules, and are chiefly distinguished from those of other tribes by having the lobes of the corolla twisted instead of imbricated or valvate in the bud.

ixtle (iks'tl), *n.* Same as *istle*.

Iyar (ē'är), *n.* [Heb.] The second month of the sacred year among the Jews, and the eighth of the civil year, beginning with the new moon of April. Also called *Zif*.

iyent, *n.* A Middle English plural of *eye*[1].

Iyngidæ (ī-in'ji-dē), *n. pl.* [NL., < *Iynx* (*Iyng-*) + *-idæ*.] The wrynecks as a family of birds distinct from *Picidæ*. Also written *Iungidæ, Jyngidæ, Jungidæ, Yungidæ*.

Iynginæ (ī-in-jī'nē), *n. pl.* [NL., < *Iynx* (*Iyng-*) + *-inæ*.] A subfamily of *Picidæ*, represented by the genus *Iynx*, related to the woodpeckers, but having the tail of 12 soft rounded rectrices (the outer pair of which are extremely short and entirely concealed), the first primary spurious, the bill acute, the tongue extensile, and the pattern of coloration intricately blended; the wrynecks. There are about four species, inhabiting Europe, Asia, and especially Africa. Also written *Iunginæ, Jynginæ, Junginæ, Yunginæ*.

Iynx (ī'ingks), *n.* [NL., < L. *iynx*, < Gr. *ἰυγξ*, the wryneck, so called from its cry, < *ἰύζειν*, cry out, shout, yell, < *ἰύ*, an exclamation of surprise; cf. *ἰοί, ἰοΰ*, a cry of distress, *ἰώ*, a cry of delight: see *io*.] A genus of *Picidæ*, the wrynecks. See cut under *wryneck*. Also written *Yunx*.

izar (iz'ạr), *n.* [Also *izzar, izor*; < Ar. *izār*.] 1. A garment worn by Moslems. (*a*) An outer garment worn by Moslem women. It is of cotton, and is long enough to reach the ground when drawn over the head; it then covers the whole person, except in front, where the veil hangs down; and it can be drawn together in front, covering the veil itself except at the face. (See *burka*.) In Syria it is the common outdoor garment. (*b*) One of the two cloths forming the ihram or pilgrim's dress. It is tied around the loins, and hangs down over the thighs as far as the knees or beyond them. Compare *rida*.

2. [*cap.*] A very yellow star, of magnitude 2.6, on the right thigh of Boötes in the waist-cloth, called by the astronomers *ε* Boötæ. See cut under *Boötes*.

izard, izzard[2] (iz'ärd), *n.* [< F. *isard*, an izard.] The wild goat of the Pyrenees; an ibex.

He [the izzard-hunter] told them of all the curious habits of the *izzard*; and among others that of its using its hooked horns to let itself down from the cliffs—a fancy which is equally in vogue among the chamois hunters of the Alps. *Mayne Reid*, Bruin, xxiii.

-ize. [Also *-ise*; = F. *-iser* = Sp. Pg. *-isar, -izar* = It. *-izzare*, < LL. ML. *-izare*, < Gr. *-ίζειν*, a common formative of verbs denoting the doing of a particular thing expressed by the noun or adjective to which it is attached, as in *Ἀττικίζειν*, speak or act like the Athenians, Atticize, *Λακωνίζειν*, speak or act like the Spartans, Laconize, *Φιλιππίζειν*, speak or act for Philip, philippize, etc., *ἐλπίζειν*, have hope, < *ἐλπίς*, hope. Some verbs with this suffix, as *βαπτίζειν*, baptize, are practically mere extensions of a simpler form (as *βάπτειν*). To this suffix are ult. due the E. suffixes *-ism* and *-ist*; from the parallel form *-άζειν* come *-asm* and *-ast*.] A suffix of Greek origin, forming, from nouns or adjectives, verbs meaning to be or do the thing denoted by the noun or adjective. It occurs in verbs taken from the Greek, as in *Atticize*, to be, act, or speak like an Athenian, *Laconize*, to be, act, or speak like a Spartan, *philippize*, to act on Philip's side, etc. (also in a few whose radical element is not recognized in English, as *baptize*), and in similar verbs of modern formation, mostly intransitive, but also used transitively, as in *criticize*, to be a critic, *philosophize*, to be a philosopher, etc., *botanize, etymologize, geologize*, etc., to study or apply botany, etymology, geology, etc. It is also used causally, as in *civilize*, make civil. It is very common in verbs denoting to do or affect in a particular way something indicated by the noun to which it is attached, this being often a person's name, referring to some method or invention, as *bowdlerize*, to expurgate in Bowdler's fashion, *grangerize*, to treat (books) after the example set by Granger, *macadamize*, to make a road after McAdam's method, *burnettize*, to impregnate with Burnett's liquid, etc. In this use it is applicable to any process associated with the name of a particular person or thing, being often used for the nonce for humorous effect, or confined to special trade use. It is sometimes attached without addition of force to verbs already transitive, as in *jeopardize*, for *jeopard*, or where the noun may properly be used as a verb, as in *alphabetize*, for *alphabet* (verb). In spelling, usage in Great Britain favors *-ise* in some verbs, as *civilise*, but usage there makes most new formations in *-ize*, which is the regular American spelling in nearly all cases. Verbs in *-ize* are or may be accompanied by nouns of action in *-ization*, as *civilize, civilization*. Such verbs, especially those taken from the Greek, as *Atticize, Laconize*, may have a noun of action or state in *-ism*, as *Atticism* and *Laconism*, and a noun of agent in *-ist*, as *Atticist* (see *-ism* and *-ist*). The termination *-ize* as a variant of *-ise*[1] in nouns, as in *merchandize*, is obsolete; as a variant of *-ise*[2] equivalent to *-ish*[2], as in *advertise, divertise*, it is obsolete or treated as *-ize* above.

iztli (iz'tli), *n.* [Nahuatl *itztli*.] In Mexico and former Mexican territory, a knife or cutting-implement of any sort made of a flake of obsidian.

izzar (iz'ạr), *n.* See *izar*.

izzard[1] (iz'ärd), *n.* [Also *izzart, uzzard*, also *izzet, uzzit, ezod*, etc., forms, with altered stress, of *ezed*' (used in Sc.), < ME. **izede*, < OF. **izede*, later *ézed* = Languedoc *izéto* (Abbé de S[auvages], "Dict. languedocien-français," 1756, p. 491) = Prov. *izèdo* = Cat. *idzeta* = Sicilian *'nzeta*, < LL. ML. **izēta*, **idzēta*, a popular form, with initial *i-* developed before the original diphone *z* = *dz*, of L. *zēta*, > It. *zeta* = OF. *zede*, > E. *zed*: see *zed, zeta, Z*.] A name of the letter *Z*.

As crooked as an *izzart*, deformed in person, perverse in disposition. *Whitby*, Glossary (ed. Robinson). (*E. D. S.*)

From A to izzard, from one end of the alphabet, and hence of a period or series of any kind, to the other; all through.

izzard[2], *n.* See *izard*.

★ **1.** The tenth letter in the English alphabet. The character is only another form of *i*, the two forms having been formerly used indifferently, or *j* preferred when final or affording a terminal flourish (as in writing the numerals, iiij, etc.: see 2). The differentiation in use was established about the year 1630. In Latin, for example, *i* was written where we write both *i* and *j*—*e. g.*, *iuris* instead of *juris*—and had now the vowel-value of *i* (see *I*), and now the consonant-value of *y* (see *Y*), being pronounced as *y* where we now write and pronounce *j*. The only quasi-English word in which we now give it such a value is *hallelujah* (better written *halleluiah*); elsewhere, *j* is written only where the original *y*-sound has been thickened into the compound *dzh*, the sonant counterpart of the *ch*-sound, and identical with what we call the soft sound of *g* (see *G*); and, with a consistency very rare in English orthography, it has always (with the exception mentioned above) this value and this only. It occurs chiefly in words of Latin descent, being found only exceptionally, as a late variant of *ch* (Anglo-Saxon *c*), in words of Anglo-Saxon descent (see *jar*[1], *jar*[2], *jowl*). Owing to the equivalence in Latin of *i* and *j*, words beginning with these letters (as those beginning with *u* and *v*) respectively have, notwithstanding their great difference in pronunciation, only within a short time been separated in dictionaries. They are not separated in Bailey (1721–1755 and later), nor in Johnson (1755), nor in Todd's revision of Johnson (1818), nor in Nares's Glossary (1822; ed. Halliwell and Wright, 1859).

2. (*a*) As a numeral, a variant form of I: used chiefly at the end of a series of numerals, and now only in medical prescriptions: as, *vj* (six); *viij* (eight).

Also ther was a grett Vesell of Sylver, And it had at every ende rounde rymys gylte and it was *iiij* cornarde.
Torkington, Diarie of Eng. Travell, p. 13.

(*b*) In *math.*, *j* stands for the second unit vector or other unit of a multiple algebra. *J* usually denotes the Jacobian. (*c*) In *thermodynamics*, *J* is the mechanical equivalent of heat (being the initial of Joule).—**J function.** See *function*.

jaal-goat (jā′al-gōt), *n.* [Also *jael-goat*; < *jaal*, an African name, + *goat*.] The Abyssinian ibex, *Capra nubiana*, a wild goat found in the mountains of Abyssinia, Upper Egypt, and elsewhere.

jab (jab), *v. t.*; pret. and pp. *jabbed*, ppr. *jabbing*. [A dial., orig. Sc., form of *job*, in same sense: see *job*[1].] 1. To strike with the end or point of something; thrust the end of something against or into; poke.

The Missouri stoker pulls and *jabs* his plutonic monster as an irate driver would regulate his mule.
Putnam's Mag., Sept., 1868.

2. To strike with the end or point of; thrust: as, to *jab* a stick against a person; to *jab* a cane into or through a picture. [Scotch, and ★colloq. U. S.]

jab (jab), *n.* [= *job*[1], *n.*; from the verb.] A stroke with the point or end of something; a thrust. [Scotch, and colloq. U. S.]

"O yes, I have," I cried, starting up and giving the fire a *jab* with the poker. *C. D. Warner*, Backlog Studies, p. 279.

jabber (jab′ėr), *v.* [Early mod. E. *jaber*, also *jabble*, *jabil*, assibilated form of *gabber* and *gabble*, freq. of *gab*[1]: see *gab*[1], *gabber*, *gabble*, *gibber*[1].] **I.** *intrans.* To talk rapidly, indistinctly, imperfectly, or nonsensically; utter gibberish; chatter; prate.

We dined like emperors, and *jabbered* in several languages. *Macaulay*, in Trevelyan, I. 213.

II. *trans.* To utter rapidly or indistinctly.

He told me, he did not know what travelling was good for but to teach a man to ride the great horse, to *jabber* French, and to talk against passive obedience.
Addison, Tory Foxhunter.

jabber (jab′ėr), *n.* [< *jabber*, *v.*] Rapid talk with indistinct utterance of words; chattering.

There are so many thousands, even in this country, who only differ from their brother brutes in Houyhnhnmland because they use a sort of *jabber*, and do not go naked.
Swift, Gulliver's Travels, Gulliver to his Cousin Sympson.

jabberer (jab′ėr-ėr), *n.* One who jabbers.

Both parties join'd to do their best . . .
T' out-cant the Babylonian labourers
At all their dialects of *jabberers*.
S. Butler, Hudibras, III. ii. 152.

jabbering-crow (jab′ėr-ing-krō), *n.* The common crow of Jamaica, *Corvus jamaicensis*. It is a small species, closely related to the fish-crow (*C. ossifragus*) of the United States.

jabberingly (jab′ėr-ing-li), *adv.* In a jabbering manner.

jabberment (jab′ėr-ment), *n.* [< *jabber* + *-ment*.] The act of jabbering; idle or nonsensical talk. [Rare.]

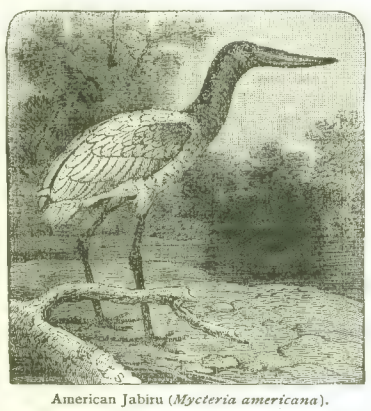
We are come to his farewell, which is to be a concluding taste of his *jabberment* in the law. *Milton*, Colasterion.

jabbernowl†, *n.* Same as *jobbernoll*.

jabble[1]† (jab′l), *v. i.* [Early mod. E. *jabil* (for **jabel*); an assibilated form of *gabble*, as *jabber* is of *gabber*.] To jabber; gabble.

To *iabil*, multum loqui.
Levins, Manip. Vocab. (E. E. T. S.), p. 126.

jabble[2] (jab′l), *v. t.*; pret. and pp. *jabbled*, ppr. *jabbling*. [Also *jable*; prob. freq. of a form represented by *jaup*: see *jaup*, *v.*, 2.] To splash, as water; cause to splash, as a liquid. [Scotch.]



jabble[2] (jab′l), *n.* [< *jabble*[2], *v.*] A slight agitation on the surface of a liquid; small irregular waves running in all directions. [Scotch.]

The steamer jumped, and the black buoys were dancing in the *jabble*. *R. L. Stevenson*, Silverado Squatters, p. 12.

jabelt, *n.* A variant of *javel*[1]. [Prov. Eng.]

What, thu *jabell*, canst not have do?
Thu and thi cumpany shall not depart
Tyll of our distavys ye have take part.
Candlemas Day, 1512 (Hawkins, Eng. Drama, I. 18).

★**jabiru** (jab′i-rō), *n.* [Tupi *jabirú*.] A large stork-like bird, *Mycteria americana*. The jabiru and the maguari are the only American representatives of the subfamily *Ciconiinæ*. The jabiru inhabits tropical and subtropical America, occasionally north to Texas. The plumage is entirely white; the bill, legs, and bare skin of the neck are black, with a red collar around the lower part of

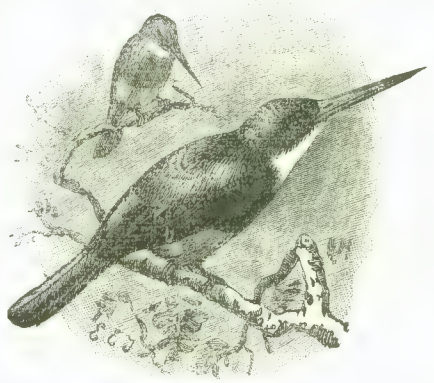
American Jabiru (*Mycteria americana*).

the neck. The wing is 2 feet long; the bill is a foot long, extremely thick at the base, and somewhat recurved at the tip. See *Mycteria*.

Jablochkoff candle. See *electric candle*, under *candle*.

jaborandi (jab-ō-ran′di), *n.* [Tupi *jaburandí*.] A drug obtained in Brazil from *Pilocarpus pennatifolius* and several allied plants. The leaves and bark furnish an agreeable, prompt, and powerful sudorific and sialogogue, with some diuretic effect, and it has become the leading drug of its class. The name is also locally applied to several other plants and drugs having similar properties—for example, some species of *Piper* and *Bacopa*, and several genera of *Rutaceæ*, the family to which *Pilocarpus* belongs. Also *jamborandi*.

jaborine (jab′ō-rin), *n.* [< *jabor*(*andi*) + *-ine*[2].] An alkaloid ($C_{22}H_{32}N_2O_4$) extracted from the leaves of jaborandi, and also derivable from pilocarpine. Its physiological effects are said to resemble those of atropin.



Jaborosa (jab-ō-rō′sä), *n.* [NL. (Jussieu), said to be < Ar. *jaborose*, a name of allied plants.] A Mexican and South American genus of the family *Solanaceæ*, containing about 8 species of herbs, having flowers with long funnelform, acutely lobed corolla, and leaves toothed, or variously pinnately dissected. *J. runcinata* is employed by South American natives to excite amorous pas-
★sion.

jabot (zha-bō′), *n.* [F.] A frilling or ruffle worn by men at the bosom of the shirt in the eighteenth century; also, a frill of lace, or some soft material, arranged down the front of a woman's bodice.

They wore men's shirts, with ruffles and *jabots*; their hair was clubbed, and their whips were long and formidable.
Fortnightly Rev., N. S., XLII. 290.

She is debited with une paire de mari. Fortunately, however, for the Comtesse's good repute, the "pair of husbands" turn out to be a double *jabot*, or projecting bosom frill of lace. *Fortnightly Rev.*, N. S., XLII. 287.

jacamar (jak′a-mär), *n.* [Tupi *jacamá-ciri*.] Any South American bird of the family *Galbulidæ*. In general aspect the jacamars resemble the bee-eaters of the old world, and have to a considerable extent the habits of the arboreal and insectivorous kingfishers.

Jacamar (*Galbula viridis*).

They nest in holes, and lay white eggs. The plumage in most cases is brilliant, and as a rule the bill is long, slender, and sharp; the feet are very weak, with the toes in pairs (in one genus there are but three toes).

Jacamaralcyon (jak′a-ma-ral′si-on), *n.* [NL. (Lesson, 1831), < *jacamar* + *alcyon*.] A genus of jacamars with three toes; the only three-toed genus of *Galbulidæ*. There is but one species, *J. tridactyla* of Brazil, 7½ inches long, slaty-black with a bronze tint, with white belly, black bill, and brown-streaked head.

Jacamarops (ja-kam′a-rops), *n.* [NL. (Lesson, 1831, but used as a F. vernacular name by Cuvier, 1829), < *jacamar* + Gr. ὄψ, eye.] A genus of *Galbulidæ*, consisting of the great jacamars. They are of large size, with a long curved bill dilated at the base and with ridged culmen, a graduated tail of 12 rectrices, and very short feathered tarsi. There is but one species, *J. grandis*, a native of tropical America, 11 inches long, golden-green in color, with rufous under parts and a white throat.

jacana (ja-ka-nä′), *n.* [Pg. *jaçaná*, < Tupi *jasaná*, *jassanam*.] 1. A bird of the genus *Parra* or *Jacana*, as *P. jacana*; any bird of the family *Parridæ* or *Jacanidæ*. There are several

Mexican Jacana (*Parra gymnostoma*).

genera and species, of both the old and the new world. These remarkable birds resemble plovers and rails, but are most nearly related to the former. In the typical American forms the tail is short, and the legs and toes are long, with enormous straight claws which enable the birds to run easily over the floating leaves of aquatic plants. There is a horny spur on the bend of the wing, and a naked frontal leaf and wattles at the base of the bill. *Parra gymnostoma* is the Mexican jacana, which is also found in the United States. The pheasant-tailed jacana of India, *Hydrophasianus chirurgus*, has no frontal or rictal lobes, and has a very long tail like a pheasant. The Indo-African jacanas belong to the genus *Metopodius;* that of the East Indies is *Hydralector cristatus.*

2. [*cap.*] [NL.] A genus of jacanas, the same as *Parra*, lately made the name-giving genus of *Jacanidæ*. *Brisson*, 1760. Also written *Iacana.*

Jacanidæ (ja-kan'i-dē), *n. pl.* [NL., < *Jacana* + *-idæ*.] A family of grallatorial aquatic birds of the order *Limicolæ*, named from the genus *Jacana;* the jacanas. They are birds of the warmer parts of both hemispheres, represented by the genera *Jacana* (or *Parra*), *Metopodius*, *Hydralector*, and *Hydrophasianus*. In technical characters they are charadriomorphic, though they are ralliform in external aspect. The skull is schizognathous and schizorhinal, with basipterygoid processes and emarginate vomer, but no supra-orbital impressions. A metacarpal spur is present in all these birds, and in some of them the radius is peculiarly expanded. The family is more frequently called *Parridæ*.

Jacaranda (jak-a-ran'dä), *n.* [NL. (A. L. Jussien, 1789); Tupi *jacarandá*.] A genus of plants of the family *Bignoniaceæ*, type of the tribe *Jacarandeæ*. It contains about 30 species of tall trees of elegant habit, native in tropical America. It is separated from kindred genera by its panicled flowers with short campanulate calyx, its short pod with flat, transparently winged seeds, and its twice, or sometimes once, pinnate leaves. The Brazilian *J. mimosifolia*, *J. Braziliana*, and *J. obtusifolia* furnish a beautiful and fragrant palisander-wood, bluish-red with blackish veins, sometimes, in common with numerous other timbers, called *rosewood*. (See *rosewood*.) As a popular name *jacaranda* is not confined strictly to this genus, but applies to various trees having similar wood. Three fossil species are described, from the Lower Tertiary of Italy and Tyrol.

Jacarandeæ (jak-a-ran'dē-ē), *n. pl.* [NL. (Bentham and Hooker, 1876), < *Jacaranda* + *-eæ*.] A tribe of *Bignoniaceæ*, embracing the genus *Jacaranda* and four others. The ovary is 1-celled or becomes so, with parietal placentæ and a 2-valved pod. They are mostly trees or shrubs, all native to tropical America except the genus *Tripinna*, which belongs mainly to Madagascar.

jacare (jak-a-rā'), *n.* [Pg. *jacaré*, < Tupi *jacaré*.] 1. A South American alligator; a cayman. Several species or varieties are described, such as the Orinoco or black jacare, *Jacare nigra.*

2. [*cap.*] [NL.] A genus of South American alligators. *J. E. Gray*, 1862.

jacatoo†, *n.* [Appar. an error for **cacatoo:* see *cockatoo*.] A cockatoo.

A rarely colour'd *jacatoo*, or prodigious huge parrot.
Evelyn, Diary, July 11, 1654.

jaca-tree (jak'a-trē), *n.* [Pg. *jaca*, < Malayalam *chakka*, the fruit: see *jack*[3], *jack-tree*.] Same as *jack*, *jack-tree*.

jacchus (jak'us), *n.* [NL.] 1. A small squirrel-like monkey of South America, a kind of marmoset, *Hapale jacchus*.—2. [*cap.*] A genus of marmosets: same as *Hapale*. Also *Iacchus*. See *Mididæ*.

jacconet, *n.* See *jaconet*.

jacent (jā'sent), *a.* [= Sp. *yacente* = Pg. *jacente*, < L. *jacen(t-)s*, ppr. of *jacēre*, lie, be prostrate, < *jacĕre*, throw, cast: see *jet*[1], *jactation*, *jaculate*, etc. Cf. *adjacent*, *circumjacent*, etc.] Lying at length; prostrate. [Rare.]

Because so laid, they [brick or squared stones] are more apt, in swagging down, to pierce with their points than in the *jacent* posture, and so to crevice the wall.
Sir H. Wotton, Reliquiæ, p. 20.

jacinth (jā'sinth), *n.* [Accommodated in term. to orig. *hyacinth;* formerly *jacint*, *iacint;* < ME. *jacint*, *jacynte*, *jacynct*, < OF. *jacinthe* = Pr. *jacint* = Sp. *jacinto* = Pg. *jacintho* = It. *jacento*, *giacinto*, < L. *hyacinthus*, < Gr. *ὑάκινθος*, hyacinth: see *hyacinth*.] Same as *hyacinth*.

jacitara-palm (jas-i-tar'ä-päm), *n.* [< S. Amer. *jacitara* + E. *palm*[2].] The plant *Desmoncus macroacanthus*. See *Desmoncus*.

jack[1] (jak), *n.* [< ME. *Jacke*, *Jake*, *Jak*, as a personal name, and familiarly, like mod. *Jack*, dial. *Jock*, as a general appellative; < OF. *Jaque*, *Jaques* (AF. also *Jake*, *Jaikes*), later *Jacques*, mod. F. *Jacques*, a very common personal name, James, Jacob, = Sp. *Jago* (formerly written *Iago*), also *Diego* = Pg. *Diogo*, these being reduced forms of the name, which appears also, in semblance nearer the LL., as E. *Jacob* = F. *Jacobe* = Sp. *Jacobo* = It. *Giacobo*, *Giacobbe*, *Jacopo*, and, with altered term. (*b* to *m*), It. *Giacomo*, *Jachimo* = Sp. contr. *Jaime* = Pg. *Jayme* = OF. *Jakemes*, contr. *Jaime*, *Jams*, *James*, > rare ME. *James*, *Jamys*, early mod. E. *Jeames* (> dim. *Jem*, *Jim*), now *James;* AS. *Iacob* = D. G. Dan. Icel., etc., *Jakob;* < LL. *Jacōbus*, < Gr. *Ἰάκωβος*, < Heb. *Ya'aqōb*, Jacob, lit. 'one who takes by the heel,' a supplanter, < *'āqab*, take by the heel, supplant (see Gen. xxv. 26, xxvii. 36). The name *Jack* is thus a doublet of *Jake* (still used as a conscious abbr. of *Jacob*, and occasionally in the same general sense as *Jack*, as in *country jake*, applied in the U. S. to a rustic), as well as of *James*, all being reduced forms of *Jacob;* but on passing into E. *Jack* came to be regarded as a familiar synonym or dim. of *John* (ME. *Jan*, *Jon*, etc., dim. *Jankin*, *Jenkin*, etc.), and is now so accepted. The F. name *Jacques*, being extremely common, came to be used as a general term for a man, particularly a young man, of common or menial condition; so E. *Jack*, and its synonym *John*, which is similarly used, in its various forms, in other languages. From this use of *Jack*, as equiv. to 'lad, boy, servant' (cf. *jock*, *jockey*), has arisen its mod. E. use as a purely common noun, alone or in comp., applied to various contrivances which do the work of a common servant or are subjected to rough usage. Cf. *billy*[2], *jemmy*[1], *jimmy*[1], *betty*, etc., likewise from familiar personal names, *jemmy* or *jimmy* being ult. identical with *jack*.] 1. [*cap.*] An abbreviation or diminutive of the name *Jacob*, now regarded as a nickname or diminutive of the name *John*.

For sweet *Jack* Falstaff, . . . banish not him thy Harry's company. *Shak.*, 1 Hen. IV., iii. 4, 522.

2. A young man; a fellow: used with *jill*, a young woman, both being commonly treated as proper names.

And aryse up soft & stylle,
And iangvle nether with *Iak* ne Iylle.
Babees Book (E. E. T. S.), p. 22.

That every man should take his own,
In your waking shall be shown:
Jack shall have Jill;
Nought shall go ill.
Shak., M. N. D., iii. 2, 461.

3†. [*cap.* or *l. c.*] A saucy or impertinent fellow; an upstart; a coxcomb; a jackanapes; a sham gentleman: as, *jack* lord, *jack* gentleman, *jack* meddler, and similar combinations.

Since every *Jack* became a gentleman,
There's many a gentle person made a *Jack*.
Shak., Rich. III., i. 3, 72.

Marc. What men are these i' th' house?
Tap. A company of quarrelling *Jacks*, an' please you;
They say they have been soldiers, and fall out
About their valours.
Beau. and Fl. (?), Faithful Friends, i. 2.

4. [*cap.*] A familiar term of address used among sailors, soldiers, laborers, etc.; hence, in popular use (commonly *Jack Tar*), a sailor.

For says he, do you mind me, let storms e'er so oft
Take the top-sails of sailors aback,
There's a sweet little cherub that sits up aloft,
To keep watch for the life of poor *Jack*.
C. Dibdin, Poor Jack.

5. Same as *jack in the water* (which see, below).—6. [*l. c.* or *cap.*] A figure which strikes the bell in clocks: also called *jack of the clock* or *clock-house:* as, the two *jacks* of St. Dunstan's.

I stand fooling here, his *Jack o' the clock*.
Shak., Rich. II., v. 5, 60.

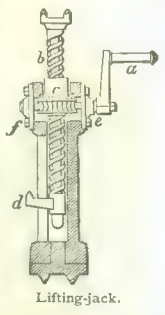
This is the night, nine the hour, and I the *jack* that gives warning. *Middleton*, Blurt, Master-Constable, i. 2.

The *jack of the clock-house*, often mentioned by the writers of the sixteenth century, was . . . an automaton, that either struck the hours upon the bell in their proper rotation, or signified by its gestures that the clock was about to strike. *Strutt*, Sports and Pastimes, p. 244.

7. Any one of the knaves in a pack of playing-cards.

"He calls the knaves *Jacks*, this boy," said Estella with disdain, before our first game was out.
Dickens, Great Expectations, viii.

8. The male of certain animals; specifically, a male ass; especially, an ass kept for getting mules from mares; a jackass. [In this sense it is much used attributively or in composition, signifying 'male': as, *jackass*, *jack*-ape.]



9. A name of several different fishes. (*a*) A pike, as *Esox lucius* or a related species; especially, a small pike, or pickerel. Also *jack-fish*.

I desire you to accept of a *Jack*, which is the best I have caught this season. *Addison*, Sir Roger and Will. Wimble.

A *Jack* or pickerel becomes a pike at 2 feet (Walton) and 2 lb. or 3 lb. weight. Some see no distinction, calling all pike; others fix the limit in different ways.
Day, Brit. Fishes, II. 140.

(*b*) A percoid fish, *Stizostedion vitreum*, the pike-perch. (*c*) A scorpænoid fish, *Sebastodes paucispinis*, better known as *boccaccio*. (*d*) One of several carangoid fishes, especially *Carangus chrysos*, also called *buffalo-jack*, *hickory-jack*, and *jack-fish;* also, *Seriola carolinensis*. (*e*) The pampano, *Trachinotus carolinus*.

10. (*a*) The jackdaw, *Corvus monedula*. (*b*) The jack-curlew, *Numenius hudsonius*. (*c*) A kind of pigeon; a jacobin.—11. One of various convenient implements or mechanical contrivances obviating the need of an assistant: used alone or compounded with some other word designating the special purpose of the implement or some other distinguishing circumstance: as, a pegging-*jack;* a shackle-*jack*, or thill-*jack*. Specifically—(*a*) A bootjack. (*b*) A contrivance for raising great weights by force exerted from below. A section of the usual form of this machine is given in the annexed figure. By turning the handle *a*, the screw *b*, the upper end of which is brought into contact with the mass to be raised, is made to ascend. This is effected by means of an endless screw working into the worm-wheel *c*, which forms the nut of the screw. On the lower end of the screw is fixed the claw *d*, passing through a groove in the stock; this claw serves at once to prevent the screw *b* from turning and to raise bodies which lie near the ground. The axis of the endless screw is supported by two malleable iron plates *e f*, bolted to the upper side of the wooden stock or framework in which the whole is inclosed. Also called *jack-screw*, and specifically *lifting-jack*. (*c*) In *cookery*, a roasting-jack; a smoke-jack.

Lifting-jack.

We looked at his wooden *jack* in his chimney that goes with the smoake, which is indeed very pretty.
Pepys, Diary, I. 116.

(*d*) A rock-lever or oscillating lever. Such levers are used in stocking-frames, in knitting-machines, and in other machinery. Their function is the actuation of other moving parts to produce specific results at proper periods. (*e*) In *spinning*, a bobbin and frame operating on the sliver from the carding-machine and passing the product to the roving-machine. (*f*) In *weaving*, same as *heck-box*. (*g*) In the harpsichord, clavichord, pianoforte, and similar instruments, an upright piece of wood at the inner or rear end of each key or digital, designed to bring the motion of the latter to bear upon the string. In the harpsichord and spinet the jack carries a quill or spine by which the string is twanged; in the clavichord it terminates in a metal tangent by which the string is pressed; and in the pianoforte it merely transmits the motion of the key to the hammer.

How oft when thou, my music, music play'st, . . .
Do I envy those *jacks* that nimble leap
To kiss the tender inward of thy hand!
Shak., Sonnets, cxxviii.

(*h*) A wooden frame on which wood is sawed; a sawbuck or sawhorse. (*i*) In *mining:* (1) A wooden wedge used to split rocks after blasting; a gad. (2) A kind of water-engine, turned by hand, for use in mines. *Halliwell*. (*j*) A portable cresset or fire-pan used for hunting or fishing at night. Also called *jack-lamp*, *jack-lantern*, *jack-light*. (*k*) A tin case in which the safety-lamp is carried by coal-miners in places where the current of air is very strong. [North. Eng.] (*l*) In *teleg.* and *teleph.*, a terminal consisting of a spring-clip, by means of which instruments can be expeditiously introduced into the circuit. In telephones such terminals are sometimes used at exchanges for allowing the lines of different subscribers to be quickly connected. The connection is made by means of a wire cord on the ends of which are metallic wedges covered on one side with insulating material. These wedges, called *jack-knives* or simply *jacks*, are inserted into the terminals of the lines to be connected. Also called *spring-jack*.

12. A pitcher, formerly of waxed leather, afterward of tin or other metal; a black-jack.

Small *jacks* we have in many ale houses tipped with silver, besides the great *jacks* and bombards of the court.
J. Heywood, Philocothonista (1635).

Body of me, I'm dry still; give me the *jack*, boy;
This wooden skilt holds nothing.
Fletcher (*and others*), Bloody Brother, ii. 2.

13. A half-pint; also, a quarter of a pint. [Prov. Eng.]—14. In the game of bowls, an odd bowl thrown out for a mark to the players.

Was there ever man had such luck! when I kissed [that is, when my bowl touched] the *jack*, upon an upcast to be hit away! I had a hundred pound on't.
Shak., Cymbeline, iii. 1, 2.

15. A flag showing the union only: used by those nations whose national standard contains a union, as Great Britain and the United States. The British jack is a combination in red, white, and blue of the crosses of St. George, St. Andrew, and St. Patrick, and dates from 1801. In the United States naval service the jack is a blue flag with a white five-pointed star for each State in the Union. It is hoisted on a jack-staff at the bowsprit-cap when in port, and is also used as a signal for a pilot when shown at the fore. See *union jack*, under *union*.

In a paper dated Friday, Jan. 14, 1652, "By the commissioners for ordering and managing ye affairs of the Admiralty and Navy," ordering what flag shall be worn by flag-officers, it is ordered, "all the shipps to wear *jacks* as formerly." *Preble*, Hist. of the Flag, p. 151.

16. A horizontal bar or crosstree of iron at the topgallantmast-head, to spread the royal-shrouds. Also called *jack-crosstree*.

Though I could handle the brig's fore royal easily, I found my hands full with this, especially as there were no *jacks* to the ship, everything being for neatness, and nothing left for Jack to hold on by but his "eyelids."
R. H. Dana, Jr., Before the Mast, p. 210.

17. A kind of schooner-rigged vessel of from 10 to 25 tons, used in the Newfoundland fisheries. A jack is generally full and clumsy, with no overhang to the counter, and carries a mainsail, foresail, and jib, sometimes also a small mainstaysail.

18. [*cap.*] A Jacobite. [Cant.] In the quotation it is used with a punning reference to the flag. See def. 15.

> With every wind he sail'd, and well cou'd tack,
> Had many pendents, but abhorr'd a *Jack*.
> *Swift*, Elegy on Judge Boat.

19†. A farthing. [Eng. slang.] — **20.** A card-counter. [Eng. slang.]

The "card-counters," or, as I have heard them sometimes called by street-sellers, the "small coins," are now of a very limited sale. The slang name for these articles is *Jacks* and "Half-Jacks."
Mayhew, London Labour and London Poor, I. 389.

21. A misprint for *jark*. [The words in several of the phrases below are very commonly joined by hyphens, as in the quotations.] — **Buffalo-jack,** the carangoid fish *Caranx pisquetos*. — **Builders' jack,** a temporary staging put in a window; a bracket or seat used in cleaning, painting, or repairing a window. Also called *window-jack*. — **California jack,** a game of cards resembling all-fours. After six cards have been dealt to each player, and the trump determined, the undealt cards are placed in a pack on the table face up, so that one card is exposed. Then the winner of each trick takes the top card into his hand, and the other players in order each one of the following cards. Every player thus continues to hold six cards until the deck is exhausted. Jack and low count each for the player who takes it. The game is esteemed one of the best for two players. — **Cheap Jack.** See *cheap*. — **Cornish jack,** the chough or Cornish crow, *Pyrrhocorax graculus*. — **Every man Jack,** every one without exception. [Slang.]

> Sir Pitt had numbered *every man Jack* of them.
> *Thackeray*, Vanity Fair, viii.

> Send them [the children] all to bed; *every man Jack* of them!
> *C. Reade*, Peg Woffington, viii.

Five-fingered jack. See *five-fingered*. — **Goggle-eyed jack.** See *goggle-eyed*. — **Great jack,** a large bottle for liquor: same as *bombard*, 4. — **Hickory-jack.** (*a*) Same as *jack*[1], 9 (*d*). (*b*) The hickory-shad, *Pomolobus mediocris*. — **Hydraulic jack.** See *hydraulic*. — **Jack at a pinch.** (*a*) A person who is employed or selected for some purpose as a necessity, or for want of a better; one who serves merely as a stopgap: sometimes used as an adverbial compound. Hence — (*b*) A poor itinerant clergyman who has no cure, but officiates for a fee in any church when required. [Prov. Eng.] — **Jack in office,** an upstart official; a public officer who gives himself airs. — **Jack in the green,** a boy dressed with green garlands, or inclosed in a framework of leaves, for the May-day sports and dances. Also *Jack-a-green*. [Eng.] — **Jack in the water,** a man who makes himself useful about wharves and docks, in landing passengers, etc., and in doing odd jobs. Also called *jack*. [Eng. slang.] — **Jack o' Bedlam.** See *Bedlam*. — **Jack of all trades,** a person who can turn his hand to any kind of work or business: often implying that he is not thoroughly expert in any one thing, as expressed in the proverb, "*Jack of all trades*, master of none." — **Jack of Dover†,** a dish of some kind.

> Many a *jakke of Dovere* hastow sold,
> That hath been twies hot and twies cold.
> *Chaucer*, Prol. to Cook's Tale, l. 23.

[It is sometimes explained as the fish called sole, and sometimes as a dish warmed up a second time.] — **Jack of straw.** Same as *jackstraw*, 1.

> I hate him,
> And would be married sooner to a monkey,
> Or to a *Jack of Straw*, than such a juggler.
> *Fletcher*, Wildgoose Chase, iii. 1.

Jack of the clock. See def. 6. — **Jack of the dust,** a man on board a United States man-of-war appointed to assist the paymaster's yeoman in serving out provisions and other stores. — **Jack on both sides†,** a man who sides first with one party and then with another.

> Reader, John Newter, who erst plaid
> The *Jack on both sides*, here is laid.
> *Wits' Recreations* (1654).

Jack out of doors†, a houseless person; a vagrant.

Neque pessimus neque primus: not altogether *Jack out of doores*, and yet no gentleman.
Withals, Dict. (ed. 1634), p. 569.

Jack out of office, a discharged official.

For liberalitie, who was wont to be a principall officer, . . . is tourned *Jacke out of office*, and others appointed to have the custodie.
Riche his Farewell to Militarie Profession, 1581. (*Nares.*)

Jack's land, in old English manors and village communities, odds and ends of land in open fields, lying between the allotments to tenants. — **Jack Tar.** See def. 4. — **Round jack,** in *hat-making*, a stand for holding a hat while the brim is trimmed to shape. — **To draw the jacks,** in *weaving*. See *draw*. — **Union jack.** See *union*. — **Yellow Jack,** yellow fever. [Slang.]

> *T. Roosevelt*, Hunting Trips, p. 168.

jack[2] (jak), *n.* [< ME. *jacke, jakke, jak*, a jack, = OD. *jakke*, D. *jak* = Sw. *jacka* = Dan. *jakke* = G. *jacke*, a jacket, jerkin, < OF. *jaque, jacque, jacq, jaique, jacke*, dial. (Norm.) *jake* = Sp. *jaco* = It. *giaco*, formerly *giacco*, a jack or coat of mail. Origin obscure; perhaps, like *jack*[1] in other material senses, ult. < OF. *Jaque, Jacques*, a personal name: see *jack*[1]. Dim. *jacket*, q. v.] A coat of fence of cheap make worn by foot-soldiers, yeomen, and the like. The word is used indiscriminately for the brigandine, gambeson, and scale-coat, and is, in short, applied to any defensive garment made of two folds of leather or linen with something between them. (*Burges and de Cosson.*) Also, a leather garment upon which rings, etc., were sewed to form a coat of fence. Compare *lorica*, 2.

Jack. (From Viollet-le-Duc's "Dict. du Mobilier français.")

> But with the trusty bow,
> And *jacks* well quilted with soft wool, they came to Troy.
> *Chapman*, Iliad, iii.

Sw. *schakal* = D. *jakhals*) = Sp. *chacal* = Pg. *chacal, jacal* = Turk. *chaqāl*, < Ar. *jaqāl* (usually *wāwi* or *ibn āwi*), < Pers. *shaghāl*, a jackal; cf. Skt. *çṛigāla*, a jackal, a fox.] **1.** A kind of wild dog somewhat resembling a fox, which inhabits Asia and Africa; one of several species of old-world fox-like *Canidæ*, of the genus *Canis*, as *C. aureus* of Asia, or *C. anthus* of Africa. The jackals are of gregarious habits, hunting in packs, rarely attacking the larger quadrupeds, lurking during the day, and coming out at night with dismal cries. They feed on the remnants of the lion's prey, dead carcasses, and the smaller animals and poultry. The jackal interbreeds with the common dog, and may be domesticated. The wild jackal emits a highly offensive odor. From the popular but erroneous notion that the jackal hunts up the prey for the king of beasts, he has been called the "lion's provider."

Black-backed Jackal (*Canis mesomelas*).

> The Inhabitants do nightly house their goats and sheep for fear of the *Jaccals*.
> *Sandys*, Travailes, p. 160.

> [Curzola] is one of the few spots in Europe where the *jackal* still lingers.
> *E. A. Freeman*, Venice, p. 204.

Jack-a-Lent (jak'a-lent), *n.* See *Jack-o'-Lent*.

jackals-kost (jak'âlz-kôst), *n.* [S. African D. *jakhalskost*, 'jackal food.'] A plant, *Hydnora Africana*, of the family *Hydnoraceæ*. It bears, half-buried in the earth, a single large flower, sessile upon the root-stock and having a thick fungus-like perianth. It is parasitic upon the roots of succulent euphorbias and similar plants. It occurs, with other species, in South ★Africa, where it is said to be eaten by the natives.

jackanapes (jak'ạ-nāps), *n.* [Also *jack-a-napes, Jack a napes, jack napes*, etc., in many forms, also *jackanape*, etc., as an assumed singular; late ME. *Jack Napis, Jack Napys, Jac Napes*, found as a nickname; orig., as the sense and later forms indicate, *Jack a Napes*, that is, 'Jack of Naples,' a popular name for a performing monkey, such as were imported from Italy. The word has nothing to do with *ape*.] **1†.** A monkey; an ape.

> With signes and profers, with noddyng, beckyng, and mowyng, as it were *Jack-an-apes*.
> *Tyndale*, Works, p. 132.

> If I might buffet for my love, or bound my horse for her favours, I could lay on like a butcher, and sit like a *jack-an-apes*, never off.
> *Shak.*, Hen. V., v. 2, 148.

jack-boot (jak′bōt), *n.* [< *jack*[2] + *boot*[2].] A kind of large boot reaching up over the knee, and serving as defensive armor for the leg, introduced in the seventeenth century; now, a similar boot reaching above the knee, worn by fishermen and others. The jack-boots of postilions, and those worn by mounted soldiers and even officers of rank, were of exaggerated weight and solidity throughout the seventeenth century and until late in the eighteenth. It was difficult to walk in them.

Jack-boot, time of James II.

Then I cast loose my buff-coat, each holster let fall,
Shook off both my *jack-boots*, let go belt and all.
Browning, How they Brought the Good [News from Ghent to Aix.

About this time [1680] . . . *jack-boots* resembling those that had formed a part of the military appointments of the troopers in the civil war came into fashion.
Encyc. Brit., VI. 474.

jacket (jak′et), *n.* [< OF. *jaquette*, f., *jaquet*, *jacquet*, m. (= Sp. *jaqueta* = It. *giacchetta*), a jacket, dim. of *jaque*, > E. *jack*[2], q. v.] **1**†. A light jack: a garment having but slight value as a defense against weapons.—**2.** A short coat or body-garment; any garment for the body coming not lower than the hips. Jackets for boys throughout the first half of the nineteenth century came only to the waist, whether buttoned up or left open in front, and a similar garment is still worn by men in certain trades or occupations. Short outer garments designed for protection from the weather and worn by men of rough occupations are called by this name: as, a monkey-*jacket*. Compare *zouave-jacket*, *smoking-jacket*.

All in a woodmans *jacket* he was clad,
Of Lincolne greene, belayd with silver lace.
Spenser, F. Q., VI. ii. 5.

Their [sheriffs'] officers were clothed in *jackets* of worsted, or say party-coloured, but differing from those belonging to the mayor, and from each other.
Stow, quoted in Strutt's Sports and Pastimes, p. 465.

3. A waistcoat or vest. [Local, U. S.]—**4.** Something designed to be fastened about or cover the body for some other purpose than that of clothing: as, a strait-*jacket*, or a swimming-*jacket*.—**5.** Clothing or covering placed around a cylindrical or other vessel of any kind, as a pipe, a cannon, a steam-boiler, a smoke-stack where it passes through the deck, etc., to give greater power of resistance, to prevent escape of heat by radiation, etc. Felt, wool, mineral-wool, paper, wood lagging, asbestos, and many other materials are in common use for jacketing steam-cylinders and -pipes, and pipes, tanks, etc., in which it is desirable to prevent freezing. Air-compressor cylinders are usually supplied with water-jackets for cooling the cylinders, which would otherwise become very hot from heat absorbed from the air, the work of compression being converted into heat in the compressed air, which thus acquires a high temperature. These cylinders are inclosed in metal shells which leave an annular space between them and the cylinder, and through this space cool water is kept constantly flowing by the aid of a pump or other device. When a steam-cylinder is thus inclosed, and the annular space is supplied with live steam, the arrangement is called a *steam-jacket*. The condensation which would otherwise occur in the cylinder during the periods of induction and expansion is thus prevented, and a considerable economy is effected. See cut under *air-engine*.

As regards construction and contour, they [Krupp guns] are built upon the model adopted in 1873; the tube, without reinforce, is encircled by a single band or *jacket* (Mantel, in German), shrunk on, and carrying trunnions and fermature.
Michaelis, tr. of Monthaye's Krupp and De Bange, p. 24.

6. A folded paper or open envelop containing an official document, on which is indorsed an order or other direction respecting the disposition to be made of the document, memoranda respecting its contents, dates of reception and transmission, etc. [U. jaco, *n.* See *jacko*.

jacob (jā'kọb), *n.* [A particular use of the personal name *Jacob*, < LL. *Jacobus*, < Gr. Ἰάκωβος, Jacob: see *jack*[1].] The starling, *Sturnus vulgaris*. [Local, Eng.]

jacobæa (jak-ọ-bē'ą), *n.* [NL., < LL. *Jacobus*, Jacob, James, with ref. to St. James, either because the plant was used for the diseases of horses, of which the saint was the patron, or because it blossoms near his day.] A common name of *Senecio Jacobæa*, or ragwort.—**Purple jacobæa**, the *Senecio elegans*, or purple ragwort, from the Cape of Good Hope.

jacobæa-lily (jak-ọ-bē'ą-lil'i), *n.* A plant of the *Amaryllidaceæ* (*Sprekelia formosissima*). The leaves are from the bulb only, which sends up a scape bearing a single large blossom, whose deep-red perianth is somewhat 2-lipped, its three upper divisions being curved upward, while the three lower are twisted about the lower part of the stamens and style. It is native in Mexico, and cultivated elsewhere.

Jacobean Architecture.
Bramshill House, Hants, England.

Jacobean, Jacobæan (jak-ọ̄'bē-ąn, jak-ọ-bē'ąn), *a.* [< LL. *Jacobæus*, < *Jacobus*, Jacob, James: see *jacobus*, *jack*[1].] Pertaining or relating to a person named Jacobus, Jacob, or James, specifically to James I., King of England, 1603–25 (who was also James VI. of Scotland from 1567), or to his times; also, in occasional use, to James II., King of England (1685–88, died 1701): as (with reference to the former), *Jacobean* architecture or literature. Jacobean architecture differed from the Elizabethan chiefly in having a greater admixture of debased Italian forms.

> The *Jacobean* and Civil War poetry is prolific in love ditties, war songs, pastorals, allegories, religious poetry. *Edinburgh Rev.*, CLXIII. 473.

> Their [Wykeham's and Waynflete's] successors have the sense to turn away from Ruskinesque and *Jacobæan* vagaries, and to build in plain English still. *Contemporary Rev.*, LI. 610.

Jacobian[1] (ja-kō'bi-ąn), *a.* [< LL. *Jacobus*, Jacob, James, + *-i-an*.] Same as *Jacobean*.

Jacobian[2] (ja-kō'bi-ąn), *a.* and *n.* [< *Jacobi* (see def.) + *-an*.] **I.** *a.* Pertaining to or named after K. G. J. Jacobi (1804–51), professor of mathematics at Königsberg in Prussia.—**Jacobian ellipsoid of equilibrium**, a heavy rotating fluid ellipsoid in equilibrium although having three unequal axes.—**Jacobian function.** See *function*.—**Jacobian system of differential equations**, a complete system of the form

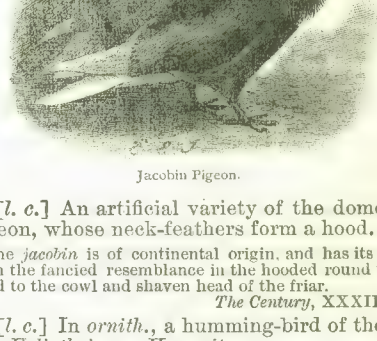
$$\frac{\delta\phi}{\delta x_h} + \sum_k X_k^h \frac{\delta\phi}{\delta x_k} = 0$$

$(h = 1, 2, \ldots, m;\ k = m+1, \ldots, m+n)$.

II. *n.* A functional determinant whose several constituents in any one row are first differential coefficients of one function, while its several constituents in any one column are first differential coefficients relatively to one variable. The vanishing of the Jacobian signifies that the functions are not independent. It is indicated by the letter *J*.

> Such [functional] determinants are now more usually known as *Jacobians*, a designation introduced by Professor Sylvester, who largely developed their properties, and gave numerous applications of them in higher algebra, as also in curves and surfaces. *Encyc. Brit.*, XIII. 31.

Jacobin (jak'ọ̄-bin), *n.* and *a.* [In first sense ME. *Jacobin*, < OF. *Jacobin*; in later senses < F. *Jacobin* = Sp. Pg. *Jacobino*, < ML. *Jacobinus*, < LL. *Jacobus*, Jacob, James: see *jack*[1].] **I.** *n.* **1.** In France, a black or Dominican friar: so called from the church of St. Jacques (Jacobus), in which they were first established in Paris. See *Dominican*.



> Now frere menour, now *jacobyn*. *Rom. of the Rose*, l. 6338.

2. A member of a club or society of French revolutionists organized in 1789 under the name of Society of Friends of the Constitution, and called Jacobins from the Jacobin convent in Paris in which they met. The club originally included many of the moderate leaders of the revolution, but the more violent members speedily gained the control. It had branches in all parts of France, and was all-powerful in determining the course of government, especially after Robespierre became its leader, supporting him in the measures which led to the reign of terror. Many of its members were executed with Robespierre in July, 1794, and the club was suppressed in November.

> Itinerant revolutionary tribunals, composed of trusty *Jacobins*, were to move from department to department; and the guillotine was to travel in their train. *Macaulay*, Barère.

Hence—**3.** A violently radical politician; one who favors extreme measures in behalf of popular government; a radical democrat: formerly much used, often inappropriately, as a term of reproach in English and American politics.

> There are two varieties of *Jacobin*, the hysterical *Jacobin* and the pedantic *Jacobin*; we possess both, and both are dangerous. *M. Arnold*, Nineteenth Century, XIX. 654.

Jacobin Pigeon.

4. [*l. c.*] An artificial variety of the domestic pigeon, whose neck-feathers form a hood.

> The *jacobin* is of continental origin, and has its name from the fancied resemblance in the hooded round white head to the cowl and shaven head of the friar. *The Century*, XXXII. 106.

5. [*l. c.*] In *ornith.*, a humming-bird of the genus *Heliothrix*, as *H. auritus*.

II. *a.* Same as *Jacobinic*.

> They must know that France is formidable, not only as she is France, but as she is *Jacobin* France. *Burke*, A Regicide Peace.

> Giles in return derided Harper as a turn-coat, who, though now so ready to fight France, was once a member of a *Jacobin* society, and in 1791 and 1792 a declaimer for the rights of man. *Schouler*, Hist. U. S., I. 385.

Jacobinia (jak-ọ̄-bin'i-ą), *n.* [NL. (Stefano Moricand, about 1846), < *Jacobin*.] A genus containing about twenty species of shrubs and herbs belonging to the family *Acanthaceæ*, native in tropical America, frequently cultivated for ornament. The corolla has an elongated tube, with the lips long and narrow, the lower 3-cleft. The flowers are large, variously colored, yellow, red, orange, or rose-purple, and usually disposed in dense terminal clusters or in axillary fascicles. The leaves are opposite and entire.

Jacobinic (jak-ọ̄-bin'ik), *a.* [= Sp. *Jacobínico*; < *Jacobin* + *-ic*.] Of, pertaining to, or resembling the Jacobins of France; turbulent; discontented with government; radically democratic; revolutionary. Also *Jacobin*, *Jacobinical*.

Jacobinical (jak-ọ̄-bin'i-kąl), *a.* [< *Jacobinic* + *-al*.] Same as *Jacobinic*.

> They arose from her [Austria's] own ill policy, which dismantled all her towns, and discontented all her subjects by *jacobinical* innovations. *Burke*, Policy of the Allies.

> The triumph of *Jacobinical* principles was now complete. *Scott*, Napoleon.

Jacobinically (jak-ọ̄-bin'i-kąl-i), *adv.* As a Jacobin, or as the Jacobins.

Jacobinism (jak'ọ̄-bin-izm), *n.* [< F. *Jacobinisme* = Sp. *Jacobinismo*; as *Jacobin* + *-ism*.] The principles of the Jacobins; unreasonable or violent opposition to orderly government.

> For my part, without doubt or hesitation, I look upon *jacobinism* as the most dreadful and most shameful evil which ever afflicted mankind. *Burke*, Conduct of the Minority.

> But it is precisely this idea of divinely-appointed, all-pervading obligation, as the paramount law of life, that contemporary *Jacobinism* holds in the greatest abhorrence, and burns to destroy. *Fortnightly Rev.*, N. S., XXXIX. 47.

Jacobinize (jak'ọ̄-bin-īz), *v. t.*; pret. and pp. *Jacobinized*, ppr. *Jacobinizing*. [< *Jacobin* + *-ize*.] To taint with Jacobinism.

> I think no country can be aggrandized whilst France is *jacobinized*. *Burke*, Policy of the Allies.

Jacobinly (jak'ọ̄-bin-li), *adv.* In the manner of Jacobins. *Imp. Dict.*

Jacobi's equation, unit, etc. See *equation*, etc.

Jacobite (jak'ọ̄-bīt), *n.* and *a.* [= F. *Jacobite* = Sp. Pg. *Jacobita*, < ML. *Jacobita*, < LL. *Jacobus*, < Gr. Ἰάκωβος, Jacob, James: see *jack*[1].] **I.** *n.* **1.** In *Eng. hist.*, a partizan or adherent of James II. after he abdicated the throne, or of his descendants. The Jacobites engaged in fruitless rebellions in 1715 and 1745, in behalf of James Francis Edward and of Charles Edward, son and grandson of James II., called the Old and the Young Pretender respectively.

> "An old Forty-five man, of course?" said Fairford. "Ye may swear that," replied the Provost—"as black a *Jacobite* as the auld leaven can make him." *Scott*, Redgauntlet, ch. iii.

2. *Eccles.*, one of a sect of Christians in Syria, Mesopotamia, etc., originally an offshoot of the Monophysites. The sect has its name from Jacobus Baradæus, a Syrian, consecrated bishop of Edessa about 541. The head of the church is called the patriarch of Antioch.

> Thei maken here *Confessioun* right as the *Jacobytes* don. *Mandeville*, Travels, p. 121.

II. *a.* **1.** Of or pertaining to the partizans of James II. or his descendants; holding the principles of a Jacobite.

> The *Jacobite* enthusiasm of the eighteenth century, particularly during the rebellion of 1745, afforded a theme, perhaps the finest that could be selected, for fictitious composition, founded upon real or probable incident. *Scott*, Redgauntlet, Int.

2. Of or pertaining to the sect of Jacobites.

> In Abyssinia, *Jacobite* Christianity is still the prevailing religion. *E. W. Lane*, Modern Egyptians, II. 313.

> In the 6th century the *Jacobite* revival of the Eutychian heresy divided the Western Syriac alphabet into two branches, a northern and a southern. *Isaac Taylor*, The Alphabet, I. 294.

Jacobitic (jak-ọ̄-bit'ik), *a.* [< *Jacobite* + *-ic*.] Relating to the British Jacobites.

Jacobitical (jak-ọ̄-bit'i-kąl), *a.* [< *Jacobitic* + *-al*.] Same as *Jacobitic*.

Jacobitically (jak-ọ̄-bit'i-kąl-i), *adv.* In a manner or spirit resembling that of the Jacobites of Great Britain.

Jacobitism (jak'ọ̄-bit-izm), *n.* [< *Jacobite* + *-ism*.] The principles of the British Jacobites, or of the sect of Jacobites.

> The spirit of *jacobitism* is not only gone, but it will appear to be gone in such a manner as to leave no room to apprehend its return. *Bolingbroke*, Remarks on Hist. Eng.

> All fear of the Stuarts having vanished from men's minds, the Whigs no longer found it answer to accuse their opponents of *Jacobitism*. *Quarterly Rev.*, CLXIII. 234.

Jacob's-chariot (jā'kọb-char'i-ọt), *n.* The common monk's-hood, *Aconitum Napellus*. [Prov. Eng.]

jacobsite (jā'kọb-zīt), *n.* [< *Jakobs(berg)* (see def.) + *-ite*[2].] An oxid of manganese and iron related to magnetite and belonging to the spinel group, found at Jakobsberg in Sweden.

Jacob's-ladder (jā'kọbz-lad'ėr), *n.* [In allusion to the ladder seen by the patriarch Jacob in a dream (Gen. xxviii. 12).] **1.** *Naut.*, a rope lad-

der with wooden steps or spokes by which to go aloft. Also called *jack-ladder*.—**2.** A common garden-plant of the genus *Polemonium*, the *P. cæruleum*, belonging to the family *Polemoniaceæ*: so called from the ladder-like arrangement of its leaves and leaflets. It is a favorite cottage-garden plant, and is found in temperate and northern latitudes in most parts of the world. It grows tall and erect, about 1½ feet high, with alternate pinnate, smooth, bright-green leaves, and terminal corymbs of handsome blue (sometimes white) flowers. The name is sometimes locally applied to several other plants.

Jacob's-ladder (*Polemonium cæruleum*).
1, rootstock and lower part of stem; 2, upper part of stem with flowers; *a*, half of a flower, from within; *b*, fruit.

3. A toy in which pieces of cardboard, wood, glass, or other material are so connected, one above another, with strings or tapes, that when the highest one is inverted those below it invert themselves in succession.

Jacobson's nerve. See *nerve*.

Jacob's-rod (jā′kŏbz-rod′), *n.* A name of the plant *Asphodeline lutea*. [Prov. Eng.]

Jacob's-staff (jā′kŏbz-stȧf′), *n.* [So called in allusion to the staff of the patriarch Jacob (Gen. xxxii. 10).] **1.** A pilgrim's staff.

> As he had traveild many a sommers day
> Through boyling sands of Arabie and Ynde,
> And in his hand a *Jacobs staffe*, to stay
> His weary limbs upon. *Spenser*, F. Q., I. vi. 35.

2. A staff concealing a dagger.—**3.** A support for a surveyor's compass, consisting of a single leg, instead of the tripod ordinarily used. This leg is made of suitable wood, shod at one end with a steel point to be stuck in the ground, and having at the other end a brass head with a ball-and-socket joint and axis above. The advantages of the Jacob's-staff are superior lightness and portability; the disadvantages, that it cannot be used on rocks or frozen ground or on pavements. **4.** A cross-staff. The cross-staff was for a long time a most important instrument for navigators, by whom, however, it does not appear ever to have been called a "Jacob's-staff"; but it was so designated by the Germans (*Jakob's Stab*), and also in English by some landsmen and poets, as shown by the annexed quotations. See *quadrant*.

> Who, having known both of the land and sky
> More than fam'd Archimide, or Ptolomy,
> Would further press, and like a palmer went,
> With *Jacobs staff*, beyond the firmament.
> *Wits' Recreations*, 1654. (*Nares.*)

> Why on a sign no painter draws
> The full-moon ever, but the half?
> Resolve that with your *Jacob's staff*.
> *S. Butler*, Hudibras, II. iii. 780.

5. The group of three stars in a straight line in the belt of Orion, also called the *ell-and-yard*, *our Lady's wand*, etc. The leader of the three is *δ* Orionis, a very white variable star.—**6.** *Verbascum Thapsus*, the common mullen. [Prov. Eng.]

Jacob's stone. See *stone*.

Jacob's-sword (jā′kŏbz-sōrd′), *n.* *Iris Pseudacorus*, the yellow iris. [Prov. Eng.]

jacobus (ja-kō′bus), *n.* [< LL. (NL.) *Jacobus*, < Gr. Ἰάκωβος, Jacob, James: see *jack*[1], *Jacobin*.] A gold coin of James I. of England: same as *broad*, 3. See cut under *broad*.

> You have quickly learnt to count your hundred *jacobusses* in English. *Milton*, Def. of the People of Eng., vii.

jacoby (jak′ō-bi), *n.* The purple jacobæa.

jacolatt†, *n.* Chocolate.

> At the entertainement of the Morocco Ambassador at the Dutchesse of Portsmouth. . . . [the Moores] dranke a little milk and water, but not a drop of wine; they also dranke of a sorbet and *jacolatt*.
> *Evelyn*, Diary, Jan. 24, 1682.

jaconet (jak′ō-net), *n.* [Also written *jaconette*, *jacconet*, with accom. term., < F. *jaconas*, jaconet; origin unknown.] **1.** A thin, soft variety of muslin used for making dresses, neckcloths, etc., but heavier than linen cambric, originally made in India.—**2.** A cotton cloth having a glazed surface on one side, usually dyed.

jacouncet, jagouncet, *n.* [< OF. *jaconce*, *jacunce*, *jagonce*, < L. *hyacinthus*, hyacinth, jacinth: see *jacinth*.] Jacinth, a precious stone; according to others, garnet.

> Rubies there were, saphires, *jagounces* [var. *ragounces*],
> Maters more precious then the ryche *jacounce*,
> Diamounde, or rubye, or balas of the beste.
> *Rom. of the Rose*, l. 1117. *Skelton*, Speke, Parrot, l. 365.

Jacquard loom. See *loom*.

Jacque (jak), *n.* [Abbr. of *Jacqueminot*.] Same as *Jack*[4].

Jacquemontia (jak-wē-mon′ti-ȧ), *n.* [NL. (J. D. Choisy, 1833), named after Victor *Jacquemont*, who traveled in the West Indies early in the 19th century as a naturalist.] A genus of the family *Convolvulaceæ*, containing about 40 species, one African, the rest mainly natives of tropical America. They are herbaceous or slightly shrubby plants, of a twining or sometimes prostrate habit. Their flowers have a bell-shaped corolla, a 2-celled and 4-ovuled ovary, and an undivided style with 2 oblong or ovate, flattened stigmas. Various species are known in cultivation.

Jacquerie (zhak-ė-rē′), *n.* [F., < OF. *jaquerie*, < *Jaque*, *Jacques*, or with addition *Jacques Bonhomme*, 'Goodman Jack,' a nickname for a peasant: see *jack*[1].] In *French hist.*, a revolt of the peasants against the nobles in northern France in 1358, attended by great devastation and slaughter; hence, any insurrection of peasants.

> A revolution the effects of which were to be felt at every fireside in France, . . . a new *Jacquerie*, in which the victory was to remain with Jacques bonhomme.
> *Macaulay*, Mirabeau.

> The emissaries of the National League similarly carry out a sort of *Jacquerie*, in midnight murders, in attacks on women and children, in houghing of cattle, in cropping of horses, and in brutalities which would disgrace the worst brigands. *Edinburgh Rev.*, CLXIII. 461.

Jacquinia (ja-kwin′i-ȧ), *n.* [NL. (Linnæus), named after N. von *Jacquin*, a botanist of Vienna.] A genus of the family *Theophrastaceæ*, containing 5 or 6 species of trees or shrubs, native in tropical America, and cultivated as hothouse plants. The corolla of the flowers is short-salver-shaped or bell-shaped and deeply 5-cleft. It has 5 fertile stamens inserted low down in its tube, and a sterile appendage at each of its sinuses. The thick coriaceous leaves are entire and alternate; the handsome white, yellow, or purplish flowers are disposed in terminal or axillary clusters. *J. Barbasco* is called *barbasco* and *currant-tree*.

jactancy† (jak′tan-si), *n.* [= F. *jactance* = Pr. *jactancia*, *jactansa* = Sp. Pg. *jactancia* = It. *giattanzia*, < L. *jactantia*, a boasting, < *jactan*(*t*-)*s*, pp. of *jactare*, throw, refl. boast: see *jactation*.] A boasting. *Cockeram*.

jactation (jak-tā′shon), *n.* [= F. *jactation* = Pr. *jactacio*, < L. *jactatio*(*n*-), a throwing, agitation, a boasting, < *jactare*, throw, shake, agitate, discuss, utter, refl. boast, brag, freq. of *jacere*, throw, cast: see *jet*[1]. Cf. *jettison*, *jetsam*, ult. a doublet of *jactation*.] **1.** The act or practice of throwing, as missile weapons.

> We find weapons employed in *jactation* which seem unfit for such a purpose. *J. Hewitt.*

2. Agitation of the body from restlessness or for exercise; the exercise of riding in some kind of vehicle.

> Among the Romans there were four things much in use; . . . bathing, fumigation, friction, and *jactation*.
> *Sir W. Temple*, Health and Long Life.

> *Jactations* were used . . . to relieve that intranquillity which attends most diseases, and makes men often impatient of lying still in their beds.
> *Sir W. Temple*, Health and Long Life.

3. Boasting; bragging.

jactator† (jak-tā′tor), *n.* [< L. *jactator*, a boaster, < *jactare*, boast: see *jactation*.] A boaster or bragger. *Bailey*, 1731.

jactitation (jak-ti-tā′shon), *n.* [= F. *jactitation*, < ML. *jactitatio*(*n*-), < L. *jactitare*, bring forward in public, utter (not found in lit. sense), freq. of *jactare*, throw, shake, agitate, discuss, utter, refl. boast, brag: see *jactation*.] **1.** A frequent tossing to and fro, especially of the body, as in great pain or high fever; restlessness.—**2.** Agitation.

> After much dispassionate inquiry and *jactitation* of the argument on both sides—it has been adjudged for the negative. *Sterne*, Tristram Shandy, iv. 29.

3. Vain boasting; bragging; in *canon law*, false boasting; insistence on a wrongful claim, to the annoyance and injury of another.—**4.** In Louisiana, an action to recover damages for slander of title to land, or to obtain confirmation of title by a public recognition of it.—**Jactitation of marriage**, in *common law*, a boasting or giving out by a party that he or she is married to another, whereby a common reputation of their marriage may follow.

jaculable† (jak′ū-la-bl), *a.* [< L. *jaculabilis*, that may be thrown, < *jaculari*, throw: see *jaculate*.] Capable of being or fit to be thrown or darted. *Blount*.

jaculate (jak′ū-lāt), *v. t.*; pret. and pp. *jaculated*, ppr. *jaculating*. [< L. *jaculatus*, pp. of *jaculari* (> Pg. *jacular*), throw (a javelin), hit with a javelin, < *jaculum*, a javelin, dart, neut. of *jaculus*, that is thrown, < *jacere*, throw: see *jactation* and *jet*[1]. Cf. *ejaculate*.] To dart; throw; hurl; launch. [Obsolete or archaic.]

jaculation (jak-ū-lā′shon), *n.* [= F. *jaculation* = Pg. *jaculação*, < L. *jaculatio*(*n*-), < *jaculari*, throw: see *jaculate*.] The action of throwing, darting, hurling, or launching, as weapons. [Obsolete or archaic.]

> So hills amid the air encounter'd hills,
> Hurl'd to and fro with *jaculation* dire.
> *Milton*, P. L., vi. 665.

> It was well and strongly strung with thirty-six barrels of gunpowder, great and small, for the more violent *jaculation*, vibration, and speed of the arrows.
> *Bp. King*, Sermon, Nov. 5, 1608, p. 20.

jaculator (jak′ū-lā-tor), *n.* [= F. *jaculateur*, < L. *jaculator*, one who throws (a javelin), < *jaculari*, throw: see *jaculate*.] **1†.** One who jaculates or darts.—**2.** In *ichth.*, the darter or archer-fish.

Jaculatores (jak″ū-lā-tō′rēz), *n. pl.* [NL., pl. of L. *jaculator*: see *jaculator*.] In Macgillivray's system of ornithology, the darters. See *darter*, 3 (*b*).

jaculatory (jak′ū-lā-tō-ri), *a.* [= F. *jaculatoire* = Sp. Pg. It. *jaculatorio*, < LL. *jaculatorius*, of or for throwing, < *jaculator*, one who throws: see *jaculator*.] **1.** Darting or throwing out suddenly; cast, shot out, or launched suddenly.—**2.** Uttered brokenly or in short sentences; ejaculatory.

> *Jaculatory* prayers are the nearest dispositions to contemplation. *Spiritual Conflict* (1651), p. 81.

jad (jad), *n.* [E. dial., also *jed*, *jud*, *judd*; origin obscure.] **1.** In *coal-mining*, a long gash cut under a mass of coal in "holing," "kirving," "benching," or "undercutting" it, so that it may afterward fall, or be wedged or blasted down.—**2.** In *quarrying*, a long deep hole made in quarrying soft rock for building purposes, whether the gash is horizontal or vertical.

> The jadding pick . . . serves for cutting in long and deep holings, juds, or *jads*, for the purpose of detaching large blocks of stone from their natural beds.
> *Morgans*, Mining Tools, p. 148.

jad (jad), *v. t.*; pret. and pp. *jadded*, ppr. *jadding*. [< *jad*, *n.*] In *coal-mining* and *quarrying*, to undercut; form a jad in.

> When the face of any heading from which the stone is to be worked away has been properly *jadded* under the roof, the side saw-cuts are proceeded with.
> *Morgans*, Mining Tools, p. 153.

jadder (jad′ėr), *n.* [< *jad* + *-er*[1].] A stone-cutter. [Prov. Eng.]

jadding-pick (jad′ing-pik), *n.* [Cf. *jedding-ax*.] In *coal-mining* and *quarrying*, a form of pick with which a jad is cut. The helves range from four to six feet in length, the tools being made in sets, to be used one after another as the depth of the jad increases. The same tool is used, and with the same name, in quarrying the soft freestones of England, as for instance the Bath stone.

jaddis (jad′is), *n.* [E. Ind.] In Ceylon, a priest of the evil genii or devils, officiating in a kind of chapel, called *jacco*, or *devils' house*.

jade[1] (jād), *n.* [The initial consonant is prop. Teut. *j* = *y*, conformed to F. *j*; = E. dial. (North.) *yaud*, Sc. *yade*, *yaud*, *yad*, a mare, an old mare; < ME. *jade* (MS. *Iade*), a jade, < Icel. *jalda* = Sw. dial. *jälda*, a mare.] **1.** A mare, especially an old mare; any old or worn-out horse; a mean or sorry nag.

> Be blithe, although thou ryde vpon a *jade*.
> What though thin horse be bothe foul and lene?
> If he wil serve the, rek not a bene.
> *Chaucer*, Nun's Priest's Tale, Prol., l. 46.

> There is one sect of religious men in Cairo, called Chenesia, which liue vpon horse-flesh: therefore are lame *Iades* bought and set vp a fatting.
> *Purchas*, Pilgrimage, p. 590.

> He was as lean, and as lank, and as sorry a *jade* as Humility herself could have bestrided.
> *Sterne*, Tristram Shandy, i. 10.

> This same philosophy is a good horse in the stable, but an arrant *jade* on a journey.
> *Goldsmith*, Good-natured Man, i. 1.

Hence—**2.** A mean or worthless person, originally applied to either sex, but now only to a woman; a wench; a hussy; a quean: used opprobriously.

> And thus the villaine would the world perswade
> To prowde attemptes that may presume too high,
> But earthly joies will make him prove a *jade*,
> When vertue speakes of loue's diuinity.
> *Breton*, Pilgrimage to Paradise, p. 10.

> She shines the first of battered *jades*. *Swift.*

> There are perverse *jades* that fall to men's lots, with whom it requires more than common proficiency in philosophy to be able to live. *Steele*, Spectator, No. 479.

3. A young woman: used in irony or playfully.

You now and then see some handsome young *jades*.
Addison.

Fie! Nathan! fie! to let an artful *jade*
The close recesses of thine heart invade.
Crabbe, Parish Register.

★ **jade**[1] (jād), *v.*; pret. and pp. *jaded*, ppr. *jading*. [< *jade*[1], *n.* The like-seeming Sp. *jadear*, *ijadear*, pant, palpitate, is quite different, being connected ult. with *jade*[2].] **I.** *trans.* 1†. To treat as a jade; kick or spurn.

The honourable blood of Lancaster
Must not be shed by such a *jaded* groom.
Shak., 2 Hen. VI., iv. 1, 52.

I can but faintly endure the savour of his breath, at my table, that shall thus *jade* me for my courtesies.
B. Jonson, Every Man out of his Humour, iv. 4.

2. To reduce to the condition of a jade; tire out; ride or drive without sparing; overdrive: as, to *jade* a horse.

It is a dull thing to tire, and, as we say now, to *jade* anything too far. *Bacon*, Discourse.

Mark but the King, how pale he looks with fear.
Oh! this same whorson conscience, how it *jades* us!
Beau. and Fl., Philaster, i. 1.

3. To weary or fatigue, in general.

The mind once *jaded* by an attempt above its power is very hardly brought to exert its force again. *Locke.*

Jaded horsemen from the west
At evening to the castle pressed.
Scott, L. of the L., v. 33.

=**Syn.** 2 and 3. *Weary*, *Fatigue*, etc. See *tire*[1], *v. t.*

II. *intrans.* To become weary; fail; give out.

They are promising in the beginning, but they fail and *jade* and tire in the prosecution. *South*, Sermons.

The interest never *jading*.
Capern, Poems, 154. *N. E. D.*

jade[2] (jād), *n.* [Also *jad*, *jadd*; = Sp. *jade* = It. *iada* (1598), < F. *jade* from *le jade* for *l'ejade*, < Sp. *ijada* in *piedra de ijada*, 'colic stone' (cf. *nephrite*): Sp. *piedra*, < L. *petra*, stone; *de*, of; *yjada*, now spelled *ijada*, the side, flank, pain in the side, colic, < L. as if **iliata*, < *ilium*, *ileum*, usually in pl. *ilia*, the flank, the groin: see *ilium*, *iliac*[1].] A tough compact stone, varying from nearly white to pale or dark green in color, much used in prehistoric times for weapons and utensils, and highly prized, especially in the East, for ornamental carvings. Two distinct minerals are included under the name. One of these is *nephrite*, a closely compact variety of hornblende (amphibole), classed with tremolite when nearly white and with actinolite when of a distinct green color; it is fusible with some difficulty, and has a specific gravity of from 2.9 to 3. The other is *jadeite*, which is a silicate of aluminium and sodium, analogous in formula to spodumene; a variety of a dark-green color and containing iron has been called *chloromelanite*. It is more fusible than nephrite, and has a higher specific gravity, viz. 3.3. This is the kind of jade most highly valued. Its translucency and color, varying from a creamy white through different shades of delicate green, give great beauty to the vases and other objects carved from it. The Chinese, who have long made use of jade for rings, bracelets, vases, etc., call it *yu* or *yu-shih* (jade-stone). A variety of jadeite having a pale-green color is called by them *fei ts'ui*, or kingfisher-plumes. The best-known locality from which jade has been obtained is the Kara-Kash valley in eastern Turkestan. Jade implements have been found in considerable numbers among the relics of the Swiss lake-dwellers, but it is generally believed that the material was brought from the East; they are also found in New Zealand, in the islands of the Pacific, in Central America, Alaska, and elsewhere, and the facts of their distribution are of great interest in ethnography. (See cut under *ax*.) The word *jade* is sometimes extended to embrace other minerals of similar characters and hence admitting of like use, as zoisite (saussurite, the jade of De Saussure and *jade tenace* of Haüy), fibrolite, a kind of serpentine, and others. Also called *ax-stone*, and by the Maoris of New Zealand *punamu*.—**Oceanic jade**, a name given by Damour to a fibrous variety of jade found in New Caledonia and in the Marquesas Islands, having a specific gravity of 3.18, and differing from ordinary nephrite in the proportion of lime and magnesia which it contains. *Encyc. Brit.*, XIII. 540.

jadedly (jā'ded-li), *adv.* In a jaded manner; wearily.

Kilgore came and dropped *jadedly* into a chair.
The Money-Makers, p. 282.

jade-green (jād'grēn), *n.* In *decorative art*, especially in ceramics, a grayish-green color thought to resemble that of the superior kinds of jade.

Missouri Republican, 1888.

Jagannatha (jag-a-nä'tä), *n.* [In E. usually in accom. spelling *Juggernaut* (sometimes *Jaggernaut*), repr. Hind. *Jaganāth*, Skt. *Jagannātha*, lit. lord of the world, < Skt. *jagat*, all that moves, men and beasts (< √ *gam*, go, move, = E. *come*, q. v.), + *nātha*, protector, lord, < √ *nāth*, seek aid of, turn with supplication to.] 1. In *Hindu myth.*, a name given to Krishna, the eighth incarnation of Vishnu.—2. A celebrated idol of this deity at Puri in Orissa. It is a rudely carved wooden image, of which the body is red, the face black, and the arms gilt; the mouth is open and red, as if with blood; and the eyes are formed of precious stones. It is covered with rich vestments, and is seated on a throne between two others, representing Bala-Rama, the brother, and Subhadra, the sister of Krishna. The temple at Puri stands in an area containing many other temples, and inclosed by a high stone wall about 650 feet square. The temple is built chiefly of coarse granite resembling sandstone, and appears as a vast mass of masonry surmounted by several towers, the great tower rising to a height of 192 feet. Under the main tower are placed the three idols. Great multitudes of pilgrims come from all quarters of India to pay their devotions at his shrine. On these occasions the idol is mounted on an enormous car—the car of Juggernaut—resting on massive wooden wheels, and drawn by the pilgrims. Formerly many of the people threw themselves under the wheels to be crushed to death, the victims believing that by this fate they would secure immediate conveyance to heaven. The practice is now of very rare occurrence. [In this sense usually *Juggernaut*.]

Jagataic (jag-a-tā'ik), *a.* [< *Jagatai*, the native name of Turkestan (< *Jagatai*, one of the sons of Jenghiz Khan, to whom he left this portion of his empire), + *-ic*.] Pertaining to Turkestan: a term applied to the easternmost dialects of the Turkish group of tongues, spoken by the people of Turkestan.

Jahveh (properly yä-vā'), *n.* See *Jehovah*.

Jahvist (jä'vist, properly yä'vist), *n.* [< *Jahveh* (see *Jehovah*) + *-ist*.] Same as *Jehovist*, 1.

The Hexateuch primarily resolves itself into four great constituents, respectively known as the works of the *Jahvist*, the Elohist, the Deuteronomist, and the Priestly Legislator. *The Academy*, No. 873, p. 60.

Jahvistic (jä-, properly yä-vis'tik), *a.* [< *Jahvist* + *-ic*.] Same as *Jehovistic*.

"Then they began to invoke the name of Jahveh." The importance of this *Jahvistic* text comes especially from its contradiction with the Elohistic text Exodus vi. 2–3.
Nineteenth Century, XIX. 173.

jail (jāl), *n.* [Two series of forms are to be distinguished: (1) E. *jail*, < ME. *jayle, jaile, jayll, jaiole*, < OF. *jaiole, jaole, jeoille, geole, geolle*, F. *geôle;* assibilated form of (2) E. **gail*, repr. by the artificial form *gaol*, formerly also spelled *goal*, used in old law-books and preserved archaically in print, though obsoleto in pronunciation (*gaol*, prop. pron. gāl, being always pron. jāl, which pronunciation belongs only to the spelling *jail*), < ME. *gaile, gayl, gayhol*, < OF. *gaiole, gayolle, gaole, gaolle* (whence the form *gaol* above), a cage, a prison, = Sp. *gayola* = Pg. *gaiola, jaula* = It. *gabbiuola, gabbiola* (also in simple form *gabbia*), a cage, ML. reflex *gabiola* (also in simple form *gabia*), a cage, the prop. L. type being **caveola*, dim. of *cavea*, a hollow, a cavity, a cage, coop: see *cave*[1], *cage*, and *gabion*.] A prison; a building or place for the confinement of persons arrested for crime or for debt; usually, in the United States, a place of confinement for minor offenses in a county.

And for to determytte this mater,
Generydes was brought owt of the *gaile*.
Generydes (E. E. T. S.), l. 1695.

Yet, ere his happie soule to heaven went
Out of this fleshlie *gaole*, he did devise
Unto his heavenlie maker to present
His bodie as a spotles sacrifice.
Spenser, Ruines of Time, l. 296.

Deep in the City's bottom sunk there was
A *Goal*, where Darkness dwelt and Desolation.
J. Beaumont, Psyche, iii. 164.

Frighted, I quit the room; but leave it so
As men from *jails* to execution go.
Pope, Satires of Donne, iv. 273.

She threatens me every Day to arrest me; and proceeds so far as to tell me, that if I do not do her Justice I shall die in a *Jayl*. *Spectator*, No. 295.

Jail liberties, jail limits, bounds prescribed by law encompassing a prison, or the area within such bounds (as, for instance, the city in which the jail is situated), the freedom of which is allowed to certain prisoners for debt, etc., usually on giving bond for the liberties, the bounds being considered, as to such prisoners, merely an extension of the prison-walls. — **To break jail.** See *break*.

jail (jāl), *v. t.* [Formerly also *gaol* and *goal;* < *jail, n.*] To confine in or as if in a jail; imprison.

There likewise was a long statute against vagabonds, wherein two things may be noted: the one, the dislike the Parliament had of *gaoling* of them, as that which was chargeable, pesterous, and of no open example.
Bacon, Hist. Hen. VII., p. 215.

And sith our Bodyes doe but *Jaile* our Minde,
While we haue Bodyes, we can ne'er be free.
Davies, Muse's Sacrifice (1612), p. 81.

Trounce him, *goal* him, and bring him upon his knees, and declare him a reproach and scandal to his profession.
South, Sermons, VI. 52.

jailbird (jāl'bėrd), *n.* [< *jail* + *bird*[1]; a humorous term, orig. perhaps with allusion to the F. sense 'cage' (see *jail*). Cf. *gallows-bird*.] One who has been or is confined in jail; a malefactor.

jail-delivery (jāl'dē-liv″ėr-i), *n.* **1.** The act of disposing judicially of the cases of all accused persons detained in a prison and awaiting trial. — **2.** In *Eng. law*, the short name of the commission issued to judges of assize, directing them to clear a jail by thus trying, and acquitting or condemning, the inmates. Hence — **3.** In England, and also in Delaware (U. S.), the court charged with the trial of ordinary criminal cases. See *assize*, 6. — **4.** The act of setting prisoners loose from a jail; a freeing of imprisoned persons, as by breaking into or out of a jail.

The most daring and successful *jail-delivery* ever perpetrated on the Sound [Puget] occurred last night.
Evening Post (New York), Dec., 1888.

General jail-delivery, a term sometimes used of acquittals in numbers at a time by reason of defects in the law, or lax or reckless administration of it.

The operation of the old law is so savage, and so inconvenient to society, that for a long time past, once in every parliament, and lately twice, the legislature has been obliged to make a *general* arbitrary *jail-delivery*, and at once to set open, by its sovereign authority, all the prisons in England. *Burke*, Speech at Bristol.

jailer (jā'lėr), *n.* [Two series of forms, as with *jail:* (1) E. *jailer* (sometimes spelled *jailor*), < ME. *jayler, jaylier*, < OF. *jaioleor, geolier, jaulier*, F. *geôlier*, < *geole*, etc., a jail; (2) E. **gailer*, repr. by the artificial form *gaoler* (see *jail*), < ME. *gailer, gayler, gaylere*, < OF. *gaioleor, gaiolier* (ML. reflex *gaolarius*), a jailer, < *gaiole*, etc., jail: see *jail, n.*] **1.** The keeper of a jail or prison.

The scheref fond the *jaylier* ded.
Robin Hood and the Monk (Child's Ballads, V. 13).

Life is the *jailor*, Death the angel sent
To draw the unwilling bolts and set us free.
Lowell, Death of a Friend's Child.

2. In *coal-mining*, a small tub or box in which water is carried in a mine. [Somersetshire, Eng.]

jaileress (jā'lėr-es), *n.* [Formerly also *gaoleress;* < *jailer* + *-ess*.] A female jailer.

My saucy *gaoleress* assured me that all my oppositions would not signify that pinch of snuff.
Richardson, Clarissa Harlowe, ii. 72.

jail-house (jāl'hous), *n.* A jail.

jail-keeper (jāl'kē″pėr), *n.* One who keeps a jail; a jailer.

Jain (jīn), *n.* and *a.* [Hind. *Jain*, Hindi *Jaina*, < Skt. *jaina*, a Jain, prop. adj., < *jina*, lit. 'overcomer,' < √ *ji*, overcome.] **I.** *n.* A member of a non-Brahminical sect in India, the doctrinal system of which corresponds in many essential points with Buddhism. The sect seems, according to their own scriptures, to have originated with one Pārswanātha about 700 B. C., but became fully established about 200 years later under Vardhamāna (or Jnātaputra, in Pāli Nātaputta), one of six noted false teachers (according to Buddhistic writings) contemporary with Gautama, the Buddha. The Jains are divided into two classes or parties, the *Swetambaras*, or 'white-robed ones,' and the *Digambaras*, or 'sky-clad (or naked) ones.' The Jains deny the divine origin and infallible authority of the Vedas. They believe in the eternity of the universe both of matter and of mind, and hold that time proceeds in two eternally recurring cycles of immense duration, defying all human calculation — the "ascending" cycle, in which the age and stature of men increase, and the "descending" cycle, in which they decrease. Their moral code agrees with that of the Buddhists, and consists of five prohibitions against killing, lying, stealing, adultery, and worldly-mindedness, and of five duties, viz.: mercy to animated beings, almsgiving, veneration for the sages while living and the worship of their images when deceased, confession of faults, and religious fasting. The Jains are found in various parts of India, but especially on the west coast, and are remarkable for their wealth and influence.

II. *a.* Of or pertaining to the Jains or to their creed. — **Jain architecture,** a chief style of Indian architecture, closely akin to Buddhist architecture, and developed contemporaneously with it after about A. D. 450, when the Jain sect acquired prominence. The most notable characteristics of the Jain style are the pseudo-arch and -dome, built in horizontal courses and of pointed sec-

tion. The domes rest commonly upon eight pillars arranged octagonally, with four more pillars at the corners, completing a square in plan; and both arches and domes are usually supported by a system of brackets or corbels carried out from the piers or pillars at about two thirds of their height, and often richly carved. The central feature in a Jain temple is a cell lighted from the door, and containing a cross-legged figure of one of the deified saints of the sect. The cell is terminated above by a dome or a pyramidal spire-like roof, and there are often connected with the temples extensive inclosed courtyards, with porticos and ranges of cells around the inclosure, each cell serving as a chapel. The tower is also characteristic of Jain architecture, being noteworthy especially in the towers commemorative of victory, which consist usually of a number of superimposed stories rising almost perpendicularly, and with the top corbeled out so as to overhang the sides. These towers are usually elaborately carved upon their entire surface. Jain architecture was at its best about the eleventh century, and is still practised, not without dignity and beauty, as at Ahmedabad.

Jaina (jī'nä), *n.* and *a.* Same as *Jain*.

Jainism (jī'nizm), *n.* [< *Jain* + *-ism*.] The religious system of the Jains.

jak (jak), *n.* Same as *jack*[3], *jack-tree*.

January (jan'ū-ā-ri), *n.* [< ME. *January* (also *Janivere, Janyvere*, etc., after OF.: see *Janivere*) = OF. and F. *Janvier* = Pr. *Januer, Januier, Genovier, Genoyer* = Sp. *Enero* = Pg. *Janeiro* = It. *Gennajo, Gennaro* = D. *Januarij* = G. Dan. *Januar* = Sw. *Januari*, < L. *Januarius* (sc. *mensis*), the month of Janus, < *Janus*, Janus: see *Janus*.] The first month of the year, according to present and the later Roman reckoning, consisting of thirty-one days. Abbreviated *Jan*.

Januayst, *a.* and *n.* An obsolete form of *Genoese*.

Januform (jā'nū-fôrm), *a.* [< L. *Janus*, Janus, + *forma*, form.] Having the form of Janus—that is, two-faced. [Rare.]

> The supposition was that the statue was to be *Janiform*, with Playfair's face on one side and Stewart's on the other; and it certainly would effect a reduction in price, though it would be somewhat singular.
> ★ *Sydney Smith*, To Francis Jeffrey.

Janus (jā'nus), *n.* [L., prob. orig. **Dianus*, like fem. *Jana* for *Diana*, being thus etymologically = Gr. Ζήν, a form of Ζεύς, L. *Jovis, Jupiter* (cf. LL. *Januspater*): see *deity, Diana, Jove, Jupiter*. The assumed connection with *janua*, a door, is prob. due to popular etymology.] 1. A primitive Italic solar divinity regarded among the Romans as the doorkeeper of heaven and the especial patron of the beginning and ending of all undertakings. As the protector of doors and gateways, he was represented as holding a staff or scepter in the right hand and a key in the left; and, as the god of the sun's rising and setting, he had two faces, one looking to the east, the other to the west. His temple at Rome was kept open in time of war, and was closed only in the rare event of universal peace.

> Your faction then belike is a subtile *Janus*, and has two faces. *Milton*, On Def. of Humb. Remonst.

Hence—2. A doorkeeper. [Rare.]

> They differ herein from the Turkish Religion, that they haue certaine idoll puppets made of silke or like stuffe, of the fashion of a man, which they fasten to the doore of their walking houses, to be as *Ianusses* or keepers of their house. *Purchas*, Pilgrimage, p. 421.

3. [NL.] A genus of hymenopterous insects of the family *Uroceridæ*, resembling *Cephus*, but distinguished from it by the filiform antennæ. There are twelve European and Asiatic species, and one North American, *J. flaviventris*.

Janus-cloth (jā'nus-klôth), *n.* A textile fabric, the color of one face of which is different from that of the other: used for reversible garments.

Janus-cord (jā'nus-kôrd), *n.* A kind of rep made of woolen and cotton, the cord or rib showing on both sides alike.

Janus-faced (jā'nus-fāst), *a.* Having two faces; two-faced; hence, double-dealing; deceitful.

Janus-headed (jā'nus-hed″ed), *a.* Double-headed.

Janvert, *n.* See *Janivere*.

Japan (ja-pan'), *a.* and *n.* [Prop., as an adj., attrib. use (*Japan* varnish, work, etc.) of the name of the country called *Japan* (D. Dan. Sw. G. *Japan* = F. Sp. *Japon* = Pg. *Japão* = It. *Giappone* = Russ. *Yaponiya*), < Chin. *Jih-pŭn* (Jap. *Nihon* or *Nippon*), lit. 'sunrise' (that is, the East, the Japanese archipelago lying to the east of China), < *jih* (Jap. *ni*), the sun, + *pŭn* (Jap. *pon* or *hon*), root, foundation, origin. The name was introduced into Europe by the Dutch or Portuguese.] I. *a.* Of or pertaining to Japan: as, *Japan* varnish (now written "*japan* varnish," without reference to the country); *Japan* work, etc.—**Japan allspice, anemone, camphor,** etc. See the nouns.—**Japan clover,** the hoop-koop-plant, *Lespedeza striata*, a native of China and Japan, introduced, perhaps with tea-boxes, into the southern part of the United States about the year 1840, since which time it has spread throughout the Southern States. Its purplish flowers are minute and axillary, the pod one-seeded. The leaves are trifoliate, very small, but numerous. The root is perennial, strikes deep, and resists drought. It thrives in good soil or poor, in the former growing erect and bushy, sometimes two feet high. It is highly valued for pasturage and for hay.—**Japan colors.** See *color*.—**Japan earth.** Same as *terra japonica* (which see, under *terra*).—**Japan globe-flower.** See *Kerria*.—**Japan wax.** See *wax*.

II. *n.* [*l. c.*] 1. Work varnished and figured in the manner practised by the natives of Japan.

> On shining altars of *Japan* they raise
> The silver lamp; the fiery spirits blaze.
> *Pope*, R. of the L., iii. 107.

2. A liquid having somewhat the nature of a varnish, made by cooking gum shellac with linseed-oil in a varnish-kettle. Litharge or some similar material is also usually added to quicken the drying of the resulting japan. When it has been cooked down to a very thick mass termed a "pill," it is allowed to cool, and is then thinned down with turpentine. Japan is a light-colored brownish-yellow liquid, of about the consistency of varnish. A thin surface of it dries in from fifteen to thirty minutes. It is used principally as a medium in grinding japan colors. A small portion added to ordinary house-paints makes them dry more rapidly, hence it is sometimes called *japan drier*.

> They were stained . . . in imitation of maple, but far less skilfully. Sometimes they were a black *japan*.
> *Mayhew*, London Labour and London Poor, I. 330.

3. An asphaltum varnish.—4†. A black cane. *Davies*.

> Like Mercury, you must always carry a caduceus or conjuring *japan* in your hand, capped with a civet-box.
> *The Quack's Academy*, 1678 (Harl. Misc., II. 33).

Black japan, or *japan lacquer*, a varnish of a jet-black color; a hard black varnish used for producing a glossy-black and enamel-like surface on iron, tin, and other materials. It is made by cooking asphaltum with linseed-oil, and thinning the resulting thick mass with turpentine. Also called *japan black, black asphaltum, Brunswick black*.—**Old japan,** Japanese porcelain which has a white ground decorated with dark blue under the glaze, and with red, green, and occasionally other enamels, with some gold. This porcelain, which is the best-known of all the Japanese decorative porcelains, is now known as *Hizen* or *Imari*.

★

japan (ja-pan'), *v. t.*; pret. and pp. *japanned*, ppr. *japanning*. [< *japan, n.*] To varnish with japan; cover with any material which gives a hard black gloss.

> Two huge, black, *japanned* cabinets . . . reflecting from their polished surfaces the effulgence of the flame.
> *Barham*, Ingoldsby Legends, I. 195.

Japanese (jap-a-nēs' or -nēz'), *a.* and *n.* [< F. *Japonais* = It. *Giapponese*, etc.; as *Japan* + *-ese*.] I. *a.* Pertaining to Japan or its inhabitants.—**Japanese art,** the art of Japan, an original, consistent, and strictly national development, noteworthy chiefly in the departments of industrial and of decorative art. The productions of this art are characterized by fitness for their purpose and constructive soundness, and exhibit at once delicacy of touch and freedom of hand. In *architecture* the groundwork is plain and simple, the models not differing greatly from those of neighboring Asiatic countries. But the decoration shows the true artistic spirit; there is richness of carving, inlaying of bronze, gold, and precious woods, and brilliant color, but no excess or heaviness, and no masking of structural elements. In *painting* and the kindred arts the highest study, that of the human figure, has not been mastered; but the refined and true drawing of animals and plants, with accurate representation of swift motion, and the harmonious use of color, are alike remarkable. In *sculpture*, especially in bronze and wood, the same subjects are treated with the same qualities and the same success. The technic of the Japanese bronzes especially has never been attained by other peoples. Lacquered ware, embossed in gold and colors, represents another industry in which the Japanese are unrivaled. Their pottery and porcelain, though of great beauty, is perhaps excelled by that of the Chinese. In textile fabrics, embroidery, wall-papers, etc., the exactness of observation and mastery of technical rendering alike of Japanese artist and workman produce admirable results.—**Japanese bantam,** a quaint ornamental variety of bantam with short yellow legs, and plumage white with the exception of the tail, which is black. The tail is very large, and is carried so upright that in the cock it almost touches the head; and the wings droop so as nearly to reach the ground.—**Japanese box.** Same as *Chinese box*. See *Euonymus*.—**Japanese cypress,** one of various species of *Chamæcyparis*.—**Japanese deer,** *Cervus sika*.—**Japanese elm,** the keyaki.—**Japanese ivy.** See *ivy*[1].—**Japanese long-tailed fowls,** a breed of the domestic hen developed in Japan, similar in form to a game or a small Malay, but characterized by the remarkable length of the trailing sickle-feathers of the cock, which frequently attain six or seven feet, and sometimes much more. Also known as *Phenix, Shinotawaro*, or *Yokohama fowls*.—**Japanese pasque-flower, persimmon, quince, silk, yam,** etc. See the nouns.

Japanese Art.—Example from a native Japanese book.

II. *n.* 1. *sing.* and *pl.* A native or natives of Japan, an island empire in the Pacific ocean, lying to the east of Corea, consisting of four large islands and from three to four thousand smaller ones. The Japanese style their own country *Nihon* (or *Nippon*) (see *Japan*, etymology), or *Dai Nihon* (or *Nippon*), 'Great Nihon,' and sometimes *Yamato*, from the name of the region in which the old capital was situated.

2. The language of the inhabitants of Japan. It is an agglutinative language, and often claimed, on doubtful grounds, to belong to the Ural-Altaic family, as related especially with Mongol and Manchu.

Japanesque (jap-a-nesk'), *a.* [< *Japan* + *-esque*.] Resembling the Japanese, or what is Japanese; akin to Japanese; imitating the Japanese art.

★

Japanism (ja-pan'izm), *n.* [= F. *Japonisme;* as *Japan* + *-ism*.] Japanese art, customs, etc.; also, the study of things peculiar to Japan.

> *Harper's Mag.*, LXXVI. 334.

Japanization (ja-pan-i-zā'shon), *n.* The act or process of conforming, or the state of being conformed, to Japanese ideas, as of art or civilization.

japanned (ja-pand'), *p. a.* 1. Covered with japan, or with something resembling it in effect.—2. Appearing as if varnished with japan: as, the *japanned* peacock, *Pavo nigripennis*.

> There is one strange fact with respect to the peacock, namely the occasional appearance in England of the *japanned* or "black-shouldered" kind.
> *Darwin*, Var. of Animals and Plants, p. 305.

Japanned leather. Same as *patent leather* (which see, under *leather*).

japanner (ja-pan'ėr), *n.* 1. One who applies japan varnish, or produces japan gloss.—2. A shoe-black.

> Well, but the poor—the poor have the same itch;
> They change their weekly barber, weekly news,
> Prefer a new *japanner* to their shoes.
> *Pope*, Imit. of Horace, I. i. 156.

Japanners' gilding. See *gilding*.

japanning (ja-pan'ing), *n.* [Verbal n. of *japan, v.*] The art of coating surfaces of metal, wood, etc., with japan or varnish, which is dried and hardened by means of a high temperature in stoves or hot chambers.

Japannish (ja-pan'ish), *a.* [< *Japan* + *-ish*[1].] Of or pertaining to Japan or the Japanese; of Japanese character. [Rare.]

> In some of the Greek delineations (the Lycian painter, for example) we have already noticed a strange opulence of splendour, characterisable as half-legitimate, half-meretricious, a splendour hovering between the Raffaelesque and the *Japannish*. *Carlyle*, Sterling, vi.

jape (jāp), *v.* [< ME. *japen*, < OF. *japer, japper*, F. *japper* = Pr. *japar*, trifle, jest, play a trick, tr. trick, impose upon; origin uncertain.] I. *intrans.* To jest; joke. [Obsolete or archaic.]

> And nunneries.
> *Tennyson*, Sir John Oldcastle, Lord Cobham.

II. *trans.* To deride; gibe; mock; befool.

Thus hath he *japed* the ful many a yeer.
Chaucer, Knight's Tale, l. 871.

jape (jāp), *n.* [< ME. *jape*, < OF. *jape, jappe*, F. *jappe* = Pr. *jap, jaup;* from the verb.] 1. A joke; jest; gibe.

He . . . gan his beste *japes* forth to caste,
And made hire so to laugh at his folye,
That she for laughtere wende for to dye.
Chaucer, Troilus, ii. 1167.

The roar of merriment around bespoke the by-standers well pleased with the *jape* put upon him.
Barham, Ingoldsby Legends, I. 136.

2†. A trick; wile; cheat.

It is no *iape*, it is trouth to see.
Rom. of Partenay (E. E. T. S.), l. 5695.

Nere myn extorcioun I myghte nat lyven,
Nor of swich *japes* wol I nat be shryven.
Chaucer, Friar's Tale, l. 142.

To make one a jape†, to deceive one; play a trick upon one.

She made hym fro the dethe escape,
And he *made hir a* ful fals *jape*.
Chaucer, House of Fame, l. 414.

japer† (jā′pėr), *n.* [< ME. *japer*, < OF. *japeur*, F. *jappeur*, a jester, < *japer*, jest: see *jape*, *v.*] A jester; a buffoon.

After this comth the synne of *japeres*, that ben the develes apes, for they maken folk to laughe at hire japerie, as folkes doon at the gawdes of an ape.
Chaucer, Parson's Tale.

The *japers*, I apprehend, were the same as the bourdours, or rybauders, an inferior class of minstrels.
Strutt, Sports and Pastimes, p. 262.

japery† (jā′pėr-i), *n.* [< ME. *japerie*, < OF. *japerie, japperie*, jesting, < *japer*, jest: see *jape*, *v.*] Jesting; joking; raillery; mockery; buffoonery.

Justinus, which that hated his folye,
Answerde anon right in his *japerie*.
Chaucer, Merchant's Tale, l. 412.

Japetidæ (jā-pet′i-dē), *n. pl.* [NL., < *Japetus, Japhetus*, a Latinized form of Heb. *Japheth*, one of the three sons of Noah, + *-idæ*.] The Indo-European or Aryan family of peoples. [Rare.]

Japhetian (jā-fet′i-an), *a.* and *n.* [< *Japheth* (see def.) + *-ian*.] I. *a.* Pertaining to Japheth; Japhetic.

The pre-scientific *Japhetian* theory and the Caucasian theory of Blumenbach have long been abandoned.
Abstract from *I. Taylor*, Nature, XXXVI. 597.

II. *n.* A descendant of Japheth; specifically, one of the Milesian colonists of Ireland.

Japhetic (jā-fet′ik), *a.* [= Sp. *Jafético*, < NL. *Japheticus*, < *Japhetus*, Japheth.] Pertaining to Japheth, one of the sons of Noah; descended, or supposed to be descended, from Japheth; Indo-European or Aryan: as, the *Japhetic* nations. Compare *Semitic* and *Hamitic*.

Are out of tune, and *iarre* in euery stoppe.
Gascoigne, Steele Glas (ed. Arber), p. 59.

2. To grate on the ear or the feelings; have a jangling or discordant quality; clash.

On easy numbers fix your happy choice;
Of *jarring* sounds avoid the odious noise.
Dryden and Soames, tr. of Horace's Art of Poetry, i. 108.

A string may *jar* in the best master's hand.
Roscommon.

Start at his awful name, or deem his praise
A *jarring* note. *Cowper*, Task, iv. 181.

3. To receive a short, rattling, tremulous motion, as from an impulse; shake joltingly.

The gallery *jarred* with a quick and heavy tramp.
R. L. Stevenson, Prince Otto, ii. 14.

4†. To sound or tick in vibrating, as a pendulum; hence, to be marked off by regular vibrations or ticks.

The bells tolling, the owls shrieking, the toads croaking, the minutes *jarring*, and the clock striking twelve.
Kyd, Spanish Tragedy, iv.

5. To speak or talk clatteringly or discordantly; haggle; dispute; quarrel.

Ye muse somwhat to far,
All out of joynt ye *jar*.
Skelton, Duke of Albany and the Scottes.

The clash of arguments and *jar* of words.
Cowper, Conversation, l. 85.

2. A clashing of interest or opinions; collision; discord; debate; conflict: as, family *jars*.

Although there be in their words a manifest shew of *jar*, yet none if we look upon the difference of matter.
Hooker, Eccles. Polity, v. 19.

Yet him whose heart is ill at ease
Such peaceful solitudes displease;
He loves to drown his bosom's *jar*
Amid the elemental war.
Scott, Marmion, ii., Int.

3. A short tremulous motion or vibration, as from an impulse; a sudden shaking or quiver: as, to feel the *jar* of an earthquake, or from blasting.

In r, the tongue is held stiffly at its whole length, by the force of the muscles; so as when the impulse of breath strikes upon the end of the tongue, where it finds passage, it shakes and agitates the whole tongue, whereby the sound is affected with a trembling *jar*.
Holder, Elem. of Speech.

4†. A clicking or ticking vibration, as of a pendulum; a tick.

I love thee not a *jar* o' the clock behind
What lady, she her lord. *Shak.*, W. T., i. 2, 43.

5. *pl.* A sliding joint in the boring-rods used in rope-drilling. The jars are like two large flat chain-links, and their object is to give the bit a decided jar on the up-stroke, so as to loosen it in case it has become wedged in the hole. They also form a very important member of the drilling-tools, as being the connecting-link between the drill and the means of operating it.

jar2 (jär), *n.* [< ME. *char*, a turn: see *ajar*2.] A turn: used separately only in the occasional colloquial phrases *on a jar, on the jar*, usually *ajar*, on the turn; turned a little way, as a door or gate.

She never absolutely shuts her mouth, but leaves it always *on a jar*, as it were.
Sheridan, School for Scandal, ii. 2.

"I was there," resumed Mrs. Cluppins, "unbeknown to Mrs. Bardell; . . . when I see Mrs. Bardell's street-door *on the jar*." "On the what?" exclaimed the little Judge. "Partly open, my Lord," said Serjeant Snubbin.
Dickens, Pickwick, xxxiv.

★ **jar**3 (jär), *n.* [< OF. *jare*, F. *jarre* = Pr. *jarra, guarra* = It. *giara, giarra*, formerly also *zara*, f., *giarro*, m., < Sp. Pg. *jarra*, f., *jarro*, m., a jar, pitcher, < Ar. *jarra*, a ewer, a jug with pointed bottom, < Pers. *jarrah*, a jar, earthen water-vessel. Cf. Pers. *jurrah*, a little cruse or jar.] 1. An earthen or glass vessel of simple form, without handle or spout. In ancient times large earthenware jars served the purpose of casks and barrels. See *amphora, dolium*, and *pithos*.

A great *jarre* to be shap'd
Was meant at first; why, forcing still about
Thy labouring wheele, comes scarce a pitcher out?
B. Jonson, tr. of Horace's Art of Poetry.

Or some frail China *jar* receive a flaw.
Pope, R. of the L., ii. 106.

2. The quantity contained in a jar; the contents of a jar.

Sir, Spain has sent a thousand *jars* of oil.
Pope, Moral Essays, iii. 56.

Deflagrating jar, a glass-stoppled jar used in the lecture-room to exhibit the combustion of certain bodies in gases, as, for instance, phosphorus or sulphur in oxygen. See *deflagration*.—**Leyden jar**. [After the town where it was invented.] In *elect.*, a condenser (which see) consisting, in its common form, of a glass jar lined inside and out with tin-foil for about two thirds of its height. A brass rod terminating in a knob connects below with the inner coating, usually by means of a loose chain. The glass surface above the coatings is usually varnished, for better insulation. For illustration, see *battery*.—**Unit jar**, a small Leyden jar furnished with two knobs (one connected to each coating), the distance between which can be varied. By connecting one knob to the prime conductor of an electrical machine, and the other to one plate of a condenser (the other plate of which is to earth), the relative value of different charges can be measured, by counting the number of sparks which pass between the knobs during the operation of charging. The unit is entirely arbitrary.

jarble, jarvel (jär′bl, -vel), *v. t.*; pret. and pp. *jarbled, jarveled* or *jarvelled*, ppr. *jarbling, jarveling* or *jarvelling*. [See *javel*3.] To wet; bedew, as by walking in long grass after dew or rain. *Brockett*. [Prov. Eng.]

jardinière (zhär-dē-nyãr′), *n.* [F., a flower-stand, also a female gardener, a gardener's wife, fem. of *jardinier*, a gardener: see *garden, gardener*.] 1. A piece of furniture or a vessel for the display of flowers, whether growing or cut. (*a*) A stand upon which flower-pots can be arranged. (*b*) A cache-pot. (*c*) A vessel, often of fine enameled pottery or of porcelain, and richly decorated, in which flowers are arranged for the decoration of the table. 2. A kind of lappet, forming part of the headdress of women at the beginning of the eighteenth century.

jardon (F. pron. zhär-dôṅ′), *n.* [F., < *jarde*, q. v.] Same as *jarde*.

jar-fly (jär′flī), *n.* A homopterous insect of the family *Cicadidæ;* any harvest-fly or lyerman, as *Cicada tibicen:* so called from the jarring sound of their stridulation.

jargle† (jär′gl), *v. i.* [< OF. *jargouiller*, warble, chirp, chatter, connected with *jargonner*, chatter, jangle: see *jargon*1. Cf. E. *gargle*1, < OF. *gargouiller*.] To emit or make a harsh or shrill sound.

Jargles now in yonder bush.
England's Helicon, p. 46. (*Halliwell*.)

Her husband's rusty iron corselet,
Whose *jargling* sound might rock her babe to rest.
Bp. Hall, Satires, iv. 4.

jargogle† (jär′gog-l), *v. t.* [Appar. a confused extension of *jargon*1.] To jumble; confuse.

To *jargogle* your thoughts. *Locke*.

jargon1 (jär′gon), *n.* [< ME. *jargoun, gargoun, jargon, jergon*, chattering, < OF. *jargon, gergon*, F. *jargon*, gibberish, peddlers' French, orig. 'chattering,' = It. *gergo, gergone*, jargon (cf. Sp. *gerigonza* = Pg. *geringonça*, jargon), > OF. (also F.) *jargonner*, chatter as birds, later speak gibberish, jangle, chatter, babble confusedly (cf. Sp. *gerigonzar*, speak a jargon); perhaps a reduced reduplication of the root appearing in L. *garrire*, chatter, prattle, talk, croak (as a frog), sing (as a nightingale), etc.: see *jar*1 and *garrulous*.] 1. The twittering of birds; hence, confused, unintelligible talk; formless speech; gabble; gibberish; babble.

He was al coltissh, ful of ragerye,
And ful of *jargon* as a flekked pye.
Chaucer, Merchant's Tale, l. 604.

What more exquisite *jargon* could the wit of man invent than this definition?—"The act of a being in power, as far forth as in power."
Locke, Human Understanding, III. iv. 8.

Specifically—2. A barbarous mixed speech, without literary monuments; a rude language resulting from the mixture of two or more discordant languages, especially of a cultivated language with a barbarous one: as, the Chinook *jargon;* the *jargon* called Pidgin-English.

For my own part, besides the *jargon* and patois of several provinces, I understand no less than six languages.
Sir T. Browne, Religio Medici, ii. 8.

3. Any phraseology peculiar to a sect, profession, trade, art, or science; professional slang or cant.

This society has a peculiar cant and *jargon* of their own.
Swift, Gulliver's Travels, iv. 5.

The conventional *jargon* of diplomacy, misleading everywhere, becomes tenfold more misleading in those parts of the world [southeastern Europe].
E. A. Freeman, Amer. Lects., p. 403.

=Syn. 1. *Chatter, Babble*, etc. See *prattle*, *n.*

jargon[1] (jär'gon), *v. i.* [< ME. *jargonen, jargounen*, < OF. *jargonner*, jargon; from the noun.] To utter unintelligible sounds.

Ful faire servise, and eke ful swete
These briddis maden as they sete.
Layes of love, ful wel sownyng,
They songen in her *iargoning*.
Rom. of the Rose, l. 716.

The noisy jay,
Jargoning like a foreigner at his food.
Longfellow, Birds of Killingworth.

jargon[2] (jär'gon), *n.* [Also *jargoon*; < F. *jargon*, < It. *giargone*, a sort of yellow diamond, perhaps < Pers. *zargūn*, gold-colored, < *zar*, gold, + *gūn*, quality, color. Cf. *zircon*.] A colorless, yellowish, or smoky variety of the mineral zircon from Ceylon. The gray varieties are sold in Ceylon as inferior diamonds, and called *Matura diamonds*, because most abundant in the district of Matura.

jargonelle (jär-go-nel'), *n.* [< F. *jargonelle*, a very stony variety of pear, dim. of *jargon*, the mineral so called: see *jargon*[2].] 1. A variety of early pear.—2. An essence obtained from fusel-oil.

jargonic (jär-gon'ik), *a.* [< *jargon*[2] + *-ic*.] Pertaining to the mineral jargon.

jargonist (jär'gon-ist), *n.* [< *jargon*[1] + *-ist*.] One who uses a particular jargon or phraseology; one who repeats by rote popular phrases, professional slang, or the like.

"And pray of what sect," said Camilla, "is this gentleman?" "Of the sect of *jargonists*," answered Mr. Gosport; "he has not an ambition beyond paying a passing compliment, nor a word to make use of that he has not picked up at public places." *Miss Burney*, Cecilia, iv. 2.

jargonize (jär'gon-īz), *v. i.*; pret. and pp. *jargonized*, ppr. *jargonizing*. [< OF. *jargoniser*, speak jargon; as *jargon*[1] + *-ize*.] To speak a jargon; utter uncouth and unintelligible sounds.

jargoon (jär-gön'), *n.* Same as *jargon*[2].

jark†, *n.* [Also misprinted *jack*. Old slang: origin unknown.] A seal (see extract under *jarkman*). *Fraternitie of Vacabondes*, 1575. (*Halliw ll.*) [Cant.]

jarkman†, *n.* [Also misprinted *jackman*. Cf. *jark*.] 1. A particular kind of swindling beggar. See the quotation. [Cant.]

There [are] some in this Schoole of Beggers that practise writing and reading, and those are called *Jarkmen* [old ed., *Jackmen*]: yea, the *Jarkman* is so cunning sometimes that he can speake Latine; which learning of his lifts him vp to aduancement, for by that means he becomes Clarke of their Hall, and his office is to make counterfeit licences, which are called Gybes, to which hee puts seales, and those are termed Jarkes.
Dekker, Belman of London, sig. C 3 (ed. 1608).

2. A begging-letter writer. [Slang.]

jarl (järl, properly yärl), *n.* [Icel., = Dan. Sw. *jarl* = AS. *eorl*, E. *earl*: see *earl*.] In *Scand. hist.*: (*a*) A man of noble birth; a nobleman. (*b*) A chief; as a title, an earl; a count. The name was used both as a family title and as an official designation. In Iceland, practically a republican commonwealth, it never took root.

Our ætheling, ceorl, and slave are found in the oldest tradition of the north as *jarl*, carl, and thrall; in later times carl begat the bonder and *jarl* the king.
J. R. Green, Conq. of Eng., p. 55.

Two ghastly heads on the gibbet are swinging;
One is *Jarl* Hakon's and one is his thrall's.
Longfellow, Saga of King Olaf, iii.

jarle†, *v. i.* [A freq. of *jar*[1], or contr. of *jargle*.] To quarrel; be at odds.

The odd £30 shall come with the £100, or else my father and I will *jarle*.
Sir P. Sidney (Arber's Eng. Garner, I. 308).

jarnut (jär'nut), *n.* [E. dial., due to Dan. *jordnöd* or D. *aardnoot* = E. *earthnut*. Cf. *jarworm*, a dial. form of *earthworm*.] The earthnut or pignut. See *Bunium*.

jarool (ja-röl'), *n.* [E. Ind.] A timber-tree of ★India, *Lagerstræmia Flos-Reginæ*.

jarosite (ja-rō'sīt), *n.* [Named from a locality, Barranco *Jaroso*, in Spain.] A native hydrous sulphate of iron and potassium, occurring in ocher-yellow rhombohedral crystals, and also in granular masses.

jar-owl (jär'oul), *n.* The churn-owl, night-jar, or night-churr, *Caprimulgus europæus*.

jarrah (jar'ä), *n.* [Nat. Aust. *jerryhl*.] The *Eucalyptus marginata*, or mahogany gum-tree, of southwestern Australia. It is famous for its indestructible wood, which is not attacked by the chelura, teredo, or termites, and does not easily decay. It is, therefore, highly valued for marine and underground uses, as for jetties, railroad-ties, and telegraph-poles. Australian ship-builders prefer it to any other timber, unless it be English or live oak. It has been somewhat criticized, however, for deficient tenacity and a tendency to warp and shrink. Jarrah-wood is reddish, heavy, and close-grained, works easily and takes a fine polish, and is valuable for building purposes and for furniture. See *Eucalyptus*.

jarry (jär'i), *a.* [< *jar*[1] + *-y*[1].] Jarring; reverberating.

Theese flaws theyre cabbans wyth stur snar *jarrye* doe ransack.
Stanihurst, Æneid, i. 63.

jarsey† (jär'zi), *n.* An obsolete form of *jersey*.

jarvel, *v. t.* See *jarble*.

jarvey, jarvy (jär'vi), *n.*; pl. *jarveys, jarvies* (-viz). [Also *jarvie*; prob., like some other vehicle-names, of personal origin, from the surname *Jarvie* or *Jarvis*, which is another form of *Jervis, Gervase*.] 1. The driver of a hackney-coach. [Eng. slang.]

The Glass-coachman waits, and in what mood! A brother *jarvie* drives up, enters into conversation; is answered cheerfully in *jarvie* dialect. *Carlyle*, French Rev., II. iv. 3.

To the "Phaynix" Park a *jarvey* will be the best cicerone. *The Century*, XXIX. 178.

2. A hackney-coach.

I stepped into the litter — I mean the litter at the bottom of the *Jarvy*. *T. Hook*, Gilbert Gurney, III. 1.

jarziet (jär'zi), *n.* An obsolete form of *jersey*.

jaserant†, *n.* See *jesserant*.

jasey (jā'zi), *n.* [Also *jazey* and *jasy*; a corruption of *jersey*.] A kind of wig, originally one made of worsted; a jersey.

He looked disdainfully at the wig; it had once been a comely *jasey* enough, of the colour of over-baked gingerbread. *Barham*, Ingoldsby Legends, II. 358.

Jasione (jas-i-ō'nē), *n.* [NL. (Linnæus), < Gr. *ἰασιώνη* (Theophrastus), a plant of the convolvulus kind, bindweed, or, according to others, columbine, appar. connected with *ἰασις*, healing, *Ἰασώ*, a goddess of healing, < *ἰᾶσθαι*, heal.] A genus of plants of the family *Campanulaceæ*, containing about 3 species of herbs of Europe and the Mediterranean region. The corolla is narrowly five-parted; the anthers are somewhat connate at their base. The flowers are borne at the ends of the branches in hemispherical heads with leafy involucres. *J. montana*, with bright-blue flowers, is the common sheep's-bit of Great Britain, and extends throughout ★Europe, the extreme northern part excepted.

jasmine, jasmin (jas'min or jaz'min), *n.* [In two forms: (1) *jasmine*, also spelled *jasmin* (= D. *jasmijn* = G. Dan. Sw. *jasmin*), < OF. *jasmin, josmin*, F. *jasmin* = Sp. *jazmín* = Pg. *jasmim*; NL. *jasminum*; (2) *jessamin*, also spelled *jessamine*, and formerly *jessemin*, < OF. *jessemin, jelsomine* = It. *gesmino*, also *gelsomino* (cf. *Gelsemium* and *gelsemin*, q. v.) and *gelsimo*, jasmine; < Ar. **yāsmīn, yesmīn*, Turk. *yāsemīn*, < Pers. *yāsmīn*, also *yāsamūn*, jasmine. Cf. Gr. *ἰάσμη*, also *ἰασμέλαιον* (*ἔλαιον*, oil) and *ἰάσμινον μύρον* (*μύρον*, juice), a Persian perfume, perhaps oil of jasmine.] A plant of the genus *Jasminum*.—**Bastard jasmine**, species of the genus *Cestrum*.—**Cape jasmine**, *Gardenia florida*.—**Carolina** or **yellow jasmine**, *Gelsemium sempervirens*.—**Chili jasmine**, *Mandevilla suaveolens*.—**French jasmine**, *Calotropis procera*.—**Jasmine box**, species of the genus *Phillyrea*.—**Night jasmine**, *Nyctanthes Arbor-tristis*.—**Red jasmine**, *Plumeria rubra*. See *frangipani*.—**Wild jasmine**, the windflower, *Anemone nemorosa*.

Jasmineæ (jas-min'ē-ē), *n. pl.* [NL. (Jussieu, 1789). < *Jasminum* + *-eæ*.] A plant-tribe belonging to the family *Oleaceæ*, typified by the genus *Jasminum*. It is distinguished by the fruit being twin, or septicidally divisible into two, by the lobes of the corolla being strongly imbricated and twisted in the bud, and by the seeds being erect and having little or no albumen.

jasmine-tree (jas'min-trē), *n.* The red jasmine, *Plumeria rubra*, of tropical America.

Flowering Branch of Jasmine (*Jasminum officinale*). *a*, flower entire; *b*, flower opened to show the stamens; *c*, pistil.

Jasminum (jas'mi-num), *n.* [NL. (Linnæus): see *jasmine*.] A genus of the family *Oleaceæ*, containing some 160 species of shrubby, often climbing, plants, widely distributed in the warmer parts of the world, especially in Asia, many of them cultivated. The corolla of the flowers has a cylindrical tube (which includes the two stamens), and a spreading limb, with usually four or five divisions. The leaves are pinnately compound, or reduced to a single leaflet. The white or yellow flowers are axillary or terminal. Well-known species are: *J. officinale*, the common white jasmine, thoroughly naturalized in southern Europe; *J. grandiflorum*, from India, variously called Malabar or Catalonian or Spanish jasmine; and *J. Sambac*, the Arabian jasmine. The ordinary jasmine-oil is furnished mainly by the first two, which are extensively cultivated for the purpose in southern Europe; but the last yields a similar perfume. Many other species are prized for their elegance and fragrance.

jaspt (jasp), *n.* [< ME. *jaspe*, < OF. *jaspe*, < L. *iaspis*, jasper: see *jasper*.] Jasper.

The floore of *Jasp* and Emerande was dight.
Spenser, Visions of Bellay, l. 25.

jaspachatet (jas'pa-kāt), *n.* [< F. *jaspagate*, < L. *iaspachates*, < Gr. *ἰασπαχάτης*, < *ἰασπις*, jasper, + *ἀχάτης*, agate.] Agate jasper.

jaspe (jasp), *n.* [F., lit. jasper: see *jasper*.] A dark-gray substance produced by deoxidizing crystalled glass: used in ornamental art. *D. M. Wallace*, Art Jour., N. S., IX. 222.

jaspé (jas'pā), *a.* [F., pp. of *jasper* (= Sp. Pg. *jaspear*), make like jasper, < *jaspe*, jasper: see *jasper*.] In *decorative art*, especially in ceramics, having a surface ornamented with veins, spots, cloudings, etc., as if in imitation of jasper; jasperated; jaspidean.

jasper (jas'pėr), *n.* [< ME. *jasper, jaspre*, also *jaspe* (and as L. *iaspis*), < OF. *jaspre*, an occasional form (with excrescent *r*) of *jaspe*, F. *jaspe* = Pr. *jaspi* = Sp. Pg. *jaspe* = It. *jaspide* (also *diaspro*, ML. *diasprus*, by confusion with another word) = D. G. *jaspis*, < L. *iaspis* (*iaspid-*), < Gr. *ἴασπις*, < Ar. *yasb, yasf, yashb* (> Pers. *yashb*) = Heb. *yashpheh*, jasper.] 1. Among the ancients, a bright-colored chalcedony (not, however, including carnelian), translucent and varying in color, green being apparently most common. It was highly esteemed as a precious stone.

Her light was like unto a stone most precious, even like a *jasper* stone. Rev. xxi. 11.

2. In modern usage, a closely compact cryptocrystalline variety of quartz, opaque or nearly so, and colored red, yellow, or brown, or less often green. The color is usually due to oxid of iron, the anhydrous oxid being present in the red, and the hydrated oxid in the yellow and brown varieties. Some kinds contain clay as an impurity, and a red jasper rock (sometimes called *jasperite*) occurs on a large scale with the iron ores of the Lake Superior region. The finer varieties of jasper admit of a good polish, and are used for vases, snuff-boxes, seals, etc. *Banded* or *striped jasper* (also called *ribbon-jasper*) is a kind having the color in broad stripes, as of red and green. *Agate jasper* has layers of chalcedony. *Egyptian jasper*, much used in ancient art, was found near the Nile, in nodules having zones of red, yellow, or brown colors. *Porcelain jasper* is merely a baked indurated clay, often of a bright-red color.

3. A fine earthenware first made by Wedgwood.—4. Same as *jasper-ware*.

jasperated (jas'pėr-ā-ted), *a.* [< *jasper* + *-ate*[2] + *-ed*[2].] Mixed with jasper; containing particles of jasper: as, *jasperated* agate.

jasper-dip (jas'pėr-dip), *n.* Same as *jasper-wash*.

jasperite (jas'pėr-īt), *n.* [< *jasper* + *-ite*[2].] See *jasper*, 2.

jasperize (jas'pėr-īz), *v. t.*; pret. and pp. *jasperized*, ppr. *jasperizing*. [< *jasper* + *-ize*.] To convert into a form of silica like jasper. The "petrified forest" near Corriza in Apache county, Arizona, contains large quantities of jasperized wood, much of it true agate and jasper, and of great beauty when polished. It is extensively used for ornamental objects; single sections of the tree-trunks form table-tops, etc.

The Arizona agatized or *jasperized* wood shows the most beautiful variety of colours of any petrified wood in the world. *Nature*, XXXVII. 68.

jasper-opal (jas'pėr-ō″pal), *n.* An impure variety of the common opal, containing some yellow iron oxid and having the color of yellow jasper. Also called *jasp-opal* and *opal-jasper*.

jasper-ware (jas'pėr-wār), *n.* A kind of pottery invented by Josiah Wedgwood, and described by him as "a white terra-cotta" and as "a white porcelain bisque (biscuit)." This paste was used by Wedgwood for his most delicate work, especially for the small reliefs called "cameos" with which he ornamented his finest vases, etc., and which were also made for setting in jewelry. Also called *cameo-ware*.

jasper-wash (jas'pėr-wosh), *n.* A kind of ceramic decoration introduced by Wedgwood in 1777. In this the coloring is only on the surface, the body being untinted. In true jasper the substance is uniformly colored throughout. Also called *jasper-dip*.

jaspery (jas′pėr-i), *a.* [< *jasper* + *-y*[1].] Resembling jasper; mixed with jasper: as, *jaspery* quartz.

jaspidean (jas-pid′ē-ạn), *a.* [< L. *iaspideus*, < *iaspis*, jasper: see *jasper*.] Like jasper; consisting of jasper, or containing jasper.

jaspideous (jas-pid′ē-us), *a.* [= Pg. *jaspideo*, < L. *iaspideus*, < *iaspis*, jasper: see *jasper*.] Like jasper.

jaspoid (jas′poid), *a.* [< *jasp-er*, F. *jaspe*, + *-oid*.] Resembling jasper.

jasponyx (jas′pō-niks), *n.* [L. *iasponyx*, < Gr. *ἰασπόνυξ*, < *ἴασπις*, jasper, + *ὄνυξ*, onyx.] A jasper with the structure of an onyx.

jasp-opal (jasp′ō″pạl), *n.* Same as *jasper-opal*.

jaspure (jas′pūr), *n.* [< F. *jaspure* (= Pg. *jaspeadura*), marbling, < *jasper*, make like jasper, marble: see *jaspé*.] Decoration with veins of color like those of jasper or agate.

Jassidæ (jas′i-dē), *n. pl.* [NL., < *Jassus* + *-idæ*.] An extensive family of homopterous insects, named from the genus *Jassus*, of wide geographical distribution, and containing many bugs ordinarily called leaf-hoppers. They are mostly of small size, slender and often spindle-shaped, with very long hind legs, and curved tibiæ armed with a double row of spines. They occur in nearly all parts of the world, and many of them are notably noxious to agriculture and horticulture. Also *Iassidæ*.

Jassus (jas′us), *n.* [Prop. *Iassus*, < L. *Iassus* or *Iāsus*, < Gr. *Ἴασσος* or *Ἰασός*, a town on the coast of Caria, now Askem.] The name-giving genus of *Jassidæ*, at present restricted to a few species not characteristic of the family.

jataka (jä′tạ-kạ̈), *n.* [Skt. *jātaka*, < *jāta*, born, pp. of √*jā* or *jan*, be born.] A nativity; birthstory; specifically, an account of the life of Buddha in one of his successive human existences.

jatamansi (jat-ạ-man′si), *n.* [E. Ind.] The supposed spikenard of the ancients, *Nardostachys Jatamansi*.

Jateorhiza (jat″ē-ō-rī′zạ̈), *n.* [NL. (Miers, 1851), irreg. < Gr. *ἰατήρ* or *ἰατής*, a physician (< *ἰᾶσθαι*, cure), + *ῥίζα*, a root.] A genus of *Menispermaceæ*, containing, with one or two other species, the *J. palmata*, whose root is the columbo of commerce. They belong to the forests of Mozambique, and are woody climbers with large, deeply cleft leaves on long petioles, and the flowers in axillary racemes. The flower has six sepals in two sets, 6 petals shorter than the sepals, and in the male plant 6 stamens whose anthers open by a transverse slit near the extrorse tip. In the female flower there are 6 sterile stamens, and 3 ovaries which become ovoid drupes. See cut under *columbo*.

Jatropha (jat′rō-fạ̈), *n.* [NL. (Linnæus), irreg. < Gr. *ἰατρός*, a physician, + *τροφή*, sustenance, food, < *τρέφειν*, nourish, sustain.] A genus of plants of the family *Euphorbiaceæ*, type of the tribe *Jatropheæ*, embracing some 70 species belonging to the warmer parts of both hemispheres, but chiefly American. They are monœcious herbs or shrubs with alternate petioled and stipulate leaves, which are entire or palmately lobed. The small flowers are in dichotomous cymes, the fertile toward the center. The male flowers, and sometimes the female, have a corolla with five petals or lobes. The numerous stamens are in two or more series, with their filaments more or less united in a column. The ovary is two- or three-celled, with one seed in a cell. *J. Curcas* furnishes the seeds known as *Barbados nuts*, also, on account of their properties, called *physic-* or *purging-nuts*. These, with the seeds of *J. multifida* (called *coral-plant*), yield the jatropha-oil. *J. glauca* of the East Indies yields a stimulating oil, which is used externally. *J. gossypifolia*, a shrubby species of Africa and tropical America, occurs in the southern part of Florida. *J. podagrica* is a curious species sometimes cultivated in conservatories.

Jatropha podagrica.
a, inflorescence; *b*, male flower.

jaud (jâd), *n.* A Scotch form of *jade*[1].

I heard ane o' his gillies bid that auld rudas *jaud* of a gudewife gie ye that. *Scott*, Rob Roy, xxix.

jauk (jâk), *v. i.* [Origin obscure.] To trifle; spend one's time idly. [Scotch.]

The younkers a' are warned to obey,
An' mind their labours wi' an eydent hand,
An' ne'er, though out o' sight, to *jauk* or play.
Burns, Cottar's Saturday Night.

jauk (jâk), *n.* [< *jauk*, *v.*] **1.** A trifle; trifling; dallying.—**2.** An idler; trifler. *Jamieson.*

jault†, *v. i.* A former spelling of *jowl*.

'yellowness,' < OF. *jaune*, yellow: see *jaune*.] 1. In *pathol.*, a morbid state characterized by the presence of bile-pigments in the blood, which gives rise to a yellow staining of the skin and the whites of the eyes and to a dark coloring of the urine. The stools are usually light in color, and there is more or less lassitude and loss of appetite. Xanthopsy, or yellow vision, occurs in some very rare instances. Also called *icterus*.

Then on the Liver doth the *Iaundize* fall,
Stopping the passage of the cholerick Gall;
Which then, for good blood, scatters all about
Her fiery poyson, yellowing all without.
Sylvester, tr. of Du Bartas's Weeks, ii., The Furies.

Hence—2. A state of feeling or emotion that colors the view or disorders the judgment, as jealousy, envy, and the like.

Jealousy, the *jaundice* of the soul.
Dryden, Hind and Panther, iii. 73.

jaundice (jän′- or jân′dis), *v. t.*; pret. and pp. *jaundiced*, ppr. *jaundicing*. [< *jaundice*, *n.*] 1. To affect with jaundice.

All looks yellow to the *jaundiced* eye.
Pope, Essay on Criticism, l. 559.

Hence—2. To affect with prejudice or envy.

jaw[1] (jâ), *n.* [< ME. *jawe*, also *jowe*, *geowe*, an alteration (with sonant *j* for orig. surd *ch*, as also in *jowl*, *jar*[1], *jar*[2], *ajar*[2], and perhaps *jam*[1]) of ME. **chawe*, **cheowe*, found only in early mod. E. *chawe*, *chaw*, jaw (= OD. *kauwe*, the jaw of a fish (Hexam), *kouwe*, the cavity of the mouth, = Dan. *kjæve*, the jaw); appar. < ME. *cheowen*, *chewen*, mod. E. *chew*, *chaw* = OD. *kouwen*, etc., chew. The form may have been affected by association with *jowl*, ME. *jolle*, *chaul*, etc., and perhaps with F. *joue*, cheek.] **1.** One of the bones which form the skeleton or framework of the mouth; a maxilla or mandible; these bones collectively. The jaws in nearly all vertebrates are two in number, the upper and the lower. The upper jaw on each side consists chiefly of the superior maxillary or supramaxilla, and of an intermaxillary bone or premaxilla, both of which commonly bear teeth in mammals, reptiles, batrachians, and some fossil birds. The lower jaw in mammals is a single bone, the inframaxillary, inframaxilla, or mandible, or one pair of bones united at the middle line by a symphysis. In vertebrates below mammals this bone is represented by several pieces, its bony elements becoming quite complex in birds and most reptiles and many fishes. The mandible, and especially its terminal element when there are several, commonly bears teeth like the upper jaw. As a rule, it is movably articulated with the rest of the skull. In mammals this articulation is direct, and is known as the *temporomaxillary*. In birds it is indirect, by intervention of a quadrate bone; and in the lower vertebrates various other modifications occur. See cuts under *Cyclodus*, *Gallinæ*, *Felidæ*, and *skull*.

Theise Serpentes slen men, and thei eten hem wepynge; and whan thei eten, thei meven the over *Jowe*, and noughte the nether *Jowe;* and thei have no Tonge. *Mandeville*, Travels, p. 288.

2. The bones and associated structures of the mouth, as the teeth and soft parts, taken together as instruments of prehension and mastication; mouth-parts in general: commonly in the plural. In most invertebrates, as insects and crustaceans, the jaws are much complicated, and consist essentially of modified limbs, maxillipeds, gnathopods, or jaw-feet; and the opposite parts work upon each other sidewise, not up and down. Often used figuratively. See cut under *mouth-part*.

My tongue cleaveth to my *jaws*. Ps. xxii. 15.

Now, when we were in the very *jaws* of the gulf, I felt more composed than when we were only approaching it. *Poe*, Tales, I. 172.

To drop head-foremost in the *jaws*

Not related to OF. *gai*, E. *gay*[1].] 1. Any bird of the subfamily *Garrulinæ*; specifically, *Garrulus glandarius*, a common European bird, about 13 inches long, of a gray color tinged with reddish, varied with black, white, and blue, and having the head crested. The jays are birds usually of bright and varied colors, among which blue is the most conspicuous, thus contrasting with the somber crows, their nearest allies. The tail is comparatively long, sometimes extremely so,

European Jay (*Garrulus glandarius*).

as in the magpie. They are noisy, restless birds, of arboreal habits, found in most parts of the world, reaching their highest development in the warmer parts of America, where some large and magnificent species are found. With the exception of the boreal genus *Perisoreus*, the jays of the old and the new world belong to entirely different genera. The commonest and best-known jay of the United States is the blue jay, *Cyanurus cristatus* or *Cyanocitta cristata*, a bird about 12 inches long, with a fine crest, purplish-blue color on the back and purplish-gray below, a black collar, and wings and tail rich blue varied with black and white. (See cut under *Cyanocitta*.) Another crested species of the United States is Steller's jay, *C. stelleri*, resembling the last, but much darker in color, and confined to the west. The Canada jay or whiskyjack, *Perisoreus canadensis*, is a plain grayish bird. The Florida jay, *Aphelocoma floridana*, is mostly gray and blue. The Rio Grande jay, *Xanthura luxuosa*, is rich yellow, green, blue, and black. Some birds not properly belonging to the *Garrulinæ* are also called jays, and some members of this subfamily have other common names, as the magpies.

Jeanpaulia (jēn-pâl'i-ä), *n.* [NL. (Unger, 1845), appar. so called after some one named *Jean Paul*, perhaps Jean Paul Friedrich Richter.] A genus of fossil plants with flabellate, deeply dichotomously pinnatifid leaves (the linear divisions strongly nerved with parallel veins which branch dichotomously from below), amentaceous male flowers, and ovate drupaceous fruit. Before the flowers and fruit were known, these leaf-impressions were regarded as the fronds of ferns. They are now recognized as representing ancestral forms of the living genus *Ginkgo*. It occurs chiefly in the Mesozoic, ranging from the Rhetic to the Cretaceous. Modern writers mostly use the name *Baiera* of Friedrich Braun (1843), but that is properly preoccupied by the *Bajera* of Sternberg (1825), both being named for the geologist Johann Jacob Baier.

Jeffersonia (jef-ėr-sō'ni-ą), *n.* [NL. (Bartling, 1821), named in honor of Thomas *Jefferson*.] A genus of *Berberidaceæ*, containing two species of herbaceous plants, one American and one Chinese. These plants have a perennial rhizome, bearing leaves with long stalks and singular, two-divided blades, the solitary flowers borne upon naked scapes. The flower has 4 petal-like sepals, which fall as the bud opens, 8 petals, and 8 stamens. The one-celled and many-seeded capsule opens near the top as if by a lid. *J. diphylla*, called *twinleaf*, is an interesting plant, wild in the eastern interior of the United States, its white blossoms, an inch wide, appearing in April or May. From reputed stimulating properties, the plant is sometimes named *rheumatism-root*. It is also thought to possess tonic and emetic properties.

Jeffersonian (jef-ėr-sō'ni-ąn), *a.* and *n.* [< *Jefferson* (see def.) + *-ian*. The surname *Jefferson* occurs also as *Jeffrison*, *Jeffreson*, *Jeaffreson*, early mod. E. *Jeffreyson*, *Geffreyson*, etc., i. e. Jeffrey's son, *Jeffrey*, also *Geoffrey*, *Geoffroy*, being orig. the same as *Godfrey*, G. *Gottfried*, MHG. *Gotfrit*, *Gotevrit*, lit. 'God-peace': see *God* and *frith*[1].] **I.** *a.* Of or pertaining to Thomas Jefferson, third President of the United States (1801-9), and the first great leader of the Democratic (first called Anti-Federal and later Democratic-Republican) party; also, adopting the political theories held by or attributed to Jefferson.

Jeffersonianism (jef-ėr-sō'ni-an-izm), *n.* [< *Jeffersonian* + *-ism*.] The political doctrines advocated by Thomas Jefferson, based upon the greatest possible individual and local freedom, and corresponding restriction of the powers of national government.

Ultimately, *Jeffersonianism* must have prevailed, but at the time of its actual triumph it came too soon.
N. A. Rev., CXXIII. 137.

jeffersonite (jef'ėr-sọn-īt), *n.* [After Thomas *Jefferson*, the third President of the United States.] A variety of pyroxene occurring in large crystals, often with uneven faces and rounded edges, and having a dark olive-green color passing into brown. It is peculiar in containing some zinc and manganese. It occurs, with franklinite, zincite, etc., at Franklin Furnace, Sussex county, New Jersey.

jeg (jeg), *n.* [Origin obscure.] One of the templets or gages used for verifying shapes of parts in gun- and gunstock-making. *E. H. Knight*.

jegget† (jeg'et), *n.* [Appar. a var. of *jigot*, *gigot*.] A kind of sausage. *Ash*.

Jehoiada-box (jē-hoi'ą-dą-boks), *n.* [So called in allusion to the box or "chest" within which Jehoiada, at the command of Joash, King of Judah, made collections for the repair of the temple at Jerusalem (2 Chron. xxiv. 6–11).] A box, usually of iron, entirely closed with the exception of a slit in the top, intended to be used as a savings-bank.

Now all the *Jehoiada-boxes* in town were forced to give up their rattling deposits of specie, if not through the legitimate orifice, then to the brute force of the hammer.
Lowell, Cambridge Thirty Years Ago.

Jehovah (jē-hō'vą), *n.* [The common European spelling (with *j* = *y* and *v* = *w*) of *Yehōwāh* or *Yahōwāh*, the Massoretic form of the Hebrew name previously written without vowels JHVH (YHWH), the vowels of *Adōnāi* (which see) being substituted by the later Jews for those of the original name, which came to be regarded as too sacred for utterance. The original name, according to the view now generally accepted, was *Yahweh*, or rather *Yahwe*, the name appearing also contracted *Yāh*, separately (see *halleluiah*), or, as *Yāh* (*Jāh*: see *Jah*), *Yō*, *Yehō*, *Yāhu*, in compound proper names (as, in E. forms, *Isaiah*, *Jeremiah*, etc., *Joshua*, *Jeshua*, *Jesus*, *Jehoshua*: see *Jesus*), transliterated in late Greek variously *Ἰαβέ*, *Ἰαυέ*, *Ἰαουέ*. The origin and meaning of the name are unknown. It was formerly referred to the Hebrew root *hāwāh*, be, exist, and was taken to imply self-existence, 'he that is' ('I am that I am,' Ex. iii. 14; more correctly 'I shall be what I shall be'), or else eternity. Some modern scholars would translate the name as 'he who causes to be,' i. e. the Creator, while others connect it with an Aramaic sense 'fall,' as if 'he who causes (rain or lightning) to fall,' this explanation being paralleled by similar terms associated with the Greek Zeus. Others, in view of the fact that a metaphysical notion like 'self-existence' does not elsewhere appear in the names of the deities of primitive peoples, regard the Hebrew derivation as a piece of popular etymology (somewhat like that which in English associates the name *God* with *good*), and seek to identify *Yahwe* with some Assyrian or other foreign deity.] 1. In the Old Testament, one of the names of God as the deity of the Hebrews: in the English version usually translated, or rather represented, by "the LORD." See etymology. The Jews, since an early date, have avoided the pronunciation of this name of God, and wherever it occurs in the sacred books have substituted the word *Adonai*, or, where it comes in conjunction with *Adonai*, have substituted *Elohim*.

And I appeared unto Abraham, unto Isaac, and unto Jacob, by the name of God Almighty, but by my name JEHOVAH was I not known to them. Ex. vi. 3.

Father of all! in every age,
In every clime adored,
By saint, by savage, or by sage,
Jehovah, Jove, or Lord!
Pope, Universal Prayer.

2. In modern Christian use, God.

Jehovist (jē-hō'vist), *n.* [< *Jehovah* + *-ist*.] 1. The supposed author of certain passages of the Pentateuch in which God is always spoken of as *Jehovah*. Also *Jahvist*. See *Elohist*.—2. One who maintains that the vowel-points annexed to the word *Jehovah* in Hebrew are the proper vowels of the word, and express the true pronunciation. The *Jehovists* are opposed to the *Adonists*, who hold that the points annexed to the word *Jehovah* are the vowels of *Adonai* or of *Elohim*. See *Adonist*, *Jehovah*.

Jehovistic (jē-hō-vis'tik), *a.* [< *Jehovist* + *-ic*.] Characterized by the exclusive use of the name Jehovah for God: applied to certain passages of the Pentateuch, or to the writer or writers of these passages. Also *Jahvistic*. See *Elohistic*.

Jehu (jē'hū), *n.* [In allusion to 2 Ki. ix. 20: "The driving is like the driving of *Jehu*, the son of Nimshi; for he driveth furiously."] 1. A fast driver; a person fond of driving. [Colloq.]

A pious man . . . may call a keen foxhunter a Nimrod, . . . and Cowper's friend, Newton, would speak of a neighbour who was given to driving as *Jehu*.
Macaulay, Comic Dramatists of the Reformation.

2. A driver; a coachman. [Colloq.]

At first it was not without fear that she intrusted herself to so inexperienced a coachman; "but she soon . . . raised my wages, and considered me an excellent *Jehu*."
Lady Holland, Sydney Smith, vi.

jehup (jē'up), *v. t.* A variant form of *gee up*. See *gee*[2].

May I lose my Otho, or be tumbled from my phaeton the first time I *jehup* my sorrels, if I have not made more haste than a young surgeon in his first labour.
Foote, Taste, ii.

jeistiecor (jēs'ti-kôr), *n.* A corruption of *juste-au-corps*. Compare *justico*. [Scotch and North. Eng.]

The government is held of the Pope by an annual tribute of 40,000 ducats and a white *genet.*
Evelyn, Diary, Feb. 8, 1645.

They were mounted a la gineta, that is, on the light *jennet* of Andalusia—a cross of the Arabian. *Prescott.*

jennet[2], *n.* See *genet*[2].

jenneting (jen′et-ing), *n.* [Formerly also *jenniting, genniting, geneting, geniting, ginniting,* also *jenetin, geniton,* the term. being conformed to that of *hasting* (see quotation from Holland), *sweeting,* and other apple-names, and the first syllable conformed to that of E. *Jenkin, Jenny, Jinny,* etc., from the same ult. source: < OF. *Janet,* earlier *Jchannet, Jchennet,* and *Janot, Jannot,* earlier *Jeanot, Jeannot, Jchannot* (with corresponding fem. *Jehannette, Jeannette, Jeanneton,* E. *Janet,* etc.), dim. of OF. *Jan, Jean, Jehan,* etc., ME. *Jan, Jon,* etc., E. *John,* a personal name; in reference to St. John's apple, OF. *pomme de St. Jean;* so called, it seems, because, like a certain pear similarly named *Amire Joannet,* or *Joannet,* or *Jeannette,* or *Petit St. Jean,* it is ripe in some places as early as St. John's day (June 24th). Cf. ME. *perc-ionettes,* Jeannot pears (Piers Plowman (C), xiii. 221). The apple called *John-apple* or *apple-john,* which does not ripen till late in the season, being considered in perfection when withered (see *apple-john*), may owe its name to another cause. See *John.* The explanation attempted in the perverted form *June-eating* (through *junetin,* in Bailey) is absurd.] A kind of early apple.

Apple trees live a very short time: and of these the hastic kind, or *jenitings,* continue nothing so long as those that bear and ripen later. *Holland*, tr. of Pliny, xvi. 44.

In July come . . . plums in fruit, *gennitings,* quodlins.
Bacon, Gardens (ed. 1887).

Thy sole delight is, sitting still,
With that gold dagger of thy bill
To fret the summer *jenneting.*
Tennyson, The Blackbird.

Jennie harp. See *harp-seal.*

jenny (jen′i), *n.*; pl. *jennies* (-iz). [A familiar ★use in various senses of the common fem. name *Jenny,* vulgarly *Jinny, Jen, Jin,* early mod. E. *Jeny,* another form of *Janie, Janey,* dim. of *Jane,* < F. *Jeanne* (< ML. *Joanna*), fem. of *Jean,* < LL. *Joannes,* John: see *John.* Cf. *jenneting.* The spinning-jenny (called in F., after E., *jeannette*) (def. 4) is said to have been so named by Arkwright after his wife, *Jenny;* but according to a grandson of Jacob Hargreaves, the inventor, it is a corruption of *gin,* a contraction of *engine* (Webster's Dict., ed. 1864). *Gin* would easily suggest *Jin, Jinny, Jenny,* familiar personal names being often attached to mechanical contrivances (cf. *jack*[1], *jemmy*[1], *betty,* etc.); but in the present case there is prob. an allusion to E. dial. *jenny-spinner, jinny-spinner,* the crane-fly, also called in Sc. *spinning-Maggie* and *Jenny Nettles.*] **1.** A female bird: used especially as a prefix, as in *jenny*-heron, *jenny*-howlet, *jenny*-jay, *jenny*-wren, etc. [Prov. Eng.] Specifically —**2.** A wren: usually called *jenny-wren.*—**3.** A female ass: also called *jenny-ass.*

Down trots a donkey to the wicket-gate,
With Mister Simon Gubbins on his back; . . .
"*Jenny* be dead, Miss — but I'ze brought ye Jack;
He doesn't give no milk — but he can bray."
Hood, Ode to Rae Wilson.

That he should *jeopardize* his wilful head
Only for spite at me!—'Tis wonderful!
Sir H. Taylor, Ph. van Artevelde, II., iii. 11.

Yes, I have lost my honor and my wife,
And, being moreover an ignoble hound,
I dare not *jeopardize* my life for them.
Browning, Ring and Book, I. 188.

jeopardless† (jep′ärd-les), *a.* [< *jeopard(y)* + *-less.*] Without jeopardy, or hazard or danger.

Better is it therfore to embrace thys libertie, yf it be eyther in thy power, or *ieopardles.* *J. Udall*, On 1 Cor. vii.

jeopardous† (jep′är-dus), *a.* [< *jeopardy* + *-ous.*] Exposed to jeopardy or danger; perilous; hazardous.

The fore-fronts or frontiers of the two corners [of Utopia], what with boards and shelves, and what with rocks, be *jeopardous* and dangerous.
Sir T. More, Utopia (tr. by Robinson), ii. 1.

If a man lead me through a *jeopardous* place by day, he cannot hurt me so greatly as by night.
Tyndale, Ans. to Sir T. More.

jeopardously† (jep′ärdus-li), *adv.* In a jeopardous manner; with risk or danger; hazardously.

jeopardy (jep′ärdi), *n.* [Early mod. E. also *jeopardie, jeoperdie;* < ME. *jepardie, jeopardie, jopardie, jeperdie, jeupardye* (appar. simulating OF. *jeu perdu,* a lost game), more correctly *jupartie, jupertie,* < OF. *jeu parti,* lit. a divided game, i. e. an even game, an even chance, < ML. *jocus partitus,* an even chance, an alternative: L. *jocus* (> OF. *jeu*), jest, play, game; *partitus* (> OF. *parti*), pp. of *partire,* divide: see *joke* and *party.*] **1**†. An even chance; a game evenly balanced; also a problem in chess.

Myn estat now lyth in *jupartie*.
Chaucer, Troilus, ii. 465.

But God wolde, I had oones or twyes
Yconde and knowe the *jeupardyes*
That cowde the Greke Pictagoras,
I shulde have pleyde the bet at ches.
Chaucer, Death of Blanche, l. 666.

2. Exposure to death, loss, or injury; hazard; danger; peril. A person is in *legal jeopardy*, within the constitutional protection against being put twice in jeopardy for the same offense, when he is put upon trial, before a court of competent jurisdiction, upon indictment or information which is sufficient in form and substance to sustain a conviction, and a jury has been sworn, unless such jury, without having rendered a verdict, were discharged for good cause (or, according to some authorities, by absolute necessity), or by the consent of the accused.

Happy is he that can beware by another man's *jeopardy*.
Latimer, 2d Sermon bef. Edw. VI., 1549.

Is not this the blood of the men that went in *jeopardy* of their lives? 2 Sam. xxiii. 17.

=**Syn. 2.** *Peril*, etc. See *danger* and *risk*.

jepard†, **jepardy**†. Obsolete forms of *jeopard*, *jeopardy*.

jequirity beans. See *Abrus*.

jerboa (jėr-bō′ą or jėr′bō-ą), *n.* [Also *gerbo*, *gerboa*, *gerbua*, < NL. *jerbōa*, < Ar. *yarbū'*, in Barbary *yerbō'*, the jerboa, also the flesh of the back and loins. The name alludes to the strong muscles of the animal's hind legs.] A rodent quadruped of the family *Dipodidæ*, subfamily *Dipodinæ*, and especially of the genus *Dipus;* a gerbil, or jumping-mouse of the old world. There are about 30 species, of three genera, *Dipus*, *Alactaga*, and *Platycercomys*. The best known, and the one to which the native name has special reference, is *Dipus ægypticus*, a curious and interesting animal

Jerboa (*Dipus ægypticus*).

of the deserts of Africa, living in communities in extensive and intricate underground galleries. The hind legs of the animal are extremely long, and so great is its power of jumping that it seems hardly to touch the ground as it bounds along. The metatarsals are very elongate and are united to form one bone, as is the case among birds. The tail of the jerboa is longer than the body, very slender, and tufted at the end, and may serve as a balance during the flying leaps. The fore feet are very short; the ears are large and rounded. The size of the animal is 6 or 8 inches without the tail, and the general aspect is that of the rat or mouse, the jerboas belonging to the myomorphic group of rodents.

jerboa-mouse (jėr′bō-ą-mous), *n.* An animal of the genus *Dipodomys*, of North America; one of the pouched mice, pocket-mice, or kangaroo-rats. See *Dipodomys*.

In tourney light the Moor his *jerrid* flings.
Scott, Vision of Don Roderick, st. 25.

Right through ring and ring runs the *djereed*.
Southey.

2. A game in which this javelin is used.

jeremejeffite (properly yer-e-me′yef-īt), *n.* [After a Russian mineralogist, *Jeremejeff*.] A rare borate of aluminium found near Adun-Tschilon in Siberia. It occurs in colorless hexagonal crystals resembling beryl.

jeremiad, jeremiade (jer-ē-mī′ad), *n.* [< F. *jérémiade;* as *Jeremiah* + *-ad*[1], as in *Iliad*, etc.: so called in reference to the "Lamentations of Jeremiah," one of the books of the Old Testament.] Lamentation; an utterance of grief or sorrow; a complaining tirade: used with a spice of ridicule or mockery, implying either that the grief itself is unnecessarily great, or that the utterance of it is tediously drawn out and attended with a certain satisfaction to the utterer.

He has prolonged his complaint into an endless *jeremiad*.
Lamb, To Southey.

It is impossible to describe the mournful grandeur with which he used to open his snuff-box, take a preliminary pinch, fold and unfold the sombre bandanna, and launch into a *jeremiad* as to the prospects of Protestantism, more dismal than any ever uttered by the rivers of Babylon.
Quarterly Rev., CXLVI. 204.

Jeremianic (jer″ē-mī-an′ik), *a.* [< *Jeremiah* (see def.) + *-an* + *-ic*.] Of or pertaining to the prophet Jeremiah.

There are some portions of the book the *Jeremianic* authorship of which has been entirely or in part denied.
Encyc. Brit., XIII. 628.

jerfalcon (jėr′fâ″kn), *n.* The etymologically correct spelling of *gerfalcon*.

jergue, *v. t.* See *jerk*[2].

jerguer, *n.* See *jerker*[2].

Jericho (jer′i-kō), *n.* [With ref. to *Jericho* in Palestine, esp., in def. 1 and the second phrase, in allusion to 2 Sam. x. 4, 5: "Wherefore Hanun took David's servants, and shaved off the one half of their beards, . . . and sent them away. . . . And the king said, Tarry at Jericho until your beards be grown, and then return."] **1.** A place of tarrying—that is, a prison.—**2.** A place very distant; a remote place: as, to wish one in *Jericho*.—**From Jericho to June,** a great distance.

His kick was tremendous, and when he had his boots on would—to use an expression of his own, which he had picked up in the holy wars—would send a man *from Jericho to June*.
Barham, Ingoldsby Legends (Grey Dolphin).

To stay or tarry in Jericho (until one's beard is grown), to wait in retirement or obscurity (until one grows wiser).

Who would, to curbe such insolence, I know,
Bid such young boyes to *stay in Jericho*
Untill their beards were growne, their wits more staid.
Heywood, Hierarchie, iv. 208.

[Humorous in all senses and applications.]

jerid, *n.* See *jereed*.

jerk[1] (jėrk), *v.* [Recorded (first in latter part of the 16th century) in 3 forms: (1) *jerk* (*ierk*, n., Levins, 1570), *jerke;* (2) *gerke* (Minsheu, 1627), cf. "*girk*, a rod, also to chastise or beat" (Halliwell); (3) *yerk*, E. dial. and Sc. *yerk*, *yark:* orig. strike or beat, esp. with a whip or rod. The typical form is *yerk*, the initial *j* and *g* being palatal, and not sibilant. Origin uncertain; an equiv. term *jert* (Cotgrave) suggests that all these forms are dial. variations of the older *gird*, which has the same sense. See *yerk*.] **I.** *trans.* **1.** To strike or beat, as with a whip or rod; strike smartly. [Now only Scotch.]

With that which *jerks* the hams of every jade.
Bp. Hall, Satires, III. v. 26.

Fouetter [F.], to scourge, lash, *yerke* or *jerk*. *Cotgrave*.

Now I am fitted!
I have made twigs to *jerk* myself.
Shirley, Hyde Park, iii. 2.

2. To pull or thrust with sudden energy; act upon with a twitching or snatching motion; move with quick, sharp force: often with a word or words of direction: as, to *jerk* open a door; the horse *jerked* out his heels.

I snatched at the lappets of his coat, and *jerked* him into Mrs. Wellmore's parlor.
F. W. Robinson, Lazarus in London, iv. 10.

In attempting to dash through a thicket, his hat has been *jerked* from his head, his powder-horn and shot-pouch torn from around his neck.
W. M. Baker, New Timothy, p. 202.

We poor puppets, *jerked* by unseen wires.
Lowell, Commemoration Ode.

3. To throw with a quick, sharp motion; specifically, to throw with the hand lower than the elbow, with an impulse given by sudden collision of the forearm with the hip: as, to *jerk* a stone.

II. *intrans.* **1.** To make a sudden spasmodic motion; give a start; move twitchingly.

Nor blush, should he some grave acquaintance meet,
But, proud of being known, will *jerk* and greet. *Dryden*.

He was seized with that curious nervous affection which originates in these religious excitements, and disappears with them. He *jerked* violently—his *jerking* only adding to his excitement, which in turn increased the severity of his contortions. *E. Eggleston*, Circuit Rider, xiv.

2†. To sneer; carp; speak sarcastically.

By the way he *jerkes* at some mens reforming to models of Religion. *Milton*, Eikonoklastes, viii.

jerk[1] (jėrk), *n.* [< *jerk*[1], *v.*] **1.** A short, sharp pull, thrust, or twitch; a sudden throw or toss; a jolt; a twitching or spasmodic motion.

His jade gave him a *jerk*. *B. Jonson*, Underwoods.

The Ship tossed like an Egg-shell, so that I never felt such uncertain *Jerks* in a Ship. *Dampier*, Voyages, I. 82.

2. A sudden spring or bound; a start; a leap; a sally.

Ovidius Naso was the man; and why, indeed, Naso, but for smelling out the odoriferous flowers of fancy, the *jerks* of invention? *Shak.*, L. L. L., iv. 2, 129.

3. An involuntary spasmodic contraction of a muscle, due to reflex action resulting from a blow or other external stimulus. Thus, a blow upon the ligament of the patella, below the knee-cap, produces spasmodic contraction of the extensor muscles of the leg, which is straightened with a jerk. This is technically called *knee-jerk*, and the same action in other parts receives qualifying terms, as *chin-jerk*, etc.

4. *pl.* The paroxysms or violent spasmodic movements sometimes resulting from excitement in connection with religious services. Specifically called *the jerks*. [Western and southern U. S.]

These Methodis' sets people crazy with *the jerks*, I've hearn tell. *E. Eggleston*, Circuit Rider, xii.

5†. A sneer; sarcasm.

The question ere while mov'd who he is . . . may returne with a more just demand, who he is not of place and knowledge never so mean, under whose contempt and *jerk* these men are not deservedly falne?
Milton, Apology for Smectymnuus.

jerk[2], **jerque** (jėrk), *v. t.* [Sometimes spelled *jergue* (cf. deriv. *jerker*[2], less commonly *jerquer*, *jerguer*); prob. an accom. form, < It. *cercare* (pron. cher-kä′re), search (cf. *cercatore*, *cercante*, a searcher): see *search*.] In the English custom-house, to search, as a vessel, for unentered goods.

jerk[3], **jerky**[2] (jėrk, jėr′ki), *n.* [< Quichua *charqui*, dried meat.] Meat cut into strips and cured by drying it in the open air.

As soon as daylight appears, the captain started to where they left some *jerk* hanging on the evening before.
W. De Hass, Hist. Early Settlements, p. 389.

jerk[3] (jėrk), *v. t.* [Chiefly as pp. adj., in the phrase *jerked beef;* < *jerk*[3], *n.*] To cure, as meat, especially beef, by cutting into long thin pieces and drying in the sun.

When he [the Rocky Mountain hunter] can get no fresh meat, he falls back on his stock of *jerked* venison, dried in long strips over the fire or in the sun.
The Century, XXXVI. 832.

jerker[1] (jėr′kėr), *n.* [< *jerk*[1] + *-er*[1].] **1.** One who jerks; one who moves something in a quick, spasmodic way; in the quotation, one who whips or lashes.

Let 'em alone, Frank; I'll make 'em their own justice, and a *jerker*. *Fletcher*, Wit without Money, iv. 3.

2. One who makes quick, spasmodic motions; especially, one who suffers from involuntary spasmodic movements of the limbs or features.

In Roman Catholic countries these manifestations, as we have seen, have generally appeared in convents. . . . In Protestant countries they appear in times of great religious excitement, and especially when large bodies of young women are submitted to the influence of noisy and frothy preachers. Well-known examples of this in America are seen in the "Jumpers," *Jerkers*, and various revival extravagances. *Pop. Sci. Mo.*, XXXV. 148.

3. A cyprinoid fish, *Hybopsis kentuckiensis:* same as *hornyhead*.

jerker[2], **jerquer** (jėr′kėr), *n.* [Also written *jerguer:* see *jerk*[2].] In the English custom-house, an officer who searches vessels for unentered goods. [Colloq.]

I have heard tell that she's three parts slaver and one part pirate; and I wonder the custom-house *jerkers* don't seize her. *Sala*.

jerkin[1] (jėr′kin), *n.* [Also (Sc.) *jirkin;* prob. of D. origin (see 1st quot.), < OD. **jurkken* or **jurken*, < *jurk*, a frock, + dim. *-ken*, E. *-kin*.] A short close-fitting coat or jacket, worn in the sixteenth and seventeenth centuries. The term is used loosely to include on the one hand the doublet, and on the other the buff-coat, at least in some of its forms; it was even used for a surcoat, or coat worn over armor.

With dutchkin dublets, and with *Jerkins* iaggde.
Gascoigne, Steele Glas (ed. Arber), p. 83.

And all kinde of leather ware, as gloues, poyntes, gyrdles, skins for *ierkins*.
Stafford, A Briefe Conceipt (1581), ed. Furnivall, p. 88.

jeshamy (jesh'a-mi), *n.* A corruption of *jasmine*. [Colloq., Eng.]

jess (jes), *n.* [Usually in pl. *jesses*; < ME. *ges*, < OF. *ges, gies, giez, gets*, or without nom. *-s, get, giet*, later as pl. *gects*, F. *jet* = Pr. *get* = It. (obs.) *geto*, < ML. *jactus*, a jess: so called from their use in letting the hawk fly, being the same as OF. *get, giet*, later *gect, ject*, F. *jet*, < L. *jactus*, a throw, cast: see *jet*[1].] A short strap, usually of leather, sometimes of silk or other material, fastened about the leg of a hawk used in falconry, and continually worn. The leash, when used, is secured to this. But the term *jess* must be taken to include a short thong with a ring at the end, which is rather the leash and varvel of actual falconry than the jess proper. This is the heraldic use of the term. See cut under *à-la-cuisse*.

If I do prove her haggard,
Though that her *jesses* were my dear heart-strings,
I'd whistle her off, and let her down the wind,
To prey at fortune. *Shak.*, Othello, iii. 3, 261.

Soar ye ne'er so high,
I have the *jesses* that will pull you down.
Marlowe, Edward II., ii. 2.

Diet and seeling, *jesses*, leash and lure.
Tennyson, Merlin.

jess (jes), *v. t.* [< *jess, n.*] To secure with jesses; place the jesses on.

Both hawks are hooded and *jessed* exactly as in the old knightly days. *Harper's Mag.*, LXXVII. 82.

Jessed and belled, in *her.* See *falcon*, 1.

jessamine, jessamin (jes'a-min), *n.* [See *jasmine*.] **1.** Same as *jasmine*.

The tufted crow-toe, and pale *jessamine*.
Milton, Lycidas, l. 143.

All night has the casement *jessamine* stirr'd
To the dancers dancing in tune.
Tennyson, Maud, xxii.

2. In *her.*, the tincture white or argent in blazoning by the system of flowers.

jessamy† (jes'a-mi), *n.* and *a.* [A corruption of *jessamine*.] **I.** *n.* **1.** The jasmine. — **2.** A dandy: so called, it is said, because it was a habit of fops to wear a sprig of jasmine in their buttonhole.

My labour, however, was not without its reward; it recommended me to the notice of the ladies, and procured me the gentle appellation of *Jessamy*.
Hawkesworth, Adventurer, No. 100.

II. *a.* Like jasmine in color or perfume.

Towards evening, I took them out to the New Exchange, and there my wife bought things, and I did give each of them a pair of *jesimy* plain gloves, and another of white.
Pepys, Diary, II. 482.

jessant (jes'ant), *a.* [Appar. intended for OF. *jettant, jactant*, pushing forth, throwing out (ppr. of *jetter*: see *jet*[1]), but prob. orig. *iessant* for **issant*, < OF. *issant*, ppr. of *isser, eisser, iesser*, issue: see *ish*, and cf. *issuant*. The form is like OF. *jesant, gesant* (F. *gissant*), ppr. of *gesir*, < L. *jacere*, lie.] In *her.*: (*a*) Shooting up as a plant. (*b*) Emerging: nearly the same as *issuant*, but applied especially to an animal which appears to emerge from the middle of an ordinary or the like, instead of its upper edge. — **Jessant-de-lis**, in *her.*, having a fleur-de-lis passing through it and showing below as well as above: used commonly of the head of a creature, as a leopard, through which the fleur-de-lis seems to have been drawn.

Jessant-de-lis.

Jesse[1] (jes'ē), *n.* The name of the father of David and ancestor of Jesus, used in several phrases with reference to Isa. xi. 1: "And there shall come forth a rod out of the stem of Jesse, and a Branch shall grow out of his roots." — **Jesse candlestick.** (*a*) A branched candlestick in which the branches are made to serve the purpose of the genealogical tree of Christ's descent from Jesse. See *tree of Jesse*, below. (*b*) By extension and erroneously, any large and showy branched candlestick or chandelier intended for ecclesiastical use. — **Jesse window**, a painted window containing a tree of Jesse. — **Tree of Jesse**, a decorative genealogical tree representing the genealogy of Christ, the figure of Jesse being the root, and the branches bearing the names and often representations of his descendants. This was a design frequently carried out in the middle ages in stained glass or wall decoration, in sculpture, in the form of a branched candlestick, etc.

Jesse[2] (jes'ē), *n.* [Also written *Jessie, Jessy*; appar. of local origin, with some orig. ref. to some one named *Jesse* or *Jessie*.] A term occurring only in the following phrase: — **To give one Jesse** (sometimes, **to give one particular Jesse**), to give one a good scolding or dressing; punish one severely. [Slang, U. S.]

jesserant†, **jesseraunt**† (jes'ē-rant), *n.* [Also *jagerant, jazerant, jazerent, jaserant, jaserine, jazerant*; ME. *jasserant, jesseraunt, gesseraunt*, < OF. *gesseron, jazeran, jaseran* (also *jesseran*), a chain-mail shirt, bracelet, or necklace, F. *jaseron*, braid, = Pr. *jazeran* = Pg. *jazerão*; cf. Sp. *jacerina* = Pg. *jazerina* = It. *ghiazzerino*, a coat of mail, cuirass; said to be of Ar. (Algerian) origin.] Splint armor, whether the splints were fastened together with links of steel wire, as in Moslem armor, or by silk twist, as in Japanese armor, or as in European lobster-tail or crevisse armor.

A *jazerent* of double mail he wore.
Southey, Joan of Arc, vii.

jest[1] (jest), *n.* [In the older sense still written, archaically, *gest*; < ME. *geste*, rarely *jeste*, a story, a tale, prop. a tale of adventure or exploits, afterward extended to mean any entertaining tale or anecdote, orig. a deed or exploit, < OF. *geste*, an exploit, a tale of exploits: see *gest*[2], *gesture*.] **1**†. An act; deed; achievement; exploit; gest. See *gest*[2], *n.*, 1.

There [in Homer] may the *jestes* of many a knight be read, Patroclus, Pyrrhus, Ajax, Diomed.
Jasper Heywood, in Cens. Lit., ix. 393. (*Nares.*)

2†. A tale of achievement or adventure; a story; romance. See *gest*[2], *n.*, 2. — **3**†. A mask; masquerade; pageant.

He promised us, in honour of our guest,
To grace our banquet with some pompous *jest*.
Kyd, Spanish Tragedy, i.

4. A spoken pleasantry; a laughable or intentionally ludicrous saying; a witticism; a joke; a sally.

A *jest's* prosperity lies in the ear
Of him that hears it, never in the tongue
Of him that makes it. *Shak.*, L. L. L., v. 2, 871.

The *jests* that flash'd about the pleader's room,
Lightning of the hour, the pun, the scurrilous tale.
Tennyson, Aylmer's Field.

5. An acted pleasantry; a jocular or playful action; something done to make sport or cause laughter.

The image of the *jest* [the plot against Falstaff]
I'll show you here at large.
Shak., M. W. of W., iv. 6, 17.

To cozen their consciences, they hired certain Janizaries to force them aboard: who took their money, and made a *jest* of beating them in earnest.
Sandys, Travailes, p. 109.

6. The object of laughter, sport, or mockery; a laughing-stock.

And where there is no difference in men's worths,
Titles are *jests*. *Beau. and Fl.*, King and No King, i. 1.

She is such a desperate scholar that no country gentleman can approach her without being a *jest*.
Steele, Spectator, No. 113.

Be this a woman's fame; with this unblest,
Toasts live a scorn, and queens may die a *jest*.
Pope, Moral Essays, ii. 282.

In jest, in sport; for mere diversion; not in earnest; playfully.

He spak a word *in jest*;
Her answer wasna good.
The Laird of Waristoun (Child's Ballads, III. 108).

Tell him that he loves *in jest*,
But I in earnest. *Quarles*, Emblems, v. 1.

To break a jest. See *break*. — **Syn. 4.** *Jest, Joke*; quip, quirk, witticism, sally. A *joke* is often rougher or less delicate than a *jest*, as a practical *joke*, but *jest* often suggests more of lightness or scoffing than *joke*, as to turn everything into *jest*. *Joke* is the word to be used where action is implied; *jest* is generally applied to something said.

Of all the griefs that harass the distress'd,
Sure the most bitter is a scornful *jest*.
Johnson, London, l. 165.

Link towns to towns with avenues of oak,
Enclose whole downs in walls — 'tis all a *joke!*
Pope, Imit. of Horace, II. ii. 261.

jest[1] (jest), *v.* [< ME. *gesten*, tell romantic tales, < *geste*, a tale, etc.: see *gest*[2], *v.*] **I.** *intrans.* 1†. To tell stories or romances. See *gest*[2], *v.*

I can not *geste*, rum, raf, ruf, by letter [*i. e.* in alliterative verse].
Ne, God wot, rym hold I but litel better.
Chaucer, Prol. to Parson's Tale, l. 43.

2. To trifle (with); amuse or entertain by words or actions; treat as trifling.

By my life, captain,
These hurts are not to be *jested* with.
Beau. and Fl., Knight of Malta, ii. 1.

3. To say or do something intended to amuse or cause laughter.

Earl Limours
Drank till he *jested* with all ease, and told
Free tales, and took the word and play'd upon it.
Tennyson, Geraint.

4†. To take part in a mask or sport; engage in mock combat; just.

As gentle and as jocund, as to *jest*,
Go I to fight. *Shak.*, Rich. II., i. 3, 95.

II. *trans.* 1. To utter in jest or sport. [Rare.]

If jest is in you, let the jest be *jested*. *Ruskin.*

2. To apply a jest to; joke with; banter; rally.

He *jested* his companion upon his gravity.
G. P. R. James.

jest[2] (jest), *adv.* A common dialectal form of *just*[1].

jest-book (jest'bůk), *n.* A book containing a collection of jests, jokes, or funny stories or sayings.

jestee (jes-tē'), *n.* [< *jest*[1] + *-ee*[1].] The person on whom a jest is passed. [Rare.]

The Mortgager and Mortgagee differ, the one from the other, not more in length of purse than the Jester and *Jestee* do in that of memory.
Sterne, Tristram Shandy, i. 12.

jester (jes'tėr), *n.* [< ME. *gestour, gestiour*, < *gesten*, tell jests: see *jest*[1], *v.*] 1†. A story-teller; a reciter of tales, adventures, and romances.

Gestiours, that tellen tales
Bothe of wepinge and of game.
Chaucer, House of Fame, l. 1198.

The conteurs and the *jestours* . . . were literally, in English, tale-tellers, who recited either their own compositions or those of others, consisting of popular tales and romances. *Strutt*, Sports and Pastimes, p. 261.

2. One who is addicted to jesting; one who is given to witticisms, jokes, and pranks.

When he [Southey] writes nonsense we generally read it with pleasure, except indeed when he tries to be droll. A more insufferable *jester* never existed.
Macaulay, Southey's Colloquies.

3. A court-fool or professed sayer of witty things and maker of amusement, maintained by a prince or noble in the middle ages and later. The dress of the jester was usually showy, or even gaudy, and toward the end of the time when jesters were employed it was always typically party-colored or motley; but, as the jesters in some early courts were men of considerable intellectual ability, and in some cases of good family, their dress was not always conspicuously distinguished from that of those with whom they mingled. The bauble, sometimes very small and of rich materials, was the only certain badge of the jester's employment. The fools of Shakspere's plays indicate a certain lowering of the rank of the jester in the sixteenth and seventeenth centuries. So far as is known, the last one employed in England was Archie Armstrong (died 1672), in the court of James I., and afterward of Charles I. See *cockscomb, bauble*[2], *motley*.

Feste, the *jester*, my lord; a fool that the lady Olivia's father took much delight in. *Shak.*, T. N., ii. 4, 11.

Jesters' helmet, a kind of helmet bearing unusual ornaments, such as horns, or having the vizor shaped in rude imitation of a face.

jesting (jes'ting), *p. a.* [Ppr. of *jest*[1], *v.*] 1. Given to jesting; playful: as, a *jesting* humor. — 2. Fit for joking; proper to be joked about.

He will find that these are no *jesting* matters.
Macaulay, Hist. Eng., xv.

jesting-beam (jes'ting-bēm), *n.* In *building*, a beam introduced for appearance, and not for use.

jestingly (jes'ting-li), *adv.* In a jesting or playful manner; not in earnest.

jesting-stock (jes'ting-stok), *n.* A laughing-stock; a butt for ridicule. [Rare.]

I love thee not so ill to keep thee here,
A *jesting-stock*.
Beau. and Fl., Scornful Lady, v. 2.

jest-monger (jest'mung″gėr), *n.* A retailer of jests; a joker.

Some witlings and *jest-mongers* still remain
For fools to laugh at. *J. Baillie.*

jestword (jest'wėrd), *n.* An object of jests or ridicule; a laughing-stock; a byword; a butt.

The *jestword* of a mocking band. *Whittier.*

Jesuate (jez'ū-āt), *n.* [Also *Jesuat*, < It. *Gesuato*, < *Gesú*, Jesus: see *Jesus*. Cf. *Jesuit.*] A member of a monastic order founded by the Italian Colombini, and confirmed by Urban V. about 1367. Until 1606 it was composed entirely of laymen, who cared for the poor and sick. From the fact that they distilled alcoholic liquors at some of their houses, they were called *Aqua-vitæ fathers*. The order was suppressed in 1668.

Jesuit (jez'ū-it), *n.* [< F. *Jesuite*, now *Jésuite* = Sp. *Jesuita* = Pg. *Jesuita* = It. *Gesuita* = D. *Jezuït, Jezuïct* = G. Dan. Sw. *Jesuit*, < NL. *Jesuita*, so called (first, it is said, by Calvin, about 1550) from the name given to the order by its founder (NL. *Societas Jesu*, 'the Company (or Society) of Jesus'), < L. *Jesus* + *-ita*, E. usually *-ite*[2].] 1. A member of the "Society of Jesus" (or "Company of Jesus"), founded by Ignatius Loyola in 1534 and confirmed by the Pope in 1540. Its membership includes two general classes, laymen, or temporal coadjutors, and priests; and six grades, namely, novices, formed temporal coadjutors, approved scholastics, formed spiritual coadjutors, the professed of three vows, and the professed of four vows. The applicant for admission to the order must be at least fourteen years old, and the last vows cannot usually be taken before the end of the studies. After a two years' novitiate the lay brothers become temporal coadjutors, and the candidates for the priesthood are advanced to the grade of scholastics. A rigorous course of study follows for fourteen or fifteen years, divided into three nearly equal periods of academic or collegiate study, teaching and study combined, and a course in theology. At the end of this time the scholastic enters on another short novitiate, after which he may become either a spiritual coadjutor or one of the professed. The three vows are voluntary poverty, perfect chastity, and perfect obedience; and the fourth vow is absolute submission to the Pope. The professed of the four vows are the most influential class; they form the general congregation, and fill the highest offices and the leading missions. The general is elected for life by the general congregation. He has great power, limited only by the constitutions, and is aided by a council of assistants. He ordinarily resides at Rome, and is subject only to the Pope. There is an elaborate organization, divided into five "assistancies," subdivided into provinces, each of which is administered by a provincial, and each provincial has "superiors," rectors, etc., as subordinates. Two features characterize the system thus organized — absolute obedience and a perfect system of scrutiny. It is the combination of these two principles which has made the order of Jesuits such a power in the church. So formidable has their political influence been supposed to be that they have often been expelled even from Roman Catholic communities. They were expelled from France in 1594, restored in 1603, again expelled in 1764, and for the last time in 1880. They were expelled from Spain in 1767, and at different times from various other countries. In 1773 the order was suppressed by Pope Clement XIV., but it was revived in 1814. It is believed now to number about ten thousand members.

One whom the mob, when next we find or make
A popish plot, shall for a *Jesuit* take.
Pope, Satires of Donne, iv. 35.

2. A crafty or insidious person; an intriguer: so called in allusion to the crafty and intriguing methods commonly ascribed to the Jesuits. — 3. [*l. c.*] A dress worn by women in the latter part of the eighteenth century; a kind of indoor morning-gown. *Fairholt.* — **Jesuit lace.** See *lace.* — **Jesuits' bark,** Peruvian bark; the bark of certain species of *Cinchona*. It is so called because it was first introduced into Europe by the Jesuits. — **Jesuits' Bark Act.** See *bark*[2]. — **Jesuits' drops,** a balsamic preparation formerly in repute as a pectoral and vulnerary: same as *friars' balsam* (which see, under *friar*). — **Jesuits' nut,** a name sometimes given to the fruit of *Trapa natans*, the water-chestnut. — **Jesuits' powder,** powdered cinchona bark. — **Jesuits' tea,** *Elæodendrum quadrangulatum*, or its leaves. See *mate*[4], and *Paraguay tea*, under *tea*. — **Jesuit style,** in *arch.* See *baroque*, 2.

Jesuit (jez'ū-it), *v. t.* [< *Jesuit*, *n.*] To cause to conform to the principles of the Jesuits; make a Jesuit of.

Jesuitess (jez'ū-it-es), *n.* [< NL. *Jesuitissa*; as *Jesuit* + *-ess.*] One of an order of nuns established on the principles of the Jesuits. It was suppressed by Pope Urban VIII. about 1633.

Jesuitic (jez-ū-it'ik), *a.* [= F. *jésuitique* = Sp. *jesuítico* = Pg. *jesuitico* = It. *gesuitico*; < *Jesuit*, q. v.] 1. Of or pertaining to the Jesuits or their principles.

The *Jesuitic* maxim, that "he who has the schools has the future," the German Catholics have adopted as their own. *Bibliotheca Sacra*, XLV. 194.

2. [*l. c.*] Same as *jesuitical*.

jesuitical (jez-ū-it'i-kal), *a.* [< *Jesuitic* + *-al.*] 1. Of or pertaining to the Jesuits. — 2. Designing; crafty; insinuating: an opprobrious term.

Though for fashion's sake called a parliament, yet by a *jesuitical* sleight not acknowledged, though called so.
Milton, Eikonoklastes, § 13.

He has been accused of a *jesuitical* tendency, of a disposition to find arguments in favor of acts after the acts have been performed. *N. A. Rev.*, CXLII. 589.

jesuitically (jez-ū-it'i-kal-i), *adv.* In a jesuitical, insinuating, or politic manner; craftily.

jesuitish (jez'ū-it-ish), *a.* [< *Jesuit* + *-ish*[1].] Jesuitical.

The word *Jesuitism* now in all countries expresses an idea for which there was in Nature no prototype before. Not till these late centuries had the human soul generated that abomination or needed to name it.
Carlyle, Latter Day Pamphlets, viii.

Jesuitocracy (jez″ū-i-tok'rą-si), *n.* [< *Jesuit* + *-o-cracy*, government, as in *aristocracy*, q. v., etc.] Government by Jesuits; also, the whole body of Jesuits in a country.

The charming results of a century of *Jesuitocracy*, as they were represented on the French stage in the year 1793. *Kingsley*, Yeast, v.

Jesuitry (jez'ū-it-ri), *n.* [< *Jesuit* + *-ry.*] Jesuitism, in either of its senses.

The poor Girondins, many of them, under such fierce bellowing of Patriotism, say Death; justifying motivant, that most miserable word of theirs by some brief casuistry and *jesuitry*. Vergniaud himself says Death; justifying by *jesuitry*. *Carlyle*, French Rev., III. ii. 7.

Jesus (jē'zus), *n.* [< ME. *Jesus, Icsus, Jesu* (in AS. usually translated, *Hǣlend*, lit. 'healer,' i. e. Saviour); F. *Jésus* = Sp. Pg. *Jesus* = It. *Gesú* = D. *Jezus* = G. Dan. Sw. *Jesus*, < L. (LL.) *Jesus*, prop. in 3 syllables, *Iesus* (gen., dat., abl., and voc. *Jesu*, > voc. *Jesu* in modern tongues), < Gr. Ἰησοῦς, < Heb. *Yēshūʻa*, also *Yōshūʻa*, contr. of *Yehōshuʻa* (forms transliterated, in the LL. and E. versions of the Old Testament, as *Jeshua, Joshua*, and *Jehoshua* respectively), a name meaning 'Jehovah is salvation' or 'help of Jehovah': see *Jehovah*. The name was a very common one among the Jews, esp. during the Hellenizing period, when it assumed the Gr. form Ἰησοῦς, being sometimes assimilated to the purely Gr. Ἰάσων, Jason (cf. *iasis*, healing, < ἰᾶσθαι, heal). A special significance was impressed upon the name when it was given to the child proclaimed to be the Saviour of mankind (Mat. i. 21; Luke i. 31).] 1. The Greek form of *Joshua*, used in the authorized version of the Bible twice to designate the Jewish leader so named (Acts vii. 45, Heb. iv. 8), once to designate a man called Justus (Col. iv. 11), and elsewhere as the personal name of the Saviour, frequently conjoined with *Christ*, the Anointed, the official title.

She [Mary] shall bring forth a son, and thou shalt call his name *Jesus*: for he shall save his people from their sins. Mat. i. 21.

2†. With the article, a representation of the crucifixion or of the ecce homo, or even of the mere emblem of Christ, such as the I. H. S. or ☧: used in old inventories, etc. — **Company of Jesus,** the order of Jesuits. — **Order of Jesus,** or **Jesus Christ,** etc., the name of several orders of more or less religious character, in Spain, Sweden, etc.

jet[1] (jet), *v.*; pret. and pp. *jetted*, ppr. *jetting*. [< ME. *jetten, getten*, < OF. *jetter, jeter, getter, geter, jecter*, F. *jeter*, cast, hurl, throw, fling, dart, put or push forth, = Pr. *getar, gitar, gietar* = Sp. *jitar* = It. *gittare, gettare*, throw, etc., < L. *jactare*, throw, hurl, cast, toss, shake, agitate, etc., freq. of *jacere*, throw (> *jacēre*, lie), akin to Gr. ἰάπτειν, throw: see *iambic*. jetter† (jet'ėr), *n.* [< ME. *jettour, jectour,* < OF. *jettour, jetteur, geteor,* etc., < L. *jactator,* a boaster: see *jactator* and *jet*[1].] One who jets or struts; a spruce fellow.

So were ye better,
What shulde a begger be a *jetter?*
J. Heywood, Four P's.

jettiness (jet'i-nes), *n.* The quality of being jetty; blackness.

jetting† (jet'ing), *p. a.* Same as *jutting.* See *jut.*

The vast *jetting* coat and small bonnet, which was the habit in Henry the Seventh's time, is kept on in the yeomen of the guard; not without a good and politic view, because they look a foot taller, and a foot and a half broader. *Steele,* Spectator, No. 109.

jettison (jet'i-son), *n.* [< OF. (AF.) **jetaison, getaison, gettaison,* a throwing, jettison, < L. *jactatio*(*n*-), a throwing, < *jactare,* throw: see *jet*[1], *v.,* and cf. *jactation,* a doublet of *jettison.* The word in E. use became corrupted, through *jetson, jetsen,* to *jetsom, jetsome, jetsam:* see *jetsam,* and cf. *flotsam,* similarly corrupted.] In *law,* the throwing overboard of goods or merchandise, especially for the purpose of easing a ship in time of danger or distress. *Stephen.*

If, instead of being thrown overboard, the goods are put into boats or lighters, and lost or damaged before reaching the shore, such loss is regarded as a virtual *jettison,* and gives a claim to average contribution.
Encyc. Brit., III. 146.

The bottle was eventually picked up on the shore of Galveston Island in the Gulf of Mexico, having traversed (through the aid of the equatorial current) the Atlantic from the point of *jettison* to Trinidad or Tobago.
Sci. Amer., N. S., LIX. 153.

jettison (jet'i-son), *v. t.* [< *jettison, n.*] To throw overboard, especially for the purpose of easing and saving a ship in time of danger.

When a part of a cargo is thrown overboard (or *jettisoned,* as it is termed) to save the ship from foundering in a storm, or to float her when stranded, or to facilitate her escape from an enemy, the loss of the goods and of the freight attached to them must be made good by average contribution. *Encyc. Brit.,* III. 146.

jetto† (je-tō'), *n.* An obsolete spelling of *jet d'eau.*

The garden has every variety, hills, dales, rocks, groves, aviaries, vivaries, fountaines, especially one of five *jettos.*

a counter in card-playing, or in casting up accounts; also, an abbey-counter. Jettons came into use in the fourteenth century, and were extensively used, especially in the sixteenth and seventeenth centuries, in the Netherlands, France, Germany, and other countries.

They used to compute with *Jettons* and counters; . . . it is done by laying them on lines increasing in their value from the bottom, which is a line of Units; the second, or next above it, is a line of Tens; the third a line of Hundreds; the fourth of Thousands; and so on.
T. Snelling, View of the Origin of Jettons, p. 13.

Almost every abbey struck its own *jettons* or counters, which were thin pieces of copper, commonly impressed with a pious legend, and used in casting up accounts.
Chatto, Wood Engraving, p. 19.

jetty[1] (jet'i), *n.*; pl. *jetties* (-iz). [Also *jutty,* q. v.; < OF. *jetee, getee, gettee, gitee, jettee,* a cast, a jetty or jutty, etc.; F. *jetée,* a pier, breakwater, jetty; prop. fem. pp. of OF. *jetter, jeter,* F. *jeter,* throw, cast: see *jet*[1].] **1.** A projecting part of a building, especially a part that projects so as to overhang the wall below, as the upper story of a timber house, a bay-window, etc. See extract under *jetty*[1], *v. i.*—**2.** A projection of stone, brick, wood, or other material (but generally formed of piles), affording a convenient place for landing from and discharging vessels or boats, or serving as a protection against the encroachment or assault of the waves; also, a pier of stone or other material projecting from the bank of a stream obliquely to its course, for the purpose of directing the current upon an obstruction to be removed, as a bed of sand or gravel, or to deflect it from a bank which it tends to undermine. Important jetties are those at the mouth of the Mississippi river, constructed of willow mattresses sunk by weighting with stone, and laid along both banks of the river, to contract the current and cause it to scour out the channel. See *mattress.*

Let us cut all the cables and snap all the chains which tie us to an unfaithful shore, and enter the friendly harbour, that shoots far out into the main its moles and *jettees* to receive us. *Burke,* Economical Reform.

She was walking much too near the brink of a sort of old *jetty* or wooden causeway we had strolled upon, and I was afraid of her falling over.
Dickens, David Copperfield, iii.

The country on both sides of the Mississippi from New Orleans up to the mouth of the Red River is known as the Upper Coast; that below the city down to the *Jetties,* as the Lower Coast. *The Century,* XXXV. 108.

Glory, honour, and peace to every man that worketh good, to the *Jew* first, and also to the Gentile. Rom. ii. 10.

2. A person who seeks gain by sordid or crafty means; a hard-fisted money-lender, or tricky dealer: an opprobrious use: as, he is a regular *Jew*.—**Exchequer of the Jews.** See *exchequer*.—**Jew Bill.** See *bill*[3].—**Jew's eye**[1]. [An allusion to the custom of torturing Jews with the view of extorting money.] Something very precious or highly prized.

There will come a Christian by,
Will be worth a *Jewess' eye*.
Shak., M. of V., ii. 5, 43.

[In the original editions the word in this passage is *Jewes*, the old dissyllabic possessive for either sex. The phrase "worth a Jewes eye" is the old proverb here used punningly.]—**Jews' frankincense**, the balsam known as benzoin or gum storax, often used as an incense.—**Jews' houses**, in Cornwall, England, remains of ancient dwellings and furnaces which, together with the tools of ancient smelters and blocks of tin in the rude molds of earth in which the metal was cast, have been found in various parts of that county. These remains date back to a period many centuries before Christ, at a time when trade had been established between Britain and the eastern Mediterranean region.—**Jews' money**, a name given to old Roman coins found in some parts of England. *Halliwell.*—**Jews' tin**, tin smelted in rude blast-furnaces and cast into irregular slabs of various kinds, found in connection with the so-called Jews' houses in Cornwall, and believed to be the work of ancient smelters.

jew (jö), *v.* [< *Jew*, *n.*, in allusion to the sharpness in bargaining popularly ascribed to the Jews.] **I.** *trans.* To overreach; cheat; beat unfairly at a bargain: as, to *jew* one out of a dollar. [Colloq.]

We know there is a mawkish sentiment existing that Jews should not be countenanced; that they will cheat at every opportunity; and it has become a saying that a person swindled in any manner was simply *Jewed*. Yet we have never been in possession of evidence that satisfied us that Jews were more amenable to these alleged weaknesses than other classes. Quoted in *Amer. Hebrew*, XXXIX. 46.

II. *intrans.* To practise arts of overreaching or cheating in trade. [Colloq.]

They smuggles you quietly into some room by yourselves, and then sets to work *Jewing* away as hard as they can, pricing up their own things, and downcrying yourn.
Mayhew, London Labour and London Poor, I. 408.

To jew down, to beat down the price of; persuade the seller to take a lower price for. [Colloq.] [This verb, in these uses, is well established in colloquial speech. Though now commonly employed without direct reference to the Jews as a race, it is regarded by them as offensive and opprobrious.]

Jew-baiter (jö'bā"tėr), *n.* A person given to harrying or persecuting Jews. [Recent.]

Jew-baiting (jö'bā"ting), *n.* The act of harrying or persecuting Jews. [Recent.]

Alas! how much has taken place during these six years that makes a recurrence to this particular festival [feast of the Passover] specially painful and interesting. The *Jew-baiting* in Germany; the bloody persecutions in Russia. *Evening Post*, April 21, 1883.

Baret (1580), I. 38. (*Halliwell.*)

He's gi'en to her a *jewel* fine,
Was set with pearl and precious stane.
John Thomson and the Turk (Child's Ballads, III. 353).

A watch is neither a *jewel* nor an ornament, as these words are used and understood, either in common parlance or by lexicographers. It is not used or carried as a *jewel* or ornament, but as an article of ordinary wear by most travellers, and of daily and hourly use by all.
Ramaley v. Leland, 43 N. Y., 539.

3. An ornament of precious stones, or metal, enamel, etc., worn as a decoration, or as the badge of an honorary order: as, the *jewel* of the Garter.

The *jewel* of the order [Teutonic Order] consists of a black and white cross, surmounted by a helmet with three feathers. *Encyc. Brit.*, XXIII. 201.

4. A precious stone used in watchmaking, on account of its hardness and resistance to wear, as where a pivot turns in a socket.—**5.** An imitation, in glass or enamel, of a real jewel. See *jeweled*, 3.—**6.** In colored-glass windows, etc., a projecting boss of glass, sometimes cut with facets, introduced in the design to give variety and richness of effect.

Mosaic glass has rapidly improved in the past century. . . . The *jewels* cut from pieces of a rich colored glass add effectively to the brilliancy of recent designs.
Harper's Mag., LXXIX. 255.

7. Anything of great value or rare excellence; anything especially fine or dear: sometimes applied to persons as a term of high commendation or tender endearment.

Value desert and virtue; they are *jewels*
Fit for your worth and wearing.
Fletcher, Mad Lover, v. 4.

My bishop is a *jewel* tried and perfect;
A *jewel*, lords. *Ford*, Perkin Warbeck, iv. 4.

She is an inestimable *jewel*. *Steele*, Tatler, No. 95.

If solid happiness we prize,
Within our breasts this *jewel* lies,
And they are fools who roam.

Jew's-ear (jöz′ēr), *n.* [Formerly *Judas's ear*, NL. *auricula Judæ*. It grows most often upon the elder, the tree, according to one tradition, upon which Judas hanged himself.] 1. A fungus, *Auricularia Auricula-Judæ*, bearing some resemblance to the human ear. It formerly had some medicinal repute in England, which has now passed away; but it is exported in large quantities to China, where it is prized as a medicine and an article of diet.

The mushrooms or toadstooles which grow vpon the trunks or bodies of old trees verie much resembling Auricula Iudæ, that is *Jewes eare*, do in continuance of time growe vnto the substance of wood, which the fowlers do call touchwood. *Gerard*, Herball, p. 1385.

2. Any one of several fungi of the genus *Otidea*.—3. The tomato. [Prov. Eng.]

jews'-harp (jöz′härp), *n.* [The name alludes vaguely to the use of the harp among the Jews ("David's harp," etc.). The Sw. *giga* or *mungiga*, jews'-harp (*mun* = E. *mouth*), was originally applied (as in Icel., etc.) to the fiddle (see *gig*¹ and *jig*), and has nothing to do etymologically with the E. *jews'-harp*. Another proposed derivation, "a corruption of *jaw's harp*," is absurd.] 1. A musical instrument consisting of a flexible metal tongue set in a small stiff iron frame of peculiar shape, which is held to the player's mouth and pressed against his teeth, the metal tongue of the instrument being bent outward at a right angle so as to be struck with the hand. Tones of different pitch are produced by altering the shape and size of the mouth-cavity, so as to reinforce the various harmonics of the natural tone of the tongue, which is low in pitch. The jews'-harp is capable of surprisingly sweet and elaborate effects. Formerly sometimes called *jews'-trump*, and also *tromp* or *trump*.

Jews'-harp.

Yet if they would bryng him hatchets, kniues, and *Jewes-harps*, he bid them assure me, he had a mine of gold, and could refine it, & would trade with me. *Hakluyt's Voyages*, III. 576.

And plays the burden to 'em on a *Jew's-trump*.
Fletcher, Humorous Lieutenant, v. 2.

Jezebel (jez′e-bel), *n.* [So called in allusion to *Jezebel*, the infamous wife of Ahab, king of Israel (1 Ki. xvi. 31).] An impudent, violent, unscrupulous, vicious woman.

But when she knew my pain,
Saw my first wish her favour to obtain,
And ask her hand — no sooner was it ask'd,
Than she, the lovely *Jezebel*, unmasked. *Crabbe*.

Jezid (jez′id), *n.* One of a religious sect in Asiatic Turkey: same as *Yezidi*.

jhil, jheel (jēl), *n.* [Also written *jeel*; repr. Hind. *jhīl*, a lake, pool, mere.] In India, a large pool, mere, or lagoon of standing water remaining after inundation, and more or less filled with rank vegetation.

Numerous shallow ponds or *jhils* mark the former beds of the shifting rivers. These *jhils* have great value, not only as preservatives against inundation, but also as reservoirs for irrigation. *Encyc. Brit.*, XVIII. 71.

jhoom, jhum (jöm), *n.* [Bengali *jhūm*.] A system of cultivation used in India, especially on the eastern frontier of Bengal, in which a tract of forest or jungle is cleared by fire, cultivated for a year or two, and then abandoned for a new tract. In southwestern India this system is called *coomry*, and in Ceylon it is known as *chena*. *Yule and Burnell*.

jib¹ (jib), *v.*; pret. and pp. *jibbed*, ppr. *jibbing*. [Also written *jibe, gibe, gybe* (with long *i*, prob. after the D. form), < Dan. *gibbe*, naut. jib, jibe, = Sw. *gippa*, naut. jib, jibe, dial. jerk, cause to jump, = D. *gijpen* (of sails), turn suddenly (Hexham, 1678), = G. *giepen*. The root appears nasalized in the MHG. freq. *gempeln*, spring, and with reg. alteration of vowel in Sw. dial. *guppa*, move up and down, nasalized *gumpa*, spring, jump, etc.: see *jump* and *jumble*.] Same as *jibe*¹.

I think these vessels are navigated either end foremost, and that, in changing tacks, they have only occasion to shift or *jib* round the sail. *Cook*, Third Voyage, ii. 3.

jib¹ (jib), *n.* [So called because readily shifted or *jibbed*; < *jib*¹, *v. t.*] *Naut.*, a large triangular sail set on a stay forward of the foremast. In large vessels it extends from the end of the jib-boom toward the foretopmast-head; in schooners and sloops from the bowsprit-end toward the foremast-head. The *flying jib* is set outside of the jib, and the *jib-o'-jib* outside of the flying jib. When two smaller jibs are carried on one boom, instead of one larger one, they are distinguished as the *inner* and *outer jibs*. See *balloon-jib*, and cut under *sail*.—**The cut of one's jib.** See *cut*.—**To bouse up the jib.** See *bouse*².

jib² (jib), *v. i.*; pret. and pp. *jibbed*, ppr. *jibbing*. [Also *jibb*, improp. *jibe*; < ME. **gibben*, only in comp. *regibben*, kick back, < OF. *regiber*, later and mod. F. *regimber*, wince, kick, in simple form OF. *giber, gibber*, struggle with the hands and feet; perhaps of Scand. origin: < Sw. dial. *gippa*, jerk, = Dan. *gibbe*, naut. jib, jibe; that is, *jib*² is ult. identical with *jib*¹, q. v.] To pull against the bit, as a horse; move restively sidewise or backward.

jib² (jib), *n.* [< *jib*², *v.*] Same as *jibber*.

Frequently young horses that will not work in cabs — such as *jibs* — are sold to the horse-slaughterers as useless. *Mayhew*, London Labour and London Poor, I. 189.

jib³ (jib), *n.* [Also *gib:* see *gib*¹. In def. 3, cf. OF. *gibbe*, a bunch or swelling; a particular sense of *gibbe*, a sort of arm, etc.: see *gib*¹.] 1. The projecting arm of a crane: same as *gib*¹, 5.—2. A stand for beer-barrels. *Halliwell.*—3. The under lip.—**To hang the jib,** to look cross. [Prov. Eng.]

jibb, *v. i.* See *jib*².

jibber (jib′ėr), *n.* [< *jib*² + *-er*¹.] One who jibs; a horse that jibs. Also *jib*.

jibbings (jib′ingz), *n. pl.* The last milk drawn from a cow; strippings; the richest part of the milk. [Scotch.]

Jane the lesser (Jean) . . . furnishes butter and afterings (*jibbings*) for tea. *Carlyle*, in Froude.

jib-boom (jib′bōm), *n.* [Also *gib-boom*; < *jib*¹ + *boom*².] *Naut.*, a spar run out from the extremity of the bowsprit and serving as a continuation of it. Beyond this is sometimes extended the flying-jib boom.

jib-door (jib′dōr), *n.* [< *jib*¹ (?) + *door*.] In *arch.*, a door with its surface in the same plane as the wall in which it occurs. Jib-doors are intended to be concealed, and therefore have no architraves or moldings round them; and their surface is paneled, painted, or papered so as to be indistinguishable from the rest of the wall.

jibe¹ (jīb), *v.*; pret. and pp. *jibed*, ppr. *jibing*. [Also written *gibe*, and formerly *gybe*; also *jib*: See *jib*¹.] I. *trans. Naut.*, to cause (a fore-and-

aft sail) to swing over to the other side when the wind is aft or on the quarter.

II. *intrans.* 1. *Naut.*, to change from one tack to the other without going about; shift a fore-and-aft sail from one side to the other when the wind is aft or on the quarter.

Augustus . . . stood up on the centre-board, to the imminent danger of his little shins' more intimate acquaintance with a *jibing* boom.
Fitz-Hugh Ludlow, Little Brother, iii.

2. To agree; be in harmony or accord; work together: as, the two plans did not seem to *jibe*. [Colloq., U. S.]

jibe[2], *v.* and *n.* See *gibe*[1].

jiber, *n.* See *giber*.

jib-frame (jib′frām), *n.* In a marine engine, the upright frame at the sides by which the cylinder, condenser, and framing are connected.

jib-hank (jib′hank), *n.* One of a number of pieces of wood or iron, shaped nearly like a ring, which slide on the jib-stay and serve to attach the head of the jib to the stay.

jib-head (jib′hed), *n.* *Naut.*, an iron fastened to the head of a jib. It is used when, the jib having been stretched too much by use, it is necessary to shorten it by cutting off the point.

jibingly, *adv.* See *gibingly*.

jiblet†, *n.* An obsolete form of *giblet*. *Brockett.*

Oh that's well: come, I'll help you:
Have you no *jiblets* now?
Fletcher (and another), Love's Pilgrimage, i. 1.

jiblet-check, jiblet-cheek, *n.* See *giblet-check*.

jib-lot (jib′lot), *n.* A triangular lot or plot of ground, likened in shape to a vessel's jib. [New ★Eng.]

jib-netting (jib′net′ing), *n.* *Naut.*, a triangular-shaped netting rigged under the jib-boom to prevent men from falling overboard while loosing or furling the jib.

jib-o'-jib (jib′ō-jib), *n.* A small three-cornered sail sometimes set outside of and above the other head-sails.

jib-sheet (jib′shēt), *n.* One of the ropes attached at one end to the clue of the jib and at the other to the bows of the vessel, to trim the sail.—**To flow a jib-sheet.** See *flow*[1].

jib-stay (jib′stā), *n.* 1. The stay on which the jib is set.—2. In a marine steam-engine, a part of the stay-frame.

jib-topsail (jib′top′sāl or -sl), *n.* A light three-cornered sail set in yachts on the foretopmast-stay.

jickajog† (jik′a-jog), *n.* Same as *jigjog*.

jid, *n.* See *gid*[2].

Jidda gum. See *gum*[2].

jiff† (jif), *v. i.* [Origin obscure.] To make a jest or laughing-stock of one. *Bailey*.

jiffy (jif′i), *n.*; pl. *jiffies* (-iz). [Also *giffy, giffin;* of dial. origin.] A moment; an instant: as, I shall be with you in a *jiffy*. [Colloq.]

"And oh!" he exclaim'd, "let them go catch my skiff, I 'll be home in a twinkling and back in a *jiffy*."
Barham, Ingoldsby Legends, II. 40.

"Guess you better wait half a *jiffy*," cried Cyrus.
J. T. Trowbridge, Coupon Bonds, p. 191.

In six *jiffies* I found myself and all my retinue . . . at the rock of Gibraltar.
Munchausen, Travels, xxiii. 96.

jig (jig), *n.* [Also *jigg, jigge, gig, gigg, gigge* (pron. jig′); not found in ME.; a vaguely imitative word, from the imitative verb *jig*[1], *v.* The F. *gigue*, Sp. Pg. It. *giga*, a lively dance, are from the E. word in this sense, merging with the similar Rom. word, of older date, meaning 'a fiddle': see *gig*[1], *n.* See further under *jig*[1], *v.* As with other familiar words of homely aspect, the senses are more or less involved and inconstant.] 1. A rapid, irregular dance for one or more persons, performed in different ways in different countries; a modification of the country-dance.

Wooing, wedding, and repenting, is as a Scotch *jig*, a measure, and a cinque-pace: the first suit is hot and hasty, like a Scotch *jig*, and full as fantastical.
Shak., Much Ado, ii. 1.

George, I will have him dance fading; fading is a fine *jig*, I'll assure you.
Beau. and Fl., Knight of Burning Pestle, iv. 1.

All the swains that there abide
With *jigs* and rural dance resort.
Milton, Comus, l. 952.

2. Music for such a dance or in its rhythm, which is usually triple and rapid: often used in the eighteenth century as a component of a suite.

They heard the signs of an Irish orgy—a rattling *jig*, played and danced with the inspiriting interjections of that frolicsome nation. *C. Reade*, Peg Woffington, vii.

3†. A lively song; a catch.

If neere vn to the Eleusinian Spring,
Som sport-full *Jig* som wanton Shepheard sing,
The Kavisht Fountaine falls to daunce and bound.

It would have made your ladyship have sung nothing but merry *jigs* for a twelvemonth after.
Middleton, Father Hubbard's Tales.

4†. A kind of entertainment in rime, partly sung and partly recited.

Farce [F.], a (fond and dissolute) play, comedy, or enterlude; also the *jig* [*jyg*, ed. 1611] at the end of the enterlude, wherein some pretty knavery is acted. *Cotgrave.*

A *jig* shall be clapped at, and every rhyme
Praised and applauded.
Fletcher (and another), Fair Maid of the Inn, Prol.

A *jig* was a ludicrous metrical composition, often in rhyme, which was sung by the clown, who occasionally danced, and was always accompanied by a tabor and pipe. *Halliwell.*

5. A piece of sport; a prank; a trick.

What dost think of
This innovation? is 't not a fine *jigg?*
A precious cunning in the late Protector,
To shuffle a new prince into the state.
Shirley (and Fletcher?), Coronation, v. 1.

They will play ye anither *jigg*,
For they will out at the big rig.
Fray of Suport (Child's Ballads, VI. 119).

6. A small, light mechanical contrivance: same as *jigger*[1], 2: used especially in composition: as, a drilling-*jig*, shaving-*jig*, etc. Specifically—(*a*) A jigging-machine. (*b*) In *coal-mining* a self-acting incline worked by a drum, or by wheels, with hemp or wire ropes. Also called *jinny*. [Eng.] (*c*) A fish-hook or gang of hooks of which the shank is loaded with lead, platinum, or other bright metal, used in jigging for cod, mackerel, etc.

A *jig* is a bit of lead armed with hooks radially arranged, which is let down from the boat and kept constantly moving up and down. This in some way exerts a fatal fascinating power upon the squid, which seizes it.
Stand. Nat. Hist., I. 376.

Babbitting jig. See *babbitting*.—**Haymaker's jig,** a kind of country-dance.—**The jig is up,** the game is up; ★it is all over (with any one). [U. S.]

jig (jig), *v.*; pret. and pp. *jigged*, ppr. *jigging*. [Also *jigg, jigge,* also *gig* (pron. jig); an imitative verb, parallel to *gig* (pron. gig), *v.*, in like uses, and to *jog*, of contemporary appearance in literature, expressing a heavier movement of the same kind. The word is connected with OF. *giguer, ginguer,* leap, kick, sport, freak, etc., and with OF. *gigue, gige,* Sp. Pg. It. *giga,* MHG. *gige,* a fiddle, etc., only as those words are also ult. imitative of a light to-and-fro movement. As with similar imit. words, the senses are more or less indefinite.] **I.** *intrans.* 1. To play or dance a jig.

I found myself at times following the dance of the Merry Men as it were a tune upon a *jigging* instrument.
R. L. Stevenson, Merry Men.

2. To move skippingly or friskily; hop about; act or vibrate in a lively manner. Compare *jigget*.

You *jig*, you amble, and you lisp.
Shak., Hamlet, iii. 1, 149.

The trembling fowl that hear the *jigging* hawk-bells ring,
And find it is too late to trust them to their wing,
Lie flat upon the flood. *Drayton*, Polyolbion, xx. 219.

3. To use a jig in fishing; fish with a jig: as, to *jig* for bluefish.

II. *trans.* 1. To sing in jig time; sing as a jig.

Jig off a tune at the tongue's end, canary to it with your feet, humour it with turning up your eyelids.
Shak., L. L. L., iii. 1, 11.

2. To jerk, jolt, or shake; cause to move by jogs or jolts.

When the carriage [of a sawmill] is to be *jigged* back, the lever manipulating the rock shaft is moved from the saw.
Sci. Amer., N. S., LIX. 403.

3. To produce an up-and-down motion in.—4. In *metal.*, to separate the heavier metalliferous portion of (the mingled ore and rock or vein-stone obtained in mining) from the lighter or earthy portions, by means of a jig or jigging-machine. The jig was originally a box with a metallic bottom perforated with holes. In this the ore was placed, and the whole was moved rapidly up and down by hand in water, thus causing the material in the box to arrange itself in layers according to its specific gravity. Jigging is now usually done by more complicated machinery, acting continuously; but the principle remains the same. The essential feature of a jigging-machine is the admission of the water from below; in the buddle the water comes in contact with the ore from above.

5. To catch (a fish) by jerking a hook into its body.

Keep the line constantly in motion, and half the time you will *jig* them in the belly, tail, or side, as the finny mass moves over the hook. *Sportsman's Gazetteer*, p. 243.

6. In *felting*, to harden and condense by repeated blows from rods.—7. In *well-boring*, to drill with a spring-pole.—8†. To trick; cheat; impose upon; bamboozle.

Do not think the gloss
Of smooth evasion, by your cunning jests
And coinage of your politician's brain,
Shall *jig* me off. *Ford*, Love's Sacrifice, iii. 3.

jigajog (jig′a-jog), *n.* [Also *jickajog;* a var. of *jigjog*, q. v.] Same as *jigjog*.

An some writer (that I know) had had but the pennings o' this matter, he would ha' made you such a *jig-ajogge* i' the boothes, you should ha' thought an earthquake had beene i' the fayre. *B. Jonson*, Bartholomew Fair, Ind.

jigamaree (jig″a-ma-rē′), *n.* [< *jig*, with an arbitrary addition.] Something new, strange, or unknown; a jiggumbob or thingumbob. [Prov. and slang.]

jig-clog (jig′klog), *n.* A clog made for jig-dan-★cing.

jigger[1] (jig′ėr), *n.* [< *jig, v.*, + *-er*[1].] 1. One who or that which jigs.—2. A small, light, or light-running mechanical contrivance or utensil, causing or having when in use a rapid jerky motion; also, by extension, any subordinate mechanical contrivance or convenience to which no more definite name is attached. Specifically—(*a*) A jig or jigging-machine. See extract, and *jig, v. t.*, 4.

The machines best adapted for this purpose [ore-concentration] are the *jiggers* or jigs. These are sieves supporting the ore, which is raised and allowed to fall at rapid intervals by a current of water from below, and in this manner one can realize the theoretical conditions of the fall in more or less deep water. The jig is par excellence the machine for dressing, universally employed from the most ancient times because it was the simplest and most convenient, and its use has continued to our day, with the help of successive modifications, which have converted it into a machine of remarkable precision.
Callon, Lectures on Mining (tr. by Le Neve Foster [and Galloway), III. 76.

(*b*) A machine for hardening and condensing felt by repeated quick blows with rods, by the action of vibrating platens, or by intermittent rolling action on the material while warm and wet. (*c*) A small roller used in graining leather.

A grain or polish is given to the leather, either by boarding or working under small pendulum rollers, called *jiggers*, which are engraved either with grooves or with an imitation of grain. *Workshop Receipts*, 2d ser., p. 374.

(*d*) A templet or profile for giving the form to a pottery vessel as it revolves upon the wheel. (*e*) A potters' wheel when used for simple and rapidly made objects, as plain cylindrical vessels and the like. (*f*) A coopers' drawknife. (*g*) A warehouse-crane. (*h*) In *coal-mining*, a coupling-hook for connecting the cars or trams on an incline. [Leicestershire, Eng.] (*i*) In *billiards*, a rest for the cue in making a difficult or awkward shot; a bridge. (*j*) A sort of small spanker-sail, set on a jigger-mast in the stern of a canoe or other small craft, especially in Chesapeake Bay. (*k*) A door. [Slang.] (*l*) A small tackle composed of a double and single block and a fall, used about the decks of a ship for various purposes.

3. A sloop-rigged boat at one time used very extensively by the fishermen about Cape Cod, but superseded about 1829 by the dory. A jigger usually carried four persons. The name belongs to the Bay of Fundy and vicinity, and is sometimes used on the coast of New England.

4. A small street-railway car, drawn by one horse, and usually without a conductor, the driver giving change and the fare being deposited in a box. [U. S.]—5. A machine now generally used in the produce exchanges of American cities, which exhibits on a conspicuous dial the prices at which sales are made as the transactions occur. The hand or pointer is controlled by electric mechanism connected with a keyboard.—6. A drink of whisky. [Slang.]—**In-and-out jigger** (*naut.*), same as *boom-★jigger*.

jigger[1] (jig′ėr), *v. t.* [< *jigger*[1], *n.*] To jerk; shake. [Colloq.]

Few anglers have failed to experience the anxiety which ensues when a fish remains on the top of the water, shaking his head, and many is the fish who has *jiggered* himself free by this method. *Quarterly Rev.*, CXXVI. 350.

jigger[2] (jig′ėr), *n.* [An E. accom. of *chigoe*, the native name: see *chigoe*.] 1. The penetrating flea of the West Indies: same as *chigoe*.

Numbers are crippled by the *jiggers*, which scarcely ever in our colonies affect any but the negroes.
Southey, Letters (1810), II. 201.

2. In the United States, a name of sundry harvest-mites or harvest-ticks which, though normally plant-feeders, fasten to the skin of human beings and cause great irritation. These acarids belong to an entirely different class from the chigoe, or jigger properly so called, and lay no eggs in the wounds they make. The so-called *Leptus americanus* and *L. irritans* are two species to which the name is given. See cut under *harvest-tick*.

The making of sleigh-bells is quite an art. . . . The little iron ball is called "the *jinglet*."
The American, IX. 350.

jingo (jing′gō), *n.* and *a.* [Origin obscure; it "appears first (*c.* 1670) as a piece of conjurer's gibberish" (*N. E. D.*): poss. a form, introduced perhaps by gipsies or soldiers, of the Basque *Jinkoa*, *Jainkoa*, *Jeinkoa*, contracted forms of *Jaungoicoa*, *Jangoikoa*, God, lit. 'the lord of the high.'] **I.** *n.* **1.** A name used in the oath "by *jingo*," sometimes extended to "by the living *jingo*": as, I won't do it, by *jingo*. [Colloq.]

By *jingo* [par dieu], quoth Panurge, the man talks somewhat like, I believe him.
Motteux, trans. of Rabelais, iv. lvi.

Jumping up in his boat
And discarding his coat,
"Here goes," cried Sir Rupert, "by *jingo* I'll follow her!"
Barham, Ingoldsby Legends, II. 35.

2. [*cap.*] A member of a section of the Conservative or Tory party in Great Britain which advocated a blustering foreign policy. Especially used during the Beaconsfield (Disraeli) administration of 1874–80, in reference to the Russo-Turkish war, etc. The name alludes to a song at that time popular, expressing the Jingo spirit:

"We don't want to fight, but, by *jingo*, if we do,
We've got the ships, we've got the men, we've got the money, too."

Said to have been first used as a political designation in a letter by George J. Holyoake, entitled "Jingoes in the Park," published in the London Daily News, March 13, 1878. [In this sense it takes the plural *Jingoes*.]

II. *a.* [*cap.*] Belonging or relating to the Jingoes: as, the *Jingo* policy; *Jingo* bluster. See I., 2.

Such a state of mind is neither wonderful nor unreasonable; it is unintelligible only to those who are themselves so possessed with the *Jingo* swagger that they cannot understand that other people may be without it.
E. A. Freeman, Fortnightly Rev., N. S., XL. 328.

Jingoism (jing′gō-izm), *n.* [< *Jingo* + *-ism*.] The spirit, policy, or political views of the Jingoes.

He [Beaconsfield] always ridiculed the predominance on the Conservative side of the doctrine of the integrity and independence of the Turkish Empire; and, in short, he thought that in the days of *Jingoism* the English Conservative party had gone mad.
Fortnightly Rev., N. S., XLI. 346.

jink[1] (jingk), *v.* [Also *jenk;* origin obscure. Hardly a nasalized form of *jig*, though some senses suggest such a connection.] **I.** *intrans.* **1.** To move nimbly. [Scotch.]

Learned and meditative as was Sir Thomas More, a jesting humor, a philosophical *jocundity*, indulged on important as well as on ordinary occasions, served his wise purpose. *I. D'Israeli*, Amen. of Lit., I. 331.

jocundly (jok'und-li), *adv.* In a jocund manner; merrily; gaily.

jocundness (jok'und-nes), *n.* [< ME. *jocundnes*; < *jocund* + *-ness*.] Jocundity. *Holland*, tr. of Plutarch, p. 160.

jod (jod), *n.* [Var. of *jot*, ult. < Gr. *ἰῶτα*, iota, < Heb. *yōdh*: see *jot*[1], *iota*.] The letter J. [Prov.]

As surely as the letter *Jod*
Once cried aloud, and spake to God,
So surely shalt thou feel this rod,
And punished shalt thou be!
Longfellow, Golden Legend, iii.

jodel, *v.* See *yodel*.

joe[1] (jō), *n.* [A particular use of the familiar name *Joe*, abbr. of *Joseph*. In sense 1, with ref. to *Joseph* Hume, M. P., at whose instance the fourpence was issued in 1836, especially for the convenience of paying short cab-fares.] **1.** A fourpenny-piece. Also *joey*. [Slang.] —**2.** [*cap.*] An old jest: same as *Joe Miller*.

Of what use a story may be even in the most serious debates may be seen from the circulation of old *Joes* in Parliament, which are as current there as their sterling namesakes used to be in the city some threescore years ago.
Southey, The Doctor, xvi.

3. Something worthless. [Sailors' slang.] —**4.** Hence, a lobster too small to be sold legally. [Cape Cod, U. S.]

joe[2] (jō), *n.* [Also *jo*; an abbr. of *Johannes*.] A Portuguese and Brazilian gold coin, worth from eight to nine dollars.

Be sure to make him glow
Precisely like a guinea or a *jo*.
Wolcot, Lyric Odes for 1783, vii.

"Has the Indian come yet?" "He was here last week." "An't you afraid of him?" "No." . . . "That's you, for a broad *joe!* Never be afraid of any body."
S. Judd, Margaret, i. 8.

Double joe. See *double*.

joe[3] (jō), *n.* [Also *jo*; usually considered as a form of *joy*, < OF. *joye*, F. *joie*; but this is not probable.] **1.** A master; a superior. *Halliwell.* [North. Eng.] —**2.** A sweetheart; a darling. [Scotch.]

Blessings on your frosty pow,
John Anderson, my *jo*.
Burns, John Anderson.

Och! owre aft thy *joes* ha'e starv'd,
Mid a' thy favours!
Burns, On Pastoral Poetry.

joe-ben (jō'ben), *n.* [Prob. imitative of the bird's note.] The greater titmouse, *Parus major*, or some other titmouse. [Suffolk, Eng.]

joewood (jō′wůd), *n.* A tree, *Jaquinia Keyensis*, found in the southern peninsula of Florida and the Keys. Its leaves are saponaceous. ★See *Jaquinia*.

joey (jō′i), *n.* [Dim. of *Joe*, a familiar abbr. of *Joseph*. See *joe*[1].] **1.** In *coal-mining*, a man specially appointed to set the timber in a stall or working while coal is being raised. [Midland counties, Eng.] —**2.** Same as *joe*[1], 1. [Slang, Eng.]

They [the patterers] have an idea . . . that this nobleman [Sir James Graham] invented fourpenny-pieces, and now, they say, the swells give a *joey* where they used to give a "tanner."
★ *Mayhew*, London Labour and London Poor, I. 267.

jog (jog), *v.*; pret. and pp. *jogged*, ppr. *jogging*. [Also *joggt*, *joggert*; an imitative verb, parallel to *jig*[1], *v.* (which appears at about the same time, but prob. existed much earlier), both expressing the notion of quick or sudden movement or shaking or jerking, but *jog* implying a heavier motion. In some uses *jog* falls in with *shog*. See further under *jig*[1]. The similar-seeming W. words are not pertinent.] **I.** *trans.* **1.** To touch, push, or shake slightly or gently; nudge; move by pushing.

Snatch from Time
His glass, and let the golden sands run forth
As thou shalt *jog* them.
Dekker and Ford, Sun's Darling, ii. 1.

Jogging . . . her elbow, he whispered something arch in her ear.
Goldsmith, Citizen of the World, cxxiii.

Jupiter, I think, has *jogged* us three degrees nearer to the sun. *Walpole*, Letters, II. 193.

Also *joggle-joint*. —**3.** In *carp.* and *masonry*, a notch in a piece of timber or stone, into which is fitted a projection upon a corresponding piece or counterpart, or a key also engaging a notch in a corresponding piece or counterpart, to prevent one piece from slipping on the other.

joggle-beam (jog′l-bēm), *n.* A built beam the parts of which are joined by projections on one part fitted into notches cut in the other part or parts, or by keys fitting notches in the meeting surfaces of the parts, to prevent slipping of the parts upon one another.

joggle-joint (jog′l-joint), *n.* Same as *joggle*, 2.

joggle-piece (jog′l-pēs), *n.* In *building*, same as *king-post*.

joggle-post (jog′l-pōst), *n.* **1.** In *building*, a post having shoulders or notches for receiving the lower ends or feet of struts. See *king-post*. —**2.** A post built of two or more pieces of timber joggled together.

joggle-truss (jog′l-trus), *n.* In *building*, a truss with a single post placed centrally and fitted to the chord by a stub-tenon or its equivalent, the chord being at the top, and the post hanging downward and having its lower end connected with the ends of the chord by oblique braces.

jogglework (jog′l-wėrk), *n.* In *masonry*, construction in which stones are internotched or keyed (joggled) together.

joggling-table (jog′ling-tā″bl), *n.* In *metal.*, a machine for dressing or concentrating ore. It consists of an inclined table on which the ore is placed and over which water is allowed to flow. The separation of the heavier ore from the lighter rock or veinstone is assisted by a succession of blows struck on the edge of the table by machinery contrived for this purpose, thus causing the table to vibrate sufficiently for the particles to arrange themselves in the order of their specific gravity. In the form of joggling-table known as "Rittinger's side-blow percussion table," the table is pushed violently from its position at rest by a cam acting upon the end of a rod, and when the cam has released the end of the rod the table is pushed back by a strong spring.

joglar, *n.* [Pr.: see *juggler*[1].] A professional minstrel or jongleur. See *joculator*.

Now in the palmy days of Provençal song there were many professional *joglars*, such as Arnaut Daniel or Perdigo, who stood high among the most brilliant troubadours, and visited on terms of social equality with nobles and princes. *Encyc. Brit.*, XVI. 479.

jog-trot (jog′trot), *n.* and *a.* **I.** *n.* **1.** A slow, easy jogging motion on horseback.—**2.** A slow routine mode of performing daily duty to which one pertinaciously adheres.

As we grow old, a sort of equable *jog-trot* of feeling is substituted for the violent ups and downs of passion and disgust. *R. L. Stevenson*, Crabbed Age and Youth.

II. *a.* **1.** Monotonous; easy-going; humdrum.

All honest *jog-trot* men, who go on smoothly and dully and write history and politics, and are praised.
Goldsmith, Vicar, xx.

2. Adapted for an easy, jogging pace. [Rare.]

These roads are old-fashioned, homely roads, very dirty and badly made, and hardly endurable in winter, but still pleasant *jog-trot* roads, running through the great pasture lands. *T. Hughes*, Tom Brown at Rugby, i. 1.

Gr. termination), < Heb. *Yōhānān*, John, lit. 'Jehovah hath been gracious.' This name owes its wide currency primarily to the impression which the character of John the Baptist made upon the popular imagination in the middle ages; *Baptist* alone is also a common name in southern Europe. Owing to the extreme frequency of *John* as a given name, it came to be used, like its accepted E. synonym *Jack*, as a common appellative for a man or boy of common or menial condition, and, in its different national forms, E. *John*, F. *Jean*, D. and G. *Hans*, etc., has served as a popular collective name for the whole people.] A common name for a man or boy, often used, like *Jack*, its synonym, to designate a man or a boy in general or indefinitely, especially an awkward fellow.—**Cheap John.** See *cheap*.

John-a-dreamst, *n.* [That is, *John o' dreams*, for *John of dreams*.] A dreamy, idle fellow.

Yet I,
A dull and muddy-mettled rascal, peak,
Like *John-a-dreams*, unpregnant of my cause,
And can say nothing. *Shak.*, Hamlet, ii. 2.

Johnanapest (jon′a-nāps), *n.* Same as *jack-anapes*.

It is a small species, very abundant along the western coast of the United States.—**3.** Among sailors, a kind of penguin, *Pygoscelis tæniata.*—**4.** The fish *Ethcostoma nigrum*, and other species of ★darters. [Local, U. S.]

johnny-cake (jon'i-kāk), *n.* **1.** In the southern United States, a cake of Indian meal mixed with water or milk, seasoned with salt, and baked or toasted by being spread on a board set on edge before a fire. It is of negro origin.

To make a faultless *johnny-cake*, you must be black, you must be fat, you must be a pampered slave and a doting despot; and even so your secret shall be buried with you. You can never teach the world how to make a *johnny-cake*, because you never learned; you were born so.
J. W. Palmer, After his Kind, p. 198.

2. In other parts of the United States, any unsweetened flat cake of Indian meal, sometimes mixed with mashed pumpkin (especially in New England), and usually baked in a pan: incorrectly used at times for *corn-bread*, *pone*, etc.

Some talk of hoe-cake, fair Virginia's pride;
Rich *johnny-cake* this mouth has often tried.
Both please me well, their virtues much the same,
Alike their fabric, as allied their fame;
Except in dear New England, where the last
Receives a dash of pumpkin in the paste.
Joel Barlow, Hasty Pudding.

Could *ioyne* such learning *with* experience
As made his name more famous than the rest.
Gascoigne, Steele Glas (ed. Arber), p. 64.

Woe unto them that *join* house *to* house, that lay field to field. Isa. v. 8.

Sobriety and contemplation *join* our souls *to* God.
Burton, Anat. of Mel., p. 611.

Pluto *with* Cato thou for this shalt *join.*
Pope, Dunciad, iii. 309.

3. To unite or form a junction with; become connected with or a part of; come into association or union with: as, to *join* a church, party, or society; the Missouri river *joins* the Mississippi; to *join* one in an enterprise.

The goddess swift to high Olympus flies,
And *joins* the sacred senate of the skies.
Pope, Iliad, i. 294.

I but come like you to see the hunt,
Not *join* it. *Tennyson*, Geraint.

4. To unite or take part in, in a friendly or hostile manner; engage in with another or others: as, he *joined* issue with his opponent; the forces *joined* battle.

Jehoshaphat . . . *joined* affinity with Ahab.
2 Chron. xviii. 1.

Till winds the signal blow
To *join* their dark encounter in mid air.
Milton, P. L., ii. 718.

5. To adjoin; be adjacent or contiguous to: as, his land *joins* mine. [Colloq.]—**6**†. To enjoin; command.

Who *Ioyned* the be Iostyse our iapez to blame,
That com a boy to this borȝ, thaȝ thou be burne ryche?
Alliterative Poems (ed. Morris), ii. 877.

And they *join* them penance, as they call it, to fast, to go pilgrimages, and give so much to make satisfaction withal. *Tyndale*, Works, I. 281.

To join battle. See *battle*1.—**To join issue.** See *issue.*—**To join the majority.** See *majority.*

II. *intrans.* **1.** To be contiguous or close; lie or come together; form a junction.

She . . . lifte vp hir handes *ioynynge* towarde heuene, and thanked oure lorde of that socoure that he hadde hir sente. *Merlin* (E. E. T. S.), ii. 300.

A certain man's house . . . *joined* hard to the synagogue. Acts xviii. 7.

2. To unite or become associated; confederate; league.

Though hand *join* in hand, the wicked shall not be unpunished. Prov. xi. 21.

Hee and the Irish Rebels had but one aime, one and the same drift, and would have forthwith *joyn'd* in one body against us. *Milton*, Eikonoklastes, xii.

Now and then
The rougher voices of the men
Joined in the song.
William Morris, Earthly Paradise, I. 392.

3†. To meet in hostile encounter; join battle.

Thus at the *joyenynge* the geauntez are dystroyede,
And at that journey for-justede with gentille lordez.
Morte Arthure (E. E. T. S.), l. 2134.

He saw the armies *join*,
The game of blood begun.
Fletcher, Loyal Subject, ii. 1.

But look you pray, all you that kiss my lady Peace at home, that our armies *join* not in a hot day!
Shak., 2 Hen. IV., i. 2, 238.

★**join** (join), *n.* [< *join*, *v.*] The place where two things are joined; the line or surface of juncture; a joint; also, the mode of joining.

Should the *join* be in sight, by smoking the shellac before applying it [to the broken edges], it will be rendered the same colour as the jet itself.
Workshop Receipts, 1st ser., p. 23.

The chief means of detecting modern from old Persian and Saracenic metal vessels is by examining the brazing *joins*, which in ancient vessels are rare.
Sci. Amer., N. S., LV. 7.

Cross-join, in *upholstery*, a seam across the breadth of any material, as of a carpet, furniture-covering, or the like.

joinant (joi'nant), *a.* [ME. *joynaunt*, < OF. *joignant*, ppr. of *joindre*, join: see *join.*] **1**†. Adjoining.

The grete tour that was so thikke and strong . . .
Was evene *joynant* to the gardyn wal.
Chaucer, Knight's Tale, l. 202.

2. In *her.*, conjoined.

joinder (join'dėr), *n.* [F. *joindre*, inf. used as a noun: see *join*, *v. t.*] **1**†. A joining; conjunction.

A contract of eternal bond of love,
Confirm'd by mutual *joinder* of your hands.
Shak., T. N., v. 1, 160.

2. In *law*: (*a*) The coupling or joining of two causes of action in a suit against another: called more fully *joinder of action.* (*b*) The coupling of two or more persons together as defendants. (*c*) The acceptance by a party to an action of the point of controversy put in his adversary's previous pleading: called *joinder in demurrer* if the previous pleading was a

demurrer, *joinder of issue* if it was an allegation of fact.—**Joinder in error.** See *error*.—**Joinder of issue, joinder in issue.** See *issue*.

joiner (joi′nėr), *n.* [ME. *joiener*, < OF. *joignour*, a joiner (def. 2), < *joindre*, join: see *join*.] 1. One who joins. Specifically—2. One whose occupation is to construct things by joining pieces of wood by means of glue, framing, or nails; appropriately and usually, a mechanic who does the wood-work for the internal and external finishings of houses, ships, etc.

He would not be aknowen that himself was prieste, but sayed that he had by ye space of 9 yeres ben beyonde the sea, & there liued by the *ioyners* craft.
Sir T. More, Works, p. 345.

Her chariot is an empty hazel-nut
Made by the *joiner* squirrel, or old grub,
Time out o' mind the fairies' coach-makers.
Shak., R. and J., i. 4, 68.

3. In *wood-working*, a power-tool for sawing, planing, cross-cutting, etc. By means of attachments, it is capable of performing a great variety of work, as grooving and tonguing, mitering, molding and beading, wedge-cutting, boring, etc. *E. H. Knight.*—**Joiners' chisel,** a thin-bladed paring-chisel. *E. H. Knight.*—**Joiners' gage,** a scribing-tool for making a mark on a board parallel to its edge. *E. H. Knight.*—**Joiners' plane,** a long bench-plane used in facing and matching boards.

joinering (joi′nėr-ing), *n.* [< *joiner* + *-ing*¹.] Same as *joinery*. *Carlyle*, in Froude. [Rare.]

joinery (joi′nėr-i), *n.* [< *join* + *-ery*.] 1. The art or trade of a joiner.—2. Joiners' work.

He made an administration so checkered and speckled; he put together a piece of *joinery* so closely indented and whimsically dovetailed. *Burke*, American Taxation.

join-hand† (join′hand), *n.* Cursive writing; running-hand.

A little boy . . . told her that he was to go into *join-hand* on Thursday. *Addison*, Spectator, No. 7.

joining (joi′ning), *n.* [Verbal n. of *join*, *v.*] A line of junction; a joint.

In the steeple which stands before me at a small distance, the *joinings* of the stones are clearly perceptible.
Reid, Inquiry, vi. 22.

Fine joining, sewing together or securing by crocheting, as of lace.

joining-hand† (joi′ning-hand), *n.* Same as *join-hand*.

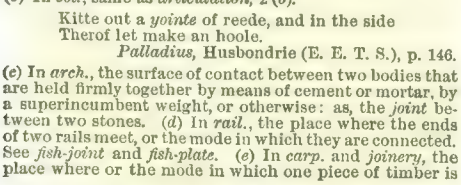
joint (joint), *n.* [< ME. *joynt*, < OF. *joint*, *joinct*, m., *jointe*, *joynte*, *juinte*, f., = Pr. *jonta*, *junta* = Sp. Pg. *junta*, a joint, = It. *giunta*, f., a joint, meeting, arrival, < L. *junctus*, m., a joining, ML. *juncta*, f., a joining, a joint, connection, < *junctus*, pp. of *jungere*, join: see *join*.] 1. The place or part in which two things, or parts of one thing, are joined or united; the mode of connection of two things, together with the contiguous parts connected, whether the latter are movable or not; juncture; articulation; hinge.

A scaly gauntlet now, with *joints* of steel,
Must glove this hand. *Shak.*, 2 Hen. IV., i. 1, 147.

Specifically—(*a*) In *anat.*: (1) An articulation.

The paume hath power to putten oute the *Ioyntes*,
And to vnfolde the fust for hym hit bylongeth,
And receyuen that the fyngres rechen and refuse, yf hym liketh. *Piers Plowman* (C), xx. 142.

Myself I then perused, and limb by limb
Survey'd, and sometimes went, and sometimes ran
With supple *joints*, as lively vigour led.
Milton, P. L., viii. 269.



(2) A part between two articulations; an internode; one of the pieces which form a jointed organ: as, the second *joint* of the tarsus.

There we pray'd a little; and there was shewn us the middle *Joint* of a Man's Finger: I kiss'd it, and ask'd whose Relick it was.
N. Bailey, tr. of Colloquies of Erasmus, II. 11.

(*b*) In *bot.*, same as *articulation*, 2 (*b*).

Kitte out a *yointe* of reede, and in the side
Therof let make an hoole.
Palladius, Husbondrie (E. E. T. S.), p. 146.

(*c*) In *arch.*, the surface of contact between two bodies that are held firmly together by means of cement or mortar, by a superincumbent weight, or otherwise: as, the *joint* between two stones. (*d*) In *rail.*, the place where the ends of two rails meet, or the mode in which they are connected. See *fish-joint* and *fish-plate*. (*e*) In *carp.* and *joinery*, the place where or the mode in which one piece of timber is

Joints, in carpentry.

a, joint concealed by the bead; *b*, joint which may be nailed from both edges, with a jog to prevent slipping; *c*, joint used for pilasters; *d*, joint used for skirtings, dados, doors, jambs, etc.; *e*, miter-joint; *f*, dovetail-joint; *g*, square joint; *h*, rabbet-joint with beads; *i*, tongue-and-groove joint; *j*, feather-joint; *k*, drip-joint.

connected with another. Pieces of timber are framed and joined to one another generally by mortises and tenons, of which there are several kinds, or by iron straps and bolts. (*f*) In *bookbinding*, the flexible cloth or leather which, serving as a hinge, connects the back of a book with its sides. (*g*) The junction of two portions of an electrical conductor, such as a telegraph-wire or cable-core. [Joints made between materials in masonry, carpentry, plumbing, and in other arts have received in many instances names that are compounds of the word *joint* with others that describe the position of the parts, as angle-*joint*, butt-*joint*, etc.; or the manner of forming the joint, as dovetail-*joint*, rivet-*joint*, scarf-*joint*, dowel-*joint*, etc. Most of these joints are clearly defined by their names.]

2. In *geol.*, a crack intersecting a mass of rock. Beds of considerable thickness, especially when homogeneous and somewhat crystalline, are frequently found to be traversed by a great number of fissures, nearly parallel with one another, and often very straight and regular in their course. Sometimes there are two systems of these joints, each set consisting of parallel fissures, and the two sets being at right angles, or nearly so, with each other. There may be even three systems of joint-planes, but in any case one set is almost always more decidedly well formed than the others. The cleat of coal is an illustrative example of the occurrence of a well-developed jointing; the distinctive scenery of certain picturesque limestone regions—as, for instance, that of the north of England—is due to the peculiar form of weathering caused by well-defined systems of joint-planes. The character and relative position of the systems of joints in rocks are of great practical importance from various points of view, and especially with reference to the facility with which the rock may be quarried into forms convenient for use. The jointing of granite is frequently such as to divide the rock naturally into cuboidal masses. The prismatic jointing of volcanic masses is frequently very perfectly and beautifully marked. See *basalt*.

3. One of the large pieces into which a carcass is cut up by the butcher: as, a *joint* of beef; also, such a piece roasted, or prepared for eating: as, a hot *joint;* a cold *joint*.—4. (*a*) A place of meeting or resort for persons engaged in evil and secret practices of any kind: as, a tramps' *joint*. Specifically—(*b*) Such a place, usually kept by Chinese, for the accommodation of persons addicted to the habit of opium-smoking, and where they are provided with pipes, opium, etc. [Colloq., U. S.]—**Abutting joint.** See *abutment*, 2 (*b*) (2).—**Ball-and-socket joint.** See *ball*¹.—**Bell-hanger's joint,** a method of joining wire in use by bell-hangers. The ends of the wires are bent and hooked together, and then twisted about the body of the wire to form linked loops.—**Britannia joint,** in wires for carrying an electric current, a joint made by slightly bending up the ends of the two wires to be joined, laying them side by side for a few inches, binding them tightly together with finer wire, and then soldering the whole.—**Brodie's joint,** a joint, especially the knee, exhibiting Brodie's disease. See *disease*.—**Chelate joint.** See *chelate*.—**Composite joint.** See *composite*.—**Cramp joint.** (*a*) A joint between plates of metal in which the edges are thinned by hammering, one being left plain and the other notched obliquely with shears. Each alternate cramp is bent up, the next down, for the insertion of the plain edge, after which they are hammered together, brazed, and flattened. It is used for works requiring strength, as the parts of musical instruments. (*b*) See *cramp-joint*.—**Cup-and-ball joint.** Same as *ball-and-socket joint*.—**Dovetail-joint.** See *dovetail*.—**Fast-joint butt.** See *butt*².—**Female joint.** See *female*.—**Foliated joint,** in *carp.*, a rabbeted joint.—**French joint,** a joint for wires in which the ends to be joined are placed side by side for a few inches, and then twisted.—**Hooke's joint,** a contrivance by which a motion of rotation is communicated from one shaft to another lying in the same plane, though in a different direction. The two shafts are pronged at the end, and in the prong of each is pivoted one of the cross-bars of a cross-shaped piece, the axis of each cross-bar being perpendicular to that of the shaft to which it is pivoted.—**Hydrostatic, incrassate, inflated, lapped,** etc., **joint.** See the adjectives.—**Loose-joint butt.** See *butt*².—**Opium joint.** See def. 4 (*b*).—**Out of joint,** dislocated, as when the head of a bone is displaced from its socket; hence, figuratively, confused; disordered; gone wrong.

The jaundiced eye;
Eye, to which all order festers, all things here are *out of joint*.
Tennyson, Locksley Hall.

Round-joint file. See *file*¹.—**Rustic joint.** See *rustic*.—**Second joint.** (*a*) The thigh of a fowl (the leg, or drumstick, being the first joint), esteemed by many the best part for eating. (*b*) The middle piece or joint of a fly-rod, between the tip and the butt.—**Square joint,** a joint in wooden stuff in which the edges are brought squarely together without rabbeting, tongue, or feather.—**To break joint,** in *masonry*, *carp.*, etc. See *break*.—**To flush a joint.** See *flush*⁷.—**To put one's nose out of joint,** to supplant one in another's love, favor, or confidence. [Colloq.]—**Universal joint,** in *mech.*, an arrangement by which one part of a machine may be made to move freely in all directions in relation to another. A familiar example is afforded by the well-known ball-and-socket joint, which consists of a solid working into a hollow sphere. See cut of *ball-and-socket joint*, under *ball*.—**Water joint.** See *water*. (See also *pin-joint*, *plumb-joint*, *ring-joint*, *shackle-joint*, *toggle-joint*, *twist-joint*, *union-joint*.)

joint (joint), *a.* [< OF. *joint*, F. *joint*, < L. *junctus*, pp. of *jungere*, join: see *joint*, *n.*] 1. Joined in relation, action, or interest; having a common share; participating: as, *joint* owners; *joint* tenants.

Heirs of God, and *joint*-heirs with Christ. Rom. viii. 17.

What might be toward, that this sweaty haste
Doth make the night *joint*-labourer with the day?
Shak., Hamlet, i. 1, 78.

Man walk'd with beast, *joint* tenant of the shade.
Pope, Essay on Man, iii. 152.

2. Joined in use or participation; held jointly or in common; shared by different individuals: as, *joint* stock or property; a *joint* interest in an enterprise.

For 'tis a cause that hath no mean dependence
Upon our *joint* and several dignities.
Shak., T. and C., ii. 2, 193.

The gen'rous Greeks their *joint* consent declare,
The priest to rev'rence, and release the fair.
Pope, Iliad, i. 490.

3. Joined in amount or effect; combined; acting together: as, *joint* strength; *joint* efforts; a *joint* attack.

The Kentish men, all parties uniteing against a common Enemy, with *joint* power so oppos'd him that he was constrain'd to retire back. *Milton*, Hist. Eng., iv.

'Tis not a lip, or eye, we beauty call,
But the *joint* force and full result of all.
Pope, Essay on Criticism, l. 246.

Where priest and clerk with *joint* exertion strive
To keep the ardor of their flock alive.
Crabbe, The Borough.

4. In *law*: (*a*) Of contracts, united in interest or liability in such manner that the law will not proceed without joining all, as distinguished from cases where a part may act, or sue or be sued, severally. Thus, partners are *joint* debtors, and notice to one is notice to all, and an action by or against any one of them respecting partnership affairs must be usually by or against all. See *estate in joint tenancy* (under *estate*), and *several*. (*b*) Of crimes and torts, combined or connected in the same transaction.—**Joint and several,** united in obligation or liability in such manner that the creditor may proceed against all together or each separately.—**Joint batteries.** See *battery*.—**Joint committee, contract, convention,** etc. See the nouns.—**Joint indorsement.** See *indorsement*, 3.—**Joint rights in rem,** in *civil law*, same as *condominium*.—**Joint tenancy,** in *law*, a tenure of estate by unity of interest, title, time, and possession; possession or occupation by joint tenants. See *estate*.

joint (joint), *v.* [< *joint*, *n.* Cf. Sp. Pg. *juntar*, join.] **I.** *trans.* 1. To form with a joint or joints; articulate.

The fingers are *jointed* together for motion, and furnished with several muscles. *Ray*, Works of Creation.

2. To prepare the edge of (a board or a piece of other material) for closely joining another piece; straighten the edge of (a board or plank), by means of a plane called a *jointer*. In coopers' work the edges of staves are jointed by the coopers' jointer, which is a tool analogous to the carpenters' jointer, but having a curved instead of a plane under face, to impart the proper curvature to the stave.

3. To unite closely; combine; join.

The time's state
Made friends of them, *jointing* their force 'gainst Cæsar.
Shak., A. and C., i. 2, 96.

4. To cut or divide into joints or pieces; separate the joints of; disjoint.

He *joints* the neck, and with a stroke so strong
The helm flies off and bears the head along.
Dryden, Æneid, ix. 1038.

II. *intrans.* To fit as by joints, or as parts adjusted to one another: as, stones cut so as to *joint* into each other.

joint-coupling (joint′kup″ling), *n.* In *shafting*, a form of universal joint by which the sections are coupled and locked together.

jointed (join′ted), *a.* [< *joint*, *n.*, + *-ed*².] Provided with joints; formed with knots or nodes.—**Jointed charlock.** See *charlock*.—**Jointed rod,** a fishing-rod made in sections, with male and female ferrules or male and female screws. See *rod*.

jointedly (join′ted-li), *adv.* By joints.

joint-end (joint′end), *n.* The iron end-piece on which a carriage-bow moves, as on a pivot.

jointer¹ (join′tėr), *n.* 1. One who or that which joints. Specifically—(*a*) In *carp.*, a long plane used to straighten the edges of boards or planks, so that they will make a close joint with other pieces similarly jointed. (*b*) In coopers' work: (1) A tool used for jointing staves. It is analogous to the carpenters' jointer, but has its under face curved, to impart the proper curvature to the edges of staves. (2) A machine for jointing staves, which cuts them to the required curves on their edges. (*c*) In *masonry*, a tool for filling the cracks between the courses of bricks or stones.

2. In *masonry*, a bent strip of iron inserted into a wall to strengthen a joint. *E. H. Knight.*—**Backing** or **side jointer,** a jointer having a bit with a concave edge for dressing the backs of barrel-staves. Also called an *overshave*.—**Heading-jointer,** a jointer having a bit with a straight edge.—**Stave-jointer,** a large plane for working the edges of barrel-staves.

jointer²†, *n.* An obsolete form of *jointure*.

jointer³†, *n.* One who has a jointure or a jointure-settlement.

In Laxfield here my land and living lies;
I'll make thy daughter *jointer* of it all.
Greene, Friar Bacon and Friar Bungay.

joint-evil (joint′ē″vl), *n.* Same as *lepra nervorum* (which see, under *lepra*).

joint-fir (joint′fėr), *n.* 1. A general name of plants of the family *Gnetaceæ* (which see).—2. A name of the taxoid conifers.

joint-grass (joint'gras), *n.* 1. The grass *Paspalum distichum*, of the southern United States. [U. S.]—2. Various species of *Equisetum* or horsetail. [Prov. Eng.]—3. The yellow bedstraw, *Galium verum*. [Prov. Eng.]

joint-hinge (joint'hinj), *n.* A strap-hinge.

jointing-machine (join'ting-ma-shēn'), *n.* A planing-machine adapted to fine cabinet- and piano-work.

jointing-plane (join'ting-plān), *n.* 1. A jointer: specifically, a power-tool which has largely superseded the hand-tool or jointer-plane; a combination wood-working machine for jointing, planing, chamfering, rabbeting, beading, etc. It is essentially a rotary planer.

2. A small supplementary share in a plow.

jointing-rule (join'ting-rōl), *n.* In *painting*, a straight rod about six feet long used as a guide in marking out with paint the joints of brickwork.

jointless (joint'les), *a.* [< *joint* + *-less*.] Having no joint; without, or as if without, joints; hence, stiff; rigid.

"Let me die here," were her words, remaining *jointless* and immovable. *Richardson*, Clarissa Harlowe, VI. 38.

jointly (joint'li), *adv.* In conjunction; together; unitedly; in concert.—**Jointly and severally**, collectively and individually.

joint-oil (joint'oil), *n.* The synovial fluid which lubricates joints; synovia.

An albuminous fluid called "synovia," and commonly known as *joint-oil*. *Mivart*, Encyc. Brit., XXII. 111.

joint-pipe (joint'pīp), *n.* A short section of a gas- or steam-pipe, threaded at both ends and used for joining lengths of pipe.

joint-pliers (joint'plī'ėrz), *n. pl.* A special form of small nipping pliers for watchmakers' use.

joint-racking (joint'rak'ing), *a.* Causing pain in the joints.

Dropsies, and asthmas, and *joint-racking* rheums. *Milton*, P. L., xi. 488.

jointress (join'tres), *n.* [Contr. of *jointuress*, < *jointure* + *-ess*.] 1. A woman who has a jointure; a dowager. [Rare.]—2. A woman who joins with another person in rule or possession.

Therefore our sometime sister, now our queen,
The imperial *jointress* of this warlike state.
Shak., Hamlet, i. 2, 9.

joint-ring (joint'ring), *n.* A ring jointed so as to consist of two equal parts; a gemel-ring.

Marry, I would not do such a thing for a *joint-ring*, nor for measures of lawn, nor for gowns, petticoats, nor caps. *Shak.*, Othello, iv. 3, 73.

joint-rod (joint'rod), *n.* In *bookbinding*, a wooden rod with a curved face, used to hold a book in good shape for pressing.

joint-saw (joint'sâ), *n.* A saw with a curved working-face, used in forming the joints of compasses, etc.

joint-snake (joint'snāk), *n.* A fragile limbless lizard of the southern United States: same as *glass-snake*.

joint-splice (joint'splīs), *n.* Any form of reinforcing device for holding two parts of a structure or machine firmly in place, as the fish-plate of a rail-joint on a railroad.

joint-stock (joint'stok), *a.* Of or pertaining to or concerning joint stock, or the holding of stock in shares; having a capital divided into shares.

The development of the *joint-stock* principle gave it the chance to secure the requisite capital from a number of small investors. *Science*, VII. 222.

Joint-stock company. (*a*) An association the property or capital of which is represented by stock issued in shares to the members respectively, the object being that changes in membership shall depend, not, as in partnership, upon the consent of all the members, but upon the transfer of shares, which any member may make without the consent of the others, and also that the death of a member shall not dissolve the association, as in case of a partnership his right being simply transferred to his executors or administrators. Another object usually if not always involved is the rendering of the power of control separable from the right of ownership, by vesting the management in a committee or officers instead of leaving it, as in the case of a partnership, with each member. In the absence of any statute the liability of a joint-stock company and its members, and its means of enforcing its rights as to third persons, are nevertheless precisely those of partners: all the members must join in suing; all are liable for its debts, and all must be joined when sued; and on a change of membership pending a suit a corresponding change of parties may be required. To obviate these inconveniences, statutes have been passed in several of the United States allowing such associations to sue and be sued in the name of the president or treasurer. In respect to internal controversies, the courts, even without the aid of statute, follow the analogies afforded by the law of corporations, so far as this can be done without conceding to unincorporated associations the right to have a common seal, and to have succession and sue and be sued as a distinct artificial person. (*b*) An association for similar objects, but having the express sanction of statute for its organization as a corporation. In both classes of companies the members contribute.—**Joint-stock Companies Acts**, British statutes prescribing methods for the organization, management, and winding up of incorporated companies other than banking concerns.

joint-stool (joint'stöl), *n.* 1. A stool made of parts fitted or joined together, as distinguished from one more roughly made, as from planks.

Fool. Come hither, mistress. Is your name Goneril?
Lear. She cannot deny it.
Fool. Cry you mercy, I took you for a *joint-stool*.
Shak., Lear, iii. 6, 54.

Joint-stools were then created; on three legs
Upborne they stood, three legs upholding firm
A massy slab, in fashion square or round.
Cowper, Task, i. 19.

2. Any supporting rest or block used for holding the ends of two abutting parts, as the ends of rails, ships' ways, etc.

joint-strip (joint'strip), *n.* In railroad-cars, a strip of wood with rabbeted grooves for the insertion of corrugated metal roofing-sheets.

joint-test (joint'test), *n.* The electrical test to which the joints in the core of telegraph-cables are subjected to insure their soundness.

jointure (join'tūr), *n.* [Early mod. E. also *jointer*; < ME. *joynture*, rarely *joynter*, < OF. *jointure*, later *joincture*, F. *jointure* = Pr. *junhtura*, *junctura* = Sp. Pg. *juntura* = It. *giuntura*, < L. *junctura*, a joining, < *jungere*, pp. *junctus*, join: see *join*. Doublet *juncture*, q. v.] 1†. A joining or coupling together; junction; union; conjunction.

It wanteth moevyng and *joynture* of soule and body.
Chaucer, Boëthius, ii. prose 5.

Yet all too mean to balance equal forage,
And sympathise in *jointure* with thy courage.
Ford, Fame's Memorial.

2†. A joint of armor.

Joynter and gemows he jogges in sondyre!
Morte Arthure (E. E. T. S.), l. 2894.

3. An estate in lands or tenements settled before marriage on the intended husband and wife jointly.—4. An estate or property settled on a woman in consideration of marriage, and to be enjoyed by her after her husband's decease.

It is utterly unaccountable to me why you, the widow of a City Knight, with a good *jointure*, should not close with the passion of a man of such character . . . as Mr. Surface. *Sheridan*, School for Scandal, i. 1.

jointure (join'tūr), *v. t.*; pret. and pp. *jointured*, ppr. *jointuring*. [< *jointure*, *n.*] To settle a jointure upon.

If thou, my dear, thyself shouldst prize,
Alas, what value would suffice?
The Spaniard could not do't, though he
Should to both Indies *jointure* thee. *Cowley*.

jointuress (join'tūr-es), *n.* Same as *jointress*.

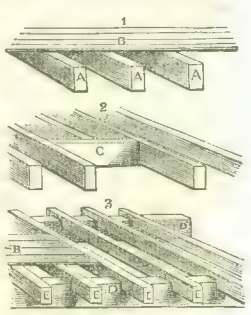
joint-wire (joint'wīr), *n.* In *watchmaking* and *jewelry-manuf.*, tubular wire of silver, gold, or alloy, for use in hinge-joints. It is drawn over a steel wire, which after the drawing is pulled out. Pieces of this tubular wire are hard-soldered to the parts to be hinged together, and a wire pintle completes the hinge-joint.



joint-worm (joint'wėrm), *n.* 1. A jointed worm; an intestinal worm of the genus *Tænia*; a tapeworm. See cut under *Tænia*.

In opening a dog the other day, I found this worm. . . . 'Tis the *joint-worm* which the learned talk of so much.—Ay; the Lumbricus lætus, or vulgarly in English the tape-worm. *Mrs. Centlivre*.

2. The larva of a chalcid hymenopterous parasite of the genus *Isosoma*, which is very destructive to crops of barley, wheat, and rye in the United States. The eggs are laid in the stems of these cereals, and the larvæ feed in slight enlargements near the joints. There is only one annual generation, and the insect winters in the stubble in both the pupal and adult states. All the species of *Isosoma* are phytophagous or plant-feeding, and work like *I. hordei* upon the stalks of various grasses and cereals. These worms are of small size, one tenth to one fifth of an inch long. They attack the crop when it is a foot or less in height, checking the growth, causing the green leaves to turn yellow, and making knots on the stem. The rye joint-worm is the larva of *I. secalis*; the wheat joint-worm, that of *I. tritici*; both of these were formerly considered merely varieties of *I. hordei*, but are now called species. See *Isosoma*.

jointy (join'ti), *a.* Full of joints.

joist (joist), *n.* [The vulgar pron. *jīst* (like *jīn*, *jīnt*, *hīst*, etc., for *join*, *joint*, *hoist*, etc.) was formerly in good usage, and in this case is etymologically correct, the form *joist*, early mod. A college *joke* to cure the dumps.
Swift, Cassinus and Peter.

The practice of turning every thing into *joke* and ridicule is a dangerous levity of imagination.
Beattie, Moral Science, I. i. 7.

2. Something not real, or to no purpose; what is not in earnest or actually meant; an illusion.

Inclose whole downs in walls—'tis all a *joke*!
Pope, Imit. of Horace, II. ii. 261.

In joke, in jest; for the sake of raising a laugh; not in earnest; with no serious intention.—**No joke**, a serious matter. [Colloq.]—**Practical joke.** See *practical*.—**To cut** or **crack a joke.** See *cut*, *crack*.—**Syn.** See *jest*[1].

joke (jōk), *v.*; pret. and pp. *joked*, ppr. *joking*. [Cf. L. *jocari*, jest, joke; from the noun.] **I.** *intrans.* To jest; make merry about something.

Note that *jubilee* is of Heb. origin, and has no connection with the L. *jubilum,* a wild cry, ML. *jubilus,* a cry of joy, L. *jubilare,* shout for joy, whence E. *jubilant, jubilate,* etc. The words have been more or less confused in E. and Rom.] 1. Among the ancient Jews, according to the law in Lev. xxv., the year following the seven *Shemittas* (7 x 7 = 49); the fiftieth year, called *Shenath ha-yobel* (the year of Jubilee), or *Shenath hadror* (the year of emancipation), when the ram's-horn trumpet was sounded, on the day of atonement, throughout the land. The *Yobel* lasted the whole year. In that year the land was not tilled, all lands that had been sold were restored to the original owners or their heirs, and all bondsmen of Hebrew blood were liberated. Whether all debts were canceled is uncertain.

A *jubile* shall that fiftieth year be. Lev. xxv. 11.

2. In the *Rom. Cath. Ch.,* a year in which remission from the penal consequences of sin is granted by the church to those who repent and perform certain acts. The ordinary jubilee is now granted once in twenty-five years. Extraordinary jubilees are sometimes proclaimed on special occasions. The institution dates from 1300, in the pontificate of Boniface VIII., the interval being then fixed at one hundred years, and plenary indulgence granted to all who visited the churches of St. Peter and St. Paul at Rome for a certain number of days with offerings. The period was shortened successively to fifty, thirty-three, and twenty-five years, and certain works of charity and devotion were substituted for the pilgrimage to Rome.

3. Now, in general, the completion of the fiftieth year of any continuous course of existence or activity, or a celebration of the completion of fifty years, whether on the anniversary day or in a succession of festivities or observances: as, the *jubilee* of a town or of a pastorate; the *jubilee* of Queen Victoria.

Our sexteyn and oure fermerer,
That han ben trewe freres fifty yeer,—
They may now, God be thanked of his loone,
Maken hir *jubilee,* and walke allone.
Chaucer, Summoner's Tale, l. 154.

Hence—4. Any exceptional season or course of rejoicing or festivity; a special occasion or manifestation of joyousness.

Joy was then a masculine and a severe thing; the recreation of the judgement, or rejoicing, the *jubilee* of reason.
South, Sermons.

And over Earth's full *jubilee*
Shall deeper joy be felt in heaven.
Whittier, Pastoral Letter.

Who that has ever known it can forget the *jubilee* of Nature in Virginia's woods in April?
The Century, XXXVII. 834.

5. The fiftieth year; the year following any period of forty-nine (or sometimes fifty) years.

But is 't possible he should believe he is not of age? why, he is fifty, man; in 's *jubilee,* I warrant.
Fletcher (and another), Queen of Corinth, iii. 1.

6†. A period of fifty years; a half-century.

Judaic (jö-dā'ik), *a.* [= F. *judaïque* = Sp. Pg. *judaico* = It. *giudaico*, < L. *Judaïcus*, < Gr. Ἰουδαϊκός, of or pertaining to Judea, < Ἰουδαία (L. *Judæa*), Judea: see *Judean*.] Pertaining or relating to the Jews; Jewish in condition or tendency.

Judaical (jö-dā'i-kal), *a.* [< *Judaic* + *-al*.] Same as *Judaic*.

Judaically (jö-dā'i-kal-i), *adv.* After the Jewish manner.

Judaisation, Judaise, etc. See *Judaization*, etc.

Judaism (jö'dā-izm), *n.* [= F. *judaisme* = Sp. *judaismo* = Pg. *judaismo* = It. *giudaismo*, < LL. *Judaismus*, < Gr. Ἰουδαϊσμός, Judaism, < Ἰουδαΐζειν, Judaize: see *Judaize*.] 1. The religious system and polity of the Jews, as enjoined in the laws of Moses.

But we are told, we embrace Paganism and *Judaism* in the arms of toleration. A most audacious calumny! *Milton*, Articles of Peace with the Irish.

Judaism alone, of all the ancient religions, went at least so far as to lay the basis of a spiritual or universal religion. *Faiths of the World*, p. 300.

2. Conformity to the Jewish rites and ceremonies.—3. A Jewish quarter or Jewry. [Rare.]

The Jews had also their Jewerie, or *Judaisme*, not for a "corporation" merely, but also for the requirements of their faith and worship, and for their living together. *Mayhew*, London Labour and London Poor, II. 128.

The Judaism, in *Eng. hist.*, a term used to designate revenues arising from exactions imposed on Jews.

The revenue of *the Judaism*, as it was termed, was managed by a separate branch of the exchequer, termed the exchequer of the Jews. *S. Dowell*, Taxes in England, I. 90.

Judaist (jö'dā-ist), *n.* [< *Juda(ism)* + *-ist*.] An adherent of Judaism; a Judaizer.

Judaistic (jö-dā-is'tik), *a.* [< *Judaist* + *-ic*.] Relating or pertaining to Judaism.

Judaistically (jö-dā-is'ti-kal-i), *adv.* In a Judaistic manner; with a tendency to Judaism.

It can have been designed only for *Judaistically*-disposed readers. *Encyc. Brit.*, XX. 729.

Judaization (jö″dā-i-zā'shon), *n.* [< *Judaize* + *-ation*.] The act of Judaizing; a conforming to the Jewish religion or ritual. Also spelled *Judaisation*.

Judaize (jö'dā-īz), *v.*; pret. and pp. *Judaized*, ppr. *Judaizing*. [< F. *judaiser* = Sp. *judaizar* = Pg. *judaisar* = It. *giudaizzare*, < LL. *Judaizare*, < Gr. Ἰουδαΐζειν, live or act in the manner of the Jews, < Ἰουδαῖος, a Jew: see *Judean*.] **I.** *intrans.* 1. To conform to Judaism in any respect; adopt or affect the manners or customs of the Jews.

They say . . . that usurers should have orange-tawny bonnets, because they do *judaize*. *Bacon*, Usury (ed. 1887).

They . . . prevailed on the Galatians to *judaize* so far as to observe the rites of Moses in various instances. *Milner*.

2. To reason or interpret like a Jew.

By their sorcerous doctrine of formalities they take the way to transforme them out of Christian men into *Judaizing* beasts. *Milton*, Apology for Smectymnuus.

II. *trans.* To bring into conformity with Judaism: as, to *Judaize* the Christian sabbath.

Error by that time had brought back again Priests, Altars, and Oblations; and in many other Points of Religion had miserably *judaiz'd* the Church. *Milton*, Touching Hirelings.

The English translation of the Bible had to a very great degree *Judaized*, not the English mind, but the Puritan temper. *Lowell*, Among my Books, 2d ser., p. 273.

Also spelled *Judaise*.

Judaizer (jö'dā-ī-zėr), *n.* 1. One who conforms to Judaism in any respect; one who reasons or interprets according to Jewish ideas or teachings.

The *Judaizers* clamored for other criterions; not so "James, Cephas, and John." *The Century*, XXXII. 487.

Specifically—2. One of a class of persons in the early church who, though converted from Judaism to Christianity, still insisted on obedience to the Mosaic law. Also called *Jewish Christian*.

Also spelled *Judaiser*.

Judas (jö'das), *n.* [= F. *Judas*, a treacherous person, a peephole (so called with reference to the treachery of Judas Iscariot, one of the apostles), < LL. *Judas*, < Gr. Ἰούδας, Judas, Judah, Jude, a Grecized form of *Judah*, < Heb. *Yehūdah*, Judah, a name first known as that of one of the sons of Jacob: see *Judean*, *Jew*.] 1. A treacherous person; one who betrays under the semblance of friendship.—2. [*l. c.*] In some old houses, a lattice with small openings in a door, through which those inside could look without being seen: designed to prevent the admission of objectionable persons.

A *judas* [in certain old Parisian houses] is a square iron lattice, with such small spaces in the metal that no weapon could be thrust through them while the warder was reconnoitering the visitor. Some *judases* have a double lattice; all have an iron flap inside to keep inquisitive eyes from prying into the house and yard. *The Century*, XXVII. 75.

Hence—3. [*l. c.*] In a prison, a small opening in the door or wall of a cell to enable the guards to watch the prisoners; a judas-hole.

Immediately over it [a door] is a narrow horizontal slit about as large as the opening for letters in a street letter-box, covered by a pivoted strip of wood which can be raised and lowered like the blade of a jack-knife so as to open or close the aperture. This contrivance, which is known to the political prisoners as the *Judas*, enables the guard to look into the cell at any time without attracting the attention of the occupant. *The Century*, XXXV. 522.

Judas of the paschal. See the extract.

This wooden imitation of a candle, which rested on the socket of the middle branch [of the seven-branched candlestick] was called—it is not known why—the *Judas of the paschal*, at the top of which was let in the true wax candle. *Rock*, Church of our Fathers, III. ii. 244.

Judas-colored (jö'das-kul″ord), *a.* Red: applied to hair, from the notion that Judas had red hair.

I do not like his oath, there's treachery in that *Judas-colour'd* beard. *Dryden*, Amboyna.

With leering Looks, Bullfac'd and Freckled fair,
With two left Legs, and *Judas-colour'd* Hair.
Dryden, On Jacob Tonson.

Judas-cup (jö'das-kup), *n.* A wooden bowl used in medieval times at monastic and domestic refections on Maundy Thursday evenings.

Judas-ear (jö'das-ēr), *n.* Same as *Jew's-ear*.

judas-hole (jö'das-hōl), *n.* A small trap or hole in a door made for peering or watching, either from within or from without. Also *judas*. See *judas*, 3.

He knew the world as he had seen it through *judas-holes*, chiefly in its foulness and impurity. *C. Reade*, Never too Late to Mend.

Judas-light (jö'das-līt), *n.* A wooden imitation of the paschal candle.

Judasly† (jö'das-li), *a.* [< *Judas* (see *Judas*) + *-ly*[1].] Like Judas; treacherous.

Shall any of them prove a devil as Christ said of Judas? or ever, as these with us of late, have to do with any devilish or *Judasly* fact? *Bp. Andrews*, Works, I. 15.

Judasly† (jö'das-li), *adv.* [< *Judas* (see *Judas*) + *-ly*[2].] Like Judas; treacherously.

Thou shalt vnderstand, most deare reader, that William Tyndall was *Judasly* betrayed by an Englisheman. *Tyndale*, Works, p. 429.

Jonas . . . hyred a shyppe to thentent he myght *Judasly* flee from the face of our lorde God. *Bp. Fisher*, Works, p. 203.

Judas-tree (jö'das-trē), *n.* [NL. *arbor Judæ*: so called because, according to tradition, Judas hanged himself on a tree of this kind. Cf. *Jew's-ear*.] 1. Originally, the *Cercis Siliquastrum* of southern Europe, a small leguminous tree with handsome purple flowers.—2. The similar American tree, *Cercis Canadensis*, the redbud.—3. The elder-tree of the old world, *Sambucus nigra*, which grows to a height of 25 feet. [Prov. Eng.]—**California Judas-tree,** *Cercis occidentalis*.

Judas-tree or Redbud (*Cercis Canadensis*).
1, branch with flowers; 2, branch with leaves and fruit; *a*, flower.

judcock (jud'kok), *n.* [Also *juddock*, *jedcock*.] Same as *jack-snipe*, 1.

juddock (jud'ok), *n.* Same as *judcock*.

Judean, Judæan (jö-dē'an), *a.* and *n.* [< L. *Judæus*, < Gr. Ἰουδαῖος, Jewish, a Jew, < Ἰουδαία, Judea, Palestine, < Heb. *Yehūdah*, Judah, son of Jacob, whose name was also given to the kingdom so called: see *Judas*, *Jew*.] **I.** *a.* Relating to Judea, the southernmost division of Palestine in the time of Christ, lying south of Samaria.

II. *n.* A native or an inhabitant of Judea; a Jew.

judge (juj), *n.* [< ME. *jugge*, *juge*, < OF. *juge*, F. *juge* = Pr. *jutge* = Sp. *juez* = Pg. *juiz* = It. *giudice*, < L. *judex* (*judic-*), one who declares the law, a judge, < *jus*, the law, + *dicere*, say, declare: see *jus*[2] and *diction*. Cf. *judge*, *v.*] 1. A public officer invested with authority to hear and determine causes, civil or criminal, and to administer justice between parties in courts held for the purpose; a public officer appointed to exercise the judicial power; a justice; a magistrate.

But seldome sitts the *iudge* that may not erre. *Puttenham*, Partheniades, v.

The charge is prepared, the lawyers are met,
The *judges* all ranged: a terrible show!
Gay, Beggar's Opera, iii. 2.

2. [*cap.*] A title of God as supreme arbiter of all things.

The Lord the *Judge* be judge this day between the children of Israel and the children of Ammon. Judges xi. 27.

3. In a more general sense, any one intrusted with authority to arbitrate on the rights of others: as, no man ought to be a *judge* in his own cause.—4. A person appointed to decide in any competition or contest; an authorized arbiter: as, to make one a *judge* in a dispute; the *judges* of a competitive exhibition.

The controverse of beauties soveraine grace;
In which, to her that doth the most excell,
Shall fall the girdle of faire Florimell. . . .
The *judges*, which thereto selected were,
Into the Martian field adowne descended.
Spenser, F. Q., IV. v. 6.

O, Heaven be *judge* how I love Valentine.
Shak., T. G. of V., v. 4, 36.

5. A person skilled in determining the true nature or quality of anything; one qualified or able to discriminate, as between good and bad, right and wrong, genuine and spurious, etc.; a connoisseur; an expert: as, a *judge* of wines or of paintings; a *judge* of character or of qualifications.

Mr. Brisk, you're a *Judge:* was ever anything so well bred as my Lord? *Congreve*, Double-Dealer, ii. 2.

A man who is no *judge* of law may be a good *judge* of poetry or eloquence, or of the merits of a painting. *Dryden*.

6. In *Jewish hist.*, an administrative officer who stood at the head of the Hebrew state in the intermediate period between the time of Moses and Joshua and that of the kings. These officers were generally military leaders, without any regular transmission of their authority, not supreme magistrates succeeding to the rule of Moses and Joshua. None of the judges had authority over all the tribes, and sometimes two or more were contemporaneous.

And it came to pass, when Samuel was old, that he made his sons *judges* over Israel. 1 Sam. viii. 1.

7. [*cap.*] *pl.* The seventh book of the Bible, properly the "Book of Judges" (*Liber Judicum*, Vulgate). It contains the history of the Israelites un-

der the administration of the judges from the death of Joshua to about the time of the birth of Samuel. The date and authorship are unknown. Some critics regard Samuel as the author; others find traces of several authors or compilers, and place the final revision as late as the eighth century B. C.

8. In *coal-mining*, the measuring-rod with which the depth of a holing or jad is ascertained. [Eng.]—**Associate judge,** the designation usually given to each of the judges of a court other than the chief or presiding judge.—**Chief judge,** a judge who presides over the sessions and deliberations of a court. The office of chief judge is often a distinct office, having a slightly higher salary; but in some cases the position belongs to the member of the court who may be chosen by his associates, or who is entitled to it by virtue of seniority in office.—**Circuit judge.** (*a*) The judge of a circuit court; specifically, in the United States, the judge appointed to preside over one of the nine circuits into which the country is divided. A circuit court is commonly held by him with the district judge, or with a justice of the Supreme Court; but it may be held by any one of the three alone, or by any two together. Formerly the justice of the Supreme Court allotted to a circuit was called the *circuit judge.* (*b*) The term has sometimes been employed to designate a special judge, or one of a class of special judges, added to a court for the purpose of holding trials, but without being a member of a court in banc.—**City judge,** the usual title in the United States of a local magistrate having criminal or civil jurisdiction, or both, within the limits of a city.—**County judge,** a local magistrate having a limited jurisdiction within a county.—**District judge,** a judge whose jurisdiction is confined to a particular district; specifically, in the United States, the judge of a district court in one of the numerous districts into which the country is divided for judicial purposes, there being usually two or more districts within each State.—**Judge ordinary,** in England, formerly, the judge of the Court for Divorce and Matrimonial Causes.—**Judges' chambers.** See *chamber.*—**Lay judge,** a judge who is not a lawyer.—**Municipal judge.** Same as *city judge.*—**Presiding judge.** (*a*) The judge for the time being holding a court or presiding in a court. (*b*) A chief judge.—**Probate judge,** or **judge of probate,** a judge having jurisdiction of testamentary causes; a surrogate.—**Puisne judge,** a junior judge: the title formerly used in the English superior courts of common law for a judge other than the chief judge.—**Side judge,** a designation sometimes given to a magistrate, or each of two magistrates, of inferior rank, associated with a magistrate of higher grade for the purpose of constituting a court.—**Trial judge,** the judge before whom a cause is tried: used particularly in appellate courts to designate the judge whose rulings are brought under review. = **Syn. 1** and **3.** *Judge, Umpire, Referee, Arbitrator;* justice, arbiter. *Judge* is a technical word for a legal officer with duties clearly defined: as, a *judge* of probate; or a general word for a person empowered to arbitrate or award: as, to act as *judge* at contests, an exhibition of paintings, a competitive examination, etc. *Umpire* is a name applied to the person selected to decide all disputed points connected with a public contest: as, the *umpire* in a game of base-ball. *Referee* is somewhat more loosely used. In legal usage *referee* means one to whom a pending cause or some branch of it is referred, with the sanction of the court, to act in place of the judge, or in aid of his determination, the result being a decision of the court; while an *arbitrator* is one to whom a question is referred simply by agreement of the parties, without sanction of the court. The reference of a pending cause to an *arbitrator* takes it out of court, and precludes further proceedings in court. In a boxing-match, boat-race, foot-ball game, etc., the *referee* is the same as an *umpire.* Sometimes an *umpire* is legally appointed to decide where *arbitrators* disagree. Thus all these words may have technical senses when used ★as legal terms.

judge (juj), *v.*; pret. and pp. *judged,* ppr. *judging.* [< ME. *juggen, jugen,* < OF. *juger,* F. *juger* = Pr. *jutjar, jutgar* = Sp. *juzgar* = Pg. *julgar* = It. *giudicare,* < L. *judicare,* declare the law, judge, decide, < *judex* (*judic-*), one who declares the law, a judge: see *judge, n.* Cf. *adjudge, adjudicate.*] **I.** *intrans.* **1.** To act as a judge; pronounce upon the merits of a cause or controversy; pass judgment.

The Lord *judge* between me and thee. Gen. xvi. 5.

Judge not, that ye be not judged. For with what judgment ye *judge,* ye shall be judged. Mat. vii. 1, 2.

It is not ours to *judge*—far less condemn. *Byron.*

2. To form a judgment or mental assertion; say to one's self that so and so is or is not true; make up one's mind about the truth of a matter.

When I shal conferre the thinges I see with those I haue read, I will *iudge* accordingly.
Lyly, Euphues and his England, p. 247.

We uniformly *judge* improperly when we assent to what we do not clearly perceive, although our judgment may chance to be true.
Descartes, Prin. of Philos. (tr. by Veitch), i. § 44.

3. To make a critical determination; decide as to what is true or false, good or bad, genuine or spurious, etc.; estimate the value or magnitude of anything.

They are employed to *judge* of commodities, such as raw silk, by handling them.
H. Spencer, Prin. of Psychol., § 80.

II. *trans.* **1.** To hear and determine authoritatively, as a cause or controversy; examine into and decide upon.

Rewards and punishments are not received, but at the hands of such as, being above us, have power to examine and *judge* our deeds. *Hooker,* Eccles. Polity, i. ¶.

2. To try at the bar of justice; pass judgment upon.

God shall *judge* the righteous and the wicked.
Eccl. iii. 17.

3. To pass sentence upon; adjudge; sentence; condemn. [Rare.]

And the barouns and alle the peple seide she was nothinge trewe, and thei *Iuged* [her] to be brent.
Merlin (E. E. T. S.), iii. 430.

Vpon the oon of them our Savyor stode whanne he was *jugede* to Deth. *Torkington,* Diarie of Eng. Travell, p. 32.

4. To form a judgment or opinion of or upon; decide upon critically; estimate.

Some censure this act as cruel and tyrannical; but, consider'd well, it may be *judg'd* more favourably.
Milton, Hist. Eng., v.

We *judge* ourselves by what we feel capable of doing, while others *judge* us by what we have already done.
Longfellow, Kavanagh, i.

5. To hold as an opinion; esteem; consider.

If ye have *judged* me to be faithful to the Lord.
Acts xvi. 15.

If men *judge* that learning should be referred to action, they *judge* well. *Bacon,* Advancement of Learning, ii. 109.

[He] *judged* it highly expedient to use despatch.
Goldsmith, Vicar, xxi.

=**Syn. 5.** To account, hold, believe, deem, consider, regard.

judge-advocate (juj'ad'vō-kāt), *n.* See *advocate.*

judgeman†, *n.* [< ME. *juggeman;* < *judge* + *man.*] A judge; doomsman.

Full arely the *juggemen* demed hym to dye,
Both prestis and prelatis to Pilate made preysing,
And alls cursid caytiffis and kene on criste gan thei crie,

York Plays, p. 427.

judgement, *n.* See *judgment.*

judger (juj'ėr), *n.* One who judges or forms a judicial or critical opinion; a judge.

Readie speakers generallie be not the best, playnest, and wisest writers, nor yet the deepest *iudgers* in weightie affaires. *Ascham,* The Scholemaster, p. 115.

That within her which a wanton fool
Or hasty *judger* would have call'd her guilt
Made her cheek burn. *Tennyson,* Geraint.

judgeship (juj'ship), *n.* [< *judge* + *-ship.*] The office of a judge; authority to judge; also, the period of incumbency of a judge.

To pass over those concerning the Pope, his universal pastourship, *judgship* in controversies, power to call councils. *Barrow,* The Pope's Supremacy.

judgingly† (juj'ing-li), *adv.* In the manner of a judge; as one qualified to judge; judiciously.

This work neither his own ministers nor any els can discerningly anough or *judgingly* perform without his own immediat direction, in his own fit season.
Milton, Civil Power.

judgmatical (juj-mat'i-kal), *a.* [Irreg. < *judge* + *-matical,* as in *dogmatical.*] Judicious; skilful; done with or manifesting good judgment. [Colloq.]

So a *judgmatical* rap over the head stiffened the lying impostor for a time. *J. F. Cooper,* Last of Mohicans, xxv.

The tone [of the book] is moderate and *judgmatical* ★throughout. *Athenæum,* No. 3186, p. 680.

judgment, judgement (juj'mẹnt), *n.* [< ME. *juggement, jugement,* < OF. *jugement,* F. *jugement* = Pr. *jutjamen* = OSp. *juzgamiento* = Pg. *julgamento* = It. *giudicamento,* < ML. *judicamentum,* a judgment, < L. *judicare,* judge: see *judge, v.*] **1.** The faculty of judging.

When one goeth about to prove anything, he must firste invente somewhat to prove his cause, the whiche when he hath dooen, he must use *judgemente* bothe in framyng the same reason so invented, and also to see whether it serveth for the purpose or not.
Sir T. Wilson, Rule of Reason (1552).

Specifically—(*a*) The intellectual power of perceiving relations between ideas, as the relations of similarity, difference, etc.

When the notice touches upon two or more ideas together, there generally arises another, not compounded or extracted from them, but generated by them—to wit, an idea of comparison, resemblance, identity, difference, relation, distance, number, situation, or other circumstance belonging to them: all which, in metaphysical language, are comprehended under the general term of *judgment.*
A. Tucker, Light of Nature, I. xi.

(*b*) The power of recognizing the true or just relations between ideas; the power of judging wisely and justly; correct, sound, or acute intellectual perception; understanding; good sense.

And hence perhaps may be given some reason for that common observation that men who have a great deal of wit and prompt memories have not always the clearest *judgment* or deepest reason; for, wit lying most in the assemblage of ideas and putting those together with quickness and variety wherein can be found any resemblance or congruity, thereby to make up pleasant pictures and agreeable visions in the fancy, *judgment* on the contrary lies quite on the other side, in separating carefully, one from another, ideas wherein can be found the least difference, thereby to avoid being misled by similitude, and by affinity to take one thing for another.
Locke, Human Understanding, II. xi. § 2.

To speak therefore of *judgment* as it is in the best poets; they who have the greatest proportion of it want other helps than from it, within. As for example, you would be loth to say that he who is endued with a sound *judgment* has no need of history, geography, or moral philosophy, to write correctly. *Judgment* is indeed the master-workman in a play; but he requires many subordinate hands, many tools to his assistance. *Dryden,* Dramatick Poesy.

2. The act of judging. (*a*) The act of affirming (or denying) a relation (as of similarity or difference) between two ideas.

Judgment . . . is the putting ideas together, or separating them from one another in the mind, when their certain agreement or disagreement is not perceived, but presumed to be so.
Locke, Human Understanding, IV. xiv. 4.

(*b*) The process of arriving at a conclusion or decision; the determination of a doubtful or debatable matter.

Ye shall do no unrighteousness in *judgment.*
Lev. xix. 15.

A Daniel come to *judgement!* yea, a Daniel!
O wise young judge, how I do honour thee!
Shak., M. of V., iv. 1, 223.

3. The product of the mental act of judging; the recognition of a relation between objects; a mental affirmation or proposition; the thought that a given general representation is really applicable to a certain object; the actual consciousness of belief. The Kantian logicians speak of *judgments* where other logicians speak of *propositions,* in order to show that they study thought, and not merely its expression in language.

We find him [Kant] distinguishing two kinds of *judgments; judgments* of perception, and *judgments* of experience. The former are *judgments* which merely express a connection of individual experience, and which, therefore, give rise only to a subjective association of ideas. The latter are *judgments* in which the connection is determined by one of the categories, and which therefore express an objective relation of things.
E. Caird, Philos. of Kant, p. 354.

An accurate *judgment* is one which corresponds precisely to the realities represented, or which faithfully expresses the relations of things.
J. Sully, Outlines of Psychol., p. 408.

4. The decision of a judge, or of one acting as a judge; an authoritative determination; specifically, the judicial decision of a cause in court; adjudication; award; sentence.

Than comaunded the kynge leodogan that *Iugement* sholde be yoven be the rede of his barouns.
Merlin (E. E. T. S.), iii. 469.

Another Difference . . . was between the two Archbishops of England, about the Jurisdiction of Canterbury over York, which being referred to the Pope, he gave *Judgment* on Canterbury's Side. *Baker,* Chronicles, p. 58.

The Lord and his Spirit puts into the preacher's mouth a *judgment* against oppression, against extortion, against usury, and he utters that *judgment.* *Donne,* Sermons, x.

Specifically—(*a*) the determination of the rights of the parties in a common-law action, as distinguished from a decree in chancery; (*b*) the determination of the rights of the parties in any action, legal or equitable, under the reformed procedure; (*c*) the document embodying such determination. When those rights have been conceded, or established by evidence, and it only remains to compel compliance with the judgment, the judgment is called final. If before enforcing the judgment it is necessary to take proceedings to determine the application of those rights—as, for instance, to take an accounting, or to turn lands or chattels into money for the purpose of division—the determination of the rights of the parties first had is an interlocutory judgment or decree; and after such further proceedings have been had the court gives a final judgment or decree, which can be immediately enforced.

5. An opinion formed or put forth; a conclusion drawn from premises; a decision based on observation or belief; an estimate; a view.

By the *judgment* of the most authentical physicians.
B. Jonson, Every Man out of his Humour, iv. 4.

Where blind and naked Ignorance
Delivers brawling *judgments,* unashamed,
On all things all day long.
Tennyson, Merlin and Vivien.

6. A divine allotment or dispensation; a decree or commandment of God; specifically, an event or experience regarded as a direct manifestation of the divine will, especially of the divine displeasure.

How unsearchable are his *judgments!* Rom. xi. 33.

You have more fearful Examples of miraculous *Judgements* in this particular [of swearing], than of any other Sin. *Howell,* Letters, I. v. 11.

Through thorns of *judgment* mercies bloom
In sweet relief. *Whittier,* Anniversary Poem.

7. The final trial of the human race in the future state; the judgment-day.

The angels which kept not their first estate . . . he hath reserved . . . unto the *judgment* of the great day.
Jude 6.

One that, before the *judgement,* carries poor souls to hell.
Shak., C. of E., iv. 2, 40.

See *equity*.—**Judgment debt.** See *debt*.—**Judgment debtor.** See *debtor*.—**Judgment in personam,** a judgment which binds only the right of a party and his representatives, as distinguished from a *judgment in rem*, which is available as conclusive respecting the right of the subject of action against all the world.—**Judgment non obstante, judgment non obstante veredicto,** at *common law*, a judgment rendered by the court notwithstanding a contrary verdict, as, for instance, because some matter relied on in avoidance and found to be true by the verdict is insufficient in law.—**Judgment of experience,** an empirical judgment having objective validity.—**Judgment of God,** a phrase formerly applied to extraordinary trials of secret crimes, as by arms and single combat, by ordeal, etc., it being imagined that God would work a miracle to vindicate innocence.—**Judgment of perception,** the judgment by which a given sense-process is referred to an existing object.—**Judgment of retraxit,** a judgment suffered at common law by a plaintiff voluntarily retracting his claim.—**Judgment record** or **roll.** (*a*) In ancient common law practice, the roll of parchment upon which the record terminating in a judgment was engrossed, for permanent preservation. Hence—(*b*) In modern practice, the documents (usually the process complaint, answer, verdict or findings and judgment thereon) fastened and folded together, and filed as the record of the judgment.—**Judgment respondeat ouster,** an interlocutory judgment requiring the defendant to put in a more substantial defense.—**Preliminary judgment,** the judgment that certain probabilities require the examination of a given hypothesis.—**To confess judgment,** in a general sense, to acknowledge liability; specifically, to give a formal consent, upon which the clerk of a court or a justice may enter judgment against the consenting party, without the necessity of process or pleading for the bringing of an action.—**To sit in judgment,** to exercise the function of a judge; hence, to assume the right to criticize or judge: usually in an adverse sense.—**Transcendent judgment,** in the *Kantian terminology*, a judgment which relates to an object which can never be presented in experience.

= **Syn. 1.** *Judgment, Sagacity, Perspicacity;* discrimination, penetration, wisdom, brains. *Judgment,* as compared with *sagacity* and *perspicacity*, is a general word: as, sound *judgment* in business; good *judgment* as to cloths. *Sagacity* is a power to discern the real facts of a situation, to see the course that is wisest to avoid failure or achieve success. (See *astute*.) *Sagacity* is especially the word applied to brutes that have a large discernment and a quickness of mind like those of man. *Perspicacity* is essentially the same as *discernment*, except that it is more vividly figurative, suggesting the actual use of the eyes in looking into things. See *discernment*.—**4.** *Verdict, Report,* etc. See *decision* and *inference*.—**5.** *Taste, Judgment* (see *taste*); opinion, belief, conclusion.

judgment-cap (juj′ment-kap), *n.* Same as *black cap* (*a*) (which see, under *cap*).

judgment-day (juj′ment-dā), *n.* In *theol.*, the last day, or the day when final judgment will be pronounced on the subjects of God's moral government; doomsday. Roman Catholic theologians hold to two judgment-days: the first at death, when the eternal lot of the soul is determined by God—this being designated the private or particular judgment; the second, the great or general judgment-day, at the end of the world.

> Unto the French the dreadful *judgement-day*
> So dreadful will not be as was his sight.
> *Shak.*, 1 Hen. VI., i. 1.

judgment-hall (juj′ment-hâl), *n.* A hall where courts are held.

> Pilate entered into the *judgment hall* again, and called Jesus. John xviii. 33.

judgment-note (juj′ment-nōt), *n.* A promissory note of the usual form, containing also a power of attorney to appear and confess judgment for the sum therein named. It is not negotiable. *Bouvier.*

judgment-seat (juj′ment-sēt), *n.* A seat or place of judgment; specifically, the seat or bench on which judges sit in court.

> Pilate . . . sat down in the *judgment seat* in a place that is called the Pavement. John xix. 13.
>
> We shall all stand before the *judgment seat* of Christ. Rom. xiv. 10.

Judica (jö′di-kạ), *n.* [So called from the opening words in Latin of the introit, the 43d Psalm, *Judica me, Deus*, "Judge me, O God": L. *judica*, 2d pers. sing. impv. of *judicare*, judge: see *judge*, *v.*] A name sometimes given in England to Passion Sunday, or the fifth Sunday in Lent.

judicable (jö′di-kạ-bl), *a.* [= It. *giudicabile*, < LL. *judicabilis*, that can be judged, < L. *judicare*, judge: see *judge*, *v.*] Capable of being judged or tried.

> They were heretics . . . towards God and towards man, and *judicable* in both tribunals.
> *Jer. Taylor*, Works (ed. 1835), II. 315.

judicative (jö′di-kā-tiv), *a.* [= F. *judicatif* = Pr. *judicatiu* = It. *giudicativo*, < L. as if **judicativus*, < *judicare*, judge: see *judge*, *v.*] Having ability to judge; judging.

> The former is but an act of the *judicative* faculty.
> *Hammond*, Works, IV. 492.
>
> The *judicative* power as to writing, speaking, or publishing of gross reflections upon the whole parliament or upon either house, though perhaps originally questionable, seems now of too long a standing and of too much frequency in practice to be well counteracted.
> *Hargrave*, Juridical Arguments, II. 183.

judicatory (jö′di-kā-tō-ri), *a.* and *n.* [= It. *giudicatorio*, < LL. *judicatorius*, pertaining to judging (neut. *judicatorium*, a court of justice), < L. *judicare*, judge: see *judge*, *v.*] **I.** *a.* Pertaining to the passing of judgment; belonging to the administration of justice; dispensing justice.

> He who had power to admonish had also power to reject in an authoritative or *judicatory* way.
> *Bp. Hall*, Cases of Conscience, iii. 5.

II. *n.*; pl. *judicatories* (-riz). 1. A court of justice; a tribunal; any body of persons endowed with judicial authority: as, a church *judicatory*.

> To have brought the King to condign punishment hath not broke the Covnant, but it would have broke the Covnant to have sav'd him from those *Judicatories* which both Nations declar'd in that Covnant to be supreme against any person whatsoever. *Milton*, Eikonoklastes, xxviii.

2. Administration of justice.

> No such crime appeared as the lords, the supreme court of *judicatory*, would judge worthy of death.
> *Clarendon*, Great Rebellion.

judicature (jö′di-kā-tūr), *n.* [< F. *judicature* = Sp. Pg. *judicatura* = It. *giudicatura*, < ML. *judicatura*, < L. *judicare*, judge: see *judge*, *v.*] 1. The power of administering justice by legal trial and determination; judicial authority.

> Give me a man that buyes a seat of *judicature;* I dare not trust him for not selling of justice.
> *Bp. Hall*, The Best Bargain.
>
> The Parliament of England has no Arbitrary Power in point of *Judicature*, but in point of making Law only.
> *Selden*, Table-Talk, p. 89.
>
> The manorial system, and the ecclesiastical and civil *judicature* of old times, are either falling into desuetude or being ruthlessly abolished.
> *Stubbs*, Medieval and Modern Hist., p. 51.

2. A court of justice; a judicatory.

> One of the five *judicatures* of Palæstine was held at it [Sephon]. *Pococke*, Description of the East, II. i. 62.

3†. Legality; lawfulness, as constituted by statute or enactment.

> Our Saviour disputes not here the *judicature* (for that was not his office) but the morality of divorce. *Milton.*

4. Extent of jurisdiction of a judge or court.—**Judicature Acts,** English statutes regarding the Supreme Court of Judicature in England, particularly those of 1873 (36 and 37 Vict., c. 66), 1875 (38 and 39 Vict., c. 77), 1877 (40 and 41 Vict., c. 9), and 1881 (44 and 45 Vict., c. 68), by which the said court has been established and organized in its two permanent divisions, the Court of Appeal and the High Court of Justice.

judicial (jö̤-dish′al), *a.* [= Sp. Pg. *judicial* = It. *giudiciale, giudiziale*, < L. *judicialis*, of or belonging to a court of justice, judicial, < *judicium*, judgment, decision of a court of justice, also the court itself, < *judex* (*judic-*), a judge: see *judge*, *n.*] 1. Of or pertaining to a judge; proper to the character of a judge; judge-like; hence, critical; discriminating; impartial; formerly, judicious.

> I know I shall bee taxed for writing so much of my selfe, but I care not much, because the *iudiciall* know there are few such Souldiers as are my examples.
> Quoted in *Capt. John Smith's* Works, II. 92.
>
> Her brains a quiver of jests, and she does dart them abroad with that sweet, loose, and *judicial* action.
> *B. Jonson.*
>
> I confesse it to me a meer toy, not deserving any *judicial* man's view. *Nashe*, Pierce Penilesse.
>
> His mind was rather *judicial* than forensic in its cast.
> *Sumner*, John Pickering.
>
> A measure of calm becomes the *judicial* function, and a parent or teacher carried away by violent feeling is unfit for moral control. *J. Sully*, Outlines of Psychol., p. 568.

2. Pertaining to the administration of justice; proper to a court of law; consisting of or resulting from legal inquiry or judgment: as, *judicial* power or proceedings; a *judicial* decision, writ, sale, or punishment.

> In this distinct and separate existence of the *judicial* power in a peculiar body of men, nominated indeed, but not removable at pleasure, by the crown, consists one main preservative of the public liberty. *Blackstone*, Com., I. vii.

3. Enacted by statute, or established by constituted authority. [Rare.]

> It was not a moral, but a *judicial* law, and so was abrogated; . . . which law the ministry of Christ came not to deal with. *Milton.*

4. Determinative; giving judgment; deciding, as about a point in contest or about future events: as, *judicial* astrology.

> *Judicial* duels (which were the authorized substitutes for private wars between families) continued in France down to the close of the 14th century.
> *H. Spencer*, Prin. of Sociol., § 522.

5. Having the nature of a judgment or punishment.

> *Judicial* blindness; such as Pharaoh's, who, from resisting God's will, at length did not know the difference between light and darkness.
> *J. H. Newman*, Parochial Sermons, i. 221.

Judicial act, an act involving the exercise of judicial power (which see, below). Hence—(*a*) An act of a court or magistrate in deciding a question of right litigated before him or referred by law to his judgment. (*b*) An act of any public officer involving the exercise of his judgment or discretion on a question affecting the right of any party. Thus, the act of the fiscal officer of a municipality in auditing a claim is usually judicial, but his paying a lawful warrant or order for payment is ministerial. (See *ministerial*.) A judicial act implies deliberation, and therefore, if to be done by several jointly, those who are to do it must be together (or under modern statutes a majority after notice to all); while a ministerial act may ordinarily, unless otherwise required by law, be the concurrent act of each separately.

> The distinction between a *judicial* and a legislative *act* is well defined. The one determines what the law is, and what the rights of parties are, with reference to transactions already had; the other prescribes what the law shall be in future cases arising under it.
> *Justice Stephen J. Field*, 99 U. S., 761.

Judicial astrology. See *astrology*.—**Judicial bribery.** See *bribery*.—**Judicial comity,** the deference which courts in any state usually pay to the rules of law maintained in other states or nations, although different from their own, in cases where the persons, property, or transactions in question are within the foreign jurisdiction. The laws of a state can have no extraterritorial effect; but when a civil controversy arises in the courts of one state as to matters wholly or partly within the territory of another, and the law of the two states differs, and there is contest as to which ought to control the case, the courts often apply the extraterritorial law to extraterritorial persons or property, etc., in furtherance of justice as between the parties, not as the binding rule of law, but by way of comity.—**Judicial confession.** See *confession*, 1 (*d*).—**Judicial declaration.** See *declaration*.—**Judicial discretion.** See *discretion*.—**Judicial evidence.** See *evidence*, 2 (*d*).—**Judicial factor,** in *Scots law*, a factor or administrator appointed by the Court of Session (sometimes by the sheriff), on special application by petition, setting forth the circumstances which render the appointment necessary. Such factors are usually appointed in cases where a father has died without a settlement, leaving his children in pupilarity, and also where a party has become incapable of managing his own affairs.—**Judicial murder,** the execution of one convicted as criminal legally, but in reality unjustly.—**Judicial notice.** See *notice*.—**Judicial power.** (*a*) The authority to determine rights of person or property, by arbitrating between adversaries in specific controversies, at the instance of a party thereto. (*b*) The power conferred upon and exercised by the judiciary or a court as such. (*c*) A power conferred upon a public officer involving the exercise of judgment and discretion in the determination of questions of right in specific cases affecting the interests of persons or property, as distinguished from ministerial power, or authority to carry out the mandates of judicial power or of the law.—**Judicial sale,** a sale made pursuant to a specific judgment, decree, or order of a judicial tribunal, as distinguished from one made by a ministerial officer in execution of process to enforce a money judgment.—**Judicial separation.** See *separation*.

judicially (jö̤-dish′al-i), *adv.* 1. In a judicial manner; in the forms of legal justice: as, a sentence *judicially* declared.

> When the cardinal asked Bilney whether he had not taken the oath before not to preach or defend any of Luther's doctrines, he confessed he had done it, but not *judicially* (judicialiter in the register).
> *Bp. Burnet*, Hist. Reformation, i.

2. In the manner of a judge, as opposed to that of a pleader; impartially.

> He [the critic] should discuss the subject-matter *judicially* and as a whole, . . . gauging the work by the author's standard as well as his own.
> *Stubbs*, Medieval and Modern Hist., p. 53.

3. By way of a judgment or punishment.

> Reflect that . . . those truths divine . . .
> Are never long vouchsaf'd, if push'd aside, . . .
> And that, *judicially* withdrawn, disgrace,
> Error, and darkness occupy their place.
> *Cowper*, Expostulation, l. 692.

judiciary (jö̤-dish′i-ā-ri), *a.* and *n.* [= F. *judiciaire* = Sp. Pg. *judiciario* = It. *giudiciario*, < L. *judiciarius*, of or belonging to a court of justice, < *judicium*, judgment, a court of justice: see *judicial*.] **I.** *a.* Pertaining to courts of judicature or legal tribunals; judicial.

> But to lay such a censure on a clergyman as a suspension, without proof, in a *judiciary* proceeding, was contrary both to law and justice.
> *Bp. Burnet*, Hist. Own Times, an. 1686.

To enable the federal head to exercise the powers given it to best advantage, it should be organized . . . into legislative, executive, and *judiciary*.
Jefferson, Correspondence, II. 64.

Judiciary Act, an act of the United States Congress of September 24th, 1789 (1 Stat., 73), establishing the federal courts of the United States, defining their jurisdiction and powers, and regulating procedure: now embodied with amendments in the provisions of the Revised Statutes. —**Judiciary anathema**. See *anathema*, 2.—**Judiciary astrology**. Same as *judicial astrology* (which see, under *astrology*).

The consideration of his *judiciary astrology*.
Hakewill, Apology, p. 164.

Judiciary law. See *law*[1].

II. *n.* That branch of government which is concerned in the trial and determination of controversies between parties and of criminal prosecutions; the system of courts of justice in a country; the judges taken collectively.

The committee . . . reported a provision that the jurisdiction of the national *judiciary* should extend to all "questions which involved the national peace and harmony." *Calhoun*, Works, I. 245.

judicious (jö̤-dish'us), *a.* [= F. *judicieux* = Sp. Pg. *judicioso* = It. *giudicioso*, < ML. *judiciosus*, prudent, judicious, < L. *judicium*, judgment: see *judicial*.] 1. Having or exercising sound judgment; well-judging; prudent; discreet; sensible: as, a *judicious* parent or teacher; a *judicious* historian.

This overdone, or come tardy off, though it make the unskilful laugh, cannot but make the *judicious* grieve.
Shak., Hamlet, iii. 2, 29.

2. Manifesting good judgment; well-judged; carefully considered or planned: as, a *judicious* use of time or money; *judicious* treatment of the insane.

I shall give as particular an Account of . . . the several sorts of Winds as my own Observations and the *Judicious* Informations from others will afford me Matter to do. *Dampier*, Voyages, II. iii. 2.

A tale should be *judicious*, clear, succinct;
The language plain, and incidents well link'd.
Cowper, Conversation, l. 235.

3†. Relating to a court or to the administration of justice; judicial.

His last offences to us
Shall have *judicious* hearing.
Shak., Cor., v. 6, 127.

=**Syn. 1** and **2**. Prudent, rational, wise, discreet, intelligent, skilful, discerning, sagacious, sound, cool, politic. See *sensible* and *astute*.

judiciously (jö̤-dish'us-li), *adv.* In a judicious manner; with good judgment; with discretion or wisdom.

By *judiciously* availing himself of several . . . rare moments, he [Temple] succeeded in establishing a high character for wisdom and patriotism.
Macaulay, Sir William Temple.

Juglandaceæ (jö-glan-dā'sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Juglans* (*Jugland-*) + *-aceæ*.] A family of dicotyledonous trees, the walnut family, containing 6 genera and about 35 species, belonging to the north temperate zone of both hemispheres. The flowers are monœcious, the sterile ones being commonly borne in loose catkins; the calyx, when present, is adherent to the scale; and the stamens are numerous. The fertile flowers are solitary, or in a small erect spike. The perianth is adherent to the ovary, which contains a single erect ovule. The fruit is mostly a dry-hulled drupaceous nut. The leaves are alternate, odd-pinnate, without stipules. Many species are valuable for their timber, nuts, and other products. The important genera are *Hicoria* and *Juglans*. See cuts under *hickory* and *walnut*.

juglandet, *n.* [ME., < L. *juglans* (*jugland-*), walnut: see *Juglans*.] The walnut.

Juglans (jö'glanz), *n.* [NL. (Linnæus), < L. *juglan* (*jugland-*), a walnut, a walnut-tree, < *Jovis*, Jove, Jupiter (contr. as in *Jupiter*), + *glans*, an acorn: see *glans*, *gland*.] A leading genus of the *Juglandaceæ*, or walnut family. In contrast with *Hicoria*, the hickory, the nut of this genus has a ridged surface, with the husk closely adherent. *J. regia* is the common walnut of Europe, though indigenous chiefly in Persia and northern India. It is valued for its light, tough, and well-colored wood, its nuts and the oil they yield, and some medicinal products. *J. nigra* is the black walnut of North America, which furnishes the well-known rich-brown cabinet-wood. *J. cinerea*, the butternut, yields a lighter-colored and softer but durable wood, a more oily nut, and an officinal cathartic. These species all afford dyestuffs. Both leaves and fruit of this genus occur abundantly in a fossil state in many Cretaceous and Tertiary deposits. Forms which vary slightly from the living plant are sometimes called *Juglandites*; those founded on leaves alone are often distinguished as *Juglandiphyllum*, and fossil wood with nearly the structure of walnut has been named *Juglandinium*. See cut under *walnut*.

jugula, *n.* Plural of *jugulum*.

jugular (jö'gū-lăr), *a.* and *n.* [= F. *jugulaire* = Pg. *jugular* = It. *giugulare*, < NL. *jugularis*, < L. *jugulum*, also *jugulus*, the bone which joins the shoulders and the breast, the collar-bone, also the hollow of the neck above the collar-bone, dim. of *jugum*, a yoke: see *jugum*.] **I.** *a.* **1.** In *anat.*, pertaining to the throat in general.—**2.** In *ichth.*: (*a*) Having the ventral fins situated at the throat, in advance of the pectorals: as, a *jugular* fish. [Colloq.]—**To jump over**, to pass over, disregard, or omit something intervening.=**Syn. 1** and **2.** *Leap, Spring*, etc. See *skip.*

II. *trans.* 1. To pass by a leap; spring or leap over; pass over suddenly or hastily: as, to *jump* a stream.—2. To give a jumping motion to; move with a spring or bound; propel by a jump or jumps; drive onward: as, to *jump* a child up and down.

Jump her and thump her. *Shak.*, W. T., iii. 1, 195.

The light-draught, broad-bottomed stern-wheeler, constructed with a view to *jumping* her over the bars at low water. *The American*, VI. 40.

3. To skip over; pass by or neglect; give no heed to; act or proceed in disregard of: as, to *jump* all minor considerations; to *jump* a claim (which see, below).—4†. To drive forward or through as if by leaps; act upon or about impetuously.

To *jump* a body with a dangerous physic
That s sure of death without it.
Shak., Cor., iii. 1, 154.

Why, there was Sir John Moneyman could *jump*
A business quickly. *B. Jonson*, Devil is an Ass, iv. 1.

5. In the game of checkers, to pass by or skip over (an opposing man) in moving. The man which is jumped is removed from the board.—6. Among sportsmen, to start or cause to start; cause to leap or spring, as game from a cover; flush.

We had half an hour's good sport in *jumping* these little ducks. *T. Roosevelt*, Hunting Trips, p. 62.

7. In *forging*, to upset or shape, as a bar or rod, by endwise blows. A transverse piece forged on the end of a bar is said to be *jumped* on.—8†. To risk or hazard.

You must . . . *jump* the after inquiry at your own peril. *Shak.*, Cymbeline, v. 4, 188.

If . . . that but this blow
Might be the be-all and the end-all here,
But here, upon this bank and shoal of time,
We'ld *jump* the life to come.
Shak., Macbeth, i. 7, 7.

To jump a claim, in the United States and Australia, to take possession of public land to which another has previously acquired a claim, the first occupant, by squatter law and custom, and under the preëmption laws of the United States, having the first right to the land.—**To jump one's bail**, to abscond in order to avoid trial, as an indicted person, leaving one's sureties liable for the bail-bond. [Slang, U. S.]

jump[1] (jump), *n.* [⟨ *jump*[1], *v.*] 1. The act of jumping; a leap; a spring; a bound; hence, a passing over; an omission: as, a high *jump;* the *jump* of a gun; a *jump* of a whole century.

We believe . . . that Nature does make *jumps* now and then. *Huxley*, Lay Sermons, p. 297.

2†. A risk; a venture; a hazard.

Our fortune lies upon this *jump.*
Shak., A. and C., iii. 8, 7.

3. In *geol.* and *mining*, a slight fault or dislocation of a vein.—4. In *building*, an abrupt rise in a level course of brickwork or masonry, to accommodate the work to the inequality of the ground.—5. A kind of dance. Formerly also called *dump.*—**From the jump**, from the start or beginning. [Colloq.]—**Full jump**, full speed.—**Hop, skip, and jump.** See *hop*[1].—**On the jump, on the keen jump**, on the go; on the rush; busily engaged; hard at work. [Colloq., U. S.]

De tar-kittle's a-bilin' *on de keen jump.* Mas'r Mellasys.
T. Winthrop, Saccharissa Mellasys.

jump[1]† (jump), *a.* [⟨ *jump, v. i.*, 4.] 1. Matched.

And thou to be *jump* with Alexander.
Lyly, Alexander and Campaspe (1584).

He said the musike best thilke powers pleas'd
Was *jumpe* concord betweene our wit and will.
Sir P. Sidney, Arcadia, iii.

2. Exact; precise; nicely fitting.

Acrosticks and telestichs on *jump* names.
B. Jonson, Execration upon Vulcan.

jump[1]† (jump), *adv.* [⟨ *jump*[1], *a.*] Exactly; precisely; fitly.

How *jumpe* he hitteth the naile on the head.
Stanihurst, p. 34. (*Halliwell.*)

Thus twice before, and *jump* at this dead hour,
With martial stalk hath he gone by our watch.
Shak., Hamlet, i. 1, 65.

jump[2] (jump), *n.* [Prob. < *jump*[1], as a garment to be 'slipped' on; cf. *slip* and *slop*, names of garments to be 'slipped' on. Less prob. a nasalized form of *jup*, *jupe*. Cf. *jumper*[2].] A garment of loose make, worn especially for undress. (*a*) In the seventeenth century, a short loose coat.

> Instead of lac'd coats, Belts, and Pantaloons,
> Your Velvet *Jumps*, Gold Chains, and grave Fur Gowns.
> *Wycherley*, Gentleman Dancing-Master, Epil.

> A jacket, *jump*, or loose coat reaching to the thighs, . . . with sleeves to the waist. *Randle Holme.*

(*b*) *pl.* Toward the close of the eighteenth century, a kind of bodice for women, which apparently took the place of stays when the wearer was not carefully dressed. Also called *jimps*.

> Bless me, Mr. Carmine, don't mind my shape this bout, for I m only in *jumps*. *Foote*, Taste, i. 1.

jumpable (jum'pa-bl), *a.* [< *jump*[1] + *-able*.] Capable of being jumped.

> Plenty of fair *jumpable* fences. *Edinburgh Rev.*, CLXVI. 386.

jump-about (jump'a-bout″), *n.* The goutwort, *Ægopodium Podagraria*. [Prov. Eng.]

jump-coat† (jump'kōt), *n.* Same as *jump*[2] (*a*).

jump-coupling (jump'kup″ling), *n.* In *mech.*, same as *thimble coupling* (which see, under *coupling*).

jumper[1] (jum'pėr), *n.* [< *jump*[1], *v.*, + *-er*[1].] 1. One who or that which jumps. Specifically— 2. One who practises leaping or dancing as a part of divine worship. The practice has prevailed among certain Methodists, chiefly in Wales, sometimes among Irvingites, and among the Shakers. A Russian dissenting sect bears a name translated by *Jumpers*.

> Jenny [was] a Welshwoman; her rude forefathers were goat-herds on week-days, and *Jumpers* on Sundays. *Savage*, R. Medlicott, iii. 12.

> Another sect is the *Jumpers*, among whom the erotic element is disagreeably prominent. *D. M. Wallace*, Russia, p. 302.

3. One who jumps a claim to land. [U. S. and Australia.]

> The funeral of a well-known *jumper*, who had been shot in a quarrel over a piece of disputed land. *The Century*, XXXVII. 776.

4. In *zoöl.*, any animal which habitually jumps, leaps, or hops as a mode of progression. (*a*) A fish which often leaps out of water. (*b*) Any saltatorial insect, as a halticid, psyllid, grasshopper, etc. (*c*) The maggot or larva of the cheese-fly; a cheese-hopper.

5. In *mech.*, a tool or contrivance which works with a jumping motion. (*a*) In *quarrying:* (1) A drill worked by hand and struck by a hammer. (2) A long drill worked by hand, but not struck by a hammer. It has a chisel-edge at each end, and is swollen in the middle to give more weight and thus add to the force of the blow. (*Morgans*, Mining Tools, p. 43.) Called in the United States a *churn-drill*. (*b*) A spring controlling the star-wheel of a clock or a click in a repeating watch.

> There must also be a slight spring or *jumper* somewhere on the ratchet teeth to keep them exactly in the proper place for the click to catch next time. *Sir E. Beckett*, Clocks and Watches, p. 141.

(*c*) A bit used in a jointer. (*d*) A special form of plowshare for rough soil, or soil filled with roots. (*e*) In *teleg.*, a wire used to cut out an instrument or part of a circuit, or to close temporarily a gap in a circuit.

6. A kind of sleigh: usually a simple box on runners, especially on runners which are parts of the poles forming the thills, and the middle parts of which are made thinner so as to bend. [U. S.]— 7. *Naut.*, a preventer-rope made fast in such a way as to prevent a yard, mast, or boom from jumping, or giving way in an upward direction, in heavy weather.— **Minute-jumper**, an electric clock in which the hands move only at the end of each minute, the minute-hand moving over a whole minute at each step.

jumper[2] (jum'pėr), *n.* [Cf. *jump*[2].] A kind of loose jacket with sleeves worn by some classes of laborers, as seamen and stevedores, usually with overalls, reaching to the thighs, and buttoned the whole length in front; also, any upper garment of similar shape.

> Men and women [Eskimo] are alike clothed with jacket and trousers. The jacket is a hooded *jumper* with openings only for face and hands. The hood is enlarged when necessary so as to admit of an infant being carried inside against the woman's back. *A. W. Greely*, Arctic Service, p. 32.

> A green-check cotton waist or blouse sewed into a belt —the masculine uniform of Fairharbor; he calls it a *jumper*. *E. S. Phelps*, Old Maid's Paradise.

jumper[3]† (jum'pėr), *v. t.* [< ME. **jumpren jompren*, also found in var. form, *jumbren*, *jombren*, mix, freq. of *jumpen*, jump: see *jumber*, *jump*.] To mix together; mingle; jumble.

> Ne *jompre* eke no discordant thyng yfere. *Chaucer*, Troilus, ii. 1037.

jumping-bean (jump'ing-bēn), *n.* Same as *jumping-seed*.

jumping-betty (jump'ing-bet″i), *n.* The garden-balsam, *Impatiens balsamina:* so called from the elastic bursting of the pods and projection of the seeds. [Prov. Eng.]

jumping-bug (jum'ping-bug), *n.* Any insect of the family *Halticoridæ*. See *Halticoridæ*.

jumping-deer (jum'ping-dēr), *n.* The black-tailed deer of North America, *Odocoileus hemionus*. See cut under *mule-deer*.

jumping-hare (jum'ping-hār), *n.* A jerboa-like rodent quadruped of South Africa, *Pedetes caffer* or *Helamys capensis*, of the family *Dipodidæ* and subfamily *Pedetinæ*, nearly as large as a hare, which it somewhat resembles. The hind feet are 4-toed, with stout hoof-like claws; the tail is about as long as the body and bushy throughout; and the ears are high. The jumping-hares clear many feet at a bound. They replace the true jerboas in South Africa.

jumpingly† (jum'ping-li), *adv.* So as to be jump or exact; closely; exactly.

> Do not imitate
> So *iumpingly*, so precyselie,
> And step for step so strayte.
> *Drant*, tr. of Horace's Art of Poetry.

jumping-mouse (jum'ping-mous), *n.* Same as *deer-mouse*, 1.

jumping-mullet (jum'ping-mul″et), *n.* 1. Same as *jump-rocks*.— 2. A fish of the family *Mugilidæ*, *Mugil albula*. [Cape Hatteras, U. S.]

jumping-rat (jum'ping-rat), *n.* A jerboa, or other animal of the family *Dipodidæ*.

jumping-seed (jum'ping-sēd), *n.* The seed of a Mexican euphorbiaceous plant, infested by the larva of a small tortricid moth, *Carpocapsa saltitans*. See *Carpocapsa*. The uneasy movements of the imprisoned larva when it is warmed make the seed roll about on a flat surface, or even jump a slight distance in the air. The larva pupates in January or February, and the moth soon after issues through a hole previously cut by the larva. Also called *jumping-bean*, *devil-bean*.

jumping-shrew (jum'ping-shrö), *n.* An insectivorous mammal of the family *Macroscelididæ;* an elephant-shrew. See cut under *elephant-shrew*.

jumping-spider (jum'ping-spī″dėr), *n.* A spider of the family *Attidæ*, which spins no web, but captures its prey by leaping upon it; any attid.

jump-joint (jump'joint), *n.* A butt-joint; in *ship-building*, the characteristic joint of a carvel-built vessel.

jumply† (jump'li), *adv.* [< *jump*[1], *a.*, + *-ly*[2].] In a jump manner; exactly; suitably; opportunely.

> My meeting so *jumply* with them makes me abashed with the strangeness of it. *Sir P. Sidney*, Arcadia.

jump-ring (jump'ring), *n.* In *metal-work*, particularly in jewelry, a ring made of a bar or wire with plane ends abutted against each other, but not welded.

jump-rocks (jump'roks), *n.* [< *jump*[1], *v.*, + obj. *rocks*.] A catostomine fish, *Moxostoma cervinum*, with a 3-lobed air-bladder, from 10 to 12 dorsal rays, and a very slender body, rarely attaining a foot in length. It inhabits the South Atlantic States from the James to the Chattahoochee river. Also called *jumping-mullet*.

jump-seat (jump'sēt), *n.* An extra seat under the main seat of a carriage so arranged that the latter can be shifted to a position further front or back, and the extra seat brought up.

jump-up-and-kiss-me (jump'up-and-kis'mē), *n.* The pansy, *Viola tricolor*. [Prov. Eng.]

jump-up-Johnny (jump'up-jon'i), *n.* Same as *Johnny-jump-up*. [Local.]

> Walks branching thence in four directions, and along them beds of *jump-up-Johnnies*. *The Century*, XXXV. 947.

jump-weld (jump'weld), *n.* A butt-weld.

jun. or **Jun.** An abbreviation of *junior*.

Juncaceæ (jung-kā'sē-ē), *n. pl.* [NL. (C. A. Agardh, about 1825), < *Juncus* + *-aceæ*.] A family of monocotyledonous plants, the true rushes, typified by the genus *Juncus*. In technical characters this family is closely allied to the *Liliaceæ*, having a perianth of 6 segments in two series, 6 or rarely 3 stamens, and a superior ovary, with 3 cells or placentæ. But it is distinguished by the glumaceous, calyx-like texture of the perianth, on account of which, as well as of its appearance, it resembles the sedges and grasses. The species number about 210, belonging to 8 genera. These plants prefer wet ground and the cooler latitudes. The genera *Juncus* and *Juncoides* (the wood-rush) are almost cosmopolitan; others are more local. See cut under *Juncus*.

juncaceous (jung-kā'shius), *a.* [< NL. *juncaceus*, < L. *juncus*, a rush: see *Juncus*, *junk*[1].] In *bot.*, pertaining to or resembling the *Juncaceæ*, or those plants of which the rush is the type; juncous.

Juncaginaceæ (jung-kaj-i-nā'sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Juncago* (*Juncagin-*), a former generic name, + *-aceæ*.] A family of plants. They are erect herbs with rush-like leaves, and spikes or racemes of inconspicuous flowers, with a perianth of six divisions and an ovary of 3 or more carpels. American botanists use *Scheuchzeriaceæ*.

juncal (jung'kal), *a.* [< NL. *juncalis*, < L. *juncus*, a rush: see *Juncus*.] 1. Belonging to or concerned with the genus *Juncus*.— 2. Belonging or relating to the *Juncales*.

Juncales (jung-kā'lēz), *n. pl.* [NL. (Lindley, 1846), pl. of *juncalis:* see *juncal*.] According to Lindley, an "alliance" of plants embracing the orders *Juncaceæ* and *Araceæ*.

juncate†, *n.* An obsolete form of *junket*[2].

Junceæ (jun'sē-ē), *n. pl.* [NL. (A. P. de Candolle, 1815), < *Juncus* + *-eæ*.] A synonym of *Juncaceæ*.

junciform (jun'si-fôrm), *a.* [< L. *juncus*, a rush, + *forma*, shape.] Reed-like; growing like a rush: as, a *junciform* polyp.

junckerite (jung'- or yöng'kėr-it), *n.* [Named after M. *Juncker*, director of the mines at Poullaouen, France.] In *mineral.*, same as *siderite*.

Junco (jung'kō), *n.* [NL.; Sp. *junco*, < L. *juncus*, a rush.] 1. A notable genus of the finch family, *Fringillidæ;* the North American snowbirds. *Junco hiemalis* is the black snowbird so abundant in winter in most parts of the United States, about 6¼ inches long, of a blackish slate-color with white belly and white lateral tail-feathers and pink bill. Several other species or varieties occur in the western United States and Mexico, chiefly in mountainous regions, as the Oregon snowbird (*J. oregonus*), the gray-headed snowbird (*J. caniceps*), and the Mexican snowbird (*J. alticola*). The genus was instituted by Wagler in 1831, and later called by Audubon *Niphæa*. See cut under *snowbird*.

2. [*l. c.*] Any bird of this genus.

juncous (jung'kus), *a.* [= Sp. Pg. *juncoso* = It. *giuncoso*, < L. *juncosus*, full of rushes, < *juncus*, a rush: see *Juncus*, *junk*[1].] Full of rushes; resembling rushes; juncaceous. [Rare.]

junction (jungk'shon), *n.* [= F. *jonction* = Sp. *junccion* = Pg. *juncção*, < L. *junctio(n-)*, a joining, < *jungere*, pp. *junctus*, join: see *join*.] 1. The act or operation of joining; the state of being joined; union; combination; coalition: as, the *junction* of two armies or of detachments.

> Though there was a *junction*, there never was a real union, of the slave with the free States. *Nineteenth Century*, XXIII. 96.

2. A place or point of union or meeting; especially, the point or locality where two or more lines of any kind come into union: as, a town at the *junction* of several rivers. The word is often used specifically in naming a place, otherwise unimportant, where two or more railroads meet.

> There is one joint so perfect that it can only be discerned by the minutest search; it is not even so perceptible as the *junction* of two pieces of paper which have been pasted together. *B. Taylor*, Lands of the Saracen, p. 169.

=**Syn.** 1. *Connection*, etc. See *union*.

junctional (jungk'shon-al), *a.* [< *junction* + *-al*.] Pertaining to a junction: as, "*junctional* lines," *Encyc. Brit.*, II. 289.

junction-box (jungk'shon-boks), *n.* 1. A chamber connecting two or more lines of pipe or wires.— 2. A coupling for the rolls in a roll-train, by which all may be continuously driven from the engine or the driven gears and yet have their vertical distances apart vary.

junction-plate (jungk'shon-plāt), *n.* A welt or break-joint plate, secured by rivets over the edges of boiler-plates which form a butt-joint.

junctot†, *n.* An obsolete variant of *junto*.

junctura (jungk-tū'rä), *n.*; pl. *juncturæ* (-rē). [L.: see *juncture*.] In *zoöl.* and *anat.*, same as *juncture*, 2.

juncture (jungk'tūr), *n.* [< L. *junctura*, a joining, a joint, < *jungere*, pp. *junctus*, join: see *join*. Cf. *jointure*, from the same L. source.] 1†. A joining; junction.

> Nor are the soberest of them so apt for that devotional compliance and *juncture* of hearts which I desire to bear in those holy offices to be performed with me. *Eikon Basilike.*

2. The line or point at which two bodies are joined; a joint or articulation; a seam.

> Swift to perform heav'n's fatal will it [the dart] fled,
> Full on the *juncture* of the neck and head,
> And took the joint, and cut the nerves in twain.
> *Pope*, Iliad, xiv. 544.

3. A point of time; particularly, a time rendered critical or important by a concurrence of circumstances; a conjuncture.

> O what Luck it is, Sir Rowland, that you were present at this *Juncture!* *Congreve*, Way of the World, iv. 15.

Juncus (jung'kus), *n.* [NL., < L. *juncus*, a rush: see *junk*[1].] The most important genus of the *Juncaceæ* or rushes, containing about half of the species. They are plants of a rigid habit, with smooth, commonly simple and slender, hollow or pithy stems, and small greenish or brownish flowers in heads or irregular panicles, the capsule containing a large number of seeds. Economically they are not very important. They are often planted on sea- and river-embankments to fix the soil. Some are used for matting, especially in Japan, for chair-bottoms, and for bands. Their pith furnishes wicking for the rush candle or rush-light used in Europe and in China. Four fossil species of *Juncus* have been described from the Tertiary, one from Spitzbergen and the rest from the continent of Europe.

1, *Juncus arcticus*. 2, *J. tenuis*; *a*, flower of same.

jundie (jun'di), *v. t.* or *i.* [Origin obscure.] To jog with the elbow; jostle. [Scotch.]

June (jön), *n.* [< ME. *June*, *Juyne*, < OF. *Juin*, *Guing*, F. *Juin* = Pr. *Junh* = Sp. *Junio* = Pg. *Junho* = It. *Giunio*, *Giugno* = D. G. Dan. Sw. *Juni*, < L. *Junius*, June, prop. adj. (sc. *mensis*, month), of the family Junius, < *Junius*, a Roman gentile name, akin to *juvenis*, young: see *juvenile*, *young*.] The sixth month of the year, consisting of thirty days, during which the sun enters the sign Cancer.

And Merlin seide "The xj day of *Iuyne*."
Merlin (E. E. T. S.), i. 54.

And what is so rare as a day in *June*?
Then, if ever, come perfect days.
Lowell, Vision of Sir Launfal.

June-apple (jön'ap″l), *n.* Same as *jenneting*. *Fallows*.

juneating (jö'nē-ting), *n.* A falsified form of *jenneting*.

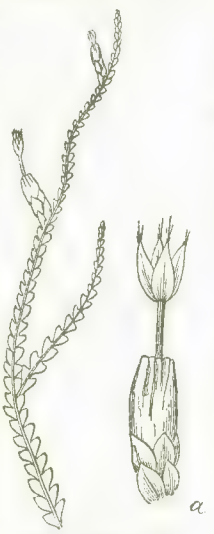
June-berry (jön'ber″i), *n.* 1. The shad-bush or service-berry of North America, *Amelanchier Canadensis*, of the family *Malaceæ*. It is a bush or small tree, sometimes attaining the height of 30 feet, covered in spring with graceful white racemes, and yielding later a small berry-like pome of a deep-purple color and pleasant subacid flavor. The fruit sometimes ripens in June.

★2. The fruit of the shad-bush.

June-bug (jön'bug), *n.* 1. In the northern United States, a beetle of any one of the numerous species of the genus *Lachnosterna*, as *L. fusca*, common in the whole country. They are large brown clumsy beetles of the melolonthine group of the family *Scarabæidæ*. Their larvæ, found in turf, are large whitish grubs, popularly known as *white-grubs*, *fish-worms*, and *ground-hogs*. Also called *dor-bug* (which see for another cut). In the south these beetles are oftener called *May-beetles*, since they appear there earlier.

a

June-bug, or May-beetle (*Lachnosterna fusca*), side view. *a*, larva. (Both natural size.)



2. In the southern United States, a beetle very different from the preceding, *Allorhina nitida*, a large, smooth, greenish species of the cetonian group of *Scarabæidæ*, which appears in June, and the larvæ of which resemble those of the northern June-bug in habits and appearance, being likewise known as *white-grubs*. See cut under *Allorhina*. Also *June-bug*.—3. One of various European beetles of the genus *Rhinotrogus*, related to *Lachnosterna*.

June-grass (jön'gras), *n.* The Kentucky blue-grass, *Poa pratensis*; also *Kœleria cristata*.

junetint, *n.* An obsolete form of *jenneting*. *E. Phillips*, 1706.

Jungermanneæ (jung-gėr-man'ē-ē), *n. pl.* [NL. (J. Lindley, 1846), < *Jungermannia* + *-eæ*.] According to Lindley, a suborder of the *Jungermanniaceæ*, founded on the tribe *Jungermannidæ*.

Jungermannia (jung-gėr-man'i-ą), *n.* [NL., named after *Jungermann*, a German botanist (1572–1653).] A genus of *Hepaticæ*, or liverworts, giving its name to the family *Jungermanniaceæ*. It formerly embraced nearly the whole family, but has been much divided, and still contains heterogeneous forms. It may perhaps be characterized as having the involucral leaves free, the inner involucre tubular and more or less angular, and the mouth laciniate. It comprises small creeping and branching herbs of damp places. About a dozen fossil species of this genus are known, found, for the most part, beautifully preserved in the amber of North Prussia.

Jungermannia minuta. *a*, capsule with its perianth, on larger scale.

Jungermanniaceæ (jung-gėr-man-i-ā'sē-ē), *n. pl.* [NL. (Dumortier, 1822), < *Jungermannia* + *-aceæ*.] A family of cryptogams, the largest of the class *Hepaticæ*; the scale-mosses. It consists of chiefly moss-like plants, sometimes merely with a flat leafless thallus, much oftener differentiated into a filiform stem with broadly inserted sessile leaves. In the foliose species the leaves are commonly in two rows on the upper side of the stem; sometimes there is a third row of rudimentary ones beneath. The fructification consists of oblong stalked capsules inserted on the stem, which split into valves, ordinarily four, discharging numerous spores and spirally marked elaters. These plants are to be found nearly everywhere in damp soil and on trunks of trees, being especially abundant in humid climates.

jungermanniaceous (jung-gėr-man-i-ā'shius), *a.* Belonging to or resembling the *Jungermanniaceæ*.

Jungermannidæ (jung-gėr-man'i-dē), *n. pl.* [NL. (J. Lindley, 1846), < *Jungermannia* + *-idæ*.] According to Lindley, a tribe of the *Jungermanniaceæ*.

Jungermannieæ (jung″gėr-ma-nī'ē-ē), *n. pl.* [NL. (Nees von Esenbeck, 1833), < *Jungermannia* + *-eæ*.] 1. Originally, and with some authors still, the equivalent of *Jungermanniaceæ*.—2. Now, more commonly, a tribal division of the family *Jungermanniaceæ*, typified by the genus *Jungermannia*.

jungle (jung'gl), *n.* [Cf. F. *jungle* (< E.); < Hind. *jangal*, a desert, a forest, jungle (cf. *jangla*, a coppice, thicket, fence, railing, grating, lattice), < Skt. *jāṅgala*, dry, desert.] 1. A dense growth of rank and tangled vegetation, large and small, often nearly impenetrable, such as is characteristic of some parts of India, especially in the swampy regions at the base of the Himalaya mountains.

As we proceeded, the full luxuriance of this tropical *jungle* became more and more apparent, and we soon found that owing to the tangled mass of vegetation it was absolutely impossible to leave the beaten path.
Ball, Jungle Life in India, p. 177.

A damp belt of lowland, the terái, stretches along their [the Himalayas'] foot, and is covered with dense fever-breeding *jungle*. *W. W. Hunter*, The Indian Empire, p. 30.

2. A tract of land covered by such vegetation; a wilderness of dense overgrowth; a piece of swampy thickset forest-land.

To an eye accustomed for years to the wild wastes of the *jungle*, the whole country presents the appearance of one continuous well-ordered garden.
E. J. Waring, Tropical Resident at Home, p. 7.

jungle-bear (jung'gl-bār), *n.* The sloth-bear of India, *Melursus labiatus*. See cut under *aswail*.

jungle-bendy (jung'gl-ben″di), *n.* An East Indian tree, *Tetrameles nudiflora*.

jungle-cat (jung'gl-kat), *n.* Same as *chaus*[2].

jungle-cock (jung'gl-kok), *n.* See *jungle-fowl*.

jungled (jung'gld), *a.* [< *jungle* + *-ed*[2].] Covered with jungle; tangled with wild growths.

The savages were posted on a thickly *jungled* island in the lake.
N. A. Rev., CXXVI. 85.

jungle-fever (jung'gl-fē″vėr), *n.* A severe variety of remittent fever prevalent in the East Indies and other tropical regions. It is characterized by the paroxysmal recurrence of the cold and hot stages. Also called *hill-fever*.

jungle-fowl (jung'gl-foul), *n.* 1. A gallinaceous bird of India, *Gallus sonnerati*, the first species of the genus known to naturalists, supposed to be one of the wild originals of the domestic hen, though the *Gallus bankivus* (see *Gallus*[1]) resembles the common hen more nearly. It closely resembles the common black-red pit game-cock, and is abundant in the higher wooded districts of India. The name extends to other species of the same genus.

2. Any megapod of Australia, as *Megapodius tumulus*.

jungle-ghau (jung'gl-gou), *n.* Same as *jungle-ox*.

jungle-nail (jung'gl-nāl), *n.* The East Indian tree *Acacia tomentosa*.

jungle-ox (jung'gl-oks), *n.* An Indian bovine quadruped of the subgenus *Bibos*, *B. frontalis*, inhabiting Sylhet and other mountainous parts of northeastern India. It is nearly allied to the gayal and to the common ox.

jungle-sheep (jung'gl-shēp), *n.* A ruminant animal, *Hemitragus hylocrius*, of India.

jungly (jung'gli), *a.* [< *jungle* + *-y*[1].] Of the nature of jungle; consisting of or abounding with jungle.

In closely-wooded or *jungly* tracts all kinds of survey operations are prosecuted at a disadvantage.
R. A. Proctor, Light Science, p. 276.

Junian (jö'niąn), *a.* [< L. *Junianus*, pertaining to Junius, < *Junius*, the name of a Roman gens. See def.] Of or pertaining to "Junius," a writer who published under this name a series of letters which appeared in a London newspaper, the "Public Advertiser," between November 21st, 1768, and January 21st, 1772, denouncing various abuses in the administration of the British government. After voluminous discussion, the authorship of the letters remains disputed, but the strongest evidence appears to assign it to Sir Philip Francis, a contemporary politician.

junior (jö'nyor), *a.* and *n.* [< L. *junior*, contr. of *juvenior*, compar. of *juvenis*, young: see *juvenile*.] **I.** *a.* 1. Younger; not as old as another. It is applied to distinguish the younger of two persons bearing the same name in one family or town, and especially to distinguish a son bearing the same name as the father: opposed to *senior*: as, John Smith, *junior*. In this use commonly abbreviated *Jr.* or *Jun.*

2. Younger or lower in standing, as in a profession, especially the bar: as, a *junior* counsel; a *junior* partner in a firm or company.

Mr. Smith, the assistant at a cheap shop; the *junior* partner in a slippery firm of some three weeks' existence.
Dickens, Sketches.

3. In American colleges and schools, pertaining to the third year of the course, the next below the senior or last year; in institutions having a three years' course, usually pertaining to the first year (the second being called the *middle year*): as, the *junior* class; *junior* students.

II. *n.* 1. A person younger than another.

The fools, my *juniors* by a year,
Are tortur'd with suspence and fear;
Who wisely thought my age a screen,
When death approach'd to stand between.
Swift, Death of Dr. Swift.

2. One of less experience or inferior standing in his profession than another, who is called his *senior;* one employed as the subordinate of another, especially at the bar.

Not one of them but he thinketh himself to haue had a great iniurie dooen vnto him; if he goe on the lefte hand of another yᵗ semeth to be his *iunior* or inferiour.
J. Udall, On Luke xiv.

He had been retained as Mr. Sergeant Snubbins's *junior*.
Dickens, Pickwick, xxxi.

3. In American colleges and seminaries, a member of the junior class; a student in the junior year.

juniority (jö-nior'i-ti), *n.* [< *junior* + *-ity*.] 1. The state of being junior or a junior: opposed to *seniority*.

He admits as probable upon present knowledge, in the person of Homo sapiens, the *juniority* of man.
Pop. Sci. Mo., XXVIII. 624.

2. In *law*, same as *borough-English*.

We have a choice between "ultimogeniture," the awkward term proposed by the Real Property Commissioners of the last generation, and such foreign forms as Jungsten-Recht and Juveignerie, . . . or one must coin a new phrase like *juniority* or junior-right.
C. Elton, Origins of Eng. Hist., p. 185.

junior-right (jö'nyor-rīt), *n.* In *law*, same as *borough-English*.

If we are to describe the area from which we must collect examples of *junior-right*, we shall find that it has flourished not only in England and in most parts of Central and Northern Europe, but also in some remote and disconnected regions. *C. Elton*, Origins of Eng. Hist., p. 185.

It appears also that until quite recently the custom of what we English call Borough-English, but for which the book-word *Junior rite* has of late been invented, existed "in the Theel-lands at Norden, in East Friesland, not far from the mouths of the Ems."
N. and Q., 7th ser., VII. 259.

juniorship (jö'nyor-ship), *n.* [< *junior* + *-ship*.] 1. The state of being junior or a junior; juniority. *Imp. Dict.*—2. In the *Rom. Cath. Ch.*, same as *juvenate*.

★**juniper** (jö′ni-pėr), *n.* and *a.* [< ME. *juniper, junyper, junipar,* etc., also *gynypre, jeneper,* etc. (also prob. **genevre,* > ult. *geneva* and *gin*[5], q. v.), < OF. *genevre, genoivre* = Pr. *genibre, genebre* = OSp. *genebro,* Sp. *enebro* = Pg. *zimbro* = It. *ginepro, giunipero,* < L. *juniperus,* a juniper, so called as 'renewing its youth,' i. e. being evergreen, < *juvenis* (contr. *juni-*), young, + *parere,* produce: see *parent.*] **I.** *n.* A coniferous evergreen shrub or tree, belonging to the genus *Juniperus.* There are about 30 species, distributed through the northern parts of the globe or on mountains further south. *J. communis,* the common juniper of Europe and North America, is a spreading shrub or small tree, whose purple aromatic berries yield a volatile oil used as a diuretic and stimulant and also in the manufacture of gin. The true savin, *J. Sabina,* also widely distributed, is a small tree whose tops form the officinal savin. *J. Virginiana,* the North American red cedar or pencil-cedar, is a generally small but sometimes large tree, yielding a fragrant, light, imperishable wood, highly valued for pencil-making, cabinet-work, posts, etc. The wood of *J. Bermudiana* serves similar purposes. (See *cedar,* 2.) (For botanical characters, see *Juniperus.*) The name is locally applied to other trees, the so-called juniper-swamps of the southern United States consisting of the white cedar, *Chamæcyparis thyoides.*

Juniper (*Juniperus Virginiana*).
a, branch with male flowers; *b*, branch with fruit; *c*, scale of male flower with two anthers; *d*, seed.

And that Tre hathe many Leves, as the *Gynypre* hathe.
Mandeville, Travels, p. 289.

Who cut up mallows by the bushes, and *juniper* roots for their meat. Job xxx. 4.

Gum juniper. Same as *sandarac,* 2.—**Irish** and **Swedish juniper,** columnar varieties of *Juniperus communis,* elegant in cultivation.

II.† *a.* Bitter; sharp; severe.

Bishop Grouthead, offended thereat, wrote Pope Innocent the fourth . . . a *juniper* letter, taxing him with extortion and other vitious practices.
Fuller, Ch. Hist., III. iv. 29.

When women chide their husbands for a long while together, it is commonly said, they give them a *juniper* lecture; which, I am informed, is a comparison taken from the long lasting of the live coals of that wood, not from its sweet smell; but comparisons run not upon all four. *Ellis*, Modern Husbandman (1750), VII. ii. 142.

juniper-brandy† (jö′ni-pėr-bran″di), *n.* Gin.

Juniperinæ (jö″ni-pę-rī′nē), *n. pl.* [NL. (Endlicher, 1847), < *Juniperus* + *-inæ.*] A subtribe of coniferous plants of the tribe *Cupressineæ,* embracing the single genus *Juniperus.*

juniperite (jö′ni-pėr-īt), *n.* [< NL. *Juniperites.*] A petrified trunk or fossil impression belonging to the genus *Juniperus* or *Juniperites.*

Juniperites (jö″ni-pėr-ī′tēz), *n.* [NL., < *Juniperus,* q. v.] An extinct genus of plants, the fossil ancestor of *Juniperus.*

juniper-oil (jö′ni-pėr-oil), *n.* A volatile oil distilled from the berries and probably the tops of *Juniperus communis.* It is an officinal drug with stimulant, carminative, and diuretic properties.

juniper-resin (jö′ni-pėr-rez″in), *n.* Sandarac.

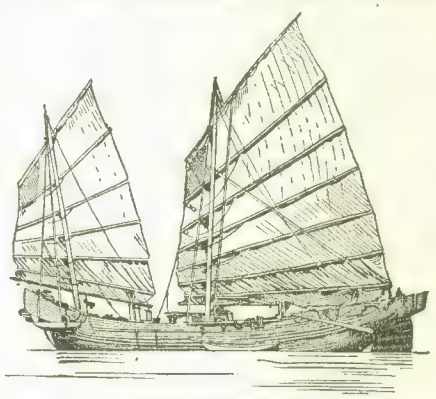
Juniperus (jö-nip′ę-rus), *n.* [L., the juniper-tree: used as a genus by Tournefort, Inst., 361, 1700, but with a wider meaning, including *Cedrus.* Restricted to present sense by Linnæus.] A genus of coniferous plants, the true junipers, embracing about 30 species, widely distributed. The few scales of the strobile in this genus are fleshy, and consolidated into an indehiscent berry or drupe, containing from 1 to 6 hard seeds, either distinct or united in a woody mass. The leaves are either scale-like or slender and spreading (acerose), or both in the same plant. (See *juniper.*) Eight or ten fossil species are described from various parts of the world, largely from the Tertiary of Europe and the Cretaceous and Tertiary of the arctic regions. When deviating slightly from the living plant, these fossil forms are often called *juniperites.*

junk[1] (jungk), *n.* [< ME. *jonke,* < OF. *jonc,* a rush, a rush-light, F. *jonc* = Sp. Pg. *junco* = It. *giunco,* a rush, bulrush (in Pg. also junk, cordage (orig. or sometimes made of rushes), whence the E. word in def. 2), < L. *juncus,* a rush. From L. *juncus* also come ult. E. *junket* and *jonquil.*] **1**†. A rush; a reed.

It [the crown] was of *Jonkes* of the See, that is to sey, Rushes of the See, that prykken als scharpely as Thornes.
Mandeville, Travels, p. 13.

2. *Naut.,* old or condemned cable and cordage cut into small pieces, used when untwisted for making points, gaskets, swabs, mats, etc., and picked into fibers to make oakum for calking seams. Hence—**3.** Worn-out and discarded material in general that may be turned to some use; especially, old rope, chain, iron, copper, parts of machinery, and bottles, gathered or bought up by tradesmen called junk-dealers; hence, rubbish of any kind; odds and ends.—**4.** Salt beef or pork supplied to vessels for long voyages: so called from its resemblance in toughness to old ropes' ends.

The purser's *junk* had become as tough as the foretopsel weather-earrings. *Dickens*, Bleak House, xvii.



5. The mass of blubbery and cellular tissue which fills the cavity of the head of the sperm-whale between the case and the white-horse, containing oil and spermaceti.

The dense mass of cellular tissue beneath the case and nostril, and which is technically called the *junk,* also contains spermaceti, with which oil and its tissue is infiltrated. *Ure*, Dict., III. 869.

junk[2] (jungk), *n.* [A var. of *chunk*[1].] A thick piece; a lump; a chunk.

There were two eggs, a *junk* of bread, and a bottle of wine on board the Arethusa.
R. L. Stevenson, Inland Voyage, p. 25.

junk[3] (jungk), *n.* [= F. *jonque,* < Sp. Pg. *junco,* < Malay *jong, jong, ajong, ajong,* Jav. *jong,* Balinese *hejong.* In spoken Malay *jong* is the usual form.] A large sea-going sailing vessel used in the Chinese seas. It has a flat bottom,

A Canton Trading-junk.

a square prow, and high full stern, from one to five heavy masts carrying lug-sails, sometimes made of matting, and a huge rudder, which at sea is lowered below the bottom. The name is also given to the larger-sized river-craft of China.

China also, and the Great Atlantis (that you call America), which have now but *junks* and canoas, abounded then in tall ships. *Bacon*, New Atlantis.

It became a difficult task to thread our way between the fleets of sampans and *junks.* The latter are the most extraordinary looking craft, . . . with high, overhanging sterns. *Lady Brassey*, Voyage of Sunbeam, II. xxi.

junk-bottle (jungk′bot′l), *n.* A thick strong bottle, usually made of green or black glass.

Just stopping to take a lusty dinner, and bracing to his side his *junk-bottle,* well charged with heart-inspiring Hollands, he issued jollily from the city gate.
Irving, Knickerbocker, p. 447.

junk-dealer (jungk′dē″lėr), *n.* The keeper of a junk-shop; a junkman.

junker (yöng′kėr), *n.* [G., a young noble, contr. of *jung herr* (MHG. *junc herre*): see *young* and *herre*[1], and cf. *younker,* the E. form of *junker.*] **1.** A young German noble or squire.

A "*Junker* (Jung Herr), or younker," says Herr Bamberger, "is essentially the scion of a noble house which has devoted itself to military service—a mixture of Charles I. cavalier, Prussian lieutenant, German feudal lord, and Spanish Don Quixote."
Lowe, Bismarck, I. 82, note.

2. [*cap.*] A member of the aristocratic party in Prussia which came into power under Bismarck when he was made prime minister (1862).

Junkerism (yöng′kėr-izm), *n.* [< *junker* + *-ism.*] The political principles and social ideas of the aristocratic party in Prussia called Junkers.

★**junket**[2] (jung′ket), *n.* [Formerly *junkat, juncate,* dial. *jenket;* = F. *joncade,* < It. *giuncata,* a sweetmeat, cream-cheese, so called as being brought in or served on rushes, < *giunco,* a rush: see *junk*[1]. Cf. *junket*[1].] **1.** Curds mixed with cream, sweetened, and flavored. Hence—**2**†. Any sweetmeat or delicacy.

And beare with you both wine and *juncates* fit,
And bid him eate. *Spenser*, F. Q., V. iv. 49.

With stories told of many a feat,
How faery Mab the *junkets* eat.
Milton, L'Allegro, l. 102.

3. A feast or merrymaking; a convivial entertainment; a picnic.

Such *junkets* come not every day.
Massinger, Great Duke of Florence, iv. 2.

George, taking out his wife to a new jaunt or *junket* every night, was quite pleased with himself as usual, and swore he was becoming quite a domestic character.
Thackeray, Vanity Fair, xxviii.

junket[2] (jung′ket), *v.* [< *junket*[2], *n.*] **I.** *intrans.* To feast; banquet; take part in a convivial entertainment.

She which stands at the head being Godmother; and after this they *iunket* together.
Purchas, Pilgrimage, p. 192.

II. *trans.* To entertain; feast; regale.

The good woman took my lodgings over my head, and was in . . . a hurry to *junket* her neighbours. *H. Walpole.*

junketer (jung′ket-ėr), *n.* One who takes part in a junket.

On what principle . . . are these *junketers* . . . allowed the use of steamboats at an expense of from $300 to $500 per day? *New York Tribune*, June 14, 1862.

junketing (jung′ket-ing), *n.* [Verbal n. of *junket*[2], *v.*] A lively feast or entertainment; a season of conviviality; picnicking.

All was fun, frolic, courtship, *junketing,* and jollity.
Barham, Ingoldsby Legends, I. 133.

junk-wad (jungk′wod), *n.* In *ordnance,* a wad made of oakum bound with spun-yarn and filling the bore of the gun, used in proving cannon and to hold the shot in place.

Juno (jö′nō), *n.* [L., a name ult. connected with *Jovis, Jupiter,* Jove, Jupiter, *Diana,* etc.: see *deity.*] **1.** In *Rom. myth.,* the queen of heaven, the highest divinity of the Latin races in Italy next to Jupiter, of whom she was the sister and the wife. She was the parallel of the Greek Hera, with whom in later times she became to a considerable extent identified. She was regarded as the special protectress of marriage, and was the guardian of woman from birth to death. In Rome she was also the patron of the national finances, and a temple which contained the mint was erected to her, under the name of Juno Moneta, on the Capitoline. In her distinctively Italic character, Juno (called *Lanuvina,* from the site at Lanuvium of her chief sanctuary, or *Hospita,*

Juno of Lanuvium.—Colossal statue in the Vatican Museum, Rome.

the Protectress) was a war-goddess, represented as clad in a mantle of goatskin, bearing a shield and an uplifted spear, and accompanied, like Athena, by a sacred serpent. 2. The third planetoid, discovered by Harding, at Lilienthal, in 1804.—**Bird of Juno**, the peacock.

Junonia (jö-nō′ni-ạ), *n.* [NL. (Huebner, 1816?), < *Juno*.] A genus of butterflies of the family *Nymphalidæ*, of wide geographic distribution, occurring in India, Africa, China, the West Indies, and North and South America. The commonest species in the United States is *J. cœnia*, which occurs also in Central America.

Junonian (jö-nō′ni-ạn), *a.* [< L. *Junonius*, of Juno, < *Juno*(*n*-), Juno: see *Juno*.] Of or pertaining to Juno; resembling Juno, or partaking of her characteristics.

Junonian fulness and grand development of features.
C. O. Müller, Manual of Archæol. (trans.), § 375.

Junonical† (jö-non′i-kạl), *a.* [< L. *Juno*(*n*-), Juno, + *-ic-al*.] Junonian.

Yeet do I stil feare me theese fayre *Junonical* harbours.
Stanihurst, Æneid, i. 656.

Juno's-rose (jö′nōz-rōz), *n.* The white lily, *Lilium candidum*.

Juno's-tears (jö′nōz-tērz), *n.* The European vervain, *Verbena officinalis*.

junt (junt), *n.* [Appar. a var. of *junk*[2], *chunk*[1].] 1. A large piece; a chunk. [Scotch.]—2. A squat clumsy person. [Scotch.]—3†. A worthless woman. *Middleton*, Trick to Catch the Old One, v. 2.

junta (jun′tạ), *n.* [= F. *junte*, < Sp. *junta* (orig. fem. of *junto*, used as pp. of *juntar*, convoke, congregate) = Pg. *juncta*, f., a council, meeting, < L. *juncta*, fem. of *junctus*, joined, pp. of *jungere*, join: see *join*. Cf. *junto*.] 1. A meeting; a council. See *junto*. Specifically—2. In Spain, a consultative or legislative assembly, either for the whole country or for one of its separate parts. The most celebrated juntas in history were that convened by Napoleon in 1808 and the later revolutionary juntas.

I had also Audience of the King [of Spain], to whom I delivered two Memorials since, in his Majesty's Name of Great Britain, that a particular *Junta* of some of the Council of State and War might be appointed to determine the Business. *Howell*, Letters, I. iii. 10.

junto (jun′tō), *n.* [An erroneous form of *junta*, < Sp. *junta*, a council: see *junta*. The E. form *junto* came into use at a time when Sp. words in *-a* were commonly taken with the term. *-o*, appar. as seeming more Spanish. Cf. *bastinado*, < Sp. *bastonada*.] A private council or assembly; a combination of persons openly or secretly engaged for a common purpose, especially of a political character; a club of partizans or intriguers; a faction; a cabal; specifically, in *Eng. hist.*, a group of leading Whig politicians in the reigns of William III. and Anne, of whom the most important were Somers, Wharton, Russell, and Montague.

How venerable were this *junto!* How admirable this assembly! *Jer. Taylor*, Works (ed. 1835), I. 382.

The puzzling sons of party next appeared,
In dark cabals and mighty *juntos* met.
Thomson, Castle of Indolence, i.

That the republic might be governed by lawful magistrates, and not by a *junto* of particular persons.
J. Adams, Works, V. 98.

Essex Junto, in *U. S. hist.*, a name, first used about 1781, which was chiefly applied to a group of extreme Federalist leaders, mostly connected with Essex county, Massachusetts, about the end of the eighteenth and the beginning of the nineteenth century. During the presidency of John Adams they were adherents of Hamilton rather than of the President. Later the name was applied to the Federalists in general. = Syn. *Faction*, *Camarilla*, etc. See *cabal*[1].

jupt, *n.* Same as *jupe*.

jupardie†, *n.* A Middle English form of *jeopardy*.

Amer. name, + E. *palm*[1].] *Raphia tædigera*, a palm which grows on the rich alluvial soil on the banks of the Lower Amazon and Pará rivers in Brazil. It has cylindrical leaf-stalks, which measure from 12 to 15 feet in length, and are used by the natives for a variety of purposes, as for the walls ★of houses and for baskets and boxes.

jupe† (jöp), *n.* [Also *jup*, *jub* (Florio); < ME. **jupe*, *gipe* (= MHG. *juppe*, *jupe*, *joppe*, *jope*, *güppe*, *gippe*), < OF. *jupe*, *juppe*, *jube*, *jubbe*, *gipe*, *gippe*, a silk stuff, a garment made of it, F. *jupe* = Pr. *jupa* = It. *giuppa*, *giubba* (ML. *jupa*), < Sp. *juba* (*al-juba*), < Ar. *jubbah*, *al-jubbah*, a garment so called: see *jubbah*. MHG. *schübe*, G. *schaube*, is prob. from the same source. The name was applied to various forms of garments. Hence *jupon*.] Same as *jupon*.

This play of ours, just like some vest or *jup*
Worn twice or thrice, was carefully laid up.
Flecknoe, Epigrams (1670).

jupel, *n.* [OF., also *juppel*, *jupiel*, dim. of *jupe*, a jupe: see *jupe*.] Same as *jupon*.

jupette (jö-pet′), *n.* [Dim. of *jupe*.] A jupon having a very short skirt.

Jupiter (jö′pi-tėr), *n.* [In older English frequently *Juppiter*; = F. Sp. Pg. *Jupiter*, < L. *Jupiter*, more correctly *Juppiter*, OL. *Joupiter* = Gr. Ζεύς πατήρ, voc. Ζεῦ πάτερ = Skt. *Dyaus pitar*, lit. 'Jove (Zeus) father': see *Jove*, *Zeus*, *deity*, and *father*.] 1. In *Rom. myth.*, the supreme deity, the parallel of the Greek Zeus, and the embodiment of the might and national dignity of the Romans. The central seat of his cult was the Capitoline Hill at Rome, where he had the title of Optimus Maximus (Best Greatest). He was primarily a divinity of the sky, and hence was considered to be the originator of all atmospheric changes. His weapon was the thunderbolt. He controlled and directed the future, and sacrifices were offered to secure his favor at the beginning of every undertaking. He was also the guardian of property, whether of the state or of individuals. White, the color of the light of day, was sacred to him; hence, white animals were offered to him in sacrifice, his priests wore white caps, his chariot was drawn by four white horses, and the consuls were dressed in white when they sacrificed to him upon assuming office. The eagle was especially consecrated to him. The surviving artistic representations of Jupiter are comparatively late, and betray Greek influence, imitating the type of the Greek Zeus. Also called *Jove*.

2. The brightest of the superior planets, and the largest body of the solar system except the sun itself. Its sidereal period of revolution is 11.86198 Julian years, and its synodical period 399 days. Its mean distance from the sun is about 483,000,000 miles. Its equatorial diameter at its mean distance subtends an angle of 38″, so that its real diameter is about one tenth of that of the sun (which subtends 1,922″), and about 11 times that of the earth (the solar parallax being 8″.9). Jupiter is flattened at the poles by no less than one seventeenth of its diameter. Its mass is about $\frac{1}{1047}$ of that of the sun, or 304 times that of the earth, making its mean density only 1.3, that of the earth being taken at 5.5. Gravity at its surface is 2½ times that at the earth. The most remarkable feature of the appearance of this planet is the equatorial fasciæ or bands which cross its disk. These fasciæ subsist generally for months or even years, but sometimes form in a few hours. They sometimes have a breadth of one sixth of the apparent disk of the planet. There are also spots of much greater permanence. It is, however, probable that no solid matter can be seen, and quite doubtful whether any exists, in the planet. The spots revolve about the axis in 9 hours, 55 minutes, and 35 seconds, but the white clouds in 5½ minutes less time. From his photometric observations, Zöllner calculates the albedo of Jupiter to be 0.6, so high a value as to suggest that the planet must be self-luminous. Jupiter has eight satellites or moons. Their periods of revolution are as follows: I. 16d. 16h. 32.2m.; II. 1d. 18h. 27.6m.; III. 3d. 13h. 13.7m.; IV. 7d. 3h. 42.6m.; V. 11h. 57.38m.; VI. 253.4 days; VII. 260 days; VIII. 931 (?) days.

3. In *alchemy*, tin, which was supposed to be under the control of the planet Jupiter.—4. In *her.*, the tincture azure or blue in blazoning by the planets. See *blazon*, *n.*, 2.—5. In *zoöl.*, a finback whale. Also called *Jupiter-fish*.

Rondelet . . . gives a figure of a "Balæna ura," . . . which the whale fishers of Saintonge call Gibbar, or gibbero dorso. . . . From this provincial name came Gibbartas, Gubartas, Jubart, Jubartes, *Jupiter*, etc.
J. H. Trumbull, in Fisheries of U. S. (1884), I. 29.

Jupiter's-beard (jö′pi-tėrz-bērd), *n.* 1. The houseleek, *Sempervivum tectorum*.—2. An evergreen leguminous plant, *Anthyllis Barba-Jovis*, also called *silver-bush*; also, less properly, *Anthyllis Vulneraria*, or lady's-fingers.—3. A large fungus with a white fibrous margin, *Radulum quercinum* (*Hydnum Barba-Jovis*).

Jupiter's-distaff (jö′pi-tėrz-dis″tăf), *n.* A labiate plant, or wild sage, *Salvia glutinosa*, or perhaps *Phlomis fruticosa*. [Prov. Eng.]

Jupiter's-eye (jö′pi-tėrz-ī), *n.* The houseleek, *Sempervivum tectorum*. [Prov. Eng.]

Jupiter's-flower (jö′pi-tėrz-flou″ėr), *n.* A translation of *Dianthus*, the name of the pink-genus, also of the specific name of *Lychnis Flos-Jovis* of southern Europe.

Jupiter's-nut (jö′pi-tėrz-nut), *n.* The European walnut, *Juglans regia*.

Jupiter's-staff (jö′pi-tėrz-stăf), *n.* The mullen, *Verbascum Thapsus*.

jupon (jö′pon or jö-pon′), *n.* [Also *juppon*; < ME. *joupone*, *jopowne*, *gipoun*, *gypoun*, *gepoun*, < OF. *jupon*, *juppon*, *gippon*, F. *jupon* = Pr. *jupon*, *jupio* (cf. Sp. *jubón* = Pg. *gibão* = It. *giubbone*, prob. after F.), a short cassock, etc., dim. (or aug.) of *jupe*, a jupe: see *jupe*.] A garment worn by men in the fourteenth and early part of the fifteenth century. Especially—(*a*) A jacket of heavy material, sometimes stuffed and quilted to serve as a coat of fence, and often worn under the iron armor. (*b*) A surcoat worn over the armor, with skirts reaching about to mid-thigh, and with short sleeves or none. In heraldry it is represented without sleeves and dagged or jagged at the bottom. It was introduced about the middle of the fourteenth century.

The ffelonne with the ffyne swerde freschely he strykes, . . .
Thorowe *jopowne* and jesserawnte of gentille mailes!
Morte Arthure (E. E. T. S.), l. 4238.

jurt, *v. i.* [A var. of *jar*[1], *v.*] To clash; strike with a harsh noise.

By that time that the multitude ran thither in great numbers, and presented themselves readie to defend, the ramme was *jurring* also at the other part.
Holland, tr. of Livy, p. 963.

jurt, *n.* [A var. of *jar*[1], *n.*] A crashing collision; a harsh-sounding blow; a crash.

Jura (jö′rạ), *a.* and *n.* In *geol.*, same as *Jurassic*.—**Jura limestone**. See *limestone*.

jural (jö′rạl), *a.* [< L. *jus* (*jur*-), right, law (see *jus*[2]), + *-al*.] 1. Pertaining to natural or positive right.

By the adjective *jural* we shall denote that which has reference to the doctrine of rights and obligations; as by the adjective "moral" we denote that which has reference to the doctrine of duties. *Whewell.*

2. Of or pertaining to jurisprudence.

jurally (jö′rạl-i), *adv.* 1. As regards or in accordance with natural or positive right.—2. By means of or with reference to jurisprudence.

juramentally† (jö-rạ-men′tal-i), *adv.* [< **juramental*, pertaining to an oath (< L. *juramentum* (> It. *giuramento* = OF. *jurement*), an oath, < *jurare*, swear: see *jury*), + *-ly*[2].] With an oath.

A promise *juramentally* confirmed.
Urquhart, tr. of Rabelais, iii. 19.

jurant (jö′rạnt), *a.* and *n.* [< F. *jurant*, ppr. of *jurer*, swear: see *jury*.] I. *a.* Taking an oath; swearing. [Rare.]

II. *n.* One who takes an oath. [Rare.]

Jurant and Dissident with their shaved crowns argue frothing everywhere; or are ceasing to argue and stripping for battle. *Carlyle*, French Rev., II. iv. 2.

Jurassic (jö-ras′ik), *a.* and *n.* [< *Jura* (see def.) + *-assic*, as in *Triassic*.] I. *a.* Pertaining or relating to the Jura mountains, and specifically, in *geol.*, to the Jurassic series.

II. *n.* In *geol.*, the name (having both stratigraphic and chronologic value) which includes all the divisions older than the Cretaceous and newer than the Triassic: so called from the predominance of rocks of this age in the Jura mountains. The Triassic, Jurassic, and Cretaceous together form the Mesozoic group or era. The flora of the Jurassic is distinguished by a predominance of cycadaceous forms, ferns being also plentiful. Its fauna is rich and varied. The most highly developed animals in this geological position are certain small marsupials. The oldest known bird, possessing also some marked reptilian characters, is found in the Upper Jurassic. The Jurassic group covers a wide area in Europe, and is also of great interest and importance in the Cordilleran region of the United States. The name *Oölite* was originally applied to the rocks of Jurassic age in England by William Smith, by whom the order of succession of this part of the series was first worked out and published. The Jurassic of England includes the Lias as its lower member, and above this the Lower, Middle, and Upper Oölites. In northwestern Germany the Jurassic is divided into the Lower or Black Jura, the Middle or Brown, and the Upper or White. Of these divisions the lower corresponds to the English Lias. The fossil remains of the Jurassic series in the United States are of great interest. Among them is the *Atlantosaurus*, a dinosaur, probably eighty feet in length, with a femur six feet long. The auriferous rocks of the western edge of North America are, at least in large part, of Jurassic age.

jurat[1] (jö′rat; F. pron. zhü-rä′), *n.* [Formerly also *jurate*; < F. *jurat* (vernacularly *juré*, a juryman) = Sp. Pg. *jurado* = It. *giurato*, < ML. *juratus*, an alderman, a warden, juror, juryman, lit. one sworn, < L. *juratus*, pp. of *jurare*, swear: see *jury*.] A sworn officer; a magistrate; a member of a permanent jury. The word is now chiefly used as a title of office in the Channel Islands, where the jurats are judges and legislators chosen for life, Jersey and Guernsey having twelve each, and Alderney six.

Opyn your gates, we commaunde you in the name of the kyng. The watchmen sayde, Sirs, the kayes be within the towne with the *jurates*.
Berners, tr. of Froissart's Chron., I. cxciv.

jurat[2] (jö′rat), *n.* [< L. *juratum*, neut. of *juratus*, sworn: see *jurat*[1].] In *law*, the official memorandum subscribed at the end of an affidavit, showing the time when and the person before whom it was sworn. *Wharton.*

jurate† (jö′rāt), *n.* An obsolete form of *jurat*[1].

juration† (jö-rā′shọn), *n.* [= It. *giurazione*, < LL. *juratio*(*n*-), a swearing as on oath, < L. *jurare*, swear: see *jury*.] In *law*, the act of swearing: the administration of an oath.

jurative (jö′rā-tiv), *a.* Pertaining to or having the purpose or the sanction and effect of an oath; juratory. [Rare.]

jurator†, *n.* [< L. *jurator*, a swearer, a sworn witness, a sworn magistrate, ML. a juror, < *jurare*, swear: see *jury*, *juror*.] A juror.

juratory (jö′rā-tọ-ri), *a.* [= F. *juratoire* = It. *giuratorio*, < LL. *juratorius*, of an oath, < L. *ju-*

rator, a sworn witness, < *jurare*, swear: see *jurator, jury*.] Of, pertaining to, or comprising an oath.

How often does St. Paul . . . repeat . . . his *juratory* caution before the Lord: as, God is my witness?
Donne, Sermons, vi.

Juratory caution, in *Scots law*, a form of caution sometimes offered in a suspension or advocation, where the complainer is not in circumstances to offer any better. It consists of an inventory of his effects, given up upon oath, and assigned in security of the sums which may be found due in the suspension.

jurdicciount, *n.* A Middle English variant of *jurisdiction*.

jure divino (jö'rē di-vī'nō). [L.: *jure*, abl. of *jus* (*jur-*), right, law; *divino*, abl. of *divinus*, divine: see *divine*.] By divine right. See *divine*.

jurema-bark (jö-rē'mä-bärk), *n.* [Braz. *jurema*.] An astringent bark obtained from the Brazilian tree *Acacia Jurema*. The natives are said to prepare a narcotic decoction from it.

juribali, juriballi (jö-ri-bal'i), *n.* [Native name.] A West Indian tree, *Trichilia moschata*, of the family *Meliaceæ*, the astringent bark of which is said to possess a high value in typhoid fevers. The name is also applied to two other meliaceous trees, *Soymida febrifuga*, of India and Ceylon, and *Khaya Senegalensis*, of tropical Africa, which possess similar properties.

juridic (jö-rid'ik), *a.* [= F. *juridique* = Sp. *juridico* = Pg. *juridico* = It. *giuridico*, < L. *juridicus*, relating to justice or law, as a noun a judge, < *jus* (*jur-*), law, + *dicare*, point out, *dicere*, say, declare. Cf. *judge*, ult. of same elements.] Same as *juridical*. [Rare.]

juridical (jö-rid'i-kal), *a.* [< *juridic* + *-al*.] **1.** Pertaining to the promulgation or dispensation of law; founded upon or according to the forms of law; relating to or concerned with administrative law: as, a *juridical* argument; *juridical* methods; *juridical* oppression.

The influence of Christianity on a much more famous system than the Brehon law has always seemed to me to be greatly overstated by M. Troplong and other well-known *juridical* writers. *Maine*, Early Hist. of Institutions, p. 61.

2. Subsisting in contemplation of law; of the nature of an abstract legal conception: as, a *juridical* person, or a *juridical* transaction (that is to say, a person or transaction legally supposed or conceived of to some extent irrespective of actual existence and of incidents and circumstances not recognized by the law).—**Delivery of juridical possession.** See *delivery*.—**Juridical days**, days in court on which law is administered; days on which the court can lawfully sit.

juridically (jö-rid'i-kal-i), *adv.* In a juridical manner; according to forms of law; with legal authority.

juridicialt, *a.* An obsolete variant of *juridical*.

jurinite (jö'ri-nīt), *n.* [Named by Loret (1822) after Louis *Jurine* (1751–1819), a Genevan naturalist.] In *mineral.*, same as *brookite*.

jurisconsult (jö-ris-kon'sult), *n.* [= F. *jurisconsulte* = Sp. Pg. *jurisconsulto* = It. *giurisconsulto*, < L. *jurisconsultus*, also *jureconsultus*, also separately *juris consultus* and *consultus juris*, one skilled in the law, < *juris*, gen. of *jus*, law, + *consultus*, pp. of *consulere*, consult: see *consult*.] One who gives his opinion in cases of law; one learned in jurisprudence; a jurist; specifically, a master of the civil law.

In divers particular sciences, as of the *jurisconsults*, . . . there are set down some small memorials of the schools, authors, and books.
Bacon, Advancement of Learning, ii. 120.

jurisdiction (jö-ris-dik'shon), *n.* [< ME. *jurisdiction*, *jurdicciown*, < OF. *jurisdiction*, F. *juridiction* = Sp. *jurisdicción* = Pg. *jurisdicção* = It. *giurisdizione*, < L. *jurisdictio(n-)*, *juris dictio(n-)*, administration of the law, jurisdiction, < *juris*, gen. of *jus*, law, + *dictio(n-)*, a declaring: see *diction*.] **1.** Judicial authority; the legal power of hearing and determining controversies or accusations; the right of exercising the functions of a judge or of a legal tribunal. It includes the power to compel a person to appear and answer a complaint, or to punish him for not doing so; the power to take property in dispute into the custody of the law; the power to compel production of evidence, and hear the contention of the parties; the power to determine questions of right between the parties, and to enforce the determination. *Jurisdiction of the person* depends usually on the giving of due notice to the person, or a voluntary appearance by him. *Jurisdiction of the subject-matter* usually depends on the statutory or common-law powers conferred on the court with reference to the nature of the controversy or property affected, and sometimes upon the seizure of the property into the custody of the law.

By the long uniform usage of many ages, our kings have delegated their whole judicial power to the judges of their several courts, which are the grand depositaries of the fundamental laws of the kingdom, and have gained a known and stated *jurisdiction*, regulated by certain and established rules, which the crown itself cannot now alter but by act of Parliament. *Blackstone*, Com., I. vii.

2. Controlling authority; the right of making and enforcing laws or regulations; the capacity of determining rules of action or use, and exacting penalties: as, the *jurisdiction* of a state over its subjects.

To live exempt
From heaven's high *jurisdiction*.
Milton, P. L., ii. 319.

The *jurisdiction* of the several States which constitute the Union is, within its appropriate sphere, perfectly independent of the federal government.
T. H. Benton, Thirty Years, II. 283.

3. The domain within which power is exercised; specifically, the territory over which the authority of a state, court, or judge extends.

The Mr. and Wardens shall make serche onelye within the *jurisdition* of the citie and touchinge the saide crafte onelye. *English Gilds* (E. E. T. S.), p. 307.

4. The function or capacity of judging or governing in general; the natural right to judge; inherent power of decision or control.

A new book astonishes for a few days, takes itself out of common *jurisdiction*. *Emerson*, Courage.

Man's language is higher than himself, more spiritual, more ethereal, and still less subject than he to the *jurisdiction* of the laws of material nature.
G. P. Marsh, Lects. on Eng. Lang., xii.

Appellate jurisdiction. See *original jurisdiction*, below.—**Concurrent jurisdiction.** See *concurrent*.—**Contentious jurisdiction**, that jurisdiction exercised when one invokes the aid of the law against one that disputes his demands, as distinguished from *voluntary jurisdiction*, when the person having a right to resist the demand appears as a consenting applicant.—**Delegated jurisdiction.** See *delegated*.—**Foreign Jurisdiction Act**, an English statute of 1843 (6 and 7 Vict., c. 94, and amendments) relating to the exercise of powers in foreign countries under rights acquired by treaty or otherwise.—**General jurisdiction**, jurisdiction in respect to either persons or property generally, within the boundaries of the state.—**Jurisdiction Acts.** See *Foreign Jurisdiction Act*, above, and *Summary Jurisdiction Act*, below.—**Limited jurisdiction**, a jurisdiction extending only to a certain district, or to certain classes of subjects or persons, etc., or to certain amounts.—**Original jurisdiction**, the power to entertain an action from its commencement, as distinguished from *appellate jurisdiction*, or power to review the exercise of the jurisdiction of an inferior tribunal.—**Plea to the jurisdiction**, a plea denying the jurisdiction of the court to entertain an action.—**Proper jurisdiction**, in *Scots law*, that jurisdiction which belongs to the judge or magistrate himself, in virtue of his office.—**Summary Jurisdiction Act**, an English statute of 1848 (11 and 12 Vict., c. 43) for facilitating proceedings in criminal cases before justices of the peace. It was amended in 1849 (12 and 13 Vict., c. 45), 1879 (42 and 43 Vict., c. 49), and 1884 (47 and 48 Vict., c. 43), and extended to Ireland in 1871 (34 and 35 Vict., c. 76) and to Scotland in 1881 (44 and 45 Vict., c. 33).—**Voluntary jurisdiction.** See *contentious jurisdiction* above.

jurisdictional (jö-ris-dik'shon-al), *a.* [< *jurisdiction* + *-al*.] Pertaining or relating to jurisdiction: as, *jurisdictional* rights or interests.

Civil and *jurisdictional* powers . . . were conferred on the council established by this charter.
E. Everett, Orations, II. 221.

jurisdictivet (jö-ris-dik'tiv), *a.* [As *jurisdict(ion)* + *-ive*.] Of, pertaining to, or having jurisdiction.

To ecclesiasticall censure no *jurisdictive* power can be added without a childish and dangerous oversight in polity, and a pernicious contradiction in evangelick discipline. *Milton*, Church-Government, ii. 3.

jurisprudence (jö-ris-prö'dens), *n.* [= F. *jurisprudence* = Sp. Pg. *jurisprudencia* = It. *giurisprudenza*, < L. *jurisprudentia*, also *juris prudentia*, the science of the law, < *juris*, gen. of *jus*, law, + *prudentia*, knowledge, skill: see *prudence*.] **1.** The science of law; the systematic knowledge of the laws, customs, and rights of men in a state or community necessary for the due administration of justice; the science which treats of compulsory laws, with special reference to their philosophy and history.—**2.** The body of laws existing in a given state or nation.—**3.** More specifically, the body of unwritten or judicial law considered in the light of its underlying principles and characteristic tendencies, and as distinguished from statute or legislative law.—**Analytical jurisprudence.** See *analytic*.—**Comparative jurisprudence**, the analysis and comparison of the bodies of law existing in different states. In modern times the right development of law, and the tendency to a convenient assimilation of the laws of different civilized states and nations, have been much favored by the study of comparative jurisprudence.—**Equity jurisprudence.** See *equity*, 2 (*b*).—**General jurisprudence**, the science or philosophy of law, as distinguished from *particular jurisprudence*, or the knowledge of the law of a particular nation.—**Medical jurisprudence**, forensic medicine. See *forensic*.—**Mining jurisprudence**, the law, particularly the unwritten or non-statutory law, developed from the usages of miners, in newly discovered gold fields, etc., according to which the rights of finders of conflicting claims, of abandonment, and of the use of waters and the riddance of debris were regulated.—**Particular jurisprudence**, that which in the laws of a given state or nation is peculiar to that state or nation.

jurisprudent (jö-ris-prö'dent), *a.* and *n.* [= OF. *jurisprudent* = Sp. Pg. *jurisprudente* = It. *giurisprudente*, having knowledge of the law, < L. *juris*, of the law, gen. of *jus*, law, + *prudent(t-)s*, having knowledge: see *prudent*. This adj. is later than the noun.] **I.**† *a.* Versed in the law; understanding law.

II. *n.* A person learned in the law; one versed in jurisprudence. [Rare.]

Klosterheim in particular . . . had been pronounced by some of the first *jurisprudents* a female appanage.
De Quincey.

jurisprudential (jö″ris-prö-den'shal), *a.* [< *jurisprudence* (L. *jurisprudentia*) + *-al*.] Of, pertaining to, or relating to jurisprudence.

Traverse the whole continent of Europe, ransack all the libraries belonging to all the *jurisprudential* systems of the several political states, add the contents together, you would not be able to compose a collection of cases equal in variety, in amplitude, in clearness of statement, . . . to that which may be seen to be afforded by the collection of English Reports of adjudged cases.
Bentham, Works, IV. 461.

jurist (jö'rist), *n.* [= F. *juriste* = Sp. Pg. *jurista* = It. *giurista*, < L. *jus* (*jur-*), law.] **1.** One who professes the science of law; one versed in the law, or more particularly in the civil law; one who writes on the subject of law.

It has ever been the method of public *jurists* to draw a great part of the analogies on which they form the law of nations from the principles of law which prevail in civil community. *Burke*.

2. In universities, a student in the faculty of law.

juristic (jö-ris'tik), *a.* [< *jurist* + *-ic*.] Pertaining to a jurist or to jurisprudence; relating to law; juridical; legal.

juristical (jö-ris'ti-kal), *a.* [< *juristic* + *-al*.] Same as *juristic*.

It is not rarely that we refuse respect or attention to diplomatic communications, as wide of the point and full of verbiage or conceits, when, in fact, they owe those imaginary imperfections simply to the *juristical* point of view from which they have been conceived and written.
Maine, Village Communities, p. 353.

juristically (jö-ris'ti-kal-i), *adv.* In a juristic manner or way; juridically.

jur-nut (jèr'nut), *n.* [A dial. form of *earthnut*.] **1.** The earthnut, *Conopodium majus*.—**2.** The fruit of *Arachis hypogæa*, the peanut. [Prov. Eng.]

juror (jö'ror), *n.* [< ME. *jurour*, < OF. *jureor*, *jureur*, *jourour*, F. *jureur* = Sp. Pg. *jurador* = It. *giuratore*, < L. *jurator*, a swearer, a sworn witness, a sworn magistrate, ML. a juror, < *jurare*, swear: see *jury*. Cf. *jurator*.] **1**†. One who takes or has taken an oath; one who swears; an oath-taker. Compare *nonjuror*.

I am a *juror* in the holy league,
And therefore hated of the Protestants.
Marlowe, Massacre at Paris, ii. 6.

2. One who serves on a jury; a juryman; a person sworn to deliver the truth on the evidence given him concerning any matter in question or on trial. See *jury*.

If your will pass,
I shall both find your lordship judge and *juror*.
Shak., Hen. VIII., v. 3, 60.

3. The syndic of a gild or trade, elected by the members of a craft to act as arbiter between master and man, examine apprentices, initiate masters, and represent the body of them.—**4.** One of a body of men selected to adjudge prizes, etc., at a public exhibition or competition of any kind.—**Challenge of jurors.** See *challenge*, 9.—**Grand juror**, a member of a grand jury.—**Petty juror**, a member of a petty jury.

jurt, *n.* See *yurt*.

jury (jö'ri), *n.*; pl. *juries* (-riz). [Early mod. ★E. *jurie*, < ME. *jurie*, < OF. *juree*, an oath, a judicial inquest, a jury (F. *jury*, *juri*, < E.), < ML. *jurata*, a jury, a sworn body of men, orig. fem. pp. of L. *jurare* (> F. *jurer* = Sp. Pg. *jurar* = It. *giurare*), swear, bind by an oath, < *jus* (*jur-*), law: see *just*[1].] **1.** A certain number of men selected according to law, and sworn to inquire into or to determine facts concerning a cause or an accusation submitted to them, and to declare the truth according to the evidence adduced. Trial by jury signifies the determination of facts in the administration of civil or criminal justice by the arbitrament of such a body of men, subject to the superintendence of a judge, who directs the proceedings, decides what evidence is proper to be laid before the jury, and determines questions of law. The juries in the ordinary courts of justice are *grand juries*, *petty* or *petit* or *common juries*, *special* or *struck juries*, and *sheriff's juries*. Of these, the first and last are not trial juries in the proper sense. (See phrases below.) The principle of trial by jury existed in different forms among the ancient Greeks, Ro-

mans, and Germans; but it early fell into general disuse. The existing system gradually grew up under the English common law, from which it passed into American use, but has been only partially adopted in modern times by the nations of continental Europe.

For in good faith I neuer saw the daye yet but that I durst as wel trust ye truth of one iudge as of two iuries.
Sir T. More, Works, p. 988.

The *jury*, passing on the prisoner's life,
May in the sworn twelve have a thief or two
Guiltier than him they try. *Shak.*, M. for M., ii. 1, 19.

2. A body of men selected to adjudge prizes, etc., at a public exhibition or other competition. Often called *jury of award.*—**Coroner's jury**, a jury summoned by a coroner to investigate the cause of a death.—**Grand jury** [i. e. 'large' jury, with reference to the number of members, which is greater than that of a *petty* or 'small jury'], in *law*, a body of men designated from time to time from among the people of a community, by authority of law, to inquire what violations of law have been committed therein, and by whom, their function being not to establish guilt, but to ascertain whether there is sufficient ground of suspicion of any person to justify trial by a petty jury. At common law, and generally by statute, there must be not less than twelve and not more than twenty-three members in a grand jury, and the concurrence of twelve is necessary to find an indictment. (See *indictment.*) In some jurisdictions grand juries are intrusted with some other duties relating to public welfare in their county. There is no grand jury in Scotland.—**Juries' (Ireland) Acts**, English statutes of 1871 (34 and 35 Vict., c. 65), 1872 (35 and 36 Vict., c. 25), and 1875 (38 and 39 Vict., c. 57), which relate to the qualifications, selection, and summoning of jurors in Ireland.—**Jury de medietate linguæ** (literally, of halfness of language), a jury composed of one half natives and one half aliens, allowed in cases where one of the parties is an alien. It has been generally abolished in the United States, but is still allowed in Kentucky.—**Jury of annoyance.** See *annoyance.*—**Jury of matrons**, a jury of "discreet and lawful women" impaneled to try a question of pregnancy: as where a widow alleges herself to be with child by her late husband, or a woman sentenced to death pleads, in stay of execution, that she is with child.—**Mixed jury**, a jury of mixed races, particularly a jury including both white men and colored men.—**Petty or petit jury** [i. e. 'small' jury; cf. *grand jury*]. Same as *trial jury.*—**Sheriff's jury**, a jury selected by a sheriff from the list of persons qualified to serve as jurors, and summoned by him to hold inquests, as for assessing damages in an action in which the defendant makes no defense, or for ascertaining the mental condition of an alleged lunatic.—**Special jury**, a jury selected from among men of special qualifications, as merchants or freeholders.—**Struck jury**, a jury selected by allowing each party alternately to strike off from a list a name not acceptable to him, until the number is reduced to twelve.—**To hang a jury.** See *hang.*—**Trial jury, petty or petit jury, traverse jury, or common jury**, a jury formed for the trial of an issue of fact in a civil or criminal action. At common law, both in England and in the United States, a trial jury must consist of twelve, and unanimity is necessary to render a verdict. The constitutional right of trial by jury in the United States implies these conditions. By statute, in cases where the Constitution does not secure this right, juries of four, six, or eight are sometimes allowed, as in justices' courts. By the Constitutions of several States three fourths, and in some States two thirds, of a jury may render a verdict in civil actions. According to the law of Scotland, the number of the jury in criminal cases is fifteen; and the decision of a majority determines the verdict. Instead of an absolute verdict of "guilty" or "not guilty," they may return one of "not proven," which frees the accused, but leaves him under a suspicion of guilt. In civil cases the number of the jury is twelve, and the jurors are not required to be unanimously agreed in their verdict. In cases of high treason the jury consists of twelve, and their verdict must be unanimous, as in England.

jury-box (jö'ri-boks), *n.* In a court of justice, an inclosed space in which the jury sits.

jury-leg (jö'ri-leg), *n.* [See *jury-mast.*] A wooden leg. [Slang.]

jury-list (jö'ri-list), *n.* In *law*, a list of persons who may be summoned to act as jurymen.

juryman (jö'ri-man), *n.*; pl. *jurymen* (-men). 1. One who is impaneled on a jury, or who serves as a juror.

Here therefore a competent number of sensible and upright *jurymen*, chosen by lot from among those of the middle rank, will be found the best investigators of truth, and the surest guardians of public justice.
Blackstone, Com., III. xxiii.

2. A member of any body of persons chosen to try a case at law or to inquire into the merits of a cause presented to them, as one of the dicasts of ancient Athens, or of the judices of ancient Rome, or of a modern jury of award.

All cases of importance, civil or criminal, came before courts of sixty or seventy *jurymen*. *Froude*, Cæsar, p. 30.

jury-mast (jö'ri-mast), *n.* [Origin of the first element unknown. Skeat (Concise Etym. Dict., 1901) suggests its connection with ME. *iuwere*, < OF. *ajuirie*, aid. This etym., restated as follows, seems probable: *Jury-mast* is perhaps a partial translation of OF. **mast d'ajuirie* ('mast of assistance'), taken as **mast de juirie*, whence ME. **juerie*, found recorded only in the badly spelled forms (in the "Promptorium Parvulorum," p. 268) *iuwere, iwere, iuwr', iver*, OF. *ajuierie* (Godefroy), aid, assistance, < *ajuere, ajueor*, etc., also *aiuedur*, etc., < L. *adjūtor*, helper, aider: see *aider, adjutor.* If the word were a purely Eng. formation it would have to be taken as simply < *jury* + *mast*[1], it being then a piece of nautical humor, designating a more or less awkward mast hastily devised by the captain and carpenter consulting as a 'jury.'] *Naut.*, a temporary mast erected on a ship, to supply the place of one that has been broken or carried away, as in a tempest or an engagement.

jury-process (jö'ri-pros″es), *n.* The writ for the summoning of a jury.

jury-rig (jö'ri-rig), *n.* [< *jury-* (see *jury-mast*) + *rig*[1].] *Naut.*, a temporary rig when the permanent rig has been disabled.

jury-rigged (jö'ri-rigd), *a.* *Naut.*, rigged in a temporary manner on account of accident.

jury-rudder (jö'ri-rud″ėr), *n.* [< *jury-* (see *jury-mast*) + *rudder.*] *Naut.*, a temporary rudder rigged on a ship in case of accident.

jurywoman (jö'ri-wum″an), *n.*; pl. *jurywomen* (-wim″en). One of a jury of matrons (which see, under *jury*).

jus[1]†, *n.* A Middle English form of *juice.*

Jussiæa (jus-i-ē'ä), *n.* [NL. (Linnæus), named after Bernard de *Jussieu*, founder of the natural system of botany developed later by his nephew. See *Jussieuan.*] A genus of plants of the family *Onagraceæ*, containing about 36 species, mainly herbs, inhabiting swamps and ponds, mostly in tropical and subtropical regions. The adherent calyx-tube is elongated, but not produced beyond the 4-celled ovary. There are from 4 to 6 entire or 2-lobed petals, with twice as many stamens. The leaves are alternate, and the yellow or white flowers are axillary and solitary. Several species are grown in collections, but none is conspicuous for its flowers or medicinal properties. *J. decurrens* and *J. diffusa* are natives of the United States; the latter also occurs in tropical America and Asia. The genus is sometimes very properly called *primrose-willow.* The name has also been incorrectly written *Jussieua, Jussieva, Jussievia, Jussievia.*

Jussieuan (jus-i-ū'an), *a.* [< *Jussieu* (see def.) + *-an.*] Of or pertaining to one of the French botanists Jussieu, especially Antoine Laurent de Jussieu (1748–1836).—**Jussieuan system**, in *bot.*, the natural (as contrasted with the artificial or Linnean) system of classification, promulgated by A. L. de Jussieu in 1789 in his "Genera of Plants disposed according to Natural Orders." His uncle, Bernard de Jussieu (1699–1776), had proceeded in the same direction. To the nephew more than any one else is due the received classification of genera under orders based upon proper characters. Of these he founded one hundred, within which he included nearly all known genera. His primary division of the vegetable kingdom was into *Acotyledones* (the *Cryptogamia* of Linnæus), *Monocotyledones*, and *Dicotyledones.* Subordinate divisions among flowering plants were based upon the position of the stamens. His system has been improved by A. P. de Candolle and many later workers.

jussive (jus'iv), *a.* and *n.* [< L. *jussus*, pp. of *jubere*, command, + *-ive.*] **I.** *a.* In *gram.*, expressing command.

There are princes and knights come from all parts of the world to *just* and tourney for her love.
Shak., Pericles, ii. 1, 116.

just², **joust¹** (just or jöst), *n.* [Early mod. E. also *giust* (after It.); < ME. *juste*, < OF. *joste, jouste* (F. *joute*), also *jostee* = It. *giostra* (for **giosta*), a just; from the verb.] A military contest or spectacle in which two adversaries attacked each other with blunted lances, rarely with sharp weapons as in war; a knightly tilt. The just was sometimes held at the barrier; that is, the charging knights were separated by a solid structure of wood, which each kept on his left hand, the lance being held diagonally across the neck of the horse. The shield was hung from the neck, leaving the left hand free to manage the horse and the right to direct the lance. The shock of the lance was sometimes received on the helmet, and on this account the tilting-helmet had commonly the openings for air on the right side. From the beginning of the fourteenth century the armor for the just differed from the armor for war, and became more and more heavy and unwieldy, the tilter being almost immovable in his saddle, in which he was secured by high pommel and cantle, and often by a garde-cuisse completely covering the left thigh and leg. The sport was usually declared to be in honor of one or more ladies who presided as judges and awarded the prizes.

> Lyft up thy selfe out of the lowly dust,
> And sing of bloody Mars, of wars, of *giusts*.
> *Spenser*, Shep. Cal., October.

> Some one might show it at a *joust* of arms,

> When mercy seasons *justice*.
> *Shak.*, M. of V., iv. 1, 197.

This reasonable moderator, and equal piece of *justice*, Death. *Sir T. Browne*, Religio Medici, i. 38.

3. Rights of jurisdiction.—4†. Jurisdiction; authority.

> The xix kynges . . . comaunded alle hem that were vnther theire *Iustice*, that eche man sholde euer be redy and make goode wacche. *Merlin* (E. E. T. S.), iii. 576.

5†. Precision; justness; exactness.

> O lady,
> Much less in blood than virtue, yet a princess
> To equal any single crown o' the earth
> I' the *justice* of compare! *Shak.*, Pericles, iv. 3, 9.

6. A person commissioned to hold court for the purpose of hearing complaints, trying and deciding cases, and administering justice; a judge or magistrate: generally in specific uses: as, a *justice* of the peace; the *justices* of the Supreme Court.

> Thurgh sentence of this *justice* Apius.
> *Chaucer*, Doctor's Tale, l. 204.

Bed of justice. See *bed¹*.—**Bureau of Military Justice.** See *bureau*.—**Chief justice**, the highest in rank of the judges of a court; particularly, the presiding judge in the King's (or Queen's) Bench and Common Pleas divisions of the English High Court of Justice, in the United States Supreme Court, and in the supreme courts of the States. Often abbreviated *C. J.*—**College of Justice.** See *college*.—**Department of Justice.** See *department*.—**Fugitive from justice.** See *fugitive*.—**Gate of justice.** See *gate¹*.—**Jeddart** or **Jedwood justice**, executing a prisoner and trying him afterward: an expression referring to Jedburgh, a Scotch border town, where many of the border raiders are said to have been hanged without the formality of a trial. [Scotch.]

> We will have *Jedwood justice*—hang in haste, and try at leisure. *Scott*, Fair Maid of Perth, xxxii.

Justice of the peace, an inferior or local judge chosen in each county or town or other district, to preserve the peace, to try minor causes, and to discharge other functions, as the legalizing of papers for record. Abbreviated *J. P.*

> Thou hast appointed *justices of peace*, to call poor men before them about matters they were not able to answer.
> *Shak.*, 2 Hen. VI., iv. 7, 45.

Justice of the quorum, a distinction conferred upon some, and sometimes on all, the justices of the peace of a county in England, by directing, in the commission authorizing the holding of quarter sessions, that among those holding the court must be two or more of several specially named.—**Justices in eyre.** See *eyre¹*.—**Justices' justice**, the kind of justice administered by the unpaid magistracy: in satirical reference to the disproportionate sentences and extraordinary decisions of some of these officials. [Eng.]—**Justice's warrant.** See *warrant*.—**Lord Chief Justice**, the title given in England to the chief judge of the Court of King's (Queen's) Bench: in full, the *Lord Chief Justice of England*. The title of *Lord Chief Justice of the Court of Common Pleas* lapsed with the abolition of that court.—**Lord Justice Clerk**, the Scottish judge who ranks next to the Lord Justice General. He presides over the Outer House or Second Division of the Court of Session, and is vice-president of the High Court of Justiciary.—**Lord Justice General**, the highest judge in Scotland, also called the *Lord President of the Court of Session*.—**Lords justices**, persons formerly appointed by the English sovereign to act for a time as his substitute in the supreme government either of the whole kingdom or of some part of it.—**To do justice to**, to appreciate; treat in a manner showing appreciation of: as, he never *did justice to* his son's ability.—**Trial justice**, a justice assigned to hold court for the trial of causes, usually before a jury. [U. S.]=**Syn. 1.** *Right, Justice, Equity, Law; Justness, Justice.* *Right* is the standard word for what ought to be. *Justice* and *equity* are essentially the same, expressing the working out of the principles of *right* under *law*, but *law* is often contrary to *justice* or *equity*: hence the occasional remark, "That may be *law*, but it is not *justice*." *Law* in such a case means the interpretation of written law by the courts. A court of *equity* deals with and corrects the *injustice* of the working of the *law*. *Equity* more expressively represents the idea of fairness, and *justice* that of sacred rights. (See *just¹* and *honesty*.) *Justness* has a field of meaning peculiar to itself, by which we speak of the *justness* of observations, criticisms, etc.—that is, their conformity to admitted principles. As to conformity to right, we use *justice* for the abstract quality, *justice* of the person, and *justness* of the thing. We speak of the *justness* of a cause, a claim, a plea, etc.

justice† (jus'tis), *v. t.* [< *justice, n.*] To administer justice to; deal with judicially; judge.

justiciarship (jus-tish'i-ăr-ship), *n.* [< *justiciar* + *-ship*.] The office of justiciar.

> The unpopularity of Longchamp enabled John, aided by the archbishop of Rouen, to lead a revolutionary movement by which Longchamp was deprived of the *justiciarship*, and John recognized as summus rector of the kingdom. *Encyc. Brit.*, XIII. 713.

justiciary (jus-tish'i-ą-ri), *a.* and *n.* [< ML. *justiciarius*, one who administers justice, < L. *justitia*, justice: see *justice*. Cf. *justicer, justiciar*, ult. < ML. *justiciarius*.] **I.** *a.* Pertaining to the law; legal; relating to the administration of justice.

> He was brought into the *justiciary* court, upon an indictment for the crime to which it was expected he should plead guilty. *Strype*, Memorials, K. Charles, an. 1678.

Justiciary power, the power of judging in matters of life and death. *Jamieson.* [Scotch.]

II. *n.*; pl. *justiciaries* (-riz). 1. An administrator of justice; a justice or judge. *Burke.* [Rare.]—2. In *early Eng. hist.*, the chief administrator of both government and justice. The justiciary or chief justiciary was the king's deputy from the time of William the Conqueror to that of Henry III., presiding in the king's court and the exchequer, supervising all departments of government, and acting as regent in the king's absence. His functions were afterward divided between the lord chancellor, the chief justices, the lord high treasurer, etc. Also *justiciar*.

> His [Stephen's] brother had been made Bishop of Winchester, and by adding to it the place of his chief *justici-*

ary, the king [Henry I.] gave him an opportunity of becoming one of the richest subjects in Europe.
Burke, Abridg. of Eng. History, iii. 5.

The officers whom, by a faint analogy, we may call the Prime Ministers of the Norman Kings, are spoken of by more names than one. On these great officers the title of *Justiciar* or Chief *Justiciar* definitely settled.
E. A. Freeman, Norman Conquest, V. 288.

3†. In *theol.*, one who trusts in the justice or uprightness of his own conduct.

O Saviour, the glittering palaces of proud *justiciaries* are not for thee; thou lovest the lowly and ragged cottage of a contrite heart. *Bp. Hall*, Zaccheus.

I believe it would be no hard matter to unravel and run through most of the pompous austerities and fastings of many religious operators and splendid *justiciaries*.
South, Sermons, IX. 146.

4. Administration of justice or of criminal law; judiciary. [Scotch.]—**Clerk of Justiciary.** See *clerk*.—**Courts of Justiciary**, the highest criminal tribunals of Scotland. The supreme tribunal, whose decisions are finals is the *High Court of Justiciary*. Its judges, called *Commissioners* or *Lords of Justiciary*, are the Lord Justice General, the Lord Justice Clerk, and five judges of the Court of Session, appointed by patent. *Circuit Courts of Justiciary* are held by judges of the High Court at ten different towns throughout the country, usually twice a year.

Justicieæ (jus-ti-si′ē-ē), *n. pl.* [NL. (Dumortier), < *Justicia* + *-eæ*.] A tribe of acanthaceous plants. Besides *Justicia*, which is the type, it now includes 14 genera, agreeing with it most obviously in having the upper lip or upper lobes of the corolla interior, or at any rate the corolla not twisted in the bud.

justicies (jus-tish′i-ēz), *n.* [ML., 2d pers. sing. pres. subj. (used as impv.) of *justiciare*, *justitiare*, dispense justice, < L. *justitia*, justice: see *justice*.] In *Eng. law*, a writ, now obsolete, directed to the sheriff, empowering him to hold plea of debt in his county court: so called from the significant word in the opening clause of the writ, in Latin, "we command you that you justice A. B.," etc.

justicing-room (jus′tis-ing-röm), *n.* A room in which causes are heard judicially and justice is administered; especially, such a room in the house of a justice of the peace. [Eng.]

justicot†, justicoat†, *n.* Corruptions of *juste-au-corps*.

justifiability (jus-ti-fī-a-bil′i-ti), *n.* Justifiableness. *The Lancet.* [Rare.]

justifiable (jus′ti-fī-a-bl), *a.* [< F. *justifiable*, < LL. as if **justificabilis*, < *justificare*, justify: see *justify*.] Capable of being justified or proved to be just or true; defensible; warrantable: as, *justifiable* resentment.

The stile of a Souldier is not eloquent, but honest and *iustifiable*. *Capt. John Smith*, Works, I. 60.

It is *justifiable* by Cæsar that they used to shave all except their head and upper lip, and wore very long hair; but in their old coins I see no such thing warranted.
Selden, Illustrations of Drayton's Polyolbion, viii.

His [Bacon's] conduct was not *justifiable* according to any professional rules that now exist, or that ever existed in England. *Macaulay*, Lord Bacon.

Justifiable homicide. See *homicide*2. =**Syn.** *Vindicable*. See *excusable*.

justifiableness (jus′ti-fī-a-bl-nes), *n.* The quality of being justifiable; possibility of being defended or excused.

You bring the confessions of the French and Dutch churches, averring the truth and *justifiablenesse* of their own government. *Bp. Hall*, Def. of Humb. Remonst.

justifiably (jus′ti-fī-a-bli), *adv.* In a justifiable manner; so as to admit of justification or excuse.

justification (jus″ti-fi-kā′shon), *n.* [= F. *justification* = Sp. *justificación* = Pg. *justificação* = It. *giustificazione*, < LL. *justificatio*(*n*-), < *justificare*, justify: see *justify*.] **1.** The act of justifying, or of showing something to be just or right; proof of fairness, propriety, or right intention; vindication; exculpation; upholding.

I pray, proceed to the *justification* or commendations of Angling. *I. Walton*, Complete Angler, p. 38.

The love of books is a love which requires no *justification*, apology, or defense.
Langford, Praise of Books, Prelim. Essay.

Specifically—**2.** In *law*: (*a*) The showing of a sufficient reason in court why a defendant did what he is called to answer: as, a plea in *justification*.

For liberty of franke speech, being a part of *justification* and defence in law, is allowed to use great words for plea.
Holland, tr. of Plutarch, p. 250.

(*b*) Proof by a surety offered for a party of whom security is required in legal proceedings that he is of adequate pecuniary ability.

Mr. M—— said that Recorder S—— had fixed bail at $25,000, and *justification* in $50,000 would be enough.
Philadelphia Times, April 10, 1886.

3. In *theol.*, the act by which the soul is reconciled to God. According to Roman Catholic authority, justification is an act by which God imparts his own character to the believer, making him truly just or righteous. According to the common Protestant doctrine, it is a forensic act by which, on certain conditions, God treats as just or righteous one who is not personally worthy of such treatment. In this sense it is nearly equivalent to the forgiveness of sins.

Justification . . . is not remission of sins merely, but also the sanctification and renewal of the inner man, through the voluntary reception of the grace, and of the gifts, whereby man of unjust becomes just, and of an enemy a friend, that so he may be an heir according to hope of life everlasting.
Canons and Decrees of the Council of Trent, quoted in [Schaff's "Creeds of Christendom," II. 95.

Justification is thus a forensic term; it is equivalent to the remission of sins. To justify signifies not to make the offender righteous, but to treat him as if he were righteous, to deliver him from the accusation of the law by the bestowal of a pardon.
G. P. Fisher, Hist. Reformation, p. 461.

4. The act of adjusting or making exact; the act of fitting together, as the parts of anything: as, the *justification* of lines or types, in printing.

Are we to seek here for the *justification* of the frontier which struck us as artificial and needless?
E. A. Freeman, Venice, p. 44.

When he [the printer] comes to the end of his line, and finds that he has a syllable or word which will not fill out the measure, he has to perform a task which requires considerable care and taste. This is called *justification*.
Ure, Dict., III. 644.

=**Syn. 1** and **2.** Exculpation, exoneration.

justificative (jus′ti-fi-kā-tiv), *a.* [= F. *justificatif* = Sp. Pg. *justificativo* = It. *giustificativo*, < LL. as if **justificativus*, < *justificare*, justify: see *justify*.] Justifying; having power to justify; justificatory.

Those same *justificative* points you urge
Might benefit . . .
Count Guido Franceschini.
Browning, Ring and Book, II. 313.

justificator (jus′ti-fi-kā-tor), *n.* [= F. *justificateur* = Sp. Pg. *justificador* = It. *giustificatore*, < LL. **justificator* (in fem. *justificatrix*), < *justificare*, justify: see *justify*.] One who justifies; in *law*, a compurgator who in former times justified accused persons by oath; also, a juryman (because the jurymen justify that party for whom they deliver their verdict).

justificatory (jus′ti-fi-kā-tō-ri), *a.* [< ML. *justificatorius*, < LL. *justificare*, justify: see *justify*.] Tending to justify; vindicatory; defensory.

justifier (jus′ti-fī-ėr), *n.* **1.** One who justifies; one who vindicates, supports, defends, or upholds; also, one who pardons and absolves from guilt and punishment.

That he might be just, and the *justifier* of him which believeth in Jesus. Rom. iii. 26.

2. In *printing*: (*a*) The workman who makes of just length, and with just spaces between the words, the lines of type set by a type-setting machine. (*b*) An attachment to a type-setting machine which does automatically some or all of the work of justification.—**3.** In *type-founding*, the workman who fits up a suite of strikes or unjustified matrices for use on one mold, making each and all just or uniform in height as to body, of even line as to face, and of proper nearness to mated letters.

justify (jus′ti-fī), *v.*; pret. and pp. *justified*, ppr. *justifying*. [< ME. *justifien*, < OF. (and F.) *justifier* = Sp. Pg. *justificar* = It. *giustificare*, < LL. *justificare*, act justly toward, do justice to, justify, < *justificus*, that acts justly, < L. *justus*, just, + *facere*, do.] **I.** *trans.* **1.** To prove or show to be just or conformable to reason, justice, duty, law, or propriety; vindicate; warrant; uphold.

He boldly aunswered him. He there did stand
That would his doings *justifie* with his owne hand.
Spenser, F. Q., V. xi. 4.

We are, therefore, unable to discover on what principle it can be maintained that a cause which *justifies* a civil war will not *justify* an act of attainder.
Macaulay, Nugent's Hampden.

2. To declare innocent or blameless; absolve; acquit; specifically, to free from the guilt or penalty of sin; reconcile to God.

I cannot *justify* whom the law condemns.
Shak., 2 Hen. VI., ii. 3, 16.

And by him all that believe are *justified* from all things from which ye could not be *justified* by the law of Moses.
Acts xiii. 39.

Therefore being *justified* by faith, we have peace with God through our Lord Jesus Christ. Rom. v. 1.

By works a man is *justified*, and not by faith only.
Jas. ii. 24.

3. To prove (any one) to be. [Rare.]

I here could pluck his highness' frown upon you,
And *justify* you traitors. *Shak.*, Tempest, v. 1, 131.

4. To make exact; cause to fit or be adapted, as the parts of a complex object; adjust, as lines or columns in printing.

When so many words and parts of words as will nearly fill the line have been composed, it is made the exact length required by inserting or diminishing the space between the several words. This is called *justifying* the line, and is effected by means of the spaces already mentioned. *Encyc. Brit.*, XXIII. 700.

5. To judge; pass judgment upon; hence, to punish with death; execute. [Old Eng. and Scotch.]

Bathe jureez, and juggez, and justicez of landes,
Luke thow *justyfye* theme wele that injurye wyrkes.
Morte Arthure (E. E. T. S.), l. 663.

Thir conspirators desired, at all times, to have this Duke [of Albany] put to death. . . . It was concluded by the king and counsel that he should be *justified* on a certain day. *Pitscottie*, Chron. of Scotland, p. 83. (*Jamieson.*)

Justified matrix, in *type-founding*. See *drive*, 1 (*c*).—**To justify bail**, in *law*. See *bail*2. =**Syn. 1.** To defend, maintain, exonerate, excuse, exculpate.

II. *intrans.* To agree; match; conform exactly; form an even surface or true line with something else: as, in printing, two lines of nonpareil and one of pica *justify*.

justifying-stick (jus′ti-fī-ing-stik), *n.* An attachment to some forms of type-setting machine, in which lines of type are made of even length, and with uniform spaces between the words; practically, a composing-stick.

justing, jousting (jus′ting or jös′ting), *n.* [< ME. *justing*; verbal n. of *just*2, *v.*] The act of tilting; a tilt, just, or tournament.

Ne stede for thi *justyng* wel to goon.
Chaucer, Good Women, l. 1115.

At the metynge of this turnement was sein many *Iustinges*, that gladly were be-holden.
Merlin (E. E. T. S.), ii. 134.

justing-helmet (jus′ting-hel″met), *n.* The helmet used in the just. See *just*2 and *tilting-helmet*.

justing-target† (jus′ting-tärj), *n.* A shield especially made for the just. See *tilting-target*.

Justinian code. See *code*.

Justinianist (jus-tin′i-an-ist), *n.* [< *Justinian*, Emperor of the East from 527 to 565, + *-ist*.] One who is instructed in the Institutes of Justinian; one acquainted with civil law.

justle, *v.* and *n.* An occasional form of *jostle*.

justly (just′li), *adv.* **1.** In a just manner; in conformity to reason, law, or justice; by right; honestly; fairly; equitably: as, to deal *justly*; an opinion *justly* formed.—**2.** In conformity to fact or rule; accurately: as, his character is *justly* described.

justment† (just′ment), *n.* [< *just* + *-ment*.] That which is due. *Davies.*

That for seven lusters I did never come
To doe the rites to thy religious tombe;
That neither haire was cut or true teares shed
By me o'er thee as *justments* to the dead,
Forgive, forgive me.
Herrick, To the Shade of his Religious Father.

justness (just′nes), *n.* **1.** The quality or state of being just, equitable, or right; conformity to truth or justice; lawfulness; rightfulness; honorableness.

The Esquire Katrington was a Man of a mighty Stature, the Knight, Annesley, a little Man; yet through the *Justness* of his Cause, after a long Fight, the Knight prevailed.
Baker, Chronicles, p. 138.

We may not think the *justness* of each act
Such and no other than event doth form it.
Shak., T. and C., ii. 2, 119.

2. Conformity to fact or rule; correctness; exactness; accuracy: as, *justness* of description or of proportions.

Their *justness* in keeping time by practice much before any that we have, unless it be a good band of practised fiddlers. *Pepys*, Diary, III. 66.

Every Circumstance in their Speeches and Actions is with great *justness* and delicacy adapted to the Persons who speak and act. *Addison*, Spectator, No. 309.

=**Syn.** Propriety, fitness, fairness. See *justice*.

jut (jut), *v. i.*; pret. and pp. *jutted*, ppr. *jutting*. [Early mod. E. *jutt*, *jutte*; a var. of *jet*1, *v.*] **1†.** To strike; shove; butt.

And all thy bodie shall haue the fruicion of this lighte, in suche wise as it shal no where stumble nor *iutte* against any thing. *J. Udall*, On Luke xi.

Insulting Tiranny beginnes to *Iutt*
Vpon the innocent and awelesse Throne.
Shak., Rich. III., ii. 4, 51 (fol., 1623).

2. To project forward; extend beyond the main body or line: as, the *jutting* part of a building: often with *out*.

A very pleasant little tarrasse . . . *jutteth* or butteth *out* from the maine building. *Coryat*, Crudities, I. 205.

jut (jut), *n.* [A var. of *jet*[1], *n.*] 1. That which juts; a projection.

He, stepping down
By zig-zag paths and *juts* of pointed rock,
Came on the shining levels of the lake.
Tennyson, Morte d'Arthur.

2†. A jostle; a shove; a thrust.

I will not see him, but giue him a *jutte* indeed.
Udall, Roister Doister, iii. 3.

The fiend, with a *jut* of his foot, may keep off the old, from dread of the future. *Miss Burney*, Cecilia, ii. 3.

Jute[1] (jöt), *n.* [= Dan. *Jyde* = Sw. *Jute*, < AS. *Iūtas, Eótas, Geótas, Iótas, Ytas*, pl., the Jutes.] One of a Low German tribe originally inhabiting Jutland, Denmark, which, with the Saxons and Angles, invaded Great Britain in the fifth ★century. See *Anglo-Saxon*.

jute[2] (jöt), *n.* [< Beng. *jūt*, the fibers of the plant *Corchorus*, also the plant itself, Malayalam *jat*, < Skt. *jatā* (also *jūta*), matted hair (as worn by Shiva or Hindu ascetics), also the fibrous roots of a tree (as of the banyan).] 1. A plant of the fiber-producing genus *Corchorus*, of the family *Tiliaceæ;* chiefly, one of the two species *C. capsularis* and *C. olitorius*, which alone furnish the jute-fiber of commerce. The latter is called *Jews'-mallow*, a name also occasionally given to the former. *C. capsularis* is the larger, and has

Fruiting Branch of Jute (*Corchorus capsularis*).
a, flower; *b*, seed; *c*, fruit of *C. siliquosus*.

short globular pods, while those of *C. olitorius* are elongated and cylindrical; but there is no clear difference in the quality of their product. The two species are native and cultivated in Bengal, whence comes the great mass of the jute of commerce, 60,000 tons being exported per year. Jute likes a warm, moist climate. It has been introduced into Egypt, and into the southern United States, where its success appears to be hindered only by the want of a sufficiently cheap means of separating the fiber.

2. The fiber of this plant. It is obtained by maceration from the inner bark. It is of fair tenacity, glossy, and susceptible of so fine division as to mix well with silk, and can take on a bright and permanent coloring. Hitherto, however, its commercial use has been in the manufacture of coarse fabrics, such as gunny-bags, for which it is consumed in vast quantities. It is of inferior value for ropes, not enduring moisture well. The refuse makes good paper. Dundee, in Scotland, is the great seat of jute-manufacture.—**American jute** (improperly so called), the velvetleaf, *Abutilon Abutilon*, belonging to the *Malvaceæ;* introduced from India, and now too common as a cornfield weed. Its fiber is pronounced equal to jute, and its economical importance seems to depend on the adaptation of suitable machinery.—**Bastard jute**, *Hibiscus cannabinus*, the fiber of which is inferior both to jute and sunn-hemp, and, with the better *Abelmoschus esculentus*, is used to adulterate jute.—**Jute-butts** or **-cuttings**, the woody stump of the jute-plant, the fiber of which is used for various purposes.

jute-fiber (jöt′fī″bėr), *n.* Same as *jute*[2], 2.

jutes†, *n. pl.* See *joutes*.

Jutish (jö′tish), *a.* [< *Jute*[1] + *-ish*[1].] Pertaining to the Jutes.

The advance-guard of these tribes [Saxon] was called Jutes, and their point of attack was Kent, the southeastern county of England. This they soon subdued, and erected it into a *Jutish* kingdom, with Canterbury as its capital.
Stillé, Stud. Med. Hist., p. 199.

Jutlander (jut′lan-dėr), *n.* [< *Jutland* (< *Jute*[1] + *land*) + *-er*[1].] A native or an inhabitant of Jutland, a peninsula of Europe comprising the mainland of Denmark and the adjoining part of Germany.

Jutlandish (jut′lan-dish), *a.* [< *Jutland* + *-ish*[1].] Of or pertaining to Jutland, or to the people of Jutland.

juttingly (jut′ing-li), *adv.* In a jutting manner; projectingly.

jutty† (jut′i), *n.* [A var. of *jetty*[1].] A projection, as in a building; also, a pier or mole; a jetty. [In the quotation below, also interpreted as an adjective, jutting.]

No *jutty*, frieze,
Buttress, nor coigne of vantage, but this bird
Hath made his pendent bed and procreant cradle.
Shak., Macbeth, i. 6, 7.

jutty† (jut′i), *v.* [A var. of *jetty*[1], *v.*] **I.** *trans.* To project beyond.

As doth a galled rock
O'erhang and *jutty* his confounded base,
Shak., Hen. V., iii. 1, 13.

II. *intrans.* To jut; project.

For he tooke away all those *juttying* galleries of pleasure . . . which even by auncient lawes also were forbidden to be built in Rome. *Holland*, tr. of Ammianus, p. 318.

jut-window (jut′win″dō), *n.* A projecting window; a bow-window or bay-window; a window that projects from the line of a building. *Congreve*.

juvenal† (jö′ve-nal), *n.* [< L. *juvenalis*, youthful, < *juvenis*, youthful, a youth: see *juvenile*.] A youth; a young man; a juvenile.

I will . . . send you back again to your master, for a jewel; the *juvenal*, the prince your master, whose chin is not yet fledged. *Shak.*, 2 Hen. IV., i. 2, 22.

Juvenalian (jö-ve-nā′li-an), *a.* [< L. *Juvenalis*, Juvenal (see def.), < *juvenalis*, youthful: see *juvenal*.] Of or pertaining to Juvenal, a celebrated Roman satirist (about A. D. 100); characteristic of Juvenal or of his style.

juvenate (jö′ve-nāt), *n.* [< NL. *juvenatus*, < L. *juvenis*, a youth: see *juvenile* and *-ate*[3].] In the *Rom. Cath. Ch.*, the two years devoted by a novice preparing for the priesthood to the study of Latin, Greek, and rhetoric. Also called *juniorship*. *Worcester* (Supp.).

juvenescence (jö-ve-nes′ens), *n.* [< *juvenescen(t)* + *-ce*.] The state of being juvenescent or of growing young.

juvenescent (jö-ve-nes′ent), *a.* [< L. *juvenescen(t-)s*, ppr. of *juvenescere*, grow to the age of youth, grow young again, < *juvenis*, young: see *juvenile*.] 1. Becoming young; growing young in appearance. [Rare.]—2. Immature; undeveloped. [An inaccurate use.]

juvenile (jö′ve-nil), *a.* and *n.* [= F. *juvenile* = Pr. *jovenil, juvenil* = Sp. Pg. *juvenil* = It. *giovenile, giovanile*, < L. *juvenilis*, youthful, juvenile, < *juvenis*, young, akin to *juvencus*, young, = AS. *iung, geong*, E. *young:* see *young*[1].] **I.** *a.* 1. Young; youthful: as, a *juvenile* manner; a *juvenile* part in a play.

Cousin Feenix . . . is still so *juvenile* in figure and manner, and so well got up, that strangers are amazed when they discern latent wrinkles in his lordship's face.
Dickens, Dombey and Son, xxxi.

2. Pertaining or suited to youth: as, *juvenile* sports or books.

Here [in "Romeo and Juliet"] is one of the few attempts of Shakespeare to exhibit the conversation of gentlemen, to represent the airy sprightliness of *juvenile* elegance.
Johnson, On Shakespeare's Plays.

=Syn. *Boyish, Puerile*, etc. See *youthful*.

II. *n.* 1. A young person; a youth.

"Yes, yes, yes," cried the *juveniles*, both ladies and gentlemen; "let her come, it will be excellent sport."
Charlotte Brontë, Jane Eyre, xviii.

2. A book written for young persons or children. [Trade use.]

Juveniles, classified in series according to price.
Publishers' Trade List, 1889.

3. *Theat.*, an actor who plays youthful parts: as, a first *juvenile*.

juvenileness (jö′ve nil-nes), *n.* Juvenility. *Bailey*, 1727. [Rare.]

Cleopatra, who in her *juvenility* was always playfully disposed, . . . pushed Florence behind her couch.
Dickens, Dombey and Son, xxx.

2. Anything characteristic of youth; a juvenile act or idea; juvenile crudity or volatility; a youthful proceeding or performance.

Customary strains and abstracted *juvenilities* have made it difficult to commend and speak credibly in dedications.
Glanville, Vanity of Dogmatizing, Ep. Ded.

juvent†, *n.* [ME. *juvente*, < OF. *juvente, jovente*, < L. *juventa*, the age of youth, youth, < *juvenis*, young: see *juvenile*.] Youth.

In his *Iuuente* this Iesus atte Iuwen feste
Water in-to wyn tourned as holy writ telleth.
Piers Plowman (B), xix. 104.

juventute†, *n.* [OF. *juventute*, < L. *juventūs* (*-tūt-*), the age of youth, < *juvenis*, young: see *juvenile* and cf. *juvent*.] Youth.

juvia (jö′vi-ä), *n.* [Native Brazilian.] The Brazil-nut, *Bertholletia excelsa*.

juwise†, *n.* See *juise*.

juxta-, [L. *juxta-*, prefix, *juxta*, near, close: see *just*[2], *v.*] A prefix of Latin origin, signifying 'near, together, in close proximity.' See ★*juxtaposition, juxtapose*, etc.

juxtapose (juks-tă-pōz′), *v. t.*; pret. and pp. *juxtaposed*, ppr. *juxtaposing*. [< F. *juxtaposer*, < L. *juxta*, near (see *just*[2]), + *ponere*, place: see *pose*[2].] To place (two or more objects) close together; place side by side.

When red and green are *juxtaposed*, the red increases the saturation of the green and the green that of the red, so that both colours are heightened in brilliance.
J. Ward, Encyc. Brit., XX. 69.

juxtaposit (juks-tă-poz′it), *v. t.* [< L. *juxta*, near, + *positus*, pp. of *ponere*, place: see *posit*. Cf. *juxtapose*.] To place near together or in close relation; juxtapose.

Manufactured articles, similar articles of home and foreign production, *juxtaposited*. *Contemporary Rev.*, LI. 505.

juxtaposition (juks″tă-pō-zish′on), *n.* [= Pg. *justaposição*, < F. *juxtaposition*, < L. *juxta*, near, + *positio(n-)*, a placing: see *position*. Cf. *juxtapose*.] The act of juxtaposing, or the state of being juxtaposed; the act of placing or the state of being placed in nearness or contiguity.

Putting the case of English style into close *juxtaposition* with the style of the French and Germans.
De Quincey, Style, i.

Jysse†. See *Gis*.

jyst†, *n.* See *gist*[1].

K

★ **1.** The eleventh letter and eighth consonant of the English alphabet; the eleventh character also of the Phenician alphabet, from which it has come to us through the Latin and Greek. The comparative scheme of forms, Phenician with its descendants and its claimed originals (see *A*), is as follows:

Egyptian. Hieroglyphic. Hieratic. Phenician. Early Greek and Latin.

K was little used in classical Latin, its office having been transferred to *C* (as is explained under *C*); hence it is not common in most alphabets derived from the Latin, as Italian and French. It was scarcely used in Anglo-Saxon, the *k*-sound being regularly represented by *c*, of which *k* was only an occasional variant; but it became common in early Middle English, from the thirteenth century, and gained rapidly in frequency, being needed to represent the *k*-sound where the *c* would be ambiguous, owing to the assibilation of *c* before certain vowels. (See *C, ch.*) It is now the regular symbol for the sound it denotes in all the Teutonic languages, except English. In the modern English spelling of words of Anglo-Saxon, Romance, or Latin origin it occurs for this sound before *e* and *i*, ■ being used before other vowels and before consonants. In foreign words not of Romance or Latin origin *k* is the usual initial symbol for the sound. Medially and finally, the sound is denoted in English by *ck*, as in *back, bicker*, etc. *K* has no variety of pronunciation in English, being everywhere the surd or breathed correspondent to the sonant or voiced *g* (hard). It is called a guttural, or, better, a back-palatal, being the audible result of a breach of contact between the upper surface of the back part of the tongue and the opposite surface of the palate; it is related to *g* (hard) and *ng* as *t* is related to *d* and *n*, and *p* to *b* and *m*. It is, however, now silent before *n*, in words like *knife, knight*; and, while itself no longer doubled in English words, it is used with ■ as a substitute for double *c* or double *k*, as in *sick, suck*. In words belonging to the Teutonic part of our language, the *k*-sound represents to a large extent a more original *g*-sound, as in *kin*, answering to Latin *genus*, Greek γένος (Sanskrit *jana*). Owing to the variable English transliteration of Oriental words (Arabic, Hebrew, Hindustani, Persian, Turkish, etc.), *k* (or *c*) may represent any one of several different kinds of *k*-sounds, more precisely represented (as in the etymologies of this dictionary) by *k, kh, q, gh, h*, etc. Such words are preferably entered under the form nearest the original; but usage is too arbitrary and various to be brought under any rule.

2. In *chem.*, the symbol for potassium (NL. *kalium*).—**3.** As an abbreviation: (*a*) [*l. c.*] In *meteor.*, of *cumulus* (*c* being used for *cirrus*). (*b*) Of *king, knight*, etc.: as, K. G., Knight of the Garter. (*c*) Of *carat.*—**4.** In *math.*, *k* is generally a constant coefficient. It is also ■ unit vector perpendicular to *i* and *j*.—**5.** As a numeral in medieval use, 250.

ka[1], **kae** (kâ, kā), *n.* [An obs. or dial. var. of *coe*[1].] The jackdaw. [Scotch.]

> In spite o' a' the thievish *kaes*

Kaaba, Caaba (kä'bä or kä'a-bä), *n.* [< Ar. *ka'bah*, a square building, < *ka'b*, ■ cube.] A cube-shaped, flat-roofed building in the center of the Great Mosque at Mecca: the most sacred shrine of the Mohammedans. In its southeast corner it contains the sacred black stone called *hajar al aswud*, said to have been originally a ruby which came down from heaven, but now blackened by the tears shed for sin by pilgrims. This stone is an irregular oval about seven inches in diameter, and is composed of about a dozen smaller stones of different shapes and sizes. It is the point toward which all Mohammedans face during their devotions. The Kaaba is opened to worshipers twice or three times a year, but only the faithful are permitted to approach it.

The *Kaabah* stands in an oblong square (enclosed by a great wall) 250 paces long, and 200 broad, none of the sides of which run quite in ■ straight line, though at first sight the whole appears to be of a regular shape.
Burckhardt, quoted in Burton's El-Medinah, p. 366.

kaama, *n.* See *caama*, 2.

kaareewan (kä-rē'wân), *n.* [Native name.] A tree of Queensland, *Acacia glaucescens*, 50 feet or more in height, with a wood of handsome appearance, hard, close, and tough.

kaladana-seed (kal-ą-dā'nä-sēd), *n.* The seed of *Pharbitis Nil*, used as a cathartic.

kalamdan (kal'am-dan), *n.* [Also *kalemdan;* Pers. (> Ar. Hind.) *qalam-dān*, a pen-case, < *qalam*, a pen, pencil, reed (see *calamus*), + *dān*, having, holding.] A Persian writing-case, consisting of a long and narrow box of wood or papier-maché painted in bright colors and varnished, having at one end the ink-pot, in a slightly projecting compartment, and including a receptacle for pens, a knife, etc.

kalamkari (kal-ąm-kar'i), *n.* [< Pers. *qalam-kārī*, < *qalam-kār*, a painter, < *qalam*, a pen, pencil, + *-kār*, denoting an agent.] Color-decoration of certain special kinds in Indian countries; specifically, a chintz of which the pattern is produced by many separate dyeings, the ground being covered in places by repellent preparations, and also by printing from small blocks.

kalan (kā'lan), *n.* The sea-otter. See cut under *Enhydris*.

An adult *kalan* is an animal not much larger than a mature and well-conditioned beaver. . . . It will measure from the tip of its tail, which is short, to the extremity of the muzzle, 3½ to 4½ feet, the tail not being over 6 to 8 inches long, and it has a proportionate girth of a little over 2 feet.
Fisheries of U. S., V. ii. 487.

Kalanchoe (kal-an-kō'ē), *n.* [NL. (Adanson, 1763), from the Chinese name of the plant.] 1. A genus of tropical herbs or shrubs belonging to the *Crassulaceæ*, or orpine family, differing from most other plants of the family by having the calyx 4-parted. The leaves are opposite and fleshy, and the flowers are large, white, yellow, or purplish, and disposed in many-flowered paniculate cymes. There are about 55 species, one of which is a native of Brazil, all the rest occurring in tropical and southern Africa and Asia. *K. crenata* of Sierra Leone is a succulent shrub cultivated in greenhouses, and is called *scalloped kalanchoe*. Sometimes erroneously written *Calanchoe*.

2. [*l. c.*] A plant of this genus.

Kalands (kal'andz), *n. pl.* [Probably from L. *Kalendæ*, the first day of the month.] A religious brotherhood which originated in northern Germany in the thirteenth century, and extended to France and other countries. Its objects were the establishment of solemn burial rites, common religious exercises, and mutual support. The meetings occurred on the first of each month, and terminated with a feast; these feasts gradually degenerated into excesses, and the fraternity was abolished. Also called *Calender brothers*.

kalathos (kal'ą-thos), *n.* [< Gr. *κάλαθος*.] Same as *calathus*, 1.

kaldt, *a.* A Middle English form of *cold*.

kale, kail[1] (kāl), *n.* [Formerly also *keal;* a ★dial. var. of *cole*[2].] 1. In Scotland, loosely, cabbage in general, and by extension any kind of greens; a variety of *Brassica oleracea*, a kind of cabbage with curled or wrinkled leaves not forming compact heads like the common cabbage, nor yielding a fleshy edible inflorescence like the cauliflower and broccoli, and usually having a long stalk; borecole.

The first ceremony of Halloween is pulling each a stock or plant of *kail*. *Burns*, Halloween, note.

2. A broth made in Scotland in which kale or cabbage is a principal ingredient; hence, any

soup, no matter of what composed, and, by a further extension, dinner: as, will you come and tak' your *kale* wi' me? [Scotch.]

> But there is neither bread nor *kale*,
> To fend my men and me.
> *Battle of Otterbourne* (Child's Ballads, VII. 21).

When he brings in the messe with *Keale*, Beef, and Brewesse, what stomack in England could forbeare to call for flanks and briskets?
Milton, Apology for Smectymnuus.

But hear ye, neighbour, . . . I will be back here to my *kail* against ane o'clock. *Scott*, Black Dwarf, i.

Corn-kale, *Brassica arvensis*, the charlock or wild mustard: so called from its growing in fields of grain. Also *field-kale*.—**Indian kale**, *Baursea grandifolia* (*Caladium grandifolium*). The rootstocks contain a large quantity of starch, which is used by the natives, after boiling to extract the noxious properties.—**Kale through the reek**, bitter language or treatment: in allusion to the unpalatableness of smoky broth. [Scotch slang.]—**Sea-kale**, a cruciferous plant, *Crambe maritima*, found wild on the western shores of Europe and on the Black Sea. It has broad, wavy-toothed leaves, which are gray-colored, and, like the stem, glaucous. For two centuries it has been cultivated for its young shoots, which make a pleasant and wholesome dish.—**Wild kale.** (*a*) *Brassica arvensis*, or charlock. (*b*) *Brassica oleracea*, the cabbage-plant, in its wild state.

kale-bell (kāl′ bel), *n.* The dinner-bell. [Scotch.]

> But hark, the *kail-bell* rings, and I
> Maun gae link aff the pot.
> *Watty and Madge* (Herd's Collection, II. 109).

kale-blade (kāl′ blād), *n.* A cabbage-leaf. [Scotch.]

> Your hose sall be the brade *kail-blade*,
> That is baith brade and lang.
> *The Gardener* (Child's Ballads, IV. 92).

kale-brose (kāl′brōz), *n.* A pottage made of meal and the skimmings of broth.

Ane wadna hae thought that gude meal was sae scant amang them, when the queau threw sae muckle gude *kail-brose* scalding hot about my lugs.
Scott, Old Mortality, xxviii.

kaleege, kalij (ka-lēj′, kä-lēj′), *n.* [Hindi *kālij*.] A pheasant of the genus *Euplocamus* and that section called *Gallophasis*, related to the silver-pheasants and firebacks. There are several species, such as *E. albocristatus*, *E. melanotus*, and *E. horsfieldi*, inhabiting the upper parts of India from the foothills to an elevation of 8,000 feet. They are noted for their pugnacity, and for making a drumming noise, but in general habits resemble other pheasants of the same genus. Also spelled *kalij* and *calidge*.

kaleidograph (ka-lī′dō-gräf), *n.* [Irreg. < Gr. *καλός*, beautiful, + *εἶδος*, form, + *γράφειν*, write.] An apparatus for throwing on a screen or on a glass disk the colored patterns produced by a kaleidoscope.

kaleidophone, kaleidophon (ka-lī′dō-fōn, -fon), *n.* [Irreg. < Gr. *καλός*, beautiful, + *εἶδος*, form, + *φωνή*, sound.] An instrument invented by Sir Charles Wheatstone for exhibiting the vibrations of an elastic plate or rod, in order to illustrate the phenomena of sound-waves. A polished knob, reflecting a point of light, is attached to the vibrating plate or rod, and in its vibrations produces (by virtue of the persistence of visual impressions) a variety of visible curves. Also written *caleidophone*.

kaleidoscope (ka-lī′dō-skōp), *n.* [F. *kaleidoscope* (< E.); irreg. < Gr. *καλός*, beautiful, + *εἶδος*, form, + *σκοπεῖν*, view.] An optical instrument creating and exhibiting, by reflection, a variety of beautiful colors and symmetrical forms. In its simplest form the instrument consists of a tube containing two reflecting surfaces inclined toward each other at any angle which is an aliquot part of 360°. A clear eye-glass is placed immediately against one end of the mirrors and a similar glass at their other end; the tube is continued a little beyond this second glass, and its termination is closed by a disk of ground glass. In the cell thus formed are placed beads, pieces of colored glass, or other small, bright-colored, diaphanous objects, and the changing of their positions by rotating the tube produces, by the repeated reflection in the mirrors, different symmetrical figures. The polyangular kaleidoscope multiplies the effect by having three or four mirrors; a larger number destroys the symmetry of combination. Besides the use of the kaleidoscope as a toy, it serves the practical purpose of furnishing an endless variety of patterns for decorative work. Sir David Brewster invented the instrument about 1815, although the idea of it had been vaguely suggested before. He also made it applicable to distant objects by replacing the object-box at the outer end with a double-convex lens, controlled by an adjusting-screw.—**Jewel kaleidoscope**, an enlarged and superior form of kaleidoscope mounted on a stand, with a wheel to regulate its adjustment: so called because furnished with very richly colored pieces of glass.

kaleidoscopic (ka-lī-dō-skop′ik), *a.* [< *kaleidoscope* + *-ic*.] Relating to the kaleidoscope; varying or variegated like the forms and colors in a kaleidoscope: as, *kaleidoscopic* views; *kaleidoscopic* combinations of color.

Her generation certainly would have lost one of its representative and original creations: representative in a versatile, *kaleidoscopic* presentment of modern life and issues. *Stedman*, Vict. Poets, p. 141.

American Laurel (*Kalmia latifolia*).
a, flower; *b*, same, cut longitudinally, showing the position of the stamens before fertilization, and the pistil; *c*, same, after fertilization; *d*, fruit.

corolla and ten hypogynous stamens with elongated filaments. The anthers have the peculiarity (though free in the early bud) of becoming embedded in specialized pits or pockets of the corolla as it expands, the filaments bending over and acquiring tension, and finally straightening elastically, withdrawing the anthers suddenly, and projecting the pollen to some distance over adjacent flowers. The plants are for the most part handsome evergreen shrubs with shining leaves and showy flowers in corymbs. There are 7 species, one of which grows in the West Indies, and one extends to the Rocky Mountains and California, the remainder being confined to eastern North America. *K. latifolia*, the American laurel, also called *calico-bush* from the color of its flowers, is one of the most wide-spread and beautiful of American shrubs, and was proposed by Darlington as the national emblem. It is a large shrub, often from 10 to 20 feet in height, with ample shining leaves and a profusion of very showy flowers varying from nearly white to deep pink. The stems are crooked and straggling, the bark brown and scaly, and the wood very hard and useful for various purposes. *K. angustifolia*, the sheep-laurel, lambkill, or wicky, is a smaller shrub with bright crimson or rose-colored flowers, common in New England, and ranging from Hudson's Bay to Georgia. It is believed to poison sheep when the deep snows of winter drive them to the extremity of eating it. *K. glauca*, the pale laurel, prefers cold peat-bogs, and is the only species that ranges across the continent. It is a low straggling bush, with the leaves whitened underneath, and lilac-purple flowers.

Kalmuck, Calmuck (kal′muk), *n.* [Also *Calmuc*; = F. *Kalmouk* = G. *Kalmucke*, < Russ. *Kalmuikŭ*.] 1. kangan, *n.* See *cangan*.

kangaroo (kang-ga-rö'), *n.* [Orig. *kanguroo*, > ★F. *kanguroo:* a native Australian name.] **1.** A large marsupial mammal of Australia, *Macropus giganteus;* by extension, any herbivorous and saltatorial marsupial of the family *Macropodidæ* (which see for technical characters). The great kangaroo, the first Australian species of this large family to be scientifically described and named, was discovered by Cook in 1770. The male stands 6 or 7 feet high; the female is a third smaller. The hinder parts of the animal enormously preponderate over the fore parts; the thighs and tail are very muscular, the lower leg and the tail very long. The second and third digits are much reduced, the weight of the body falling chiefly on the fourth and fifth. The fore limbs are very small, used chiefly for prehension, and not in locomotion; during the flying leaps the animal makes, said to be from 10 to 20 and even 30 feet in extent, they are closely clasped to the breast. The head and neck are slender, the ears high. The general color is yellowish brown, darker above and paler below. The front teeth are fitted for nipping herbage; the stomach is long and sacculated; and there is a large cæcum. In their whole structure and economy the kangaroos represent ruminants in the Australian, Austro-Malayan, and Papuan regions. They are gregarious, inoffensive, and timid, but when brought to bay prove formidable antagonists, using the claws of the hind feet with great effect. They are killed by being closed in upon and

knocked down with clubs, or driven into ambush and shot like deer. There are many species, 29 of the genus *Macropus*, 6 of *Petrogale*, and 3 of the genus *Onychogalea*, in which the tail ends in a kind of nail. They inhabit not only Australia and Tasmania, but New Guinea, New Ireland, the Aru Islands, and other islands. A large number of smaller species with naked muzzle, called *brush-kangaroos, pademelons, whallabees*, etc., constitute the subgenus *Halmaturus*. The rock-kangaroos form the genus *Petrogale*. Hare-kangaroos or kangaroo-hares belong to the genus *Lagorchestes*. (See cut under *hare-kangaroo*.) A peculiar type of kangaroo, inhabiting New Guinea and Misol, is the genus *Dorcopsis*. (See cut under *Dorcopsis*.) Kangaroo-rats, potoroos, or bettongs are small animals constituting the subfamily *Hypsiprymninæ*.

Giant Kangaroo (*Macropus giganteus*).

This animal is called by the natives *kanguroo*.
Cook's Voyages, quoted in N. and Q., 6th ser., VI. 58.

She might have said that it was not convenient to come in and find a tame *kangaroo*, as big as a small donkey, lying on his side on the hearth-rug.
H. Kingsley, Hillyars and Burtons, xxi.

2†. A kind of chair. *Davies.*

It was neither a lounger, nor a dormeuse, nor a Cooper, nor a Nelson, nor a *kangaroo:* a chair without a name would never do; in all things fashionable the name is more than half. Such a happy name as *kangaroo* Lady Cecilia despaired of finding.
Miss Edgeworth, Helen (1834?), xvi.

kangaroo-apple (kang-gạ-rö′ap′l), *n.* **1.** The yellow, egg-shaped berry of *Solanum aviculare*, which is edible when fully ripe. It is a native of Australia and New Zealand.—**2.** The plant which yields this fruit. It is a plant with shrubby stems 6 or 8 feet high, long and narrow or pinnatifid leaves, and cymes in the axils or on the branches.

kangaroo-dog (kang-gạ-rö′ dog or -dôg), *n.* Same as *kangaroo-hound*.

kangaroo-foot plant (kang-gạ-rö′fůt plant). An Australian plant, *Anigozanthos Manglesii*, of the family *Amaryllidaceæ*. The perianth, 3 inches long, is 6-cleft and split nearly to the base on the under side. As in the other members of the genus, the exterior of the perianth, as also the inflorescence, and to some extent the stem, is clothed with plumose wool, which in this plant is very dense and bright-green, except at the base of the flower, where it is crimson.

kangaroo-grape (kang-gạ-rö′grāp), *n.* Same ★as *kangaroo-vine*.

kangaroo-grass (kang-gạ-rö′grȧs), *n.* The Australasian grass *Themeda triandra* (*Anthistiria vulgaris* of Hackel), also diffused through southern Asia and the whole of Africa. It is a perennial leafy-stemmed grass, 2 or 3 feet high, with long, bent awns; it is highly esteemed for the nutritious fodder it yields.

kangaroo-hare (kang-gạ-rö′hãr), *n.* Same as *hare-kangaroo*.

kangaroo-hound (kang-gạ-rö′hound), *n.* A kind of deer-hound or greyhound used in hunting kangaroos in Australia. Also *kangaroo-dog*.

kangaroo-mouse (kang-gạ-rö′mous), *n.* An American rodent mammal of the family *Heteromyidæ* and genus *Perognathus;* a pocket-mouse. The kangaroo-mice are closely related to the species of *Dipodomys* (see *kangaroo-rat*, 2), but are smaller. They inhabit the same parts of the United States.

kangaroo-rat (kang-gạ-rö′rat), *n.* **1.** An Australian marsupial of the family *Macropodidæ*, subfamily *Potoroinæ* or *Hypsiprymninæ*, and genus *Potorous* (or *Hypsiprymnus*), *Æpiprymnus*, or *Bettongia;* a bettong; ■ potoroo.—**2.** An American rodent of the family *Heteromyidæ* and subfamily *Dipodomyinæ*, as *Dipodomys phillipsi* or *D. ordi*. They resemble jerboas rather than kangaroos, and are common in the southwestern parts of the United States and Mexico. See *Dipodomys*.

Kangaroo-rat (*Potorous tridactylus*).

kangaroo-thorn (kang-gạ-rö′thôrn), *n.* A spiny shrub, *Acacia armata*, of extratropical Australia. It is grown there for hedges, and is valuable for fixing coast-sands.

kangaroo-vine (kang-gạ-rö′vīn), *n.* An Australian climbing plant, *Cissus Baudiniana*. Also *kangaroo-grape*.

kangy, *a.* Another spelling of *cangy*.

kankar (kang′kär), *n.* [Hind. *kankar*, limestone, stone, gravel, any small fragments of rock, whether rounded or not.] In India, an impure concretionary carbonate of lime, usually occurring in nodules, in alluvial deposits, and especially in the older of these formations. It is an important rock in India, especially in the valley of the Lower Ganges, where it is much used as a building-stone in the absence of anything better. Also written *kunkur*.

The commonest and also the most useful stone of India is *kankar*, a nodular form of impure lime, which is found in almost every river valley, and is used from one end of the peninsula to the other for metalling the roads.
W. W. Hunter, Indian Empire, p. 493.

kanker†, *n.* A Middle English spelling of *canker*.

kankerdort†, *n.* A variant of *canker-dort*.

kanna (kan′ạ̈), *n.* [Sw., = E. *can*[2].] The principal Swedish unit of capacity, equal to 100 cubic inches, Swedish measure, or 2.615 liters = 2.764 United States quarts = 2.302 imperial quarts. The Swedish system was abolished from 1889.

kans (kanz), *n.* [E. Ind.] A grass, *Saccharum spontaneum*, allied to the sugar-cane, very common in India. It grows from ■ to 15 feet high, and is rendered very showy by the large amount of silvery-white wool which surrounds the base of the flowers. It may be used for fodder, thatching, twine, etc., but is proving a noxious weed, extremely difficult to eradicate.

Kansas-Nebraska Bill. See *bill*[3].

kant†, *a.* An obsolete form of *cant*[5].

kantar, *n.* See *cantar*.

kantele, *n.* [Finn.] A five-stringed harp or dulcimer used by the Finns. Also *kandele*.

kanten (kan′ten), *n.* [Jap.] A kind of gelose or gelatin, sometimes called *Japanese isinglass*, prepared in Japan from several species of seaweed, particularly from the cartilaginous *Florideæ*, and used for soups, as well as in the trades, as, for example, in dressing woven goods. It is usually sold in irregular prismatic sticks, resembling glue.

kantharos (kan′thạ-ros), *n.* [< Gr. *κάνθαρος*: see *cantharus*.] Same as *cantharus*, 1.

Kantian (kan′ti-ạn), *a.* and *n.* [< *Kant* (see def.) + *-ian*.] **I.** *a.* Of or belonging to Immanuel Kant, the great German philosopher (1724–1804), or to his system of philosophy.

The ultimate decision . . . as to the truth of the *Kantian* Criticism of Pure Reason must turn upon the opposition of perception and conception, as factors which reciprocally imply, and yet exclude, each other.
E. Caird, Philos. of Kant, p. 666.

II. *n.* A follower of Kant; a Kantist.

Kantianism (kan′ti-ạn-izm), *n.* [< G. *Kantianismus;* but *Kantism* is a product of a more recent fashion in word-formation.] The doctrine of the German philosopher Immanuel Kant (1724–1804), one of the most influential of metaphysicians. His leading work, published in 1781 (second edition in 1787), is the "Kritik der reinen Vernunft," or "Critic of the Pure Reason" (the word *critic*, borrowed from Locke, being the name of a science analogous to logic). His fundamental position is that just as blue and red are said to be "imputed" qualities, which do not exist in the outward things themselves, but are only the modes in which these things affect the eye, so every attribute is merely a mode in which the mind is affected, and has no application to a thing in itself. This is true even of such predicates as existence and possibility, and equally so of non-existence and impossibility. In short, a thing in itself is absolutely unthinkable. But just as it is quite true that one thing is blue and another red, in the sense of really so affecting the eye, so Kant does not attack the real externality of matters of fact, but only that of the forms under which alone they can be apprehended by us. The ideas which the mind thus imports into knowledge are of two kinds—those which are presented in sensation, and those which are introduced in the process of thinking. The first kind, that of the forms of intuition, consists of the ideas of space and time. Space is the form under which alone we can have external perceptions. Time is that in which all our inward experience must clothe itself, and thus our outward sensations, too, when they come to be reproduced in reflection. Thought, on the other hand, is obliged to assume the forms of propositions, and thus arise twelve general conceptions (categories). For as a proposition is either universal, particular, or singular, so the object of thought must have quantity; as propositions are either affirmative, negative, or infinitated, so the object of thought must have degree of reality; as propositions are either categorical, hypothetical, or disjunctive, so the object of thought must be either a substance with attributes inhering in it, or a cause with its effect, or mutually reacting elements; and, finally, as a proposition is either contingent, necessary, or problematical, so the object of thought must possess corresponding modes of being. In attributing an unchangeable character to these conceptions, Kant is profoundly hostile to the spirit of empiricism; but in limiting human knowledge strictly to objects of possible experience, he seemed to strike a severe blow to metaphysics. Religious ideas are, however, to be admitted as regulative principles. Kant is a severe moralist, his rule being "Act so that the maxim of thy will can likewise be valid as a principle of universal legislation."

kantikoy, canticoy (kan′ti-koi), *n.* [Also *cantico, cantica, kantickie*, as a verb *kintekaye*, etc.: < Delaware *gintkaan*, to dance.] **1.** A dance, especially a religious dance, among American Indians.—**2.** An entertainment with dancing; a dancing-match. [U. S.]

Through every day of the season half the population of the entire village go and come to the summit of the bluff which overhangs it, where they peer down for hours at a time upon the methods and evolutions of the *kantickie* below, the seals themselves looking up with intelligent appreciation of the fact that, though they were in the hands of man, yet he is wise enough not to disturb them there as they rest.
Fisheries of U. S., V. ii. 337.

kantikoy, canticoy (kan′ti-koi), *v. i.* [Also *cantico*, etc., in the earliest form *kintekaye;* from the noun.] To dance as an act of worship, or in festivity: said of American Indians.

The first of these Indians, having received a horrible wound, . . . wished them to let him *kinte kaeye*—being a dance performed by them as a religious rite, etc.
Broad Advice (1649), 2 N. Y. Hist. Coll., II. 258.

These Indians had *canticoyed* (*gekintekayt*) there to-day—that is, conjured the devil, and liberated a woman among them who was possessed by him, as they said.
Dankers, Voyage to N. Y. (1679), p. 275.

Kantism (kan′tizm), *n.* [< *Kant* (see *Kantianism*) + *-ism*.] Same as *Kantianism*.

Kantist (kan′tist), *n.* [< *Kant* (see *Kantianism*) + *-ist*.] A disciple or follower of Kant.

kantjil, *n.* See *kanchil*.

kantry (kan′tri), *n.* Same as *cantred*.

Kanuck, *n.* and *a.* See *Canuck*.

kanun (ka-nön′), *n.* [Turk.] A kind of dulcimer or zither, used in Turkey. Also written *canoon*.

kaoliang (kou′li-ang), *n.* [Chin.; < *kao*, tall, + *liang*, millet.] Tall millet; the name in China of *Sorghum vulgare* or Indian millet.

kaolin (kā′ō-lin), *n.* [< Chin. *kaoling*, 'high ridge,' the name of a hill in China where it is found.] A fine variety of clay, resulting from the decomposition of feldspar. It is a hydrated silicate of aluminium. When pure it is perfectly white, and forms compact, friable, or mealy masses, made up of scale-like crystals. It is soft and unctuous to the touch. Kaolin forms one of the two ingredients in Oriental porcelain; the other, called in China *petuntze*, is a quartzose feldspathic rock. Kaolin occurs in China, Japan, Saxony, Cornwall, near Limoges in France, and at several localities in the United States; that from Limoges is used for the famous Sèvres porcelain. In mineralogy called *kaolinite*.—**Kaolin porcelain,** a name sometimes given to true or hard porcelain, such as that of the Oriental nations and of Sèvres and other factories of the continent of Europe.

kaolinic (kā-ō-lin′ik), *a.* [< *kaolin* + *-ic*.] Pertaining to or of the nature of kaolin: as, *kaolinic* substances. *Encyc. Brit.*, XIX. 624.

kaolinite (kā′ō-lin-īt), *n.* [< *kaolin* + *-ite*[2].] Kaolin in its crystalline form.

kaolinization (kā-ō-lin-i-zā′shọn), *n.* [< *kaolinize* + *-ation*.] The process by which certain minerals, particularly common feldspar, have been altered into kaolin.

Though occasionally clear and fresh, the felspar has often suffered from *kaolinization*. *Geol. Jour.*, XLIV. 552.

kaolinize (kā′ō-lin-īz), *v. t.*; pret. and pp. *kaolinized*, ppr. *kaolinizing*. [< *kaolin* + *-ize*.] To convert into kaolin: as, *kaolinized* feldspar.

The original crystals . . . have been much cracked, and sometimes even partially *kaolinized*.
Philosophical Mag., XXVII. 279.

kapet†, *n.* An obsolete form of *cape*[1].

kapelle (kä-pel′e), *n.* [G.: see *chapel*.] In Germany, a musical establishment consisting of a band or orchestra, with or without a choir, under the direction and training of a kapellmeister. In the eighteenth century such establishments were maintained at most of the German courts and by many ★of the nobility.

kapellmeister, capellmeister (kä-pel′mīs″tėr), *n.* [G., < *kapelle, capelle*, chapel, chapel-choir, orchestra, + *meister* = E. *master*.] **1.** The leader or conductor of a kapelle, or of any large musical establishment, involving, at least in central Europe, extensive duties of composition, training, accompaniment, and conducting.—**2.** The conductor of any band or orchestra.
Sometimes translated *chapel-master*.

kaph, *n.* See *caph*.

kaphar, *n.* See *caphar*.

kapitia (ka-pi-tē′yä), *n.* [E. Ind.] A resin derived from a Ceylonese tree, *Croton lacciferus*. Also *keppitiya*.

kapnographic (kap-nō-graf′ik), *a.* [< *kapnography* + *-ic*.] Of or pertaining to kapnography; executed by kapnography.

kapnography (kap-nog′ra-fi), *n.* [< Gr. *καπνός*, smoke, + *-γραφία*, < *γράφειν*, write.] Drawing by means of smoke; especially, the art of producing decorative designs, pictures, etc., with a point more or less fine, in a coating of carbon deposited from a flame. Successive coats of the lampblack are allowed to form, and the drawing may in this way be made to give subtle gradations of tint, as well as white or light lines drawn on the dark background. The work is fixed finally by the use of some varnish or other fixative.

kapnomor, *n.* See *capnomor*.

kapok (kā′pok), *n.* [Malay *kāpoq*.] Silky down investing the seeds of *Ceiba pentandra*, a species of silk-cotton tree botanically related to the cotton-plants, found in the East Indies, tropical America, and Africa. Like the floss of some allied trees, it is used for stuffing pillows, cushions, etc. It has become a considerable article of export from Ceylon.

kappa (kap′ä), *n.* The Greek letter *κ*: represented in English by *k*, and sometimes by *c*.

kappland (Sw. pron. käp′länt), *n.* A Swedish land-measure, equal to 437½ Swedish square ells, or 6.1 English square rods.

Karaism (kā′ra-izm), *n.* [< *Kara(ite)* + *-ism*.] The doctrines or tenets of the Karaites.

Karaite (kā′ra-īt), *n.* [Heb. *karaīm*, readers, scripturists (< *kara*, read), + *-ite*².] A member of a Jewish sect which adheres to Scripture as contrasted with oral tradition, and consequently denies the binding authority of the Talmud. The Karaites originated in Bagdad at least as early as the middle of the eighth century, and are now scattered in Turkey and elsewhere, their chief seat being in the Crimea. They are distinguished for morality and honesty, and have considerable literature. Also spelled *Caraite*.

karamani-resin (kar-a-man′i-rez″in), *n.* A resin obtained in British Guiana from a guttiferous tree, *Symphonia globulifera*. See *hog-gum tree*, under *hog-gum*.

karat, *n.* See *carat*.

karatas (ka-rā′tas), *n.* [Carib.] **1.** *Karatas Karatas* (*Bromelia Karatas*), a plant allied to the pineapple, native in South America and the West Indies. It is one of the fiber-yielding species of *Karatas*, and is sometimes called *silk-grass*. — **2.** [*cap.*] A genus of monocotyledonous plants of the family *Bromeliaceæ*, closely related to *Bromelia*, from which it differs chiefly in having the flowers in dense, sessile, terminal heads among the upper leaves. The genus is now restricted to two or three West Indian species, the more numerous Brazilian species formerly referred to it being placed in the genus *Nidularium*. They are low terrestrial plants with the habit of the pineapple, the leaves spiny-margined, often very long, and collected in a rosette at the base, the flowers in heads subtended by the upper cauline leaves. The principal species, *K. Karatas* (*Bromelia Karatas*), is the karatas or Jamaica silk-grass, and yields a valuable fiber.

karat-seed (kar′at-sēd), *n.* See *karat-tree*.

karatto, *n.* Same as *keratto*.

karat-tree (kar′at-trē), *n.* An Abyssinian leguminous tree, *Erythrina Abyssinica*, whose small equal seeds share with those of the carob the repute of being the original of the carat-weight.

karchesion (kär-kē′si-on), *n.*; pl. *karchesia* (-ä). [< Gr. *καρχήσιον*: see *carchesium*.] In *Gr. archæol.*, same as *carchesium*, 1.

karect†, *n.* Same as *charact*.

karelinite (kar′e-lin-īt), *n.* [After M. *Karelin*, the discoverer.] A rare oxysulphid of bismuth, occurring in crystalline masses of a lead-gray color. It is found in the Altai.

karengia (ka-ren′ji-ä), *n.* [African.] A grass of central Africa, *Pennisetum spicatum*, closely allied to the millet, the seed of which is largely used as food by the natives of the southern borders of the Sahara.

kareynet, *n.* An obsolete form of *carrion*.

kargas (kär′gas), *n.* [E. Ind.] A dagger with a curved blade, used in northern India; a sacrificial knife.

karinghota (kar-ing-gō′tä), *n.* [Malay.] A small tree, *Samadera Indica*, of the *Simaroubaceæ*, found in Hindustan and Ceylon. Its bark yields a tonic and febrifuge, and its seed an oil used for rheumatism. Its wood is light, but durable.

karite (kar′i-te), *n.* [Sudanese.] A sapotaceous tree, *Butyrospermum Parkii*, abounding in central Africa. Its seeds, when treated, yield a butter-like substance, which is used by the natives as food, and is now, under the name of *shea-butter*, imported into Europe in considerable quantities for the manufacture of soap. Recent investigations indicate that the coagulated gum of this tree is nearly identical in its properties with gutta-percha.

karkanet†, *n.* An obsolete form of *carcanet*.

karl, *n.* See *carl*.

Karlovingian (kär-lō-vin′ji-an), *a.* and *n.* Same as *Carolingian*.

karma (kär′ma), *n.* [Skt. *karman*, nom. *karma*, action, √ *kr* or *kar*, make, do.] Action or acts: an important term in Buddhist philosophy. Gautama denied the existence of any soul as distinct from material organization and so could not hold the ordinary Hindu theory of transmigration; but he still held that evil must proceed from antecedent evil and that the resulting penalty must be borne in succeeding existences. Hence he, or his disciples, declared that every being is composed of five constituent elements called *skandhas* (in Pali, *khandha*), which have their source in *upadana*, 'clinging to existence': viz. (1) form or organized body; (2) sensations; (3) perceptions; (4) combinations of properties or faculties, 52 in number and forming individual character; and (5) consciousness or thought-faculty, the most important; and that, when one dies, these five constituents of one's being are dissolved, but by the force resulting from his actions (*karma*), combined with upadana, give rise to a new set of five, of which consciousness is still the dominant faculty. Each personality is connected with the previous only by the force of acts done in previous existence. No true Buddhist believes in the passing of a soul from one body to another, but rather in the passing-on of act-force. This act-force (*karma*) is the connecting link between past, present, and future bodies.

Karmathian (kär-mā′thi-an), *n.* [So named from *Karmat*, the principal apostle of the sect, a poor laborer, who professed to be a prophet.] One of a Mohammedan sect which arose in Turkey about the end of the ninth century. The Karmathians regarded the Koran as an allegorical book, rejected all revelation, fasting, and prayer, and were communistic, even in the matter of wives. They carried on wars against the califate particularly in the tenth century, but soon after disappeared. According to some accounts the Druses developed from them.

As to the special tenets professed by the *Karmathians*, they were, in their ultimate expression, pantheistic in theory and socialistic in practice. *Encyc. Brit.*, II. 259.

karmic (kär′mik), *a.* [< *karma* + *-ic*.] **1.** Of or pertaining to the doctrine of karma: as, *karmic* laws or principles. — **2.** Affected or determined by karma: as, the *karmic* consequences of an action.

Thus, on a careful examination of the matter, the *Karmic* law . . . will be seen not only to reconcile itself to the sense of justice, but to constitute the only imaginable method of natural action that would do this.
A. P. Sinnett, Esoteric Buddhism, xi.

karn (kärn), *n.* [Corn. *karn*: see *cairn*.] In *Corn. mining*, a pile or heap of rocks; sometimes, the solid rock.

karob (kar′ob), *n.* [Cf. *carob*.] Among goldsmiths, the twenty-fourth part of a grain. Compare *carat*.

karoo, karroo (ka-rö′), *n.* [Said to be from Hottentot *karusa*, hard, with ref. to the hardness of the soil under drought.] In *phys. geog.*, the name given to immense barren tracts of clayey table-land in South Africa, which often rise terrace-like to the height of 2,000 feet above the sea-level. It is only the want of water which prevents them from being highly productive. In the wet season they are covered with grasses and flowers, but on the return of the dry season they become hard and steppe-like. — **Karoo series**, in *geol.*, an important group of rocks in South Africa, consisting largely of sandstone, with much volcanic matter intercalated and overlying. The geological age of this group has been the object of much study, and it is generally believed to represent both the Permian and Triassic. The fossils of the middle and upper divisions of the Karoo are remarkable, including labyrinthodonts, dinosaurs, theriodonts, etc. The formation is also of importance, because in association with this rock are found the diamonds for which South Africa is famous. These occur in a peculiar much-altered volcanic tuff which has come up from below through chimney-like orifices, an entirely unique mode of occurrence for this gem.

kaross (ka-ros′), *n.* [S. Afr. *karos*, poss. a corr. of *D. kuras*.] A garment of fur worn by the natives of South Africa. Also spelled *carosse*.

karpt, *v.* An obsolete form of *carp*¹.

karpholite (kär′fō-līt), *n.* See *carpholite*.

karphosiderite (kär-fō-sid′e-rīt), *n.* See *carphosiderite*.

karrawant, *n.* An obsolete spelling of *caravan*.

From thence by *karrawans* to Coptos.
Sterne, Tristram Shandy, v. 12.

karroo, *n.* See *karoo*.

karrowt, *n.* See *carrow*¹.

karst, karset, *n.* Obsolete variants of *cress*.

karstenite (kärs′ten-īt), *n.* [Named from D. L. G. *Karsten* (1768–1810), a mineralogist.] Same as *anhydrite*.

karvet, *v.* An obsolete spelling of *carve*¹.

karvelt, *n.* An obsolete form of *caravel*.

karynt, karynet, *n.* Same as *carene*¹.

karyokinesis (kar″i-ō-ki-nē′sis), *n.* [NL., < Gr. *κάρυον*, a nut (nucleus), + *κίνησις*, movement, change, revolution.] In *biology*, the series of active changes which take place in the nucleus of a living cell in the process of division. Also written *caryocinesis*.

karyokinetic (kar″i-ō-ki-net′ik), *a.* [< *karyokinesis*, after *kinetic*.] Characterized by or exhibiting or resulting from karyokinesis. Also *caryocinetic*.

The latter [the endodermal nuclei] are characterised by their angular shape, and by never presenting the *karyokinetic* figures characteristic of the ectodermal nuclei.
A. Sedgwick, Proc. Royal Soc., XXXIX. 243.

karyolysis (kar-i-ol′i-sis), *n.* [NL., < Gr. *κάρυον*, a nut, + *λύσις*, dissolution, < *λύειν*, loose, dissolve.] Same as *karyomitosis*.

karyolytic (kar″i-ō-lit′ik), *a.* [< *karyolysis* (*-lyt-*) + *-ic*.] Same as *karyomitoic*.

Radiating lines of granules making up the so-called *karyolytic* figure. *Ziegler*, Path. Anat. (trans.), i. § 75.

karyomitoic (kar″i-ō-mi-tō′ik), *a.* [< *karyomito(sis)* + *-ic*.] Pertaining to, exhibiting, or resulting from karyomitosis. Also *karyomitotic*.

Abundant evidence of the occurrence of *karyomitoic* figures in [columnar epithelium-cells].
Proc. Royal Soc., XXXVIII. 91.

karyomitosis (kar″i-ō-mi-tō′sis), *n.*; pl. *karyomitoses* (-sēz). [NL., < Gr. *κάρυον*, a nut, + NL. *mitosis*.] In *biol.*, the splitting of the chromatin fibers of a nucleus; also, a figure resulting from such splitting; karyokinesis.

The cells of lymphoid tissue multiply abundantly by *karyomitosis*. *Proc. Royal Soc.*, XXXVIII. 91.

karyoplasm (kar′i-ō-plazm), *n.* [< Gr. *κάρυον*, a nut, kernel, + *πλάσμα*, anything formed.] The substance of which the more definitely formed portions of the nucleus of a cell, including the nuclear wall, the nucleoli, and the intranucleolar network, are composed. The remaining substance of the cell is called the *nuclear matrix* or *nuclear fluid*. Also called *nucleoplasm*.

Kashmirian (kash-mir′i-an), *a.* See *Cashmerian*.

kasintu (ka-sin′tö), *n.* [E. Ind.] The common red jungle-fowl of India, *Gallus bankivus*. See *Gallus*¹.

kassu (kas′ö), *n.* [Var. of *catechu*.] A kind of catechu made from the fruit of the betelnut-palm, *Areca Cathecu*, serving in India the same purposes as the true catechu. Also *kossa*.

kassydony†, *n.* See *cassidony, chalcedony*.

kastrilt, *n.* An obsolete spelling of *kestrel*.

kat (kat), *n.* The principal ancient Egyptian unit of weight, equal almost to one fiftieth of a pound avoirdupois, according to several well-preserved standards. Also *ket*.

kata-. A form of *cata-*, in closer following of the Greek.

katabolic, *a.* See *catabolic*.

katabolism, *n.* See *catabolism*.

katakana (kat-a-kä′nä), *n.* [Jap., < *kata*, side, + *kana*, q. v.] One of the two styles of writing the syllabary of 48 letters in use among the Japanese, the other being *hiragana*. The katakana letters are said to have been invented by Kibi Daishi, about the middle of the eighth century, are formed of a part — one side — of square Chinese characters used phonetically, and are confined almost exclusively to the writing of proper names and foreign words. In katakana there is but one form for each letter, whereas in hiragana many of the letters may be written in a variety of ways.

katalysis, *n.* See *catalysis*.

Kataphrygian, *n.* See *Cataphrygian*.

katastate, *n.* See *catastate*.

katatonia (kat-a-tō′ni-ä), *n.* [NL., < Gr. *κατά*, down, + *τόνος*, tone, tension: see *tone*.] A form of insanity characterized by periods of acute mania and melancholia, and by cataleptoid and epileptoid states. *Kahlbaum*.

katatoniac (kat-a-tō′ni-ak), *n.* [< *katatonia* + *-ac*.] One who is affected with katatonia.

Kiernan found four head injuries among 30 *katatoniacs*. *Alien. and Neurol.*, IX. 458.

katchung (ka-chung′), *n.* [Malay *katjang*.] The ground-nut. See *Arachis*.

katchup, *n.* See *catchup*.

katelectrotonus, *n.* See *catelectrotonus*.

kathenotheism (ka-then′ō-thē-izm), *n.* [< Gr. *κατά*, according to, + *εἷς* (*ἑν-*), one, + *θεός*, god, + *-ism*.] Same as *henotheism*.

kathetal, kathetometer, etc. See *cathetal*, etc.

kathodal, kathode, etc. See *cathodal*, etc.

kathodic (ka-thod′ik), *a.* [< Gr. *κατά*, against, + *ὁδός*, way.] In *bot.*, turned away from the direction in which the genetic spiral runs: said of that half of a leaf which has this characteristic. The opposite half is *anodic*. *Göbel*.

kation, *n.* See *cation*.

katipo (kat′i-pō), *n.* [Maori.] A venomous spider of the family *Theridiidæ*, the *Latrodectus katipo*, of a black color with a marked red spot, found in New Zealand usually among the rushes and sedges near the sea-shore. The bite of this spider is dangerous and sometimes fatal.

Broad-winged Katydid (*Cyrtophyllum concavum*).

katsup (kat′sup), *n.* Same as *catchup*.

kattimundoo (kat-i-mun′dö), *n.* See ★*cattimandoo*.

katydid (kā′tī-did), *n.* [So called in imitation of its peculiar note.] An orthopterous insect of the family *Locustidæ*, of large size, green color, and arboreal habits. Its note (which is imitated by its name) is produced by stridulation. The common katydid is *Cyrtophyllum* or *Platyphyllum concavum*. It is abundant in the central and eastern United States, where its shrilling call is one of the most familiar sounds of a summer night. The wing-covers are long, entirely covering the hind wings, and of a pretty pale-green color. By means of the long simitar-shaped ovipositor, the eggs are pushed into crevices in the soft bark and stems of plants. The round-winged katydids are several species of *Amblycorypha*, as *A. rotundifolia*, abundant in the northern United States and Canada. *Microcentrum retinervis* is the angular-winged katydid. Another katydid, of slender form, is *Phaneroptera curvicauda*.

> I love to hear thine earnest voice,
> Wherever thou art hid,
> Thou testy little dogmatist,
> Thou pretty *Katydid!*
> *O. W. Holmes*, To an Insect.

kauce†, *n.* A Middle English form of *causey*. See *causeway*.

kauila, kauwila (kou′i-lä), *n.* [Hawaiian.] One of two trees of the buckthorn family, *Alphitonia ponderosa* and *Colubrina oppositifolia*. The former is a tall tree useful to the inhabitants on account of its close-grained, hard, and heavy wood, which turns black in drying, and was formerly used for clubs, spears, the rafters of their sacred buildings, etc. The latter is a small branching tree of comparatively little importance.

kaun†, *n.* An obsolete form of *khan*[2].

kauri (kou′ri), *n.* [Maori.] Same as *kauri-pine*.

kauri-gum (kou′ri-gum), *n.* The resin which exudes from the thick bark of the kauri-pine. Masses weighing even 100 pounds are found in the soil where the trees have formerly grown. It is used in making varnish. Also *kauri-resin, cowdie-gum*.

kauri-pine (kou′ri-pīn), *n.* [Maori *kauri*.] A name of the coniferous tree *Dammara australis*, the finest forest-tree of New Zealand. It sometimes attains the height of 180 feet, and affords a remarkably durable, straight-grained timber, easily worked, and susceptible of a high polish. It is used for masts, decking, and other ship-building purposes, for houses, bridges, and railway-ties, for furniture, and for numerous other objects. The name *kauri* is sometimes extended to the other species of the genus. It appears variously spelled as *cowdi, cowdie, cowrie, kaurie, kawry, kowrie*, etc. See *kauri-gum*, and also *Dammara*.

kauri-resin (kou′ri-rez″in), *n.* Same as *kauri-gum*.

kausia, *n.* See *causia*.

kauwila, *n.* See *kauila*.

kava (kä′vä), *n.* [S. W. Polynesian.] 1. A Polynesian shrub, *Piper methysticum*, of the pepper family. It is an erect, knotted, soft-stemmed plant with dark-green heart-shaped leaves. Its root has aromatic and pungent qualities, and affords a narcotic drink. 2. A beverage derived from this plant. The native method of preparation is by chewing or rasping the root, adding water to the result, and straining, the last process being accompanied by ceremonial chanting. Also *cava, awa, kawa*, and *ava*.

kavass, *n.* See *cavass*.

kave, *v.* and *n.* See *cave*[2].

kavel, *n.* See *cavel*[1].

kaver, *n.* See *caver*[2].

kaw†, *v.* and *n.* See *caw*[1].

kawa, *n.* See *kava*.

kawa-kawa (kä′wä-kä′wä), *n.* An ornamental shrub of New Zealand, *Macropiper* (*Piper*) *excelsum*, sometimes cultivated.

"Stay then a little," answer'd Julian, "here,
And *keep yourself*, none knowing, *to yourself*."
Tennyson, Lover's Tale, iv.

To keep open house. See *house*[1].—**To keep out,** to hinder from entering or taking possession.

No iron gate, no spiked and panelled door,
Can *keep out* death, the postman, or the bore.
O. W. Holmes, A Modest Request.

To keep the bones green. See *green*[1].—**To keep the crown of the causey.** See *crown*.—**To keep the field, the house, the peace,** etc. See the nouns.—**To keep the land aboard** (*naut.*). See *aboard*[1].—**To keep the luff,** or **the wind** (*naut.*), to continue close to the wind. —**To keep time, touch,** etc. See the nouns.—**To keep under,** to restrain; hold in subjection or under control.

Need and poverty doth hold down and *keep under* stout courages, and maketh them patient perforce, taking from them bold and rebelling stomachs.
Sir T. More, Utopia (tr. by Robinson), i.

I *keep under* my body, and bring it into subjection.
1 Cor. ix. 27.

The fire was *kept under* for the rest of the day, but all attempts to extinguish it were vain.
Lecky, Eng. in 18th Cent., xv.

To keep up. (*a*) To support; hold in an existing state or condition; prevent from lapsing: as, to *keep up* the price of goods; to *keep up* one's credit.

Ptolemy had been a soldier from his infancy, and consequently *kept up* a proper military force, that made him everywhere respected in these warlike and unsettled times.
Bruce, Source of the Nile, I. 457.

He would undertake to prove before a committee of the House of Commons that there existed a combination to *keep up* the price of muffins.
Dickens, Nicholas Nickleby, ii.

(*b*) To maintain; continue; prevent cessation of.

(*c*) To maintain in good order or condition: as, to pay so much a year to *keep up* a grave.—**To keep up to the collar**, to keep hard at work; "keep at it": in allusion to the straining of a working horse against his collar. [Colloq.]

Not that he neglected these [the proper studies of the place], for Hardy *kept* him pretty well *up to the collar*, and he passed his little go creditably.
T. Hughes, Tom Brown at Oxford, II. xii.

=**Syn. 7**, etc. *Keep, Retain, Reserve. Keep* is a very general idiomatic word, meaning, in this relation, not to dispose of or part with; hold on to: as, to sell half and *keep* half. *Retain* covers the idea of not giving up where there is occasion or opportunity: as, to surrender on condition that the officers *retain* their side-arms. To *reserve* is to keep back at a time or in an act in which other things are given up; also, to keep back for a time: as, to *reserve* judgment.

They only fall, that strive to move,
Or lose, that care to *keep*.
Owen Meredith, Wanderer, iii.

Why should not man,
Retaining still divine similitude
In part, from such deformities be free?
Milton, P. L., xi. 512.

Hast thou not *reserved* a blessing for me? Gen. xxvii. 36.

These jests are out of season;
Reserve them till a merrier hour than this.
Shak., C. of E., i. 2, 69.

6. *Keep, Defend, Protect, Shelter, Preserve. Keep* is the general word in this relation also. To *defend* is to keep by warding off attacks; the word does not so much imply success as the others do. To *protect* is to keep by covering from danger. To *shelter* is to keep by covering on one side, or on all sides, especially above, from exposure. *Shelter* seems figurative when not applied to keeping from exposure to the weather, and *protect* and *defend* when not applied to the physical. To *preserve* is in various senses to protect or keep from destruction or injury: as, to *preserve* forests, the bank of a river, fruit, vested rights, life, or one's dignity.

Behold, he that *keepeth* Israel shall neither slumber nor sleep. Ps. cxxi. 4.

Nor could the Muse *defend*
Her son. *Milton*, P. L., vii. 37.

In youth it *sheltered* me,
And I'll *protect* it now.
G. P. Morris, Woodman, Spare that Tree!

History has sometimes been called a gallery, where in living forms are *preserved* the scenes, the incidents, and the characters of the past. *Sumner*, Orations, I. 201.

2 and 3. *Observe, Commemorate*, etc. See *celebrate*.

II. *intrans.* 1†. To care; be solicitous.

Of my craft, for I wolde it kept were cloos."
Chaucer, Canon's Yeoman's Tale, l. 357.

The third me thinks shruggingly saith, I *kept* not to sit sleeping with my Poesie till a Queene came and kissed me.
Puttenham, Arte of Eng. Poesie, p. 15.

2†. To take care; be on the watch; be heedful.

Keep that the lusts shake not the word of God that is in us. *Tyndale.*

3. To lodge; dwell; hold one's self, as in an abiding-place. [Now colloq. or rare.]

Knock at his study, where, they say, he *keeps*.
Shak., Tit. And., v. 2, 5.

The Tarentines [Indians] . . . rifled a wigwam where Mr. Cradock's men *kept* to catch sturgeon, took away their nets and biscuit, &c. *Winthrop*, Hist. New England, I. 72.

But yet he could not *keep*
Here with the shepherds and the silly sheep.
M. Arnold, Thyrsis.

He was foolish enough to tell where these quail *kept* in his orchard. *Forest and Stream*, XXVIII. 252.

4. To keep one's self; remain; stay; continue: as, to *keep* at a distance; to *keep* in with some one; to *keep* out of sight; hence, in familiar speech, used with a present participle almost as an auxiliary of continuous or repeated action: as, he *keeps* moving; she *kept* crying out; they have *kept* asking for it this hour past.

Those that are married already, all but one, shall live; the rest shall *keep* as they are. *Shak.*, Hamlet, iii. 1, 156.

The Privateers *keep* out of their way, having always Intelligence where they [the Barralaventa fleet] are.
Dampier, Voyages, II. ii. 126.

We *kept* down the left bank of the river for a little distance, and then struck into the woods.
B. Taylor, Northern Travel, p. 48.

Innumerable instances are known to every naturalist of species *keeping* true, or not varying at all, although living under the most opposite climates.
Darwin, Origin of Species, p. 139.

All the place is holy ground; . . .
So *keep* where you are: you are foul with sin.
Tennyson, The Poet's Mind.

5. To last; endure; continue unimpaired.

To keep at it, to continue hard at work; persist. [Colloq.]—**To keep dark.** See *dark*[1].—**To keep from**, to abstain from; refrain from; remain away from.

I should kick, being kick'd; and, being at that pass, You would *keep from* my heels. *Shak.*, C. of E., iii. 1, 19.

To keep in with. See *in*[1], *adv.*—**To keep on**, to go forward; proceed; continue to advance.

The Pontic sea,
Whose icy current and compulsive course
Ne'er feels retiring ebb, but *keeps* due *on*
To the Propontic and the Hellespont.
Shak., Othello, iii. 3, 455.

To keep to, to adhere strictly to; avoid neglecting or deviating from: as, to *keep to* old customs; to *keep to* a rule; to *keep to* one's word or promise.

Not finding the Governour *keep to* his agreement with me; nor seeing by his carriage towards others any great reason I had to expect he would, I began to wish my self away again. *Dampier*, Voyages, I. 518.

Well, if they had *kept to* that, I should not have been such an enemy to the stage. *Sheridan*, The Critic, i. 1.

To keep up, to remain unsubdued, as by illness, age, or grief; be yet active, or not confined to one's bed; not to fall behind. [Colloq.]

keep (kēp), *n.* [< ME. *kepe*, heed, care; < *keep*, *v.*] 1†. Heed; notice; care.

We love no man that taketh *kepe* or charge
Wher that we goon; we wol ben at our large.
Chaucer, Prol. to Wife of Bath's Tale, l. 321.

Youth is least looked vnto when they stand [in] most neede of good *kepe* and regard.
Ascham, The Scholemaster, p. 50.

And unto Morpheus comes, whom drowned deepe
In drowsie fit he findes: of nothing he takes *keepe*.
Spenser, F. Q., I. i. 40.

Fletcher (*and another?*), The Prophetess, iii. 1.

You did not love cruelty, you *kennel-raker*, you gibbet-carrier! *Arbuthnot*, Miscellaneous Works (ed. 1751), I. 49.

kennet[1]†, *n.* [< ME. *kenet*, *kenit*, < AF. *kenet*, dim. of *ken*, OF. *chen*, F. *chien* = Pg. *cão* = It. *cane*, < L. *canis*, a dog: see *canis*, *canine*.] A small dog of some particular breed.

A *kenet* kryes therof, the hunt on hym calles.
Sir Gawayne and the Green Knight (E. E. T. S.), l. 1701.

My lord hadde a *kenet* fel,
That he loved swyth wel.
Seven Sages (ed. Wright), l. 1762.

kennet[2]†, *n.* [Prob. < ONF. **canette* = OF. *chenette*.] A kind of gray cloth.

kenning[1] (ken'ing), *n.* [< ME. *kenning* = Dan. *kjending*, verbal n. of *ken*[1], *v.*] 1†. Sight; view; especially, a distant view at sea.

Nawther company by course hade *kennyng* of other,
But past to there purpos & no prise made,
And sailet vpon syde vnto sere costys.
Destruction of Troy (E. E. T. S.), l. 2837.

2†. Range or extent of vision, especially at sea; hence, a marine measure of about twenty miles.

"Scylley is a *kennyng*, that is to say, about xx. miles from the very Westeste pointe of Cornewaulle." Itin. iii. f. 6. *Rom. of Partenay* (E. E. T. S.), Notes, p. 256.

Thre *kennynges* ferre on the see, that is, one and twenty leghes ferre. *Prose Romance of Melusine*, fol. 61.

The next day about evening we saw, within a *kenning*, thick clouds, which did put us in some hope of land.
Bacon.

3. As little as one can recognize or discriminate; a small portion; a little: as, put in a *kenning* of salt. [Scotch.]

Though they may gang a *kennin* wrang,
To step aside is human.
Burns, To the Unco Guid.

kenning[2]†, *n.* [< *ken*[2] + *-ing*[1].] The cicatricula or tread of an egg. Also *kinning*.

There is found in the top or sharper end of an egge, within the shell, a certaine round knot resembling a drop or a navill rising above the rest, which they call a *kinning*. *Holland*, tr. of Pliny, x. 52.

keno (kē'nō), *n.* [Also spelled *kino*; origin obscure.] The children's game of lotto, adapted to gambling purposes. Balls numbered from 1 to 99 are placed in a 'goose,' or wooden globe swinging on its axis, so that the balls can be thoroughly shaken up between the drawing of each. The roller calls each number as it comes out. The players purchase cards, upon which there are four rows of five numbers each, and as the numbers on the card are called they are covered. The first one getting five in a row shouts "Keno!" and receives all the money paid by the others, minus the ten per cent. taken by the bank.

kenogenesis (ken-ō-jen'e-sis), *n.* [< Gr. καινός, new, recent, + γένεσις, generation.] Vitiated evolution, as distinguished from hereditary evolution; ontogenesis modified by adaptation, and therefore not true to its type; that development of an individual germ which does not truly epitomize and repeat the phylogenetic evolution of its race or stock: the opposite of *palingenesis*. See *biogeny*. Also *kenogeny*, *cænogenesis*, *cenogenesis*, *kainogenesis*.

The ontogenetic recapitulation of the phylogeny is the more perfect the more the palingenetic process is conserved by heredity, and the more imperfect in proportion as the later modified evolution (*kenogenesis*) is introduced by adaptation. *Haeckel*, quoted in Encyc. Brit., XX. 422.

kenogenetic (ken″ō-jē-net'ik), *a.* [< *kenogenesis*, after *genetic*.] Of or pertaining to kenogenesis.—**Kenogenetic process.** See the extract.

The term *kenogenetic process* (or vitiation of the history of the germ) is applied to all such processes in germ-history as are not to be explained by heredity from primæval parent-germs, but which have been acquired at a later time in consequence of the adaptation of the germ or embryo form to special conditions of evolution.
Haeckel, Evol. of Man (trans.), I. 10.

kenogenetically (ken″ō-jē-net'i-kal-i), *adv.* In a kenogenetic manner. *Haeckel.*

kenogeny (ke-noj'e-ni), *n.* [< Gr. κενός, empty, + *-γενεια*, < *-γενής*, producing: see *-genous*.] Same as *kenogenesis*.

kenosis (ke-nō'sis), *n.* [NL., < Gr. κένωσις, an emptying, depletion, in theological use with ref. to Phil. ii. 6, 7, "who, being in the form of God, . . . *emptied himself* (ἑαυτὸν ἐκένωσε), taking the form of a servant" (revised version); < κενοῦν, make empty, < κενός, empty.] In *theol.*, the self-limitation and self-renunciation of the Son of God in the incarnation.

Some restrict the *kenosis* to the laying aside of the divine form of existence, or divine dignity and glory; others strain it in different degrees, even to a partial or entire emptying of the divine essence out of himself, so that the inner trinitarian process between Father and Son, and the government of the world through the Son, were partially or wholly suspended during his earthly life.
Schaff, Hist. Christ. Church, III. § 142, 8.

kenotic (ke-not'ik), *a.* [< Gr. κενωτικός, pertaining to emptying, < κένωσις, emptying: see *kenosis*.] Of or pertaining to the kenosis.

Instead of raising the finite to the infinite, the modern *Kenotic* theory lowers the infinite to the finite.
Schaff, Christ and Christianity, p. 110.

kenoticist (ke-not'i-sist), *n.* [< *kenotic* + *-ist*.] One who believes in the theory of the kenosis.

The Chalcedonian Christology has been subjected to a rigorous criticism in Germany by Schleiermacher, Baur, Dorner, Rothe, and the modern *Kenoticists*.
Schaff, Christ and Christianity, p. 67.

kenspack (ken'spak), *a.* and *n.* Same as *kenspeck*, *kenspeckle*.

kenspeck (ken'spek), *a.* and *n.* [Also *kenspack*; more commonly *kenspeckle*, q. v.; < Icel. *kennispeki*, the faculty of recognition, < *kenni*, a mark (cf. G. *kennzeichen*), < *kenna*, know, recognize, ken, + *speki*, wisdom, < *spakr*, wise.] **I.** *a.* Known by marks; strongly marked or conspicuous; readily recognizable. [Prov. Eng. and Scotch.]

The Homeric text is . . . certainly *kenspeck*, to use a good old English word—that is to say, recognizable; you challenge it for Homer's whenever you see it.
De Quincey, Homer, iii.

II. *n.* A thing known by some striking mark or peculiarity. *E. D. D.*

kenspeckle (ken'spek-l), *a.* [E. dial. also *kenspeckled*; in pop. apprehension "speckled or marked so as to be conspicuous" (Halliwell): see *kenspeck*.] Same as *kenspeck*, and the more common form. [Prov. Eng. and Scotch.]

Eng. Man. What kind of a Woman is it you enquire after?
Gib. Geud troth, she's no *Kenspeckle*, she's aw in a Clowd [she had a Spanish veil over her].
Mrs. Centlivre, The Wonder, iii.

I grant ye his face is *kenspeckle*,
That the white o' his e'e is turn'd out.
Nicol, Poems, II. 157.

It is a *kenspeckle* hoof-mark, for the shoe was made by old Eckie of Cannobie—I would swear to the curve of the cawker. *Scott*, Monastery, xxxiv.

kent[1] (kent), *n.* [Perhaps a var. of *cant*[1], *n.*, taken in sense of 'that which cants or tilts': see *cant*[1], *v.* and *n.*] 1. A long staff used by shepherds for leaping over ditches and brooks; a rough walking-stick; a pole. [Scotch.]

A better lad ne'er lean'd out o'er a *kent*.
Ramsay, Richy and Sandy.

He bade me fling doun my *kent*, and sae me and my mither yielded oursells prisoners.
Scott, Old Mortality, xiv.

He carried a long pole or *kent*, like the alpenstock, tolerably polished, with a turned top on it, on which he rested. *Dr. J. Brown*, Spare Hours, 1st ser., p. 424.

2. See the extract.

A band of fat . . . is left round the neck [of the whale], called the *kent*, to which hooks and ropes are attached for the purpose of shifting round the carcass.
Ure, Dict., III. 451.

A gramineous seed with its husk or integument; a grain or corn: as, a *kernel* of wheat, oats, or maize: formerly applied also to the seed of the apple and other pulpy fruits.

The coxcombs of our days, like Æsop's cock, had rather have a barley *kernel* wrapt up in a ballet than they will dig for the wealth of wit in any ground that they know not. *Nash* (Arber's Eng. Garner, I. 498).

Proserpine was found to have eaten three *kernels* of a pomegranate. *Bacon*, Physical Fables, xi.

What is left of you seems the mere husk of some *kernel* that has been stolen.
D. G. Mitchell, Reveries of a Bachelor.

4. The bundle of fat on the fore shoulder; any swelling or knob of flesh.—5. Figuratively—(*a*) The central part of anything; a mass around which other matter is concreted; a nucleus in general.

The sanctuary of this goddess [Astarte] had formed the *kernel* of every Phœnician settlement on the coasts and islands of the Ægean sea.
B. V. Head, Historia Numorum, Int., p. xxxviii.

The castle is the *kernel* of the whole place.
E. A. Freeman, Venice, p. 49.

(*b*) The important part of anything, as a matter in discussion; the main or essential point, as opposed to matters of less import; the core; the gist: as, to come to the *kernel* of the question.

"You that talk'd
The trash that made me sick, and almost sad?"
"O trash," he said, "but with a *kernel* in it."
Tennyson, Princess, ii.

Waxing kernels, enlarged lymphatic glands, particularly in the groin of a child: so called because supposed to be connected with the growth of the body. [Prov. Eng.]

kern-supper (kėrn′sup″ėr), *n.* A rural festivity celebrating the end of the reaping, and forming in some counties a part of the harvest-home. Also called *churn-supper*. [Prov. Eng.]

The *churn-supper* was always provided when all was shorn, but the mel-supper after all was got in.
Hone's Year Book, p. 1066.

kerolite (ker′ō-līt), *n.* See *cerolite*.

kerosene (ker′ō-sēn), *n.* [Cf. F. *kérosène* (< E.); irreg. < Gr. κηρός, wax, + *-ene*.] A mixture of liquid hydrocarbons distilled from petroleum, bituminous shale, etc., extensively used as an illuminating fluid in all parts of the world. When of good quality it is nearly colorless, and its specific gravity varies from 0.780 to 0.825. Its boiling-point should be above 170° C. (338° F.), and the point at which it evolves inflammable vapor (that is, its "flashing-point") 65° C. (149° F.). It is the same as, or very closely related to, the British paraffin-oil. Also called *photogen*, *mineral oil*, and in England *American paraffin-oil*.—**Kerosene shale**, bituminous shale; any shaly rock from which illuminating oil has been or may be profitably obtained.

kerre†, *n.* An obsolete form of *car*5.

Kerria (ker′i-ä), *n.* [NL. (De Candolle, 1817), named after William *Kerr*, a British gardener.]

A genus of rosaceous plants of the tribe *Kerrieæ*, characterized by small, dry, cartilaginous achenia, and large, solitary, peduncled yellow flowers terminating the branchlets. They are shrubs with long, slender, green branches and thin, lanceolate, acuminate, coarsely serrate leaves. There is only one well-authenticated species, *K. Japonica*, native of Japan, but cultivated throughout western Europe and in America, usually under the erroneous name of *Corchorus Japonicus*. The natural form with five sepals and petals is rare, the usual form in gardens being full-double.

kerril (ker'il), *n.* [E. Ind.] A venomous sea-snake of the genus *Hydrophis*, as *H. nigrocincta* of Bengal.

kerrite (kėr'īt), *n.* [Named after W. C. *Kerr*, a State geologist of North Carolina.] A kind of vermiculite from Franklin, North Carolina.

kesse†, *v.* A Middle English form of *kiss*.

kest†. A Middle English preterit of *cast*[1].

kestrel (kes'trel), *n.* [Early mod. E. also *kestril, castrel, kastrel, kastril;* with medial *t* developed between *s* and *r*, < OF. *quercerelle*, also written *cercerelle, crescerelle*, F. *crécerelle*, a kestrel: cf. It. *tristarello* (Florio) for *cristarello*, dim. of *quercello*, a kestrel; OF. *cercelle*, a teal, F. *sarcelle*, a teal, F. dial. *cristel*, a kestrel; Sp. *cerceta*, a kestrel; all < L. *querquedula*, a kind of teal: see *Querquedula*. The forms show much variation, due in part to different manipulations of the dim. ending.] A common European falcon, *Falco tinnunculus*, *Tinnunculus alaudarius*, or *Cerchneis tinnunculus*, of small size and reddish color. The body is 12½ inches long, the wing 9. The bird is brick-red with black arrow-heads on the back, the under parts being some shade of buff, fawn, or rufous, much spotted with black, and the head, neck, and rump being mostly bluish-gray. It inhabits parts of Asia and Africa, as well as the whole of Europe. It builds in hollow trees and in cliffs, or in nests deserted by crows, magpies, etc., and feeds on mice, small birds, and insects. The kestrel may be recognized by its habit of hovering or sustaining itself in the same place in the air by a rapid motion of the wings, always with its head to the wind (whence the names *stannel* and *windhover*). The male and female differ in color, ash-gray prevailing in the former and rusty brown in the latter. This hawk being regarded as of a mean or base kind, *kestrel* was formerly often used as an epithet of contempt. The term is extended to a number of species of the restricted genus *Tinnunculus* or *Cerchneis*. The American representatives are commonly known as *sparrow-hawks*. See cut under *sparrow-hawk*. Also called *stannel* and *windhover*.

Ne thought of honour ever did assay
His baser brest, but in his *kestrell* kynd
A pleasing vaine of glory he did fynd.
Spenser, F. Q., II. iii. 4.

What a cast of *kestrils* are these, to hawk after ladies thus! *B. Jonson*, Epicœne, iv. 2.

The hobby is used for smaller game, for daring larks, and stooping at quails. The *kestrel* was trained for the same purposes. *Goldsmith*, Nat. Hist., ii. 5.

A vessel of iron, copper, tin, or other metal, of various shapes and dimensions, used for boiling or heating water and other liquids, or for cooking vegetables, etc., by boiling. Compare *camp-kettle, tea-kettle*.

A *kettle*, slung
Between two poles upon a stick transverse,
Receives the morsel. *Cowper*, Task, i. 560.

A few weeks ago she had all the fruit gathered, all the sugar got out, all the brass *kettles* scoured and ready.
W. M. Baker, New Timothy, p. 288.

2. A tin pail. [Local, U. S.]—3†. A kettledrum.

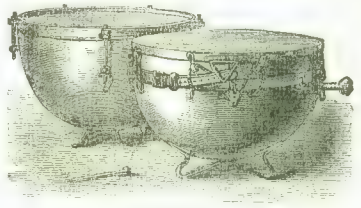
And let the *kettle* to the trumpet speak,
The trumpet to the cannoneer without.
Shak., Hamlet, v. 2, 286.

4. Figuratively, a cavity or depression suggesting the interior of a kettle. Specifically—(*a*) A hole in the ground in deep water, in which carp huddle together during winter in a kind of hibernation. (*b*) In *geol.*, any cavity, large or small, in solid rock or detrital material, which resembles a kettle in form. "The kettle" of the Sierra Nevada is about a mile across the top and 1,600 feet deep. Small cavities worn in rock by the revolutions of a stone in a swift current are of frequent occurrence, varying from a few inches to several feet in diameter and depth. Cavities of this kind are more commonly known as *pot-holes*, and sometimes as *giants' kettles*. (See also *blocking-kettle*.)

kettle[2] (ket'l), *n.* Same as *kiddle*[1].—**A kettle of fish**, or **a pretty kettle of fish**, a complicated and bungled affair; an awkward mess. [*Kettle* in this phrase is usually plausibly referred to *kettle*[2] = *kiddle*[1], but as used it has no individual significance.]

"You had better tell your uncle with my compliments," said Mr. Dingwell, "that he'll make *a kettle of fish* of the whole affair, in a way he doesn't expect, unless he makes matters square with me."
J. S. Le Fanu, Tenants of Mallory, xxxvii.

kettle[3] (ket'l), *v. i.* A variant of *kittle*[2].



kettle-bail (ket'l-bāl), *n.* A dredge used in taking scallops, having the blade adjusted to swing in the eyes of the arms to prevent it from sinking in the mud. [Rhode Island.]

kettledrum (ket'l-drum), *n.* 1. A musical instrument used in military bands and in orchestras, consisting of a hollow brass hemisphere from 24 to 30 inches in diameter, over which is stretched a head of parchment. It is sounded by blows from a soft-headed, elastic mallet or stick. The pitch of the tone is determined by various devices for

Kettledrums.

adjusting the tension of the head. In orchestral music two or more kettledrums (technically called *timpani*) are employed, tuned at different pitches, usually at the tonic and the dominant of the piece to be performed. As the pitch may be accurately fixed, kettledrums are much used, in conjunction with other instruments, for emphasizing the rhythm, and for increasing the sonority of the general effect. They are also much used in short solo passages; and various experiments have been made, with extended and elaborate effects, with a large number of drums.

The king doth wake to-night, and takes his rouse,
Keeps wassail, and the swaggering up-spring reels;
And, as he drains his draughts of Rhenish down,
The *kettle-drum* and trumpet thus bray out
The triumph of his pledge. *Shak.*, Hamlet, i. 4, 11.

A few notes on the trumpet mingled with the occasional boom of the *kettle-drum*. *Scott*, Old Mortality, vi.

2. A fashionable afternoon entertainment given by a woman chiefly to women; an afternoon tea. See *drum*.

kettledrummer (ket'l-drum″ėr), *n.* One who beats the kettledrum.

kettle-hat†, *n.* [< ME. *ketille-hatte*; < *kettle* + *hat*[1].] A kind of helmet used in the fourteenth century. It does not appear that the term was definitely limited to any one form. See *pot*.

Than the comliche kynge kaughte hym in armes,
Keste of his *ketille-hatte*, and kyssede hyme fulle sone,
Saide, "welcome, syr Craddoke, so Criste mott me helpe!"
Morte Arthure (E. E. T. S.), l. 3517.

kettle-hole (ket'l-hōl), *n.* In *geol.*, a cavity in rock or detrital material, having more or less exactly the shape of the interior of a kettle. During the disappearance of the ice-sheet of glacial times its border melted away irregularly and numerous ice-masses were isolated. Stratified deposits of sand and gravel were formed around them. When the ice-masses finally melted away, their place was marked by cavities, of which the larger and deeper examples often hold lakes, while the smaller ones are dry and are known as "kettle-holes." See *kettle*[1], 4, *kettle-moraine*, and *pot-hole*.

kettlemaw (ket'l-mâ), *n.* A fish, *Lophius piscatorius*, commonly called the *angler*.

kettle-moraine (ket'l-mō-rān″), *n.* An accumulation of glacial drift characterized by kettle-shaped depressions varying in depth from a few feet to a hundred, their outlines being rudely circular, and their sides as steep as is consistent with the stability of the soil. The district where the term was first used is southeastern Wisconsin. It was locally known as the *potash kettle country*. 'Kettle-moraine' is now used in the United States for any well-defined moraine of hill-and-hollow form. See *kettle-hole*.

kettle-pin (ket'l-pin), *n.* Same as *skittle-pin*.

Billiards, *kettle-pins*, noddy-boards, tables, truncks, shovel-boards, fox and geese, and the like.
Shelton, Pref. to Don Quixote. (*Todd.*)

kettler†, *n.* [Early mod. E. *ketler*; < *kettle* + *-er*[1].] One who makes or repairs kettles; a tinker. *Middleton*, Black Book.

kettle-stitch (ket'l-stich), *n.* [G. *kettelstich*, chain-stitch.] In *bookbinding*, a chain-stitch that knots and fastens the last two leaves of a book at its head and tail: a corruption of chain-stitch or catch-up stitch.

kettrin (ket'rin), *n.* A variant of *cateran*.

ketupa (ke-tö'pä), *n.* [Javanese.] 1. An eared owl of Java, *Strix ketupa*.—2. [*cap.*] [NL.] A genus of owls, related to the foregoing, established by Lesson in 1831; the fish-owls. They have large ear-tufts, and mostly naked tarsi; the feet are roughened, as in ospreys. There are three species, *K. javanensis* (the type), *K. flavipes*, and *K. ceylonensis*. The last is the common Indian fishing-owl.

Keuper (koi'pėr), *n.* [G.] In *geol.*, the German name of the upper division of the Triassic series, a formation of importance in Europe, and especially in Germany. The upper part of the Keuper consists there of marl, and contains large deposits of gypsum and rock-salt. The lower part is made up chiefly of gray sandstones and dark marl and clay, and contains numerous remains of plants, and sometimes coal of rather poor quality. See *Trias*.

kevel[1], *n.* See *cavel*[1].

kevel[2], *n.* See *cavel*[2].

They kiest *kevels* them amang,
Wha wou'd to the grenewood gang.
Lord Dingwall (Child's Ballads, I. 288).

kevel[3] (kev'el), *n.* [Senegal (Wolof).] A name of *Antilope kavella* of Pallas, a supposed species of gazel, later identified with the common gazel, *A. dorcas*.

kevel-head (kev'el-hed), *n.* *Naut.*, the end of one of the top-timbers used as a cavel.

kever[1]†, *v.* A Middle English form of *cover*[1].

kever[2]†, *v.* A Middle English form of *cover*[2].

keverauncet, *n.* [ME., < *kever*[2] + *-ance*.] Recovery.

kevercheft, *n.* A Middle English form of *kerchief*. *Chaucer*.

kevil[1], *n.* See *cavel*[1].

kevil[2], *n.* See *cavel*[2].

Keweenawan (kē'wē-nâ-an), *n.* [Also called *Keweenian* and *Keweenawian*; < *Keweenaw* (see def.) + *-an*.] The name given to the series of trappean rocks and their interbedded sandstones and conglomerates in which the Lake Superior copper-mines are worked. It is derived from Keweenaw Point in the upper peninsula of Michigan. The Keweenawan traps and sediments dip to the northwest and pass beneath Lake Superior, reappearing on the north shore, where they are called the Nipigon formation by the Canadian geologists. On Keweenaw Point they form a high rocky ridge, which on the southeast and southwest abuts against or overrides Cambrian sandstones, from faulting. By some the Keweenawan is believed to be pre-Cambrian; by others Cambrian or later.

kewkaw† (kū'kâ), *a.* [Cf. *askew* (?).] Awry; askew.

The picture topsie-turvie stands *kewwaw* [read *kewkaw*]:
The world turn'd upside downe, as all men know.
Taylor, Works (1630), ii. 233.

kex (keks), *n.* [Also *kecks*, *kix*, also *kecksy* (prop. adj.), and *keck*; < ME. *kex*, *kix*, < W. *cecys*, pl., hollow stalks, hemlock (cf. W. *cegid*, hemlock), = Corn. *cegas*, hemlock; cf. OFlem. *koycke*, hemlock; L. *cicuta*, hemlock.] 1. A hollow stalk, especially when dry, of various large umbelliferous plants. [Obsolete or archaic.]

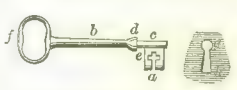
With her [Eve's] gentle blowing
Stirs vp the heat, that from the dry leaues glowing
Kindles the Reed, and then that hollow *kix*
First fires the small, and they the greater sticks.
Sylvester, tr. of Du Bartas's Weeks, ii., The Handy-Crafts.

[Sometimes applied as a term of contempt to a person.

I'll make these wither'd *kexes* bear my body
Two hours together above ground.
Beau. and Fl., King and No King, v. 2.]

2. Hemlock. [Archaic.]

Tho' the rough *kex* break
The starr'd mosaic. *Tennyson*, Princess, iv.



kexent, *a.* [Early mod. E., in the var. form *kixen*, spelled irreg. *kicson*; < *kex*, *kix*, + *-en*[2]. The form *keckson* is used as a noun.] Made of kexes or hollow stalks.

One daye agayne will, in his rage,
Crushe it all as a *kicson* cage,
And spill it quite.
Puttenham, Partheniades, xi.

kexy† (kek'si), *a.* [< *kex* + *-y*[1]. Cf. *kecksy*, *n.*, *kecky*, *a.*] Like a kex; hollow; dry; sapless.

The earth will grow more and more dry and sterile in succession of ages; whereby it will become more *kexy*, and lose of its solidity. *Dr. H. More*, Godliness, VI. x. § 3.

★**key**[1] (kē), *n.* [Early mod. E. also *keie*, *kay*, etc.; < ME. *keye*, *keie*, *keige*, also *cay*, *kay*, < AS. *cǣg*, *cāge* = OFries. *kai*, *kei*, North Fries. *kay*, a key; not found in other languages.] 1. An instrument for fastening or opening a lock, fitted to its wards, and adapted, on being inserted and turned or pushed in the keyhole, to push a bolt one way or the other, or to raise a catch or latch; in certain complicated locks, a portable appliance which on being inserted in the proper place in the lock lifts tumblers or in some other way allows the bolt to be shot without itself exercising force upon it.

Ward-lock Key and its Keyhole.
a, Main ward, or bridge; *b*, stem or body; *c*, pin; *d*, collar; *e*, bit or web; *f*, bow; *g*, eye; *h*, slot.

The(y) locked the dore and than went theyr way.
Cayphas and Anna of that kept the *kay*.
Joseph of Arimathie (E. E. T. S.), p. 38.

She took the little ivory chest,
With half a sigh she turn'd the *key*.
Tennyson, The Letters.

Hence—2. Something regarded as analogous to a key, in being a means of opening or making clear what is closed or obscure; especially, that by means of which (often by means of which alone) some difficulty can be overcome, some obstacle removed, some end attained, something unintelligible explained, etc.: as, the *key* to knowledge; Gibraltar is the *key* to the Mediterranean; a *key* to the solution of an algebraic problem; a *key* to an algebra or arithmetic (a book giving the solution of mathematical problems proposed as exercises in such text-books); the *key* to a cipher.

Thou art Peter. . . . And I will give unto thee the *keys* of the kingdom of heaven. Mat. xvi. 18, 19.

Woe unto you, lawyers! for ye have taken away the *key* of knowledge. Luke xi. 52.

These counties were the *keys* of Normandy.
Shak., 2 Hen. VI., i. 1, 114.

To learn thy secrets, get into my power
The *key* of strength and safety.
Milton, S. A., l. 799.

"Stæfcræft is seó cǣg the thēra bōca andgit unlȳcth" [AS.], grammar is the *key* that unlocks the sense of the books. *F. A. March*, Anglo-Sax. Gram., p. 140.

The *key* to all the enigmas, all the imputed guilt, all the peculiar usefulness to his country of Peel's career, is to be sought in the original contrast between his character and his position. *W. R. Greg*, Misc. Essays, 2d ser., p. 206.

3. In *mech.*: (*a*) A hand-tool for controlling a valve, moving a nut, etc., which is independent of the part to be moved. In this sense a spanner, wrench, bedstead-wrench, etc., are keys. (*b*) Any device for wedging up or locking together different parts, or for jamming or binding them to prevent vibration or slipping. Such are: (1) the wedge or cotter driven between the hub of a wheel and its shaft to bind the two together; (2) a wedge in a chain to prevent slipping; (3) a wedge put in a split tenon to cause it to spread when driven into a mortise. (*c*) A bolt which secures the cap-square to the cheek of a gun-carriage. See cut under *gun-carriage*. (*d*) In *masonry*, the central stone of an arch or vault, usually the uppermost stone; the keystone (although in a true arch no one of the voussoirs is more important to the stability of the structure than any other). See cut under *arch*[1]. (*e*) In *carp.*: (1) A piece inserted in the back of a board to prevent warping. (2) The last board in a series of floor-boards, tapering in shape, and serving when driven home to hold the others in place. (3) The roughing on the under side of a veneer, designed to assist it in holding the glue. (*f*) In *bookbinding*, one of a series of small tools used by the sewer of a book to keep the bands in place when the sections of the book are in a sewing-bench. They are made of metal or hard wood, shaped like a yoke, or the letter U, and of the size 1 by 3 inches. (*g*) A joint to assist in supporting a train of rods and the tools in a tube-well. (*h*) A wrench or lever for tuning stringed instruments of fixed intonation, like the pianoforte and the harp; a tuning-wrench or tuning-hammer. It consists of a metal head hollowed so as to fit closely over the tuning-pins, and a handle, usually long enough to give considerable leverage. (*i*) The surplus mortar or plaster that passes between the laths, and serves to hold the plastering in position. (*j*) A hollow cut in the back of a tile or terra-cotta ornament, or on a wall, to hold mortar or cement.—4. In *musical instruments:* (*a*) In instruments especially of the wood wind group, a lever and valve operated by the player's finger, and designed either to open or to close a hole or vent in the side of the tube, so as to alter the pitch of the tone by altering the length of the vibrating air-column within. While in the simpler varieties of the flute, the oboe, the clarinet, etc., such holes are controlled by the fingers directly, in more complex varieties the number of holes is so great, and their position and size are so inconvenient, that this supplementary mechanism is a necessity. A complete system of keys was first elaborated for the flute by Theobald Boehm in 1832, and has since been applied to the oboe, the clarinet, and to some extent to the bassoon, with a decided gain in ease of manipulation, length and fullness of compass, and sonorousness of tone. Partial systems of keys are also found in the English horn, the basset-horn, etc. Holes and keys have been used in various brass wind-instruments, notably in the bugle and the saxophone, though as a rule they are less used than valves. (See *valve*.) See cuts under *flute*, *clarinet*, *oboe*, etc. (*b*) In instruments with a keyboard, like the organ and the pianoforte, one of the levers which are depressed in the act of playing. When operated by the finger, it is more exactly termed a *digital* or (rarely) a *manual*; when operated by the foot, a *pedal*. In the pianoforte each key or digital is connected with a series of levers, by which a hammer may be thrown against the string or strings belonging to that key, at the same time lifting from the strings the damper that prevents their vibration. When the key is released, the damper falls and stops the vibration. The duration, the force, and to some extent the quality of the tone depend upon the way in which the finger depresses the key. (See *touch*.) In the harpsichord each key, with its levers, slips a leather or quill plectrum past the string, so as to snap or twang it. In the clavichord each key presses a metal tangent against the string, so as to drive it into vibration. In chimes of bells rung from a keyboard, each key throws a hammer against one of the bells. In the pipe-organ each key, whether a digital or a pedal, is connected with a series of levers, by which a valve is opened to admit the compressed air from the bellows into a particular groove or channel, over which stand all the pipes belonging to that key. The number of pipes actually sounded depends upon the number of stops drawn. (See cut under *organ*.) In the harmonium and reed-organ each key, with its levers, opens a valve, by which either an outward or an inward current of air is set up through the groove or channel with which are connected all the reeds belonging to that key. The number of reeds sounded depends upon the number of stops drawn. (See cut under *reed-organ*.) Keys in this sense are also (unfortunately) called *notes*. They are arranged according to an arbitrary plan, some being colored white and some black, and they are named by letters, etc., for which see *keyboard*.

She guides the finger o'er the dancing *keys*, . . .
And pours a torrent of sweet notes around.
Cowper, Charity, l. 109.

5. A part pressed by the finger to control the action of a typewriter or other similar machine, in the manner of a musical keyed instrument.—6. Any one of the various forms of circuit-closer used in electrical experiments and in the practical applications of electricity. See *telegraph*.—7. In *music:* (*a*) In *musical theory*, the sum of relations, melodic and harmonic, which exist between the tones of an ideal scale, major or minor, and in which its unity and individ-

uality are contained; tonality. Thus, a proper sense of these relations is called a proper *sense of key*, and a due observance of them puts a performance *in key*. For the difference between major and minor keys in this sense, see *mode*. (*b*) In *musical theory and notation*, the tonality centering in a given tone, or the several tones taken collectively, of a given scale, major or minor. The given tone, or the first tone of the given scale, is called the *key-note*, *key-tone*, or *tonic*; and the key is named by the name of this tone. A scale is simply an arrangement of the tones of a key in their melodic order. In modern music, and in vocal music generally, all major keys are intended to be precisely similar to one another, except in pitch, and all minor keys likewise similar to one another. But in the systems of tuning instruments of fixed intonation before the middle of the eighteenth century, certain keys were favored and others slighted; so that some keys were very useful, and some practically useless. It is said that this difference, which was originally incidental to the imperfect plan of the keyboard, and which was to have been obliterated by the introduction of the equal temperament, is to some extent unavoidable, certain keys having a peculiar quality per se; but these differences appear, on close analysis, to be relative or accidental rather than essential. (See *temperament*.) The keyboard of the organ and the pianoforte, however, is so planned as to make a decided mechanical difference between keys or scales based on different digitals. For example, the major key or scale of the digital called *C* requires the use of only white digitals, or naturals; hence it is called (unfortunately) the *natural key*. Other keys or scales require the use of one or more black digitals, which are called either *sharps* or *flats*; hence they are called the keys of one, two, three, or more sharps or flats, as the case may be. The keys of one or more sharps are called collectively the *sharp keys*; those of one or more flats, the *flat keys*. Practically, keys of more than six sharps or flats are rarely mentioned. (See *circle of keys*, under *circle*.) When these keys are represented by the staff-notation, the black digitals are indicated by marks ♯ or ♭ prefixed to certain of the notes. But since the key in which a piece is to be performed is the same either throughout, or at least for extended passages, these sharps or flats are customarily grouped into a *key-signature* at the beginning of the piece or passage, and the effect of this signature is understood to continue until contradicted by further signs: thus—

(The crosses mark the degree belonging to the key-note.) The sharps and the flats in such signatures are counted from left to right; in sharp signatures the position of the key-note is always one degree above the last sharp, while in flat signatures it is always on the same degree with the last flat but one. This provides a rule for finding the key-note from each signature except those of the keys of C and of F. The key-notes of the sharp keys, taken in direct order, are distant from one another either by a fifth upward or a fourth downward, as are the key-notes of the flat keys, taken in inverse order. These signatures are also used for *minor* keys, the key-notes of such keys being in each case two degrees below the key-notes as given for major keys. The major and minor keys that use the same signature are termed *relatives* of each other. See *relative*. (See *circle of keys*, under *circle*.) The entire system of keys as described above is conditioned upon the keyboard of the organ and the pianoforte, and therefore is essentially arbitrary. It has no basis in the phenomena of sound or the necessities of music as an art. Its complexity is due historically to the inadequate medieval theory of music, and secondarily to the arbitrary instrumental mechanism and the notation that grew out of that theory. Of the many attempts to improve or replace the system, the tonic sol-fa notation has been the most successful. See *notation*, and *tonic sol-fa* (under *tonic*).

key-basket (kē′bȧs″ket), *n.* A basket to contain a housekeeper's keys.

> A mob-cap covering her gray hair, and *key-basket* in hand, the wife of Washington must have offered a pleasant picture. *The Century*, XXXVII. 841.

key-bed (kē′bed), *n.* In *mach.*, a rectangular groove made to receive a key for the purpose of binding parts, as the wheel and shaft of a machine, firmly together, so as to prevent the one ★part from turning on the other; a key-seat.

keyboard (kē′bōrd), *n.* In the organ, pianoforte, and similar instruments, as the harpsichord, clavichord, etc., the series or horizontal row of finger-levers or digitals (usually called *keys*), by depressing which the performer causes the pipes, strings, or reeds to produce tones. The visible portions of part of the keys are white, while the others are black. The black keys are the shorter, and are raised above the level of the white keys; they are always separated from one another by one

Keyboard of a Piano, showing two octaves.

or two white keys, so as to form groups alternately of two and three. The depression of which the keys are capable is technically called the "dip." The keyboard contains altogether from fifty to ninety keys, the ratio of white to black being 7:5. The right-hand end of the keyboard is called the *upper*, because the keys there produce high tones, and the left-hand end is correspondingly called the *lower*. The white key next below (to the left of) the upper key of every group of three black keys is called A; the next white key to the right of this is called B; the next is called C; and so on, up to G, next to which another A is found. In Germany, by a curious difference of nomenclature, B is always called H, and B♭ is called B. (See *B quadratum* and *B rotundum*, under *B*.) In tuning, the tones produced by the various keys called by the same letter-name are made exact octaves of each other. The black keys are named by reference to the white keys on either side of them: thus, the black key between A and B is either A♯ or B♭, that between C and D is either C♯ or D♭, etc. When a white key is to be specially distinguished from a black one, it is called a *natural*: hence a scale or series of tones produced by using only white keys is called the *natural scale*, and its key (tonality) is called the *natural key*. (See *key*[1].) In general, a key next on the right to any given key is the *sharp* of the latter, and the second key to the right is its *double sharp*; while a key next on the left to any given key is the *flat* of the latter, and the second key to the left is its *double flat*. Thus, every key on the keyboard, except the black key called either G♯ or A♭, has three names: as A = G𝄪 = F♭♭, B = A𝄪 = C♭, C = B♯ = D♭♭, etc.; A♯ = B♭ = C♭♭, C♯ = D♭ = B𝄪, etc. (See *flat*[1] and *sharp*.) The several keys and octaves are usually calculated from middle C—the C nearest the center of the keyboard, and historically the middle tone of the medieval hexachord system (see *hexachord*)—the vibration-number of whose tone is theoretically from 250 to 265. (See *C*.) The keyboard of the organ usually extends four to five octaves, from the second C below middle C to the third A or C above middle C; that of the pianoforte usually extends six to seven or seven and a third octaves, from the third A below middle C to the fourth A or C above middle C. The organ usually has keyboards both for the hands and for the feet, the former being distinguished as *manual keyboards* or *manuals*, the latter as *pedal keyboards* or *pedals*; and there are usually two or more manual keyboards, each with its own sets of pipes or stops, and capable of being used either independently or in conjunction with the others. The principal keyboard is that of the great organ; that above it is that of the swell organ; that below it (when there are three), that of the choir organ. (See *organ*.) In the old harpsichords and similar instruments two keyboards were sometimes provided, the one producing tones of different quality or force from the other. The keyboard has been developed gradually. Its first appearance was about the end of the eleventh century, when large levers that could be manipulated only by the whole hand or a blow of the fist, having a dip of several inches or even a foot, were introduced into the organ, and later into the clavichord and

similar instruments. Only the levers corresponding to the modern white keys (*diatonics*) were used at first; those corresponding to the modern black keys (*chromatics*) were introduced in the twelfth to the fourteenth century, probably in this order: E♭, F♯, C♯, E♭, G♯. The chromatics were first placed in a distinct row from the diatonics; but in the fifteenth century all were combined into a single keyboard. The pedal keyboard was invented for the organ about the same time. Until the close of the eighteenth century the keys were colored white and black in exactly reverse order from the modern custom. (For a description of the mechanical details of the keyboard, see *organ* and *pianoforte*.) The gradual development of the keyboard kept pace with the gradual unfolding of the theory of the musical scale and of tonality. (See *temperament*.) To avoid the inaccuracy of many of the intervals in equal temperament, keyboards with more than twelve digitals and tones to the octave have been devised, but their use has been principally confined to acoustical investigations. The mechanical manipulation of the keyboard in musical performance involves a thorough muscular discipline of the hands. See *touch*, *fingering*, *technique*. — **Choir, great, pedal, solo, swell keyboards**, in *organ-building*, the keyboards belonging respectively to the choir, great, pedal, solo, and swell organs. See *organ*.

key-bolt (kē′bōlt), *n.* Any bolt kept in position by a key or cotter, in distinction from one having a nut.

key-bone (kē′bōn), *n.* The collar-bone; the clavicle.

key-bugle (kē′bū″gl), *n.* A variety of bugle invented about 1815, having six keys and a complete chromatic compass of about two octaves. It is now superseded by valve-instruments. Also called *Kent bugle*.

Key-bugle.

The coach . . . spun along the open country road, blowing a lovely defiance out of its *key-bugle*.
Dickens, Martin Chuzzlewit, xxxvi.

key-chain (kē′chān), *n.* A chain fastened at one end to the cheek of a gun-carriage and at the other to the key, to prevent its loss. See cut under *gun-carriage*.

key-chord (kē′kôrd), *n.* In *music*, the tonic triad of any key (tonality). See *triad*.

key-cold† (kē′kōld), *a.* [Formerly also *keacold*, *kaycold*; < *key*[1] + *cold*.] Cold as a key; icy; lifeless; inanimate.

And finally let vs consider by Christes saying vnto them, that if we would not suffer the strength and honour of our faith to waxe luke-warme, or rather *kay-colde*, and in maner leese his vigour by scattering our mindes abrode about so many trifiyng thinges, etc.
Sir T. More, Cumfort against Tribulation, fol. 8.

Either they marry their children in their infancy, when they are not able to know what love is, or else matche them with inequality, ioyning burning sommer with *keacold* winter, their daughters of twenty years olde or vnder to rich cormorants of three score or vpwards.
J. Lane, Tell-Trothes New Yeares Gift (1593), p. 5 [(Shak. Soc.).

Poor *key-cold* figure of a holy king!
Pale ashes of the house of Lancaster!
Shak., Rich. III., i. 2, 5.

Her apostolick vertu is departed from her, and hath left her *Key-cold*. *Milton*, Church-Government, ii. 3.

key-color (kē′kul″ọr), *n.* In *painting*, a leading color in a picture or composition.

key-desk (kē′desk), *n.* In *organ-building*, the desk-like case in which the keyboards and the stop-knobs are contained. The position of the key-desk with reference to the organ proper may be various, especially when the action is extended, or when pneumatic or electrical appliances are employed.

key-drop (kē′drop), *n.* A keyhole-guard of the modern form, usually attached to the escutcheon by a pivot and falling by its own weight to cover the keyhole.

keyed (kēd), *a.* [< *key*[1] + *-ed*[2].] 1. Having keys, as a musical instrument: as, a *keyed* flute or trombone; a *keyed* cithara or harmonica. See *key*[1], 4 (*a*) and (*b*).—2. Set or pitched in a particular key. See *key*[1], *v. t.*, 2.—**Keyed-stop violin.** See *key-stop*.—**Keyed violin**, a musical instrument similar in shape to a pianoforte, having strings and a keyboard, but the tone being produced by the action of little horsehair bows pressed against the strings by the keys.

key-fastener (kē′fas″nėr), *n.* 1. Anything used to prevent the turning of a key, as a loop of wire hung over the door-knob and passed through the bow of the key.—2. A tapered or wedge-shaped piece of metal which holds the breech-block or breech-plug of a gun firmly closed when it is inserted in the seat: a modification of the grip-fastener.

key-file (kē′fīl), *n.* A flat file of a uniform section throughout, used by locksmiths.

key-fruit (kē′frōt), *n.* Same as *samara*.

key-guard (kē′gärd), *n.* Same as *keyhole-guard*.

key-harp (kē′härp), *n.* A musical instrument similar in shape and action to a pianoforte, but having tuning-forks in place of strings.

key-head (kē′hed), *n.* A head, as of a bolt, so shaped as to serve to bind or lock the object to which it is attached.—**Key-head bolt.** See *bolt*[1].

keyhole (kē′hōl), *n.* 1. A hole or aperture in a door or lock for receiving a key.

Make the doors upon a woman's wit, and it will out at the casement; shut that, and 'twill out at the *key-hole*.
Shak., As you Like it, iv. 1, 164.

But through the *Key-holes* and the Chinks of Doors,
And thro' the narrow'st Walks of crooked Pores,
He [Michael] past.
Cowley, Pindaric Odes, xiv. 15.

2. In *carp.*, a hole or excavation passing through beams intended to be joined together, to receive the key which fastens them.—3. A small piece of water connected with a lake or other larger body; a little lake or bay. [New Brunswick.]

keyhole (kē′hōl), *v. i.*; pret. and pp. *keyholed*, ppr. *keyholing*. [< *keyhole*, *n.*] To strike lengthwise, cutting in the target a hole which resembles a keyhole: said of a bullet in target-shooting. *Reynolds*.

keyhole-guard (kē′hōl-gärd), *n.* A sort of shield to cover a keyhole when the key is not inserted. Also *key-guard*.

keyhole-limpet (kē′hōl-lim″pet), *n.* A gastropod of the family *Fissurellidæ*. There are several genera, as *Fissurella*, *Emarginula*, and others. These limpets derive their name from a perforation resembling a keyhole at the apex of the shell. See cut under *Fissurellidæ*.

keyhole-saw (kē′hōl-sâ), *n.* A narrow, slender saw used for cutting out sharp curves, such as those of a keyhole: same as *compass-saw*.

keynard†, *n.* A variant of *caynard*.

key-note (kē′nōt), *n.* 1. In *music*, the tone on which a key (tonality) is founded; a tonic. See *key*[1], 7 (*b*). Hence—2. A central principle or idea; the pivotal point in a system, a composition, or a course of action; a controlling thought.

We have had, first of all, that remarkable discourse on Self-Limited Diseases, which has given the *keynote* to the prevailing medical tendency of this neighborhood.
O. W. Holmes, Med. Essays, p. 182.

key-pattern (kē′pat″ėrn), *n.* See *meander* and *fret*[3], 2.

key-piece (kē′pēs), *n.* A log which, caught by a rock or other obstruction in a stream, causes a jam of logs. [U. S.]

key-pin (kē′pin), *n.* In an organ or pianoforte, a pin which passes through a key of the keyboard and on which the key plays as on a pivot or center, so that when the front of the key is depressed by the finger the part on the other side of the pin, called the *key-tail*, rises. In each key one such pin is inserted.

key-pipe (kē′pīp), *n.* In a lock, a pipe or tube in which the key turns.

key-plate (kē′plāt), *n.* In *carp.*, same as *escutcheon*, 2 (*b*).

key-point (kē′point), *n.* That point of a military position, intrenched or otherwise, in which its principal strength lies, and the loss of which would force the assailed to retire.

key-ring (kē′ring), *n.* 1. A finger-ring from which projects a tongue or blade which is either fixed or movable on a hinge, and serves as the key to a lock. Such key-rings were formerly common, and were often of rich design.—2. A ring used for keeping a number of keys together by being passed through their bows.

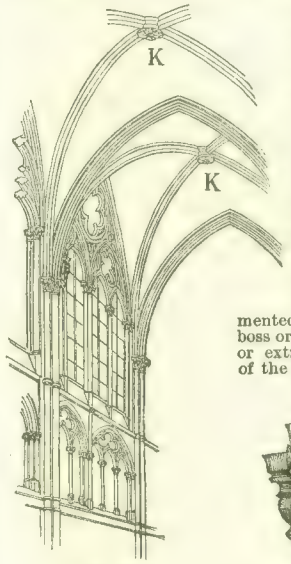
keyry, keiri (kē′ri), *n.* [Also spelled *keri*, *keyri*: *cheiri*, the specific name, < Pers. *khīrū*, gillyflower.] The wallflower, *Cheiranthus cheiri*.

Keys (kēz), *n. pl.* [From the first part of the Manx *kiare-as-feed*, four-and-twenty, designating the number of representatives, < *kiare*, four (= Gael. *ceithir* = Ir. *cethir*, etc., = E. *four*), + *as*, and, + *feed*, twenty (= Gael. *fichead* = Ir. *fiche*, etc., = E. *twenty*).] A contraction of *House of Keys*, the name of the body of twenty-four representatives which constitutes the lower branch of the legislature (Court of Tynwald) of the Isle of Man.

A local parliament, called the *House of Keys*, an assembly far in advance of the other parliament belonging to the neighboring island, in this respect—that the members dispensed with the people, and solemnly elected each other. *Wilkie Collins*, Armadale, ii. 3.

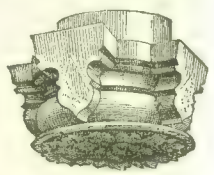
The *Keys* were at one time self-elected, but in 1866 they consented to popular election. *Encyc. Brit.*, XV. 452.

For the purposes of finance bills the [Manx] assembly (*House of Keys*) and the council sit together but vote separately. The Governor presides, as the English king did in his Great Council.
J. Bryce, American Commonwealth, I. 216, note.



keysar†, *n.* See *kaiser*[1].

key-seat (kē′sēt), *n.* A key-bed.



keyship (kē′ship), *n.* [< *key*[1] + *-ship*.] Same as *tonality*.

key-signature (kē′sig″nā-tūr), *n.* In *musical notation*, the sharps or flats placed at the head of the staff to indicate the tonality of the piece and the black digitals to be used in performing it upon the keyboard. See *key*[1], 7 (*b*), and *signature*.

keystone (kē′stōn), *n.* 1. The stone of an arch (typically the uppermost stone), which, being the last put in, is regarded as keying or locking the whole structure together; the stone at the apex of an arch. In Roman and Renaissance arches the keystone is very commonly sculptured as a decorative feature. In groined medieval vaults the keystone at the intersection of the ribs at the summit of the vault is usually ornamented with a sculptured boss or pendant. In a true or extradosed arch no one of the voussoirs is more important to the stability of the structure than any other. See *arch*[1], *n.*, 2.

K, *K*, Keystones.

Keystone.

(From Viollet-le-Duc's "Dict. de l'Architecture.")

'Tis the last *key-stone*
That makes the arch, the rest that there were put
Are nothing till that comes to bind and shut.
B. Jonson, To Sir Edward Sackville.

That hour o' night's black arch the *key-stane*.
Burns, Tam o' Shanter.

Hence—2. A supporting principle; the chief element in a system; that upon which the remainder rests or depends.

The tenet of predestination was the *keystone* of his religion. *Macaulay*, Hist. Eng., vii.

In a very interesting letter of Gauss to W. Weber, he refers to the electrodynamic speculations with which he had been occupied long before, and which he would have published if he could then have established that which he considered the real *keystone* of electrodynamics, namely the deduction of the force acting between electric particles in motion from the consideration of an action between them, not instantaneous, but propagated in time, in a similar manner to that of light.
Clerk Maxwell, Elect. and Mag., II. 435.

3. In *chromolithography*, the first stone on which the picture is drawn or photographed, to serve as an outline guide in preparing the other stones for the colors, a copy of the keystone being made on each stone for printing a single color. See *lithography*.

A drawing of the subject, in outline, on transfer tracing-paper, is made in the ordinary way; when transferred to a stone, this drawing is called the *key-stone*, and it serves as a guide to all the others. *Ure*, Dict., III. 135.

4. In a Scotch lead-smelting furnace, a block of cast-iron used to close up the space at each end of the forestone, and to fill up the space between the forestone and the back part of the furnace.—**Keystone State**, the State of Pennsylvania: so called because, in the geographical order of the original thirteen States of the American Union, Pennsylvania occupies the middle (seventh) place. This order is represented by an arch of thirteen stones, with Pennsylvania as the keystone.

key-stop (kē′stop), *n.* A digital or key so fitted to a violin as to control the stopping of the strings. A violin provided with key-stops is called a *key-stop* or *keyed-stop violin*.

key-tail (kē′tāl), *n.* In an organ or pianoforte, that part of the keys of a manual which is beyond the key-pin, and which rises when the front of the key is depressed.

key-tone (kē′tōn), *n.* Same as *key-note*, 1.

key-trumpet (kē′trum″pet), *n.* A trumpet in which the length of the vibrating column of air, and thus the pitch of the tone, is controlled by holes in the side of the tube, which are opened and closed by means of levers or keys.

key-valve (kē′valv), *n.* In *music*, the pad or valve-plug which closes an aperture on the side of the tube of a wind-instrument. *E. D.*

keyway (kē′wā), *n.* A mortise made for the reception of a key; a slot in the round hole of a wheel for the reception of the key whereby the wheel is secured to the shaft. *E. H. Knight.*

keywood† (kē′wụd), *n.* [ME., < *key*[2] + *wood*[1].] Wood landed at, and perhaps sold from, a quay.

That better gouernaunce and rule be hadd, and better ouersight, vppon *keywood*, crates, and colez, and bagges to mete hem with. *English Gilds* (E. E. T. S.), p. 383.

key-word (kē′wėrd), *n.* A word which serves as a key, guide, or explanation to the meaning, use, or pronunciation of other words, or to other matters.

These [books] are of poets, indicated by *key-word* P.; prose writers, *key-word* P. W. *Science*, XIII. 168.

The *key-word* of life is "Thy will be done."
G. S. Merriam, S. Bowles, II. 66.

K. G. An abbreviation of *Knight of the Garter*. See *garter*.

K. G. F. An abbreviation of *Knight of the Goiden Fleece*. See *fleece*.

kh. A digraph not occurring in native English words, or words of other Teutonic, Romance, Latin, or Greek origin, but common in the transliteration of Arabic, Persian, Hindustani, and other Oriental words, in which it usually represents an aspirated *k* (*k* + *h*), or else a palatal equivalent to the Scotch and German *ch* (ċh).

khaftan, *n.* See *caftan*.

khair-gum (kīr′gum), *n.* [Hind. *khair*, < Skt. *khadira*.] A gum yielded by the khair-tree.

khair-tree (kīr′trē), *n.* [< Hind. *khair* + E. *tree*.] An East Indian tree, *Acacia Catechu*. From its heart-wood is extracted the true catechu, and a gum resembling gum arabic exudes from its bark. Its wood is hard and durable.

khakan (kä-kän′), *n.* [Pers. (> Turk.) *khāqān*, an emperor, a king, sovereign. Hence Russ. *kaganŭ*, ML. *chacanus, cacanus, chaganus, caganus*, MGr. *χαγᾶνος*, emperor or khan (of Tatary). The word *khan*[1] is different.] An emperor; a king.

An embassy from Justin to the *Khakán*, or Emperor, mentions the Tartarian ceremony of purifying the Roman Ambassadors by conducting them between two fires.
Sir W. Jones, Histories and Antiquities of Asia, p. 118.

★ **khaki** (kä′ki), *a.* and *n.* [Hind. *khākī*, dusty, earthy, < *khāk*, dust, earth, ashes.] **I.** *a.* Dust-colored or clay-colored.

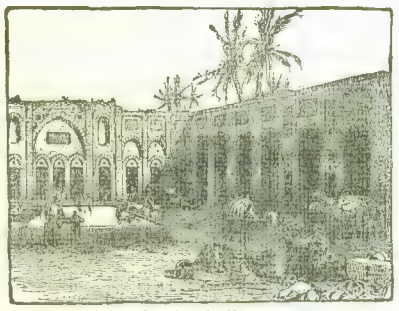
It is a fawn-colqured glove, similar to those now being sold in London shops as *khaki* deerskin, but with handsome embroidery and fringe. *N. and Q.*, 7th ser., VII. 369.

II. *n.* A twilled, closely woven, strong cotton fabric, suitable for army clothing in tropical regions: usually dyed a brownish or tan tint.

khaleb (kal′eb), *n.* [Turk.] A measure of length, the Turkish pik, or pik halebi. According to the Russian Commission, it is 26.89 English inches; but the khaleb of Moldavia is 26.43 English inches. That of Wallachia contains by law ∎ feet 2⅜ inches, English measure.

khalif, khaliff, *n.* See *calif*.

khamsin (kam′sin), *n.* [Also *kamsin;* < Turk. Ar. *khamsin*, a simoom (see def.), the fifty days preceding the vernal equinox, < Ar. *khamsīn*, fifty, fiftieth, < *khams, khamse*, five.] A hot southeast wind that blows regularly in Egypt for about fifty days, commencing about the middle of March.



khan[1] (kän, kan, or kân), *n.* [Formerly also *kawn, kaun, can*, < ME. *kan, cane, chan, chane, cham* = F. *kan, khan* = G. *chan, khan* = Russ. *khanŭ* = MGr. *χάνης, κάνης* = Turk. *khān*, < Pers. *khān*, a prince; of Tatar origin.] The title of sovereign princes in Tatar countries, whose dominions are known as khanates, and of nomadic chiefs and various state officers in Persia; also, one of the titles of the sultan of Turkey. The title has degenerated in dignity. In Persia and Afghanistan it has now a vague value, about equivalent to *esquire*, and in India it has become a common affix to the names of respectable Hindus, especially of those who claim a Pathan descent.

But estwarde on the see syde
A prynce there is that rulyth wyde,
Callyd the *Canc* of Catowe [Cathay].
Interlude of the Four Elements (ed. Halliwell, 1848).

Both of them seruing the great *Can* in those warres.
Purchas, Pilgrimage, p. 437.

In Xanadu did Kubla *Khan*
A stately pleasure-dome decree,
Where Alph, the sacred river, ran.
Coleridge, Kubla Khan.

khan[2] (kan), *n.* [Formerly also *kawn, kaun, kane, cane, hane;* < Turk. *khān* = Hind. *khāna*, < Pers. *khāna*, a house, dwelling.] One of a class of unfurnished inns in Turkish and some other Oriental lands, generally belonging to the government. Some are designed for the gratuitous use of travelers and pilgrims; others, of a better kind, for the accommodation of traders and their trains and wares, the traders paying charges.

Interior of a Khan.

The *Cane* lockt up by the Turks at noons and at nights, for feare that the Franks should suffer or offer any outrage. *Sandys*, Travailes, p. 90.

The *khan* [in Syria] is usually built around a courtyard, with sheds or booths for the animals occupying the ground floor, while the travelers may take what chance there is for sleep on the more elevated platforms.
The Century, XXXV. 817.

khanate (kan′āt or kän′āt), *n.* [< *khan*[1] + *-ate*[3].] The dominion or jurisdiction of a khan.

The *khanate* was annexed to Muscovy more than three centuries ago. *D. M. Wallace*, Russia, p. 4.

khanjee (kan′jē), *n.* [Repr. Hind. *khangī, khanagī*, Beng. *khānki*, belonging to the house, < Pers. *khānagī*, belonging to the house, < *khāna*, house: see *khan*[2].] The keeper of a khan or Oriental inn.

Everybody looks pleased [at a departure from a khan] except the *khanjee*. *J. Baker*, Turkey, p. 220.

khansamah, khansuma (kän-sä′mä, -su′mä), *n.* [Hind. *khānsāmān:* see *consumah*.] In India, a butler or house-steward.

khanum (kä′nöm), *n.* [Also *canum;* < Turk. *khānim* (Ar. *khānam*), a lady, < *khān*, a lord: see *khan*[1].] A lady of rank; the feminine of the title *khan*.

khass (kas), *a.* [Hind. *khass*, private, special.] Special; reserved; also, royal: as, *khass* revenues; *khass* lands.

khatzum-oil (kat′zum-oil), *n.* [< E. Ind. *khatzum* + E. *oil*.] An oil obtained in India from the composite plant *Vernonia anthelmintica*.

khawass (ka-was′), *n.* Same as *cavass*.

Khaya (kā′yạ), *n.* [NL. (Adrien de Jussieu, 1830), from the Wolof language of Senegal.] A genus of polypetalous plants of the family *Meliaceæ*, tribe *Swieteniеæ*, distinguished from *Swietenia*, the true mahogany, in having 4 instead of 5 petals, an 8-lobed instead of a 10-toothed stamen-tube, and compressed instead of winged seeds. They are tall trees with wood resembling mahogany, abruptly pinnate leaves of few leaflets, and crowded panicles of flowers at the ends of the branchlets. Two species are now recognized, only one of which, however, has acquired any economic importance. This is the *K. Senegalensis*, a native of Senegambia, which is called *Senegal mahogany*, and also sometimes *cailcedra*.

Khayeæ (kā′yē-ē), *n. pl.* [NL. (Reichenbach, 1837), < *Khaya* + *-eæ*.] A subdivision ("section") of meliaceous plants of the tribe *Swieteniеæ*, founded on the genus *Khaya*, not generally recognized by modern botanists.

khedival (ke-dē′val), *a.* [< *khedive* + *-al*.] Of or pertaining to the khedive of Egypt. Also *khedivial*.

khedive (ke-dēv′), *n.* [= F. *khédive*, < Turk. *khidīv*, < Pers. *khidīw, khadīw, khudīw*, a king, lord, great prince, sovereign, *khidēwi*, the viceroy of Egypt.] The title of the viceroy of Egypt, assumed by Ismail Pasha in 1867, under a convention with his suzerain the Sultan of Turkey: an agreement made between them in 1866 had established for the first time hereditary succession in his family.

khedivial (ke-dē′vi-al), *a.* Same as *khedival*.

khenna (ken′ä), *n.* Another form of *henna*.

khilat, *n.* See *killut*.

khirkah (kėr′kä), *n.* A robe used by dervishes, fakirs, or ascetics in Moslem countries; a religious habit made of shreds and patches. *Hughes*, Diet. Islam.

khitmutgar (kit′mut-gär), *n.* [Also *kitmutgar, khidmutgar*, and *kitmudgar;* < Hind. *khidmatgār*, a servant, butler, < *khidmat*, service, attendance, + *-gār*, denoting an agent.] In India, a servant, usually Mohammedan, whose duty it is to wait at table; an under-butler.

It [an English child] slaps the mouth of a gray-haired khansamah with its slipper, and dips its poodle's paws in a Mohammedan *khitmutgar's* rice.
J. W. Palmer, The New and the Old, p. 342.

Khivan (kē′vạn), *a.* [< *Khiva* (see def.) + *-an*.] Of or pertaining to Khiva, a city and khanate on the west bank of the Oxus in central Asia, temporarily occupied by the Russians in 1873, but now nominally independent.

The collection of the indemnity falls upon the *Khivan* authorities. *Encyc. Brit.*, XIV. 63.

Khlistie, *n.* [Russ., < *khlestatĭ, khluistatĭ*, lash, switch, < *khluistŭ*, a whip, switch.] A powerful Russian sect, the members of which called themselves People of God. They were followers of one Daniel, who declared himself to be a manifestation of the Almighty, and inculcated twelve commandments, including celibacy and total abstinence from strong drinks. The members are called *Lashers* and *Danielites*.

kholah (kō′lạ), *n.* [E. Ind.] The East Indian jackal, *Canis aureus*.

khuskhus (kus′kus), *n.* [Hind.] Same as *cuscus*[2].

khutbah (kụt′bä), *n.* [Ar. *khutbah, khotbeh*, an address.] A Mohammedan prayer and sermon or formal oration in Arabic delivered in the mosques on Fridays at the beginning of meridian prayer. It is regarded by Mussulmans as the most sacred part of their service, and the recital of his name in this oration is a high prerogative of the sultan or ameer. In India the expression "Ruler of the Age" is substituted. Also spelled *khotbah*.

ki (kē), *n.* [Hawaiian.] A liliaceous plant, *Tætsia terminalis*, which is distributed through the Pacific islands, the Malay archipelago, and in China. In the Hawaiian islands its root is baked and eaten. It also affords an intoxicating drink by fermentation or distillation. The natives regard the plant as sacred, and place it around graves. Elsewhere in Polynesia the name is *ti*.

kiabooca-wood (kī-ạ-bō′kạ-wụd), *n.* [< Malay *kayu-buku* + E. *wood*[1].] An ornamental wood exported from Singapore and produced in many of the Malayan islands and New Guinea. It appears to be merely the burl-wood of the same tree which affords the lingo or lingoa-wood, namely *Pterocarpus Indicus* of the family *Fabaceæ*. It is colored in shades of yellowish red beautifully mottled with curls or knots of a darker hue. It is much used in the East and to some extent in Europe for inlaying and the manufacture of small articles, such as snuff-boxes. Also *Amboyna wood, kiabouca, kiabocca, kyabuca*, etc. See *Pterocarpus*.

kiack (ki-ak′), *n.* [Burmese.] In Burma, a Buddhist temple.

The people [of Pegu] send rice and other things to that *kiack* or church of which they be.
Hakluyt's Voyages, II. 261.

When they enter into their *Kiack*, at the dore there is a great iarre of water, with a Cocke or a Ladle in it, and there they wash their feete. *Purchas*, Pilgrimage, p. 469.

kiak, *n.* See *kayak*.

kiang (kyâng), *n.* [Chinese.] A river: a part of many place-names in China and neighboring countries: as, Yang-tse-*kiang* (that is, the river Yang-tse). Also spelled *keang*.

kiaugh (kyâch), *n.* [Origin obscure.] Toil; trouble; anxiety. [Scotch.]

The lisping infant, prattling on his knee,
Does a' his weary *kiaugh* an' care beguile.
Burns, Cottar's Saturday Night.

Kibara (ki-bā′rạ), *n.* [NL. (Endlicher, 1837), from the Javanese name of *K. coriacea*.] A genus of dicotyledonous apetalous plants belonging to the family *Monimiaceæ*, having unisexual, generally monœcious flowers, the male with a perianth of 4 connivent lobes, and from 5 to 8 stamens in two series, the 4 outer opposite the lobes. They are trees or shrubs with opposite leaves and small flowers in cymes or short panicles. The fruit consists of numerous ovoid drupes resting upon a broad disk-shaped receptacle. About fifteen species are known, inhabiting the East Indies, the Malay archipelago, and Australia. *K. coriacea* is a large tree of Celebes and Java, having large, opposite, ovate-oblong leaves. *Wilkiea macrophylla* of New South Wales and Queensland, referred to this genus by some authors, is an evergreen tree called the *black, Australian*, or *Queensland inkberry*.

kibbal, *n.* See *kibble*[2].

kibble[1] (kib′l), *v.;* pret. and pp. *kibbled*, ppr. *kibbling*. [Perhaps an unassibilated and variant freq. of *chip*[1], *v.*] **I.** *trans.* 1. To bruise or grind coarsely, as malt, beans, etc. *Salop.*—2. To clip roughly, as a stone.

II. *intrans.* To walk lame. [Prov. Eng.]

kibble[2], **kibbal** (kib′l, kib′al), *n.* [Origin uncertain.] 1. The bucket of a draw-well, or of the shaft of a mine. [Prov. Eng.]—2. A stick with a curve or knob at the end, used in playing the game of nurspell.

kibble-chain (kib′l-chān), *n.* The chain that draws up the kibble or bucket from a mine.

One day at the shaft's mouth, reaching after the *kibble-chain*—maybe he was in liquor, maybe not, the Lord knows, but—I didn't know him again, sir, when we picked him up. *Kingsley*, Yeast, vii.

kibbler (kib′lėr), *n.* One who or that which kibbles or cuts; especially, a machine for grind-

ing or cutting beans and peas for cattle. [Prov. Eng.]

kibbling (kib'ling), *n.* [Appar. verbal n. of *kibble*[1], *v.*, as a small bit cut off.] A part of a small fish used as bait by fishermen on the banks of Newfoundland. Also spelled *kibling*.

kibdelophane (kib-del'ō-fān), *n.* [< Gr. *κίβδηλος*, spurious, base, + *-φανής*, appearing, < *φαίνεσθαι*, appear.] A variety of ilmenite or titanic iron ore.

kibe (kīb), *n.* [Appar. < W. *cibi* (fem. *y gibi*), a chilblain; cf. *cibwst*, chilblains, prob. < *cib*, a cup, + *gwst*, a humor, malady.] A chap or crack in the flesh, caused by cold; an ulcerated chilblain, as on the heel.

My followers grow to my heels like *kibes* — I cannot stir out of doors for 'em. *Chapman*, Monsieur D'Olive, v. 1.

Fal. I am almost out at heels.
Pist. Why, then, let *kibes* ensue.
Shak., M. W. of W., i. 3, 35.

kibed (kībd), *a.* [< *kibe* + *-ed*[2].] Chapped; cracked with cold; affected with chilblains: as, *kibed* heels.

Kibessia (ki-bes'i-ä), *n.* [NL. (A. P. de Candolle, 1828), from the Javanese name of the plant.] A genus of dicotyledonous archichlamydeous (choripetalous) plants belonging to the family *Melastomaceæ*, type of the tribe *Kibessieæ*, characterized by having the irregular somewhat 4-lobed limb of the hood-shaped calyx warty and spinous (the spines sometimes barbed at the tip), 8 stamens, and a 4-celled ovary. They are smooth shrubs with angled or winged branches, coriaceous, oblong-ovate, 3-nerved leaves, obtuse at the attenuate apex, and large blue flowers on axillary, 1- to 3-flowered peduncles. There are sixteen species, inhabiting the Malay peninsula and archipelago and the Philippine Islands.

Kibessieæ (kib-ē-sī'ē-ē), *n. pl.* [NL. (Naudin, 1859), < *Kibessia* + *-eæ*.] A tribe of melastomaceous plants, typified by the genus *Kibessia*, now treated as distinct from the tribe *Astronieæ*.

kibin (kib'in), *n.* [W. *cibym*.] A Welsh corn-measure, equal to half a bushel.

kibitka (ki-bit'kä), *n.* [Russ. *kibitka*, the tilt or cover of a wagon, a tilt-wagon, a Tatar tent; of Tatar origin.] 1. A circular tent used by the Kirghiz and other Tatars. It is about 12 feet in diameter, with a rounded top. The sides are formed of collapsible or folding lattice-work, and the roof of slender, slightly curved poles; both sides and roof are covered with thick felt. There is an opening for smoke and a flap for the door.

Kibitka, or Kirghiz Tent.

2. A Russian cart or wagon with a rounded top, covered with felt or leather. It serves as a kind of movable habitation, and is used for traveling in winter.

Formerly the journey from Novogorod to Moscow was most painfully accomplished in ninety hours in a *kibitka* — a cart, or rather a cradle for two, in which the driver . . . sat close to the horses' tails, the hinder part of the cart being shaded by a semicircular hood of laths covered with birch bark. These vehicles have no springs, and are fastened together by wooden pegs. The luggage is placed at the bottom, and covered by a mattress, upon which an abundant supply of feather-beds alone renders the jolting endurable. *A. J. C. Hare*, Russia, v.

kiblah (kib'lä), *n.* [Ar. *qibla*, that which is opposite, the South, < *qabl*, before, *qabala*, be opposite.] The point toward which Mohammedans turn in prayer. This was, according to Mohammedan authorities, at first the Kaaba in Mecca, but after the flight to Medina it was for some time Jerusalem, and then again changed to Mecca. Any object of strong desire or devotion is also spoken of as a *kiblah*.

There have been few incidents more disastrous in their consequences to the human race than this decree of Mohammed changing the *Kibla* from Jerusalem to Mekka. Had he remained true to his earlier and better faith, the Arabs would have entered the religious community of the nations as peacemakers, not as enemies and destroyers. *Osborne*, Islam under the Arabs, p. 58.

kibosh (ki-bosh'), *n.* [Also *kybosh*; a slang word, of obscure origin.] The form, manner, style, or fashion of something; the thing: as, that is the proper *kibosh*; full dress is the correct *kibosh* for the opera. See the supplement. [Slang.]

kiby (kī'bi), *a.* [< *kibe* + *-y*[1].] Affected with kibes or chilblains.

And he haltith often that hath a *kyby* hele.
Skelton, Garlande of Laurell.

kichelt, kitchelt, *n.* [< ME. *kichil, kechel*, < AS. *cicel*, a cake; prob. akin to *cake*[1], *cooky*.] A small cake. Also spelled *kichil*.—**God's kichel.** See *God*[1].

Gif us a busshel whete, malt, or reye,
A *Goddes kechyl* [var. *kichil*], or a trype of chese.
Chaucer, Summoner's Tale, l. 39.

★**kick** (kik), *v.* [ME. *kiken*, a word of imitative origin. Cf. *hit, tick, flick*, etc. The W. *cicio, v.*, and Gael. *ceig, n.*, are from Eng.] **I.** *trans.* 1. To give a thrust or blow to with the foot; strike with the foot.

And by mute
Disdain *kicks* back what Words could not refute.
J. Beaumont, Psyche, vi. 34.

Perhaps it was right to dissemble your love,
But — why did you *kick* me down stairs?
J. P. Kemble, The Panel, i. 1.

There he watches yet!
There like a dog before his master's door!
Kick'd, he returns. *Tennyson*, Pelleas and Ettarre.

2. To strike in recoiling: as, an overloaded gun *kicks* the shoulder.

Some muskets so contrive it
As oft to miss the mark they drive at,
And, though well aimed at duck or plover,
Bear wide, and *kick* their owners over.
J. Trumbull, McFingal, i. 96.

3. In *printing*, to operate or effect by impact of the foot on a treadle: used with relation to some kinds of small job-presses: as, to *kick* a Gordon press; to *kick* off a thousand impressions. [U. S.]—4. To sting, as a wasp. [Prov. Eng.]—5. To reject, as a suitor; jilt. [Vulgar, southern U. S.]—**To kick one's heels.** See *heel*[1].—**To kick the beam.** See *beam*.—**To kick the bucket.** See *bucket*.—**To kick up a row** or **a dust.** See *dust*[1].

II. *intrans.* 1. To strike out with the foot; have the habit of striking with the foot: as, a horse that *kicks*.

For trewely ther is noon of us alle,
If any wight wol clawe us on the galle,
That we nel *kike*, for he seith us sooth.
Chaucer, Wife of Bath's Tale, l. 85.

They contemn all physic of the mind,
And, like galled camels, *kick* at every touch.
B. Jonson, Every Man out of his Humour, Ind.

2. To thrust out the foot with violence, as in wantonness, resistance, anger, or contempt.

Then trip him, that his heels may *kick* at heaven.
Shak., Hamlet, iii. 3, 93.

Hence—3. To manifest opposition or strong objection; offer resistance. [Now chiefly slang.]

Wherefore *kick* ye at my sacrifice and at mine offering, which I have commanded? 1 Sam. ii. 29.

You hold the woman is the better man:
A rampant heresy, such as, if it spread,
Would make all women *kick* against their Lords.
Tennyson, Princess, iv.

In a late number you maintain strongly that it is the duty of persons suffering from overcharges, insolence, and other forms of oppression to *kick*. You urge that the oppressor argues from our American charity, "bearing all things" with silent fortitude, that we, the people, rather like it; and you insist that a part of our debt to society is invariably, systematically, quickly, continuously, and powerfully "to *kick*." *The Nation*, XLVIII. 137.

4. To recoil, as a musket or other firearm.—5. To stammer. *Devonshire Dial.*, p. 72. [Prov. Eng.]—**To kick against the pricks.** See *prick*.—**To kick off,** in *foot-ball*, to give the ball the first kick which starts the play.—**To kick over the traces,** to throw off ★control; become insubordinate. [Colloq.]

kick (kik), *n.* [< *kick, v.*] 1. A blow or thrust with the foot.

A *kick* that scarce would move a horse
May kill a sound divine. *Cowper*, Yearly Distress.

2. In *foot-ball:* (*a*) The right of or a turn at kicking the ball. (*b*) One who kicks or kicks off.

He's . . . the best *kick* and charger at Rugby.
T. Hughes, Tom Brown at Rugby, i. 5.

3. The recoil of a firearm when discharged.

But he [Mr. Lowe] and I must alike be prepared to stand the recoil of our own guns, even though the *kick* may be inconvenient. *Gladstone*, Gleanings, I. 134.

4. A sudden and strong objection; unexpected resistance. [Slang.]—5. The projection on the tang of the blade of a pocket-knife by which the blade is prevented from striking the spring in the act of closing.—6. A cleat or block on the stock-board of a brick-molders' bench, which serves to make a key in the brick.—7. A die for bricks.—8. Fashion; novelty; thing in vogue. [Slang, Eng.]

'Tis the *kick*, I say, old un, so I brought it down.
Dibdin.

9. The indentation or inner protuberance of a molded glass bottle. [Slang, Eng.]

What it [a bottle] holds if it's public-house gin is uncertain: for you must know, sir, that some bottles has great *kicks* at their bottoms.
Mayhew, London Labour and London Poor, II. 511.

10. *pl.* Trousers. [Slang, Eng.]—**Drop kick,** in *foot-ball*, a kick made as the ball, dropped from the hand, rises with a bound from the ground.

Tom . . . performed very creditably, after first driving his foot three inches into the ground, and then nearly kicking his leg into the air, in vigorous efforts to accomplish a *drop-kick* after the manner of East.
T. Hughes, Tom Brown at Rugby, i. 5.

Place kick, in *foot-ball*, a kick made while the ball is stationary on the ground.

kickable (kik'a-bl), *a.* [< *kick* + *-able*.] That may be kicked; deserving to be kicked.

The epitome of nothing, fitter to be kickt, if shee were of a *kickable* substance, than either honour'd or humour'd.
N. Ward, Simple Cobler, p. 26.

Rigg was a most unengaging, *kickable* boy.
George Eliot, Middlemarch, xli.

kickee (ki-kē'), *n.* [< *kick, v.*, + *-ee*[1].] One who is kicked. [Rare and jocose.]

He . . . was seen . . . kicking him at the same time in the most ignominious manner; and in return to all demands on the part of the *kickee* to know the reason for such outrage, simply remarking "You are Pigviggin."
Savage, R. Medlicott, iii. 8.

★**kicker** (kik'ėr), *n.* 1. One who or that which kicks.

Cham. 'Twas some forc'd match,
If he were not kick'd to th' church o' the wedding day,
I'll never come at court. Can be no otherwise.
Perhaps he was rich; speak, Mistress Lapet, was't not so?
Mist. Lapet. Nay, that's without all question.
Cham. Oho, he would not want *kickers* enow then.
Fletcher (and another?), Nice Valour, i.

2. One who offers strong, and especially unexpected or perverse, opposition; one who objects or opposes; a bolter. Cf. *kick, v. i.*, 3; *n.*, 4.

There is of course a class of chronic *kickers* who are always finding fault. *Elect. Rev.* (Amer.), XIII. 6.

kickie-wickie† (kik'i-wik'i), *a.* and *n.* Same as *kicksy-wicksy*.

kickish (kik'ish), *a.* [< *kick* + *-ish*[1].] Irritable. [Prov. Eng.]

Is Majestas Imperii growne so *kickish* that it cannot stand quiet with Salus Populi, unlesse it be fettered?
N. Ward, Simple Cobler, p. 59.

kickle (kik'l), *a.* Uncertain; unsteady; fickle; tottering. Also *keckle*. *Halliwell.* [Prov. Eng.]

kick-off (kik'ôf), *n.* The first kick in a game of foot-ball.

Away goes the ball spinning towards the school goal; seventy yards before it touches ground, and at no point above twelve or fifteen feet high, a model *kick-off*.
T. Hughes, Tom Brown at Rugby, i. 5.

kickshaw (kik'shâ), *n.* [Prop. *kickshaws*, sing.; formerly also *kickshose, kickshoes, keckshose, kekshoes* (simulating *kick* + *shoes*), earlier *quelkchose*, orig. *quelquechose*, < F. *quelque chose*, something: see *quelquechose*.] 1. Something fantastical or uncommon; something trifling, not otherwise named or described, or that has no particular name.

Sir And. . . . I delight in Maskes and Reuels sometimes altogether.
Sir To. Art thou good at these *kicke-chawses*, Knight?
Shak., Twelfth Night (fol. 1623), i. 3, 122.

2. A light, unsubstantial dish, or kind of food.

Salads, broths, sauces, stewed meats, and other *kickshaws*.

kicksy-wicksy† (kik'si-wik'si), *a.* and *n.* [Also *kicky-wicky, kickie-wickie*, and *kicksy-winsie, kicksey-winsey, kicksee-winsee*, the second element perhaps a sophisticated form, to bring in an etym. explanation from *wince* (formerly also *winse*); prob. a mere redupl. of *kick*, varied in the repetition, with term. *-y*[1], or equiv. *-sy*, adj. suffix.] **I.** *a.* Flickering; uncertain; restless.

Perhaps an ignis fatuus now and then
Starts up in holes, stinks, and goes out agen;
Such *kicksy-wicksy* flames shew but how dear
Thy great light's resurrection would be here.
Poems subjoined to *R. Fletcher's* Epigrams.

II. *n.* A man's wife: occurring only in the following passage, where it is used ludicrously and without definite signification:

He wears his honour in a box unseen,
That hugs his *kicky-wicky* here at home.
Shak., All's Well, ii. 3, 297.

kickumbob†, *n.* [Irreg. < *kick* or *kickshaw*, with term. as in *thingumbob*.] A thingumbob; a "what's-its-name." *John Taylor*, 1630.

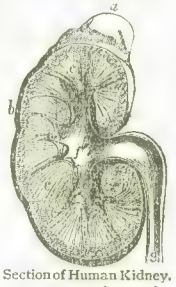
N. Bailey, tr. of Colloquies of Erasmus, II. 161.



This sort of people, that lie in wait, day and night, for our children, and may be considered as a kind of *kidnappers* within the law. *Spectator*, 311.

kidnapping (kid'nap-ing), *n.* [Verbal n. of *kidnap*, *v.*] The act of stealing, abducting, or carrying off a human being forcibly.

The other remaining offence, that of *kidnapping*, being the forcible abduction or stealing away of a man, woman, or child from their own country, and sending them into another, was capital by the Jewish law.
Blackstone, Com., IV. xv.

kidneer†, **kidnere**†, *n.* Middle English forms of *kidney*.

★**kidney** (kid'ni), *n.* [< ME. *kidney, kydney, kidenei*, pl. *kideneris, kideneris*, earlier *kideneiren, kydeneyren;* origin uncertain. Compare *kite*[2] and *neer*[2].] 1. In *anat.*, a glandular structure whose function is the purification of the blood by the excretion of urine; one of the renes or reins; a renal organ. Kidneys are of very various shapes and positions in the body, and often of loosely lobulated structure. In the higher vertebrates they are always paired and of compact figure, tending to become bean-shaped glands, as in man. The kidneys of man are situated in the loins, opposite the upper lumbar vertebræ, behind the peritoneum, embedded in fat, and capped by the adrenals or suprarenal capsules. The left is somewhat higher than the right, which leaves room for the liver. They are purplish-brown in color, about 4 inches long, 2½ broad, and 1½ thick; they weigh about 4½ ounces. Section displays an outer cortical substance, darker and softer than the rest, consisting chiefly of uriniferous tubules and Malpighian corpuscles. (See *corpuscle*.) The inner or medullary substance is composed of numerous distinctly striated conical masses, or Malpighian pyramids, whose bases are directed peripherally, while their apices converge toward the interior, ending in the papillæ, which project into the cavity of the pelvis. There are from 8 to 18 such pyramids, composed mainly of minute straight and looped uriniferous tubules, which proceed from the cortical substance to open on the papillæ. One such papilla, or a set of several papillæ, protrudes into a compartment of the general cavity called a *calyx;* the calyces unite in three infundibula, the beginnings of the general cavity of the kidney, the pelvis, which is also the funnel-shaped beginning of the ureter, the tube by which the urine passes to the bladder. The hilum of the kidney is the place on the median or concave side of the kidney, corresponding to the place of the scar on a bean, where the ureter goes out, and where the vessels and nerves enter. The organs are abundantly supplied with nerves, blood-vessels, and lymphatics. In its minute and essential structure the kidney consists of a great number of branching, looped, and convoluted epithelial tubes (*tubuli uriniferi*), terminating in dilatations, each dilatation enveloping a plexus of blood-vessels and forming a Malpighian body. These tubes, moreover, are abundantly supplied with blood-vessels. Malpighian bodies and tubules both share in the work of secreting, but there is reason to think that the former have to do with the secretion of the water and less important parts of the urine, while the elimination of the nitrogenous waste falls on the tubular epithelium. The kidneys, or, in the singular as a collective noun, the kidney, as an important internal organ whose condition is a more or less accurate index of one's bodily health, and, as formerly thought, of one's "humor" or temperament, was formerly often spoken of (somewhat like *liver, heart, bowels, stomach*, etc.) with reference to one's constitution, temperament, temper, disposition, or inward feelings. As thus used in the quotation from Shakspere, the word has been misunderstood, as if meaning 'sort' or 'kind,' whence that use in later authors.

Section of Human Kidney.
a, suprarenal capsule; *b*, vascular or cortical portion of kidney; *c c*, tubular portion, consisting of cones; *d d*, two of the papillæ, projecting into their corresponding calyces; *e e e*, the three infundibula; *f*, pelvis; *g*, ureter.

Think of that—a man of my *kidney*—think of that; that am as subject to heat as butter; a man of continual dissolution and thaw. *Shak.*, M. W. of W., iii. 5, 116.

Talk no more of brave Nelson, or gallant Sir Sidney,
'Tis granted they're tars of a true British *kidney*.
Song, Newcastle Bellman. (*Brockett.*)

2. Anything resembling a kidney in shape or otherwise, as a potato.

The corn . . . rises again in the verdure of a leaf, in the fulness of the ear, in the *kidneys* of wheat.
Jer. Taylor, Works (ed. 1835), II. 69.

3. *pl.* The inmost parts; the reins.

Curse, curse, and then I goe.
Look how he grins, I 've anger'd him to the *kidneys*.
Fletcher (*and another?*) Nice Valour, iv. 1.

Heavn's bright Torches, from Earth's *kidneys*, sup
Som somwhat dry and heatfull Vapours vp.
Sylvester, tr. of Du Bartas's Weeks, i. 2.

4. In the extract, of doubtful meaning.

It is our custom upon the first coming of the news to order a youth, who officiates as the *kidney* of the coffee house, to get into the pulpit, and read every paper with a loud and distinct voice. *Tatler*, No. 268.

Capsule of the kidney. See *capsule*.—**Floating kidney**, in *pathol.*, a kidney which has become loose and displaced in the abdomen. Also called *movable kidney*.—**Granular kidney.** See *granular*.—**Surgical kidney**, a term somewhat loosely applied to nephritic conditions secondary to mischief further down in the urinary tract, but especially to suppurative pyelonephritis arising from cystitis.

kidney-bean (kid'ni-bēn), *n.* A leguminous plant of the genus *Phaseolus*, especially *Phaseolus vulgaris*, the common twining kidney-bean of the gardens, also called *French bean* and *haricot* (see cut under *haricot*): so called from the shape of the seeds. *P. nanus*, the field- or bush-bean, is perhaps only a variety of the common kidney-bean. The green pods of the common kidney-bean, with their contents, are eaten as a "string-bean," or the dry seeds are baked or boiled.—**Kidney-bean tree**, a plant of either of the leguminous genera *Kraunhia* and *Soia*, especially the American *Kraunhia frutescens* and the Chinese *K. Chinensis* (*Wisteria Chinensis*).—**Wild kidney-bean**, *Phaseolus polystachyus*, a high-climbing bean, with small purple flowers, native in the United States.

kidney-cotton (kid'ni-kot″n), *n.* A South American variety of long-stapled and black-

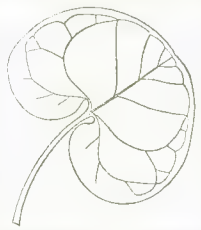
seeded cotton, *Gossypium peruvianum*. Its seeds cohere in kidney-shaped masses of eight or ten. It is a perennial cotton cultivated in Peru.

kidney-form (kid'ni-fôrm), *a.* Same as *kidney-shaped*.

kidney-link (kid'ni-lingk), *n.* In a harness, a coupling for the hames below the collar.

A *kidney link* belonging to harness hames.
Gilder's Manual, p. 103.

kidney-lipt† (kid'ni-lipt), *a.* Hare-lipped.



First, Jollie's wife is lame; the next, loose-hipt,
Squint-ey'd, hook-nos'd, and lastly *kidney-lipt*.
Herrick, Upon Jollie's Wife.

kidney-ore (kid'ni-ōr), *n.* A variety of compact hematite, or red oxid of iron, occurring in reniform masses.

kidney-potato (kid'ni-pō-tā″tō), *n.* One of various kidney-shaped varieties of the common potato.

kidney-root (kid'ni-röt), *n.* The joepye-weed, *Eupatorium purpureum:* in allusion to supposed medicinal properties.

kidney-shaped (kid'ni-shāpt), *a.* Having the shape or form of a kidney; reniform.—**Kidney-shaped leaf**, in *bot.*, a leaf having the breadth greater than the length, and a wide sinus at the base. The margin should be entire, but may be crenate, as in that of ground-ivy.

Kidney-shaped Leaf of *Asarum Europæum*.

kidney-stone (kid'ni-stōn), *n.* A nodule of brown ironstone, traversed by small veins of calcite. Such nodules are common in the Oxford clay, a division of the Middle Oölite, especially near Weymouth in England.

kidney-vetch (kid'ni-vech), *n.* A leguminous herbaceous plant, *Anthyllis vulneraria*, found chiefly in dry hilly ground throughout Europe and in western Asia and northern Africa: so called from its supposed medicinal properties. It is a foot or less high, often tufted, clothed with silky hairs, and has pinnate leaves and yellow or variably colored flowers with a permanent inflated calyx, which are borne in close heads, subtended by large bracts, and paired at the ends of the branches. It is of some economic value as sheep-fodder. Its specific name (from Latin *vulnus*, a wound) suggests a healing property, which, however, it possesses only as do other hairy plants. Also called *lady's-fingers*.

kidneywort (kid'ni-wėrt), *n.* **1.** The plant *Umbilicus Umbilicus*, of the family *Crassulaceæ:* so called from some resemblance of the leaves to a kidney, whence probably it had some repute as a remedy in diseases of the kidneys. It has fleshy, orbicular, more or less peltate leaves, the lower on long stalks. It is common on rocks, walls, etc., in western Europe and the Mediterranean regions. Also called *pennywort* and *navelwort*.

2. A book-name of *Saxifraga stellaris*, the star-saxifrage.

kidnippers (kid'nip″ėrz), *n. pl.* In *gun-molding*, nippers used to make the hoops taut about the mold.

kidsman (kidz'man), *n.*; pl. *kidsmen* (-men). [< *kid's*, poss. of *kid*[1], 5, + *man*.] One who trains young thieves. *Dickens.* [Thieves' slang.]

kief, kiff (kēf, kif), *n.* [Moorish.] A substitute for tobacco prepared for smoking, consisting of the chopped leaves of the common hemp.

The use of tobacco for smoking appears to be unknown in Morocco, while *kief*—prepared from the chopped leaves of common hemp—is almost universally employed for that purpose both by Moors and Berbers.
Journal of a Tour in Morocco, etc., by Hooker and Ball, p. 46.

kiefekil, keffekil (kē'fe-, kef'e-kil), *n.* [< Pers. *kaf*, scum, froth, + *gil*, clay.] A kind of clay; meerschaum.

kie-kie (kē'ā-kē'ā), *n.* [Maori.] A high-climbing shrub, *Freycinetia Banksii*, of the family *Pandanaceæ*, a native of New Zealand. The fruit consists of berries massed on a spadix. When young the spadix, with its bracts, is edible, and is made by the colonists into a jelly tasting like preserved strawberries. The fiber of the stems may possibly be found useful for paper-making.

Kielmeyera (kēl-mī'ėr-ą), *n.* [NL. (Martius, 1824), named for Karl Fr. v. *Kielmeyer*, of Stuttgart, a noted chemist and botanist.] A genus of dicotyledonous plants of the family *Clusiaceæ*, and tribe *Kielmeyereæ*, having free stamens, small anthers, and the numerous broad, flat ovules downwardly imbricated in two series in each cell. They are small resinous shrubs, with evergreen petioled leaves, and showy flowers in terminal racemes or panicles, or rarely solitary. Seventeen species are known, all natives of Brazil, where, from the resemblance of the flowers to roses, the plant is called *roso do campo*. *K. speciosa*, called *malvo do campo*, from the resemblance of the flowers to some mallows, is a tree sometimes 15 feet in height, with a twisted trunk, short thick branches, corky bark, elliptical leaves, and flowers resembling camellias, to which, indeed, they are closely related botanically.

kier, *n.* See *keir*.

kieselguhr (kē'zl-gör), *n.* [G., < *kiesel*, flint, pebble (= E. *chesil*), + *guhr:* see *guhr*.] A siliceous infusorial earth, used as an absorbent for nitroglycerin in the manufacture of dynamite: same as *infusorial silica*.

kieserite (kē'zėr-īt), *n.* [Named after D. G. *Kieser*, once president of the academy at Jena.] A hydrated sulphate of magnesium, occurring in considerable beds with rock-salt at Stassfurt, Prussia, and elsewhere. It is used in making Epsom salts, and also indirectly in the manufacture of potash salts at Stassfurt.

Kieseritzki gambit. See *gambit*.

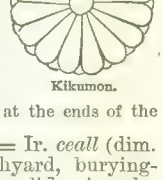
kiest†. An obsolete preterit of *cast*[1].

She *kiest* the knot, and the loop she ran,
Which soon did gar this young lord dee.
The Laird of Waristoun (Child's Ballads, III. 320).

kieve, *n.* and *v.* See *keeve*.

Kigelkia (kig-el-kī'ą), *n.* [NL. (Rafinesque, 1838), < *kigeli-keia*, the native name on the coast of Mozambique.] A genus of large trees of Africa, belonging to the family *Bignoniaceæ*, having large pinnate alternate leaves, an ample leathery calyx with oblique, 2- to 5-cleft limb, and the flowers in long, loose, pendent panicles. Only three or four species are known, inhabiting the tropical and subtropical parts of Africa. The best-known species is *Kigelkeia pinnata* (*Kigelia pinnata* of de Candolle), found in many parts of Africa. It is a large tree with whitish bark and spreading branches. The fruit is often two feet or more in length, hanging from a long stalk. It has a corky rind and is filled with pulp and numerous roundish seeds. In Nubia this tree is held sacred, and religious festivals are conducted under it by moonlight. The fruit, slightly roasted and cut in halves, is applied locally in rheumatic and other complaints.

Kiggelaria (kig-ę-lā'ri-ą), *n.* [NL. (Linnæus), named after Franz *Kiggelaer*, a Dutch botanist.] A genus of choripetalous plants, belonging to the family *Flacourtiaceæ*, tribe *Pangicæ*, distinguished from other genera of the tribe by distinct scarcely imbricated sepals, the apical dehiscence of the capsules, and the numerous stamens. They are unarmed shrubs with entire or serrate leaves and few-flowered axillary racemes. Only three species are known, natives of the warmer parts of Africa. The anomalous character of the genus has led different authors to make it the type of a distinct botanical group.



Kiggelarieæ (kig-ę-lā-rī'ę-ē), *n. pl.* [NL. (A. P. de Candolle, 1824), < *Kiggelaria* + *-eæ*.] A subtribe of plants of the family *Flacourtiaceæ*, tribe *Pangieæ*, embracing the genus *Kiggelaria* only. It was originally a tribe and contained two other genera, one of which does not belong to the same family.

kikar, *n.* [Hindi *kīkar*.] The name of species of acacia, especially *Acacia scorpioides*, one of the best gum-arabic trees. Its astringent pods, as also its bark, are valuable for tanning, and its wood is used for implements, gun-carriages, boat-timber, etc. See *Acacia, bablah*, and *gum arabic* (under *gum*[2]).

kiket, *v.* An obsolete form of *kick*. *Chaucer.*

kikuel-oil (ki-kö'ęl-oil), *n.* [< Tamil *karkol* + E. *oil*.] A solid fat of a dull sulphur-yellow color, made from the seeds of *Salvadora Persica*, and imported into Bombay from Gujerat for local consumption.

kikumon (kik'ö-mon), *n.* [Jap., < *kiku*, the *Chrysanthemum imperialis*, + *mon*, crest, badge.] A badge or crest borne by the imperial family of Japan, consisting of an open chrysanthemum of sixteen rays conjoined and rounded at the outer extremities. It is frequently represented double—that is, sixteen other rays show from below in the interstices at the ends of the rays shown in the foreground.

Kikumon.

kil-, kill-. [< Gael. *cill, ceall* = Ir. *ceall* (dim. *cillīn*), a cell, church, churchyard, burying-place, < L. *cella*, a cell: see *cell*.] An element in Celtic place-names, signifying 'cell,' 'church,' 'burying-place,' very frequent in Ireland, and common in Scotland: as, *Kil*patrick; *Kil*kenny; *Kil*bride; Icolm*kill*.

kilbrickenite (kil'brik-en-īt), *n.* [< *Kilbricken* (see def.) + *-ite*[2].] A sulphid of antimony and lead found at Kilbricken, Ireland.

kildee, kildeer (kil'dēr), *n.* See *killdee*.

kilderkin (kil'dėr-kin), *n.* [< ME. *kylderkyn* (1411); an altered form of *kinderkin*, irreg. *kinderkind;* < MD. *kindeken, kinneken* (D. *kinnetje*), a small vessel, the eighth part of a tun or vat, lit. 'a little child' (cf. *kinchin*, from the same source), < *kind*, a child, + dim. suffix *-ken* (= E. *-kin*); in mod. D. a diff. suffix (*-je*).] A measure of capacity, half a barrel or 2 firkins. Exceptionally—(*a*) Of soap or ale, 18 United States (old wine) gallons. (*b*) Of butter, 1 hundredweight net. A statute of 1662 recites the immemorial custom that a kilderkin of butter should weigh 132 pounds gross—namely, butter 112 pounds, cask 20 pounds. The kilderkin of honey, according to a statute of 1581, is 16 wine gallons.

Massie siluer and gilt plate, some like and as bigge as *kilderkins*. *Hakluyt's Voyages*, I. 465.

Two *kilderkins* of butter, put in by Mr. Peirce for Serjeant Willes. *Winthrop*, Hist. New England, I. 470.

A tun of man in thy large bulk is writ;
But sure thou'rt but a *kilderkin* of wit.
Dryden, MacFlecknoe.

kile† (kīl), *n.* [< ME. *kile, kyle, kylle*, < Icel. *kȳli*, a boil.] An ulcer; a sore.

Som for envy sall haf in thair lyms,
Also *kylles* and felouns and apostyms.
Hampole, Prick of Conscience, l. 2994.

kilerg (kil'ėrg), *n.* [Irreg. < Gr. *χίλιοι*, a thousand (see *kilo-*), + *ἔργον*, work (see *erg*).] In *physics*, a thousand ergs.

Kilhamite (kil'ąm-īt), *n.* [< *Kilham* (see def.) + *-ite*[2].] A member of the "New Connection of Wesleyan Methodists": so called from Alexander Kilham (1762–98), the founder of the organization.

kilikinic (kil″i-ki-nik'), *n.* Same as *kinnikinick*.

kilin (ki-lēn'), *n.* [Chin.] A fabulous creature mentioned in Chinese mythology. It is represented as a kind of unicorn, and is said to have appeared at the birth of Confucius. In Japan it is called *kirin*, and takes in decorative art different forms, sometimes that of a horse with head and jaws modified to approach those of a crocodile and an immense spreading tail.

kilk (kilk), *n.* [Contr. of **killock, kellock*, ult. < AS. *cerlic*, > E. *charlock*, q. v.] Charlock, *Brassica Sinapistrum*. [Prov. Eng.]

kill[1] (kil), *v. t.* [< ME. *killen, kyllen*, commonly *cullen* (later also, as early mod. E., *coll, cole*), strike, cut, < Icel. *kolla*, hit on the head, harm, = Norw. *kylla*, poll (trees), = D. *kollen*, knock down; from the noun, Icel. *kollr*, top, head, = Norw. *koll*, top, head, crown: see *coll*[1]. The notion that *kill* is another form of *quell*, AS. *cwellan*, kill, is erroneous.] **1**†. To strike, beat, cut, or stab; strike down.

There-at Thelaphus hade tene, & turnet belyue,
Caght to a kene spere, cuttyng before,
Caupit euyn with the knight; *kyld* hym to dethe.
Destruction of Troy (E. E. T. S.), l. 12803.

2. To deprive (a human being or any animal, or, in more recent use, a vegetable) of life, by any means; put to death; slay.

Enuye and yuel wille was in the Iewes;
Thei casten and contreueden to *kulle* hym whan thei migte. *Piers Plowman* (B), xvi. 137.

I will deal in poison with thee, or in bastinado, or in steel. . . . I will *kill* thee a hundred and fifty ways.
Shak., As you Like it, v. 1, 62.

3. To destroy; render wholly inactive, inefficient, etc.; deaden; quell; overpower; subdue; suppress; cancel: as, sudden showers *kill* the wind; a thick carpet *kills* the sound of footsteps.

This way you *kill* your merit, *kill* your cause,
And him you would raise life to.
Beau. and Fl., Thierry and Theodoret, iv. 1.

The hose was cut, fire dumped out, . . . pins removed, and engines *killed* so that it will take days to bring them to life again.
Philadelphia Evening Telegraph, March 20, 1886.

It is a singular commentary on the commercial progress of Colorado that many promising towns have been *killed* by the railroads, while others have been made rich and happy. *Harper's Weekly*, Jan. 19, 1889, Supp., p. 60.

4. To nullify or neutralize the active qualities of; deprive (a thing) of its characteristic active or useful qualities; weaken; dilute: as, to *kill* grain (by overheating it in the process of grinding); to *kill* fire-damp (to mix or dilute it with atmospheric air); to *kill* wire (by stretching it so as to destroy its ductility).

The gentleman that always has indefinite quantities of black tea to *kill* any extra glass of claret he may have swallowed. *O. W. Holmes*, Autocrat, p. 122.

The lye will have lost its causticity, or, in technical language, . . . it is *killed*. *Ure*, Dict., III. 846.

Throw in a good handful of common salt to *kill* the acid.
Workshop Receipts, 1st ser., p. 319.

5. To reject; discard: as, to *kill* a paragraph in a report; to *kill* an article in type.—**To do a thing to kill**, to do it in a killing or irresistible manner: as, she was dressed *to kill;* he dances *to kill*. [Low, U. S.]—**To kill down**, to destroy the life of (a plant) as far as to the roots or stem.—**To kill off**, to exterminate.—**To kill time**, to occupy spare time with employments, recreations, or amusements of merely passing interest or entertainment.

If killing birds be such a crime, . . .
What think you, Sir, of *killing Time?*
Cowper, Beau's Reply.

To kill up†, to kill by wholesale or summarily.

Swearing that we
Are mere usurpers, tyrants, and what's worse,
To fright the animals and to *kill* them up,
In their assign'd and native dwelling-place.
Shak., As you Like it, ii. 1, 62.

=**Syn. 2.** *Kill, Slay, Murder, Assassinate, Slaughter, Massacre, Despatch.* *Kill* is the general word, meaning simply to deprive of life, whether wrongfully (Ex. xx. 13), accidentally, in self-defense, in war, or by process of law. *Slay* is a less commonplace word with the same meaning as *kill*. *Murder* is the general word for killing wrongfully, especially with premeditation. *Assassinate* means to kill wrongfully by surprise, suddenly, or by secret assault. To *slaughter* is to kill brutally or in great numbers; *massacre* is more intense than *slaughter*, meaning to kill indiscriminately, without need or without warrant, rapidly or in great numbers. To *despatch* is to kill with promptness or quickness, and generally in a quiet way. *Kill, slay, slaughter,* and *despatch* may apply to ordinary and proper taking of the life of an animal. *Kill* and *slaughter* are ★the ordinary words used to describe the work of a butcher.

kill[1] (kil), *n.* [< *kill*[1], *v.*] The act of killing, as game. [Hunting slang.]

Then [they rode] across the road . . . just in time for the *kill*. *Cornhill Mag.*, June, 1862, p. 722.

kill[2], *n.* and *v.* See *kiln*.

kill[3] (kil), *n.* [< D. *kil*, a channel, MD. *kille, kiele*, an inlet, = Icel. *kíll* = Norw. *kil*, a channel, canal, inlet.] A channel, creek, stream, or bed of a river: used especially as an element of American names in the parts originally settled by the Dutch: as, *Kill* van Kull (the strait between Staten Island and New Jersey), Catskill, Schuylkill.

A great stream gushed forth, . . . made its way to the Hudson, and continues to flow to the present day; being the identical stream known by the name of Kaaters-*kill*. *Irving*, Rip Van Winkle, Postscript.

Their windows looking upon the boisterous cross-currents of the Harlem *Kills*. *The Century*, XXXVII. 858.

killable (kil'a-bl), *a.* [< *kill*[1], *v.*, + *-able*.] Capable of being or fit to be killed. [Rare.]

Looking at the "holluschickie" alone, as they really represent the only *killable* seals, then the commercial value of the same would be expressed by the sum of $1,800,000 to $2,000,000. *Fisheries of U. S.*, V. ii. 359.

killadar (kil'a-där), *n.* [Also *kellidar*; < Hind. *killādār*, the governor or commandant of a fort, < *kila'*, *killa*, a fort, + *-dār*, one who holds.] In India, the commandant of a fort or garrison.

The fugitive garrison . . . returned with 500 more, sent by the *Kellidar* of Vandiwash. *Orme*, Mogul Empire (ed. 1803), II. 217.

killas[1] (kil'as), *n.* [Also *callys*: Corn.] Clay slate; slaty rock. [Cornwall.]

The term *killas* is locally applied to every member of the slate series; and, in fact, to every rock which our miners cannot identify as either granite or elvan. *Henwood.*

killas[2] (kil'as), *n.* [Cf. *killimore*.] The earthnut, *Conopodium majus*. [Prov. Eng.]

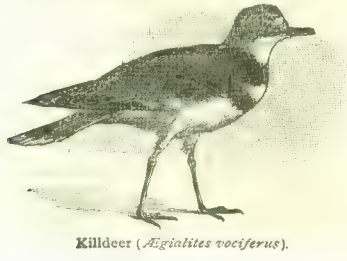
killbuck (kil'buk), *n.* [< *kill*[1], *v.*, + obj. *buck*[1]. Cf. *butcher*, as ult. containing the element *buck*[1].] A bully; a swashbuckler.

Thar. Well, have you done now, Ladie?
Ars. O my sweet *killbuck!*
Thar. You now in your shallow pate thinke this a disgrace to mee. *Chapman*, Widdowes Teares, i.

kill-calf (kil'käf), *n.* [< *kill*[1], *v.*, + obj. *calf*[1].] One who slaughters calves for market; a butcher. In the quotation used as an adjective. [Rare.]

And there they make private shambles with *kil-calfe* cruelty, and sheepe-slaughtering murther.
John Taylor, Works (1630).

kill-courtesy†, *n.* [< *kill*[1], *v.*, + obj. *courtesy*.] A person wanting in courtesy; a boor; a clown. [Rare.]



Pretty soul; she durst not lie
Near this lack-love, this *kill-courtesy*.
Shak., M. N. D., ii. 3, 77.

kill-cow (kil'kou), *n.* [< *kill*[1], *v.*, + obj. *cow*[1].] 1. A butcher. [Burlesque and rare.]—2. A swashbuckler; a braggart.

You were the onely noted man, th' onely *killkow*, th' onely terrible fellow. *Cotgrave.*

kill-cu (kil'kū), *n.* [Imitative.] The greater or lesser yellowshanks, *Totanus melanoleucus* or *T. flavipes*. *G. Trumbull*, 1888. [New Jersey.]

killdeer, killdee (kil'dēr, kil'dē), *n.* [Also *kildee, kildeer*; imitative of the bird's cry.] The largest and commonest ring-plover of North America, *Ægialites vociferus*: so called in imitation of its shrill two-syllabled note. The killdeer is from 9 to 10 inches long, and 20 in extent of wings. The bill is black; the eye is black with a bright ring around it; the legs are pale; the upper parts are grayish-brown with a bronzed olive tint, changing to orange-brown on the rump; the under parts are pure white, with two black collars encircling the neck; the front and line over the eye are white, with a black stripe over this; and the tail-feathers are peculiarly variegated with black, white, and the bright color of the rump. It occurs almost everywhere in North America, is migratory, not gregarious, very noisy, and restless. It nests on the ground, in grass or shingle, and lays four pyriform eggs, 1¾ inches long and 1 1/16 inches broad, of a drab color heavily blotched with blackish brown.

Killdeer (*Ægialites vociferus*).

It was the plaintive cry of a *kildee* startled from its sojourn on the bank. *Harper's Mag.*, LXXVIII. 48.

The sepulchral boom of the bittern, the shriek of the curlew, and the complaint of the *killdeer*-plover were beyond the power of expression. *Bret Harte*, Sketches, p. 90.

kill-devil (kil'dev'il), *n.* [< *kill*[1], *v.*, + obj. *devil*.] 1. A terrible fellow.

So I should be called *Kill-devil* all the parish over. *Marlowe*, Faustus, i. 4.

2. A kind of artificial bait.

killeck, *n.* See *killock*.

killeen (ki-lēn'), *n.* [Ir.] The Irish moss or carrageen, *Chondrus crispus*.

killer (kil'ėr), *n.* 1. One who kills or deprives of life; especially, a slaughterer; a butcher.

But he conueighed himselfe a farre of from the bondes of ye citee of Hierusalem, the *killer* of prophets, & went to the citie of Ephraim, wherunto ye desert was nigh. *J. Udall*, On John xi.

Let us . . . bring back our prince by seeing his *killers* die. *Sir P. Sidney*, Arcadia, v.

2. A club of hard wood, used for killing fish.—3. A delphinid, *Orca gladiator*, and other species of that genus: so called from their ravenous and ferocious habits. Killers hunt in packs, and not only destroy such small species of their own kind as dolphins and porpoises, but attack and sometimes kill whales much larger than themselves. See *Orca*. Also *killer-fish, killer-whale*.

The other cetaceans of this group are generally distinguished as narwhals, grampuses, *killers*, bottlenoses, dolphins, and porpoises. *Encyc. Brit.*, XXIV. 525.

Coupon-killer. See *coupon*.

killesse, *n.* A variant of *coulisse*.

killhog (kil'hog), *n.* [< *kill*[1], *v.*, + *hog*[1].] A wooden trap used by hunters in Maine. *Bartlett.* [Local, U. S.]

killick, *n.* See *killock*.

killie (kil'i), *n.* Same as *killifish*.

killifish (kil'i-fish), *n.* [Irreg. < D. *kil*, channel, + *fish*[1].] A name given about New York to fishes of the family *Cyprinodontidæ* and genera *Fundulus* and *Hydrargyra*, having an elongated form, depressed scaly head, bands of pointed teeth in the jaws, and a dorsal fin mostly in advance of the anal, with from 11 to 17 rays. The common or green killifish is *Fundulus heteroclitus*, with 5 branchiostegal rays: also called *mummychog* and *salt-water minnow*. The barred, bass, big, or striped killifish is *Fundulus majalis*, with 6 branchiostegal rays: also called *May-fish, rockfish*, and *bull-minnow*. *Fundulus diaphanus* shares the name *barred killifish*, and is also called *spring minnow* and *spring mummychog*. Some of the killifishes are known as *mud-dabblers*, and others as *studfishes*. The name is extended to some of the top-minnows of the related genus *Zygonectes*, as *Z. notatus*, known as the *black-sided killifish*. These fishes abound in shallow bays, channels, and ditches, and along the protected shores of eastern North America.

kiln (kil), *n.* [Also *kill*, formerly *kil*; early mod. ★E. *kylne, kyll*, < ME. *kylne, kulne*, < AS. *cyln, cylene, cyline* = Icel. *kylna* = Norw. *kylna* = Sw. *kölna* = Dan. *kölle*, a kiln, a drying-house, < L. *culina*, a kitchen: see *culinary*. The present pronunciation requires the spelling *kill* (cf. *mill*, formerly *miln*, of similar phonetic form); but *kiln* is the prevalent spelling.] A furnace or oven for drying, baking, or burning. Kilns may be divided into two chief classes: those for direct burning, in which the material is submitted to the action of flame, the fuel

and material being mingled together in one furnace; and those for vitrifying, drying, and baking, in which the material is separated from the furnace proper. The lime-kiln represents the first class. It consists of an upright furnace resembling a blast-furnace, the limestone and fuel being fed into the top and the burned lime or quicklime being drawn below. (See *lime*[1].) To the second class belong the pottery-kilns, brick-kilns, and porcelain-kilns. The pottery- and porcelain-kilns, which include also terra-cotta, drain-pipe, and other similar kilns, consist of a structure, usually of brick, circular in section and cone-shaped, the furnaces being arranged around the edge below, and the hollow space within being filled with the materials to be burned or vitrified. In the common pottery-kiln the materials are exposed directly to the flames from the furnaces. In the kilns for finer ware the materials are protected from direct contact with the fires. Drying-kilns for malt, hops, grain, lumber, etc., are strictly dry-houses or drying-rooms, though sometimes called kilns. Fruit-kilns are now superseded by evaporators. Brick-kilns are properly distinguished from brick-clamps by the fact that the furnace is a permanent structure. See *brick*[2].

Not farre from the Citie are twentie Lyme *kils*, and as many Brick-*kils*, seruing for the reparations of the Temple, and the houses thereto belonging.
Purchas, Pilgrimage, p. 616.

To lie in *kilns* and barns at e'en . . .

kilogram, kilogramme (kil'ō-gram), *n.* [< F. *kilogramme*, < Gr. *χίλιοι* (irreg. reduced in the French metric system of nomenclature to *kilo-*), a thousand, + *γράμμα*, a weight (a gram): see *gram*[2].] The ultimate standard of mass in the French system of weights and measures, equal to 1,000 grams; the mass of a certain cylinder of platinum deposited in the Archives of France on the 22d of June, 1799, and thence known as the *Kilogramme des Archives*. But in future the ultimate standard will be the international kilogram at the Pavillon de Breteuil near Sèvres; this substitution will not alter the value of the kilogram. The kilogram was intended to be (and is, within one ten-thousandth part) the mass of a cubic decimeter of water at its maximum density. It was ascertained by Miller to be equal to 15432.34874 grains, or 2.20462125 imperial pounds, with a probable error of 3 in the last decimal place. A recent elaborate comparison of the international kilogram with the imperial pound gave 2.2046223. See *metric system*, under *metric*. The international kilogram is a cylindrical mass of metal made of 90% platinum and 10% iridium. (*Hering*.) Copies are known as 'national prototypes.'

kilogrammeter, kilogrammetre (kil-ō-gram'-e-tėr), *n.* [< F. *kilogrammètre*; as *kilogram* + *meter*[2].] A unit used in measuring mechanical work, equal to the work done against gravity in raising one kilogram a vertical distance of one meter: it is equivalent to about 7.2 foot-pounds.

kiloliter, kilolitre (kil'ō-lē-tėr), *n.* [< F. *kilolitre*, < Gr. *χίλιοι*, a thousand, + *λίτρα*, a pound (taken as 'liter'): see *liter*.] A unit of capacity equal to 1,000 liters.

kilometer, kilometre (kil'ō-mē-tėr), *n.* [< F. *kilomètre*, < Gr. *χίλιοι*, a thousand, + *μέτρον*, a measure (taken as 'meter'): see *meter*[2].] A length of 1,000 meters, or ⅝ of a statute mile less 19 feet 11 inches. Abbreviated *km*.

kilostere (kil'ō-stēr), *n.* [< F. *kilostère*, < Gr. *χίλιοι*, a thousand, + *στερεός*, solid (taken as 'stere'): see *stere*.] A French solid measure, consisting of 1,000 steres or cubic meters, and equivalent to 35314.49 cubic feet.

kilowatt (kil'ō-wot), *n.* [< Gr. *χίλιοι*, a thousand, + E. *watt*.] A thousand watts.

kilt[1] (kilt), *v. t.* [< ME. *kylten*, < Dan. *kilte*, *kiltre*, truss, tuck up, = Sw. dial. *kilta*, swaddle; appar. < Icel. *kjalta*, the lap, = Sw. dial. *kilta*, the lap, = Goth. *kilthei*, the womb.] 1. To tuck up; truss up (the clothes). [Scotch.]

A little abune her knee.
The Young Tamlane (Child's Ballads, I. 116).

The wives maun *kilt* their coats and wade into the surf to tak' the fish ashore. *Scott*, Antiquary, xxvi.

2. In *dressmaking*, to lay (a skirt or a flounce) in deep, flat, longitudinal plaits hanging free at the bottom, in the fashion of a Highland kilt.

kilt[1] (kilt), *n.* [Also *kelt*; < *kilt*[1], *v.* Cf. Icel. *kilting*, a skirt. The Gael. word for 'kilt' is represented by *fillibeg*. The Ir. *cealt*, OIr. *celt*, clothes, is prob. unrelated.] In the original Highland dress, that part of the belted plaid which hung below the waist; in modern times, a separate garment, a sort of petticoat reaching from the girdle nearly to the knees, composed of tartan and deeply plaited. The garment is imitated in various fabrics for children's wear. See *kilting*[1].

Aft have I wid thro' glens with chorking feet,
When neither plaid nor *kelt* cou'd fend the weet.
Ramsay, Poems, II. 393.

There arises in the mind of the present writer a comical vision of the twirling plaid *kilt* worn by the very inadequate representative of the historically kiltless thane.
The Academy, Oct. 20, 1888, p. 252.

Among the Highlanders, the *kilt* seems to have been originally formed by folding and girding up the lower part of the mantle or plaid. *Jamieson*.

kilter, kelter[1] (kil'tėr, kel'tėr), *n.* [Cf. *kilting*[2]; origin uncertain.] Order; proper form, adaptation, or condition: only in the colloquial phrase *out of kilter*.

Ye very sight of one [a gun] (though *out of kilter*) was a terrour unto them.
Bradford, Plymouth Plantation, p. 235.

If the organs of prayer be *out of kelter*, or out of tune, how can we pray? *Barrow*, Works, I. vi.

"I'm a failure because I always see double," pursued Hollis, "like a stereoscope *out of kilter*."
C. F. Woolson, Jupiter Lights, xviii.

kilting[1] (kil'ting), *n.* [Verbal n. of *kilt*[1], *v.*] An arrangement of flat plaits set close together, each one hiding about half of the last, so as generally to make three thicknesses of stuff.

kilting[2] (kil'ting), *n.* [Cf. *kilter*.] 1. A tool; an instrument.—2. One of the component parts of a thing.

kimbo†, **kimboll**†, **kimbow**†, *n.* See *akimbo*.

kimbo† (kim'bō), *a.* [Also *kembo*; by aphæresis from *akimbo*, *akimbow*, q. v.] Bent, as the arms when set akimbo. [Rare.]

The *kimbo*-handles seem with bears foot carv'd.
Dryden, tr. of Virgil's Eclogues, iii.

kimbo† (kim'bō), *v. t.* [Also *kembo*; < *kimbo*, *a.*] To set (the arms) akimbo; crook; bend.

"Oons, madam!" said he, and he *kemboed* his arms, and strutted up to me. . . . "*Kemboed* arms! my lord, are you not sorry for such an air?"
Richardson, Sir Charles Grandison, IV. 288.

The wavering commons in *kym kam* sectes are haled.
Stanihurst, tr. of Virgil.

True (quoth I), common it is in some sort, and in some sort not: but first mark, I beseech you, the comparison, how they go clean *kim kam*, and against the stream, as if rivers run up hills. *Holland*, tr. of Plutarch, p. 959.

kimmer (kim'ėr), *n.* A variant of *cummer*.

Kimmerian (ki-mē'ri-an), *a.* and *n.* See *Cimmerian*. *Gladstone*.

Kimmeridge clay, shale. See *Kimmeridgian*.

Kimmeridge-coal money, ornament. See *money*, *ornament*.

Kimmeridgian (kim-ē-rij'i-an), *a.* and *n.* [< *Kimmeridge* (see def.) + *-ian*.] In *geol.*, noting a division of the Jurassic series, forming the base of the upper or Portland Oölite group as used by English geologists, and named from Kimmeridge, on the coast of Dorsetshire. The rocks of this geological division are chiefly shales, cement-stones, and clays. In the lower division of the Kimmeridgian fossils are abundant, and among them are bones of various saurians. Portions of the Kimmeridge shale are so bituminous that they have been, and still are, burned by the cottagers as fuel in districts where they occur. The shale has also been employed at various times for making naphtha, candles, and even gas. This is the material from which the so-called "coal money" was made in prehistoric times. The cement-stones of the Kimmeridgian have been used for cement.

kimnel† (kim'nel), *n.* [(*a*) Early mod. E. also *kymnel*, *kemnel*, Sc. *kimmen*, *kymmond*, ME. *kymnell*, *kymnelle* (ML. *ciminile*); (*b*) also *kimling*, *kemlin*, early mod. Wi' broaches, and wi' rings;
And they hae courted her, lady Maisry,
Wi' a' *kin* kind of things.
Lady Maisry (Child's Ballads, II. 80).

Kith and kin. See *kith*, 3.—**Next of kin.** (*a*) The relatives of a decedent entitled to his personal estate under the statute of distributions. See *heir*. (*b*) A person's nearest relatives according to the civil law. (*Stimson*.) The phrase does not include a widow, she being specifically provided for by the law as widow, and it is sometimes used in contradistinction to children: as, the widow, children, and next of kin. In either use it means that one (or more) who stands in the nearest degree of blood-relationship to the deceased. What degree is deemed nearest varies somewhat in the details of the law of different jurisdictions; but in general where there are no children, or descendants of children, the father is the next of kin, and if there is no father, the mother, and if no parent, the brothers and sisters are the next of kin, and so on.—**Of kin**, of the same kin; having relationship; of the same nature or kind; akin. See *akin*.

The king is near *of kin* to us. 2 Sam. xix. 42.

Like the wife, the adopted son, when he passed out from his former household, ceased to have any connection with his former relatives. He was no longer *of kin* to his natural father or to his brothers in the flesh.
W. E. Hearn, Aryan Household, p. 104.

To count kin. See *count*[1].

kin[1] (kin), *a.* [Partly < *kin*[1], *n.*, partly by aphæresis from *akin*.] 1. Of kin; of the same blood; related.

Ny *kyn* he is to King off Norway,
For of Melusine discended all thay.
Rom. of Partenay (E. E. T. S.), l. 6278.

Because she's *kin* to me, therefore she's not so fair as Helen. *Shak.*, T. and C., i. 1, 75.

2. Of the same kind or nature; having affinity.

Yet do I not use . . . any such proverb, so little *kin* to the purpose. *Shak.*, Hen. V., iii. 7, 71.

Melissa hitting all we saw with shafts
Of gentle satire, *kin* to charity.
Tennyson, Princess, ii.

kin[2] (kin), *n.* [A dial. (unassibilated) var. of *chine*[1].] A chap or chilblain. [Prov. Eng.]

kin[3] (kin), *n.* [Chin.] A weight, in use in China and Japan: as defined by customs treaty, 604.8 grams or 1⅓ pounds avoirdupois; a catty.

kin[4] (kin), *n.* [Chin.] A Chinese musical instrument, of very ancient origin, having from five to twenty-five silken strings. It is played like a lute.

-kin. [< ME. *-kin* (rarely *-ken*), much used in forming diminutives of proper names, as *Dawkin, Hawkin, Hopkin, Timkin, Tomkin*, etc. (many of which exist as surnames in the orig. poss. form *-kins*, as *Dawkins, Hawkins, Tomkins* or *Tompkins*, etc.); not found in AS., and prob. of D. origin: < D. *-ken* = LG. *-ken* = OHG. *-kīn, -chīn*, MHG. *-kin, -chen*, G. *-chen*, a compound dim. suffix, < *-k* + *-in*, orig. *-īn*, now, in the simple form, *-en* (see *-en*[3]).] A diminutive suffix, attached to nouns to signify a little object of the kind mentioned: as, *lambkin*, a little lamb; *pipkin*, a little pipe; *catkin*, a little cat, etc. As applied to persons it usually conveys contempt, as in *lordkin*. It is sometimes preceded by a short vowel, as in *canakin* or *cannikin, manakin* or *manikin, bootikin*, etc. In the obsolete *bodikin, ladikin (lakin)*, etc., the diminutive form is due to the tendency to mince oaths. In many words, as *bunpkin, buskin, firkin, griskin, kilderkin, malkin, napkin, siskin*, etc., the diminutive force is for various reasons (but chiefly because most of them are not of original English formation) not now perceived. In *finikin* the suffix is adjectival. In *bodkin, gherkin, pumpkin*, and some other words the termination requires special explanation: see their etymology.

kinæsthesia (kin-es-thē′si-ą), *n.* [< Gr. κινεῖν, move, + αἰσθησις, perception.] The muscular sense; the sense of muscular effort. Also *kinesthesia, kinæsthesis, kinesthesis.*

kinbote†, *n.* [< *kin* + *boot.*] A wergeld or man-boot paid by a homicide to the kin of the person slain. *N. E. D.*

kinch[1]†, *n.* [Early mod. E. also *kintch;* < ME. *kynch*, a bundle; perhaps a transposed form of *knitch*, q. v.] A bundle: same as *knitch.*

A *kintch* of wood, fascis. *Levins*, Manip. Vocab., p. 150.

kinch[2] (kinch), *n.* Same as *kench.*

kinchin (kin′chin), *n.* [Formerly also *kynchin, kynchen;* < MD. *kindeken, kinneken* (= MLG. *kindekīn*, LG. *kindken, kinncken* = G. *kindchen*), a little child (also in D., a little tun, kilderkin: see *kilderkin*), < *kind*, child, + dim. *-ken:* see *child* and *-kin.*] A child. [Thieves' slang.]

—**Kinchin lay**, the robbing of children; hence, a minor rôle among professional thieves. [Thieves' slang.]

"Ain't there any other line open?" "Stop," said the Jew, laying his hand on Noah's knee. "The *kinchin lay.*" "What's that?" demanded Mr. Claypole. "The kinchins, my dear," said the Jew, "is the young children that's sent on errands by their mothers, with sixpences and shillings, and the lay is just to take their money away."
Dickens, Oliver Twist, xli.

The tax upon tillage was often levied *in kind* upon corn.
Arbuthnot, Ancient Coins.

Kind of (also *sort of*) runs into certain marked idioms. It is used with a following noun to express something like or resembling or pretty near to what the noun expresses: as, he is a *kind of* fool (that is, not far from being a fool). Then, in careless and vulgar speech, it is transferred (especially in the abbreviated form *kind o'*, pronounced kind o, and often written *kinder*, where the *r* is never pronounced) to use before an adjective: as, that is *kind o'* good; he acted *kinder* ugly; and even before a verb: as, he *kind o'* (*kinder*) laughed.

"A slight figure," said Mr. Peggotty, looking at the fire, "*kiender* worn." *Dickens*, David Copperfield, lxiii.

The women rather liked him, and *kind o'* liked to have him round. *H. B. Stowe*, Oldtown, p. 8.

It *kinder* seemed to me that something could be done.
S. Judd, Margaret, ii. 8.

Also, in phrases like what *kind of* a thing is this? he is a poor *kind of* fellow (that is, a thing of what kind, a fellow of a poor kind), *kind of* has come to seem like an adjective element before the noun, and hence before a plural noun, after words like *some, all*, and especially *these* and *those,*

it sometimes keeps the singular form: as, *these kind of* people. This inaccuracy is very old, and still far from rare, both in speaking and in writing; but good usage condemns it.

I have heard of *some kind of* men that put quarrels purposely on others. *Shak.*, T. N., iii. 4, 266.

These kind of knaves I know. *Shak.*, Lear, ii. 2, 107.

All kind of living creatures. *Milton*, P. L., iv. 286.

To do one's kind†, to act according to one's nature.

There I throw my gaze,
Disclaiming here the *kindred* of the king.
Shak., Rich. II., i. 1, 70.

Consanguinity, or *kindred*, is defined by the writers on these subjects to be vinculum personarum ab eodem stipite descendentium; the connexion or relation of persons descended from the same stock or common ancestor.
Blackstone, Com., II. xiv.

Thy likeness to the wise below,
Thy *kindred* with the great of old.
Tennyson, In Memoriam, lxxiv.

2. Community in kind; intrinsic relationship or connection.

The sciences are all of one *kindred*. *Brougham*.

3. In a plural sense, relatives by blood or descent, or, by extension, by marriage; a body of persons related to one another; relatives; kin.

And than the kynge sente to alle the Dukes *kenrede*, and alle by letteres, that thei sholde come to hym to Cardoel. *Merlin* (E. E. T. S.), i. 79.

Adam's sons are my brethren; and, truly, I hold it a sin to match in my *kindred*. *Shak.*, Much Ado, ii. 1, 68.

4. A tribe; a body of persons connected by a family or tribal bond: with a plural form.

Salomon the wyse, that was Kyng aftre David, upon the 12 *Kynredes* of Jerusalem. *Mandeville*, Travels, p. 65.

The little territory of Dithmarschen was colonised by two *kindreds* from Friesland and two from Saxony.
Stubbs, Const. Hist., § 26.

II. *a.* **1.** Having kinship; allied by blood or descent; related as kin.

The Danes were a *kindred* folk to the English, hardly differing more from some of the tribes which had taken a part in the English conquest than those tribes differed from one another. *E. A. Freeman*, Amer. Lects., p. 151.

2. Pertaining to kinship; of related origin or character; hence, native; pertaining to nativity: as, to live under *kindred* skies.

His hands were guilty of no *kindred* blood,
But bloody with the enemies of his kin.
Shak., Rich. II., ii. 1, 182.

Hence—**3.** Congenial; allied; of like nature, qualities, etc.: as, *kindred* souls; *kindred* pursuits.

Good aunt, you wept not for our father's death;
How can we aid you with our *kindred* tears?
Shak., Rich. III., ii. 2, 63.

The fellowship of *kindred* minds
Is like to that above.
D. E. Jones, Blest be the Tie that Binds.

Mountains interposed
Make enemies of nations, who had else
Like *kindred* drops been mingled into one.
Cowper, Task, ii. 19.

kindshipt, *n.* [ME. *kyndship*; < *kind*[1] + *-ship*.] Kindness. *Gower*, Conf. Amant., ii.

kind-spoken (kīnd'spō″kn), *a.* **1.** Spoken in a kind way: as, a *kind-spoken* word.—**2.** Characterized by kindly speech: as, a *kind-spoken* gentleman. [Colloq.]

kind-tempered (kīnd'tem″pėrd), *a.* Mild; gentle.

To the *kind-temper'd* change of night and day,
And of the seasons. *Thomson*, Summer, l. 39.

kind-wittedt, *a.* [ME. *kynde-witted*; < *kind*[1], *a.*, + *wit*, *n.*, + *-ed*[2].] Having natural sense or intelligence, as opposed to *instructed*. Compare *kind wit*, under *kind*[1], *a.*

No more can a *kynde-witted* man bote clerkes hym teche,
Come for alle hus kynde wyttes thorwe Cristendom to be saued. *Piers Plowman* (C), xv. 52.

kine[1] (kīn), *n.* [See *cow*[1].] Plural of *cow*[1]. [Archaic.]

A herd of beeves, fair oxen and fair *kine*.
Milton, P. L., xi. 647.

When the deep-breathing *kine* come home at twilight.
O. W. Holmes, Autocrat, iv.

kine[2] (kīn), *n.* [Origin obscure.] A weasel. *Halliwell*. [Prov. Eng.]

kinedomt, *n.* [ME., also *kynedom, kindom, kyndom*, < AS. *cynedom*, kingdom, < *cyne-*, of a king, + *dōm*, jurisdiction: see *kingdom*.] Same as *kingdom*.

kinematic (kin-ē-mat'ik), *a.* and *n.* [< Gr. *κίνημα*(*τ-*), movement, < *κινεῖν*, move: see *kinetic*.] **I.** *a.* Of or pertaining to kinematics.

II. *n.* Same as *kinematics*.

The rules about space and motion constitute the pure sciences of Geometry and *Kinematic*.
W. K. Clifford, Lectures, I. 265.

Also *cinematic*.

kinematical (kin-ē-mat'i-kal), *a.* [< *kinematic* + *-al*.] Same as *kinematic*. Also *cinematical*.

kinematics (kin-ē-mat'iks), *n.* [Pl. of *kinematic*: see *-ics*.] **1.** That part of the science of mechanics which treats of motion, its direction, velocity, acceleration, composition, etc., without reference to mass or to constraints: opposed to *dynamics*. Thus, the relation between Kepler's laws and the law of gravitation comes under the head of kinematics, because the planet is perfectly free to move and its mass has nothing to do with the question. On the other hand, the consideration of perturbations belongs to dynamics and not to kinematics. Again, the subject of the brachistochrone, though it involves no consideration of mass, is excluded from kinematics, as involving constraint. Statics is not considered to belong to kinematics, since most statical problems involve constraints, though others do not. But the whole distinction between kinematics and dynamics seems artificial, unscientific, and confused.

2. The theory of mechanical contrivances for converting one kind of motion into another, as for example for making a piston-rod with a reciprocating motion communicate to a wheel a uniform rotation. Also called *applied kinematics*.

kinemerkt, *n.* [ME., also *kyne-merk*; < *cyne-*, of a king (see *king*[1]), + *marc*, mark.] A mark or sign of royalty. *Havelok*, l. 602.

kinepox (kīn'poks), *n.* Same as *cowpox*.

kinerict, kinerichet, *n.* [ME., also *kuneriche, kinric*, etc., < AS. *cynerīce* (= OHG. *chunirīchi*), a kingdom, < *cyne-*, of a king (see *king*[1]), + *rīce*, a kingdom. Cf. *kingric*.] Same as *kingric*.

kinescope (kin'e-skōp), *n.* Same as *kinetoscope*, 2.

kinesiatric (ki-nē-si-at'rik), *a.* [< Gr. *κίνησις*, movement, + *ἰατρικός*, relating to a cure, < *ἰατρός*, a physician.] In *therap.*, relating to or consisting in muscular movement employed as a remedy; pertaining to kinesitherapy.

kinesipathic (ki-nē-si-path'ik), *a.* [< *kinesipath-y* + *-ic*.] Of or pertaining to kinesipathy; motorpathic.

kinesipathist (kin-ē-sip'a-thist), *n.* [< *kinesipath-y* + *-ist*.] One who practises kinesipathy; one versed in kinesipathy.

kinesipathy (kin-ē-sip'a-thi), *n.* [Irreg. < Gr. *κίνησις*, movement (< *κινεῖν*, move), + *πάθος*, suffering (taken, as in *homeopathy*, etc., to mean 'cure').] Kinesitherapy, especially in its earlier and cruder forms.

kinesitherapy (ki-nē-si-ther'a-pi), *n.* [< Gr. *κίνησις*, movement, + *θεραπεία*, cure.] In *therap.*, a mode of treating diseases by gymnastics or appropriate movements; movement-cure.

kinesodic (kin-ē-sod'ik), *a.* [< Gr. *κίνησις*, movement, + *od*, force, + *-ic*.] Transmitting motor impulses: applied to the motor tracts of the nervous system.

kinesthesia, kinesthesis, *n.* See *kinæsthesia*.

kinesthetic, kinæsthetic (kin-es-thet'ik), *a.* [< *kinæsthesia*, after *esthetic*.] Pertaining to kinæsthesia.

kinetic (ki-net'ik), *a.* and *n.* [< Gr. *κινητικός*, < *κινητός*, verbal adj. of *κινεῖν*, move: see *cite*[1].] **I.** *a.* **1.** Causing motion; motory.—**2.** Pertaining to or consisting in motion: as, *kinetic* energy (energy in the form of motion).

The *kinetic* theory of gases . . . is that the particles dart about in all directions. *Tait*, Properties of Matter, p. 43.

Kinetic coefficient of viscosity. See *coefficient*.—**Kinetic constraint.** See *constraint*.—**Kinetic energy** or **activity.** See *energy*, 7.—**Kinetic theory of gases.** See *gas*, 1.

II. *n.* Same as *kinetics*.

kinetical (ki-net'i-kal), *a.* [< *kinetic* + *-al*.] Of, pertaining to, or concerned with kinetics.

kinetics (ki-net'iks), *n.* [Pl. of *kinetic*: see *-ics*.] That branch of the science of dynamics which treats of forces causing or changing the motion in bodies or of the circumstances of actual motion: opposed to *statics*, and synonymous with *dynamics* in one of the senses of that word. See *dynamics*.—**Chemical kinetics.** See *chemical*.

kinetogenesis (ki-nē-tō-jen'e-sis), *n.* [< Gr. *κινητός*, verbal adj. of *κινεῖν*, move (see *kinetic*), + *γένεσις*, origin: see *genesis*.] Origination of animal structures by means or in consequence of the movements of animals, or the doctrine of such origination. *E. D. Cope*, Origin of the Fittest, p. 423.

kinetograph (ki-nē'tō-graf), *n.* A device for taking a series of photographs of a moving object.

kinetoscope (ki-nē'tō-skōp), *n.* [< Gr. *κινητός*, moving (verbal adj. of *κινεῖν*, move), + *σκοπεῖν*, view.] **1.** A kind of movable panorama. [Rare.]—**2.** An instrument for illustrating the results of combinations of arcs of different radii in making curves. Also called *kinescope*.—**3.** An apparatus invented by Edison for exhibiting photographic pictures of objects in motion. Its essential parts are a ribbon containing the pictures, a mechanical device for causing the pictures to pass rapidly in succession under a lens or sight-piece, a lamp for illuminating the pictures, and a mechanical device for causing a circular revolving screen to move rapidly before them. A slot is cut in this screen, and its revolutions are so timed that the slot passes before each picture just as it is in line with the eyepiece. The effect is to give a view of each picture in succession, and to cut off the view as the picture is moved forward. The apparent result to the eye is a continuous picture in which the objects photographed appear to be in motion.

kine-yerdt, *n.* [< ME. *kyneyerd, kynegerd*, < AS. *cynegeard*, a scepter, < *cyne-*, of a king, + ★*geard*, rod, yard: see *yard*[1].] A scepter.

king[1] (king), *n.* [< ME. *king, kyng*, < AS. *cyng*, a late contracted form of the usual *cyning* = OS. *kuning* = OFries. *koning, kining, kening, keneng*, also, with alteration of the suffix, *konig, kenig, keneg* = OD. *coninc, koninck*, D. *koning* = MLG. *konink, konnink*, LG. *koning, köning* = OHG. *chuning, kuninc*, also, with alteration of the suffix, *chunig, kunig*, MHG. *künic, künec*, contr. *küne*, G. *König*, formerly also *konig* (with vowel due to LG.) = Icel. *konungr*, contr. *kongr* = Sw. *konung*, contr. *kung* = Dan. *konge* (a Goth. form, **kuniggs*, is not recorded, and perhaps never existed, the usual word being *thiudans* = AS. *theóden*), a king, i. e. a chief, the chief man of a tribe, prob. lit. 'belonging to a tribe,' or 'descendant of a tribe' (or 'one of noble kin'?), < AS. *cynn* (= Goth. *kuni*, etc.), a race, tribe, kin (cf. AS. *cyne-* (= OHG. *chuni-*), in comp., of a king, perhaps a contr. form of *cyning* in comp., otherwise a related noun), + *-ing*, a common patronymic suffix: see *kin*[1] and *-ing*[3]. The exact noticnal relation of *king* with *kin* is undetermined, but the etymological relation is hardly to be doubted. The asserted identity of the word with Skt. *janaka*, a father, is false. There is no connection, as alleged, with *can*[1] and *cunning*[1].] **1.** A chief ruler; a reigning sovereign or monarch; a man who holds by life tenure the chief authority over a country and people. The word is used both as a generic designation of any sovereign ruler and as the specific title of the rulers of certain states distinctively called *kingdoms*. It is applicable by extension to an infant who has become heir to the sovereign power, and reigns through a regent. *King*, originally applied to any tribal chief, whether such by hereditary, elective, or military right, took on a more imposing sense with the rise of the modern European states; but it is still used historically, or with a modern imputation or suggestion of royal splendor, with reference to many ancient and modern barbarian or savage tribes, as the ancient Canaanite kings, the Mongol kings of Asia, the ancient kings of Ireland, the kings of central Africa, the American Indian King Powhatan and King Philip, etc. The autocratic or despotic power formerly implied by the title *king* has been almost lost in Europe, where a king is now merely a chief magistrate for life, bound by constitutional and statutory limitations equally with his subjects. The office of king is now, as a rule, hereditary in principle; but in former times it was often elective, or in some manner the subject of choice or selection. In the generic sense, God is often called *King*, as the supreme ruler of the universe. Abbreviated *K*.

Who is this *King* of glory? The Lord strong and mighty.
Ps. xxiv. 8.

There's such divinity doth hedge a *king*
That treason can but peep to what it would.
Shak., Hamlet, iv. 5, 123.

2. One who or that which is chief or greatest in any respect; a holder of preëminent rank or power of any kind: as, a *king* of good fellows; the lion is called the *king* of beasts.

Of a' the lads that I do ken,
A Wamphray lad 's the *king* of men.
Lads of Wamphray (Child's Ballads, VI. 173).

Time made thee what thou wast, *king* of the woods.
Cowper, Yardley Oak.

3. In *games*: (*a*) A playing-card bearing a picture of a king: as, the *king* of diamonds.

An Ace of Hearts steps forth; the *King* unseen
Lurk'd in her hand, and mourn'd his captive Queen.
Pope, R. of the L., iii. 96.

(*b*) The chief piece in the game of chess. See *chess*. (*c*) A crowned man in the game of draughts. (*d*) See the quotation.

About the middle of the [billiard-]table was placed a small arch of iron, and in a right line, at a little distance from it, an upright cone called the *king*.
Strutt, Sports and Pastimes, p. 396.

4. *pl.* [*cap.*] The eleventh and twelfth books of the Bible. In Hebrew manuscripts they are undivided, and form a continuous narrative of the Hebrew people from the later days of King David to the captivity of Judah in Babylon. The division into two books was first made in the Septuagint and retained in the Vulgate, in both of which they are named the third and fourth books of Kings (the two books of Samuel being the first and second); hence, in the English Bible, the double title "The first book of the Kings, commonly called the third book of the Kings," etc. The period embraces the reigns of all the kings of Israel and Judah, except Saul's and most of David's. The work was probably composed substantially before the end of the captivity. The authorship is uncertain.

5. A red-finned herring. [West of Eng.] — **Apostolic king.** See *apostolic.* — **Chambers of the king†.** See *chamber.* — **Champion of the king.** See *champion*[1]. — **Clerk comptroller of the king's household, clerk of the king's silver.** See *clerk.* — **Court of King's Bench.** See *court.* — **Divine right of kings.** See *divine.* — **Era of kings.** See *era.* — **Keeper of the king's conscience,** the lord chancellor. See *chancellor,* 3 (*a*). — **King at arms.** See *king-at-arms.* — **King Charles spaniel.** See *spaniel.* — **King closer,** in *arch.* See *closer*[1] (*b*). — **King Cotton,** an expression much used in the United States for a few years before the civil war, in allusion to the commercial preëminence of cotton in the South. — **King James Bible.** See *Bible,* 1. — **King of fish,** the salmon, *Salmo salar.* — **King of misrule.** Same as *lord of misrule* (which see, under *lord*). — **King of terrors,** death.

> It [destruction] shall bring him to the *king of terrors.*
> Job xviii. 14.

King of the ant-eaters. See *ant-eater.* — **King of the breams,** *Pagellus erythrinus.* — **King of the herrings.** (*a*) The allice shad. [Local, Eng.] (*b*) The *Chimæra monstrosa.* [Local, Scotch (Shetland).] — **King of the mullets,** the common bass. [Belfast, Ireland.] — **King of the salmon,** a fish, *Trachypterus altivelis.* It has a very compressed body, dorsal and ventral fins with about seven mostly branched rays, and a bright silvery color varied by three large spots below the dorsal fin. It inhabits deep water along the Pacific coast of both North and South America. — **King of the sea-breams.** Same as *becker.* — **King's advocate.** Same as *lord advocate* (which see, under *advocate*). — **King's beadsman.** Same as *blue-gown.* — **King's Bishop's gambit.** See *gambit.* — **King's counsel, enemy, evidence.** See the nouns. — **King's evil.** See *evil*[1] and *touch-piece.* — **King's freeman,** in Scotland, a title formerly given to a person who, on account of his own service or that of his fathers to the state, had a peculiar statutory right to exercise a trade as a freeman, without entering with the corporation of the particular trade which he exercised. Such a person might move from place to place and carry on his trade within the bounds of any corporation. — **King's gambit.** See *gambit.* — **King's letter.** Same as *brief,* 2 (*d*). — **King's list.** See *list*[3]. — **King's scholar.** See *scholar.* — **King's yellow.** See *arsenic,* 2. — **Marshal of the King's Bench.** See *marshal.* — **Marshal of the king's household.** Same as *knight marshal* (which see, under *knight*). — **The king's English.** See *English.* — **The king's language†,** the king's English.

> Your Grace . . . on this subject reproving your courteoures, quha on a new conceat of finnes sum tymes spilt (as they cal it) the *king's language.*
> *A. Hume,* Orthographie (E. E. T. S.), Ded., p. 2.

Three kings of Cologne, the Three Kings, the three wise men of the East, Gaspar, Melchior, and Balthazar. =Syn. 1. *Sovereign,* etc. See *prince.*

king[1] (king), *v.* [< *king*[1], *n.*] **I.** *trans.* **1.** To rule; govern (as a king).

> For, my good liege, she is so idly *king'd,*
> Her sceptre so fantastically borne
> By a vain, giddy, shallow, humorous youth,
> That fear attends her not. *Shak.,* Hen. V., ii. 4, 26.

2. To make royal; raise to royalty.

> Those traitorous captains of Israel who *kinged* themselves by slaying their masters and reigning in their stead.
> *South,* Works, XI. ii.

II. *intrans.* To perform the part of king; act the king: with an indefinite *it.*

> The News here is that Lambeth-House bears all the sway at Whitehall and the Lord Deputy *kings it* notably in Ireland. *Howell,* Letters, ii. 28.

king[2] (king), *n.* [Chin.] **1.** The collective name in China for the books edited or compiled by Confucius, and forming with the Four Books (see *analect*) the classics of the country. — **2.** In Chinese translations of Buddhist Scriptures, the equivalent of *sutra* (which see).

king[3] (king), *n.* [Chin.] A Chinese musical instrument, of very ancient origin, consisting of sixteen suspended stones or metallic plates of graduated size, which are sounded by blows of a metal or wooden hammer.

king-apple (king'ap′l), *n.* A variety of apple, large, red in color, and of excellent quality.

king-at-arms (king'at-ärmz′), *n.* In *her.,* an officer of some antiquity in Great Britain, and formerly of great authority, whose business it is to direct the heralds, preside at their chapters, and have the jurisdiction of armory. In England there are three kings-at-arms, namely, Garter (see *Garter*), Clarencieux, and Norroy. The first of these is styled *principal king-at-arms,* and the others are called *provincial kings,* because their duties are confined to the provinces — the one (Clarencieux) officiating south of the Trent, and the other (Norroy) north of that river. There is a *Lyon king-at-arms* for Scotland, and an *Ulster king-at-arms* for Ireland, and one styled *Bath* or *Gloucester,* whose jurisdiction extends to Wales, but who is not a member of the heraldic chapter. The crown of a king-at-arms is composed of sixteen oak-leaves set erect upon a golden circle; nine leaves appear in the representations. Each king-at-arms has his official escutcheon, which he impales on the dexter side, with his own paternal arms on the sinister.

king-auk (king'âk), *n.* The great auk, *Alca impennis.*

kingbird (king'bėrd), *n.* **1.** A tyrant flycatcher, *Tyrannus carolinensis,* abundant in the United States (also called *bee-martin*), or some other species of the same genus, as the *gray kingbird, Tyrannus dominicensis.* — **2.** Any bird of the family *Tyrannidæ;* any tyrant flycatcher.

Kingbird or Bee-martin (*Tyrannus carolinensis*).

king-bolt (king'bōlt), *n.* **1.** A large bolt connecting the fore part of a carriage with the fore axle. The axle rotates about it as a joint when the carriage is turned. — **2.** A large bolt which passes through the truck and body-bolsters and center-plates of a carbody and the center of a truck. *Car-Builder's Dict.*

Also *king-pin.*

king-by-your-leave†, *n.* An old game of hide-and-seek.

> [*King-by-your-leave*] A playe that children have, where one sytting blyndefolde in the midle bydeth so tyll the rest have hydden themselves, and then he going to seeke them, if any get his place in the meane space, that same is kynge in his roume. *Huloet,* 1572.

king-crab (king'krab), *n.* **1.** A horseshoe-crab or Molucca crab; a crustacean of the family *Limulidæ* and genus *Limulus,* as *L. polyphemus, L. moluccanus,* or *L. rotundicaudus.* The king-crab is so called from its great size; it sometimes attains a length of 2 feet. The carapace is concavo-convex, rounded in front, and movably divided into the larger anterior horseshoe-shaped cephalothorax, whence the name *horseshoe-crab,* and a smaller wedge-shaped abdomen, from which projects a long, sharp, bayonet-like tail or telson. On the upper surface are a pair of large compound eyes, and in front of them a pair of small simple eyes. Underneath are five pairs of long ambulatory legs, springing from the cephalothorax near together, and an anterior pair, much smaller and otherwise modified, and differing in the two sexes. The mouth is in the middle line, behind the first pair of legs. Under the abdomen are a number of movable flaps, in the form of thin plates lying one upon another like the leaves of a book; these are pereiopods or swimming-feet, and also respiratory organs or gills. The animal when just hatched is about a quarter of an inch long, has no telson, and the cephalothoracic and abdominal regions are much alike, being somewhat semicircular and hinged by a straight line. The abdomen shows traces of segmentation, and the general aspect recalls that of a trilobite, of which *Limulus* is the nearest relative living. In many respects these strange creatures resemble scorpions, and some contend, therefore, that they are arachnidans, not crustaceans. They are found on the eastern coasts of North America and Asia. See cut under *horseshoe-crab.*

2. A British decapod crustacean, *Maia squinado,* better known as the *thornback-crab.*

kingcraft (king'kraft), *n.* The craft or occupation of kings; the art of kingly government; royal polity or policy.

> With what modestty can hee pretend to be a Statesman himself, who, with his Fathers *Kingcraft* and his own, did never that of his own accord which was not directly opposit to his professed Interest both at home and abroad?
> *Milton,* Eikonoklastes, xi.

> As for tricking, cunning, and that which in sovereigns they call *king-craft,* and reason of state in commonwealths, to them and their proceedings Polybius is an open enemy.
> *Dryden,* Character of Polybius.

> Never was there so consummate a master [as Louis XIV.] of . . . *king-craft* — of all those arts which most advantageously display the merits of a prince, and most completely hide his defects. *Macaulay,* Mirabeau.

king-crow (king'krō), *n.* A drongo-shrike of the genus *Dicrurus,* as the Indian finga, *D. macrocercus,* remarkable for its elongated forked tail and for the courage and address with which, like the king-bird of the United States, it attacks other birds. The term is extended to various other drongos of the family *Dicruridæ.*

kingcup (king'kup), *n.* A plant: same as *gold-cup.*

> Strowe me the ground with Daffadowndillies,
> And Cowslips, and *Kingcups,* and loved Lillies.
> *Spenser,* Shep. Cal., April.

king-devil (king'dev′l), *n.* A species of hawkweed, *Hieracium præaltum,* recently introduced from Europe, and becoming a serious pest to farmers. It forms a continuous mat of pale-green leaves, lying flat on the ground and preventing any other form of vegetation from taking root. *L. F. Ward,* Botanical Gazette, XIV. 14. [Northern New York.]

kingdom (king'dum), *n.* [< ME. *kingdom, kyngdom,* < AS. *cyningdōm* (= OS. *kuningdōm* = MD. *koninkdom,* D. *koningdom* = G. *königthum* = Icel. *konungdōmr* = Dan. *kongedömme* = Sw. *konungadöme*), kingly power, < *cyning,* king, + *dōm,* jurisdiction: see *king*[1] and *-dom.* This word has taken the place of ME. *kinedom,* < AS. *cynedōm,* a kingdom.] **1.** The power or authority of a king; regal dominion; supreme rule. [Archaic.]

> There be some standing here which shall not taste of death till they see the Son of man coming in his *kingdom.*
> Mat. xvi. 28.

> The Father, to whom in heaven supreme
> *Kingdom,* and power, and glory appertains.
> *Milton,* P. L., vi. 815.

2†. The state of being a king; kinghood; kingship.

> I must be married to my brother's daughter,
> Or else my *kingdom* stands on brittle glass.
> *Shak.,* Rich. III., iv. 2, 62.

3. The territory or country subject to a king; the dominion of a king or monarch (see *king*[1], 1); in general, a domain; country. — **4.** Anything conceived as constituting a realm or sphere of independent action or control: as, the *kingdom* of thought.

> In the body of this fleshly land,
> This *kingdom,* this confine of blood and breath,
> Hostility and civil tumult reigns
> Between my conscience and my cousin's death.
> *Shak.,* K. John, iv. 2, 246.

> Who pass'd, methought, the melancholy flood
> With that grim ferryman which poets write of,
> Unto the *kingdom* of perpetual night.
> *Shak.,* Rich. III., i. 4, 47.

5. In the New Testament, with the definite article, usually in fuller phrase *the kingdom of God,* or *the kingdom of heaven,* the spiritual reign of God as supreme king, and over subjects loyally accepting it: generally conceived as founded by the Messiah, and therefore a Messianic kingdom. The term is used with different shades of meaning, but always with this fundamental idea of God's reign as recognized and loyally accepted. Sometimes this reign is spoken of as recognized in the heart and life of the individual, sometimes as supreme in the community, sometimes prophetically as in its perfection embracing the whole body of the redeemed. (See, for a collection of these definitions, Dr. James S. Candlish's "The Kingdom of God," Appendix, note 2, p. 392.)

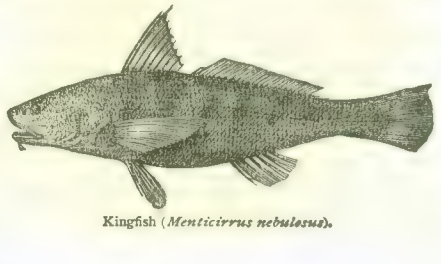
> Jesus went about all Galilee, teaching in their synagogues, and preaching the gospel of *the kingdom.*
> Mat. iv. 23.

> Not every one that saith unto me, Lord, Lord, shall enter into *the kingdom of heaven;* but he that doeth the will of my Father which is in heaven. Mat. vii. 21.

> *The kingdom of God* is not meat and drink; but righteousness, and peace, and joy in the Holy Ghost.
> Rom. xiv. 17.

6. In *nat. hist.,* one of the three great divisions in which natural objects are ranked in classification — namely, the animal, vegetable, and mineral *kingdoms.* — **Kingdom come,** the hereafter: as, to go to *kingdom come* (that is, to die). [Slang.] — **Latin kingdom.** See *Latin.* — **United Kingdom,** Great Britain and Ireland: so called since the legislative union of the two islands under the Act of Union of 1800, which took effect January 1st, 1801.

kingdomed (king'dumd), *a.* [< *kingdom* + *-ed*[2].] Possessing kingly power or character.



> Imagined worth
> Holds in his blood such swoln and hot discourse,
> That 'twixt his mental and his active parts
> *Kingdom'd* Achilles in commotion rages.
> *Shak.,* T. and C., ii. 3, 185.

king-duck (king'duk), *n.* A kind of eider-duck, *Somateria spectabilis,* of the subfamily *Fuliguline* and family *Anatidæ,* common on the northerly coasts of Europe and America. It differs from the common eider notably in the shape of the bill and head, in coloration, mode of feathering of the base of the upper mandible, position of the nostrils, etc.

king-eider (king'ī′dėr), *n.* Same as *king-duck.*

king-fern (king'fėrn), *n.* The royal or flowering fern, *Osmunda regalis.*

kingfish (king'fish), *n.* One of various fishes, of large size or of excellent quality, belonging to different families. (*a*) In the Atlantic States, and especially in New York, a sciænoid fish, *Menticirrus nebulosus,* of elongate form, with the ventral fins some dis-

tance behind the pectoral fins, and the body grayish and silvery in color, with irregular dark bars, of which the anterior trend obliquely backward and downward, and the posterior forward and downward. It is much esteemed for its flesh. Also called *whiting*, *tomcod*, *hake*, *black mullet*, and *mink*, names properly belonging to different animals. The name is also extended to related species, as the southern *M. americanus* (also called *Carolina whiting*, *Bermuda whiting*, though not found in Bermuda, *bullhead whiting*, *ground mullet*, and *barb*) and the Pacific coast *M. undulatus* (also called *sucker*). (*b*) In California, another sciænoid fish, *Seriphus politus*, better known as *queenfish*. (*c*) A sciænoid fish, *Sciæna antarctica*, of southern Australia and Tasmania, closely related to the maigre of Europe. (*d*) In New Zealand, a carangoid fish, *Seriola lalandi*, of a fusiform shape, with from 6 to 8 dorsal spines and 32 to 36 dorsal rays, steel-blue above and white below. It sometimes attains a length of 4 feet, and is an excellent food-fish. (*e*) In England, the opah, *Lampris luna*. See *opah*. (*f*) A scombroid fish, *Scomberomorus regale*, related to the Spanish mackerel; also, the *Scomberomorus caballa* or *Cero*. (*g*) A sciænoid fish, the little roncador, *Genyonemus lineatus*, common on the coast of California: so called in the San Francisco markets. (*h*) A fish of the family *Polynemidæ*, *Polynemus indicus*, esteemed in India for the sounds, which yield isinglass of the best quality, and which are a constant source of traffic among the Chinese.

kingfisher (king′fish″ėr), *n.* 1. Any bird of the extensive family *Alcedinidæ*. Kingfishers form a natural family of picarian birds, with fissirostral bill and syndactyl feet, and are remarkable for their number and variety as well as for the brilliancy of their plumage. They nest in holes, and lay white eggs. Their characteristic habit is to sit motionless on the watch for their prey, dart after it, and return to their perch. There are about 125 species and 20 genera, found in most parts of the world, but very unevenly distributed. Thus, there are only 2 species peculiar to northern parts of the old world, only 2 species in North America, and only one genus in all America. The Ethiopian region and the Indian region are about equally rich; the Australian (in a broad sense) is the richest, alone possessing half the genera and half the species. The common kingfisher of Europe, *Alcedo ispida*, a small bird of brilliant colors, is supposed to be the halcyon of classic writers. The pied kingfisher, *Ceryle rudis*, also inhabits Europe as well as other countries. The common American kingfisher, *C. alcyon*, is 12½ inches long, 22 in extent of wings, dull-blue above, white below, with a bluish belt on the breast and in the female a chestnut bar behind this; the wing- and tail-feathers are black, spotted and barred with white; the head is crested. This bird is known as the *belted kingfisher*. (See cut under *Ceryle*.) A small, glossy green-and-white species, which reaches the Mexican border of the United States, is *C. cabanisi*. The giant kingfisher or laughing-jackass of Australia is *Dacelo gigas*. See cut under *Dacelo*.

Erroneously—2. (*a*) The water-ouzel, *Cinclus aquaticus*, popularly imagined to be the female of the kingfisher *Alcedo ispida*. [Local, Scotland and Ireland.] (*b*) The tern or sea-swallow.

Also *king's-fisher*.

Swallow-tailed kingfisher, the paradise jacamar, *Galbula paradisea*, a bird of Surinam.

king-geldt, *n.* [< *king*[1] + *geld*[2].] Escuage, or royal aid. *Bailey*, 1731.

king-gutter (king′gut″ėr), *n.* A main drain. *Halliwell.* [Prov. Eng.]

king-hake (king′hāk), *n.* A gadoid fish of the genus *Urophycis*, *U. regius*, not rare along the eastern coast of the United States. It is readily distinguishable by a row of white spots along the lateral line and the low dorsal fin. It rarely much exceeds a foot in length.

kinghead† (king′hed), *n.* [ME. *kinghed*, *kinghede*; < *king*[1] + *-head*. Cf. *kinghood*.] Kingship.

I wende that *kinghed* and knigthed and caiseris with erlis
Wern Do-wel and Do-bet and Do-best of hem alle.
Piers Plowman (A), xi. 216.

To every man belongeth lore,
But to no man belongeth more
Than to a kynge, whiche hath to lede
The people, for his *kynghed*
He maie hem both saue and spille.
Gower, Conf. Amant., vii.

kinghood (king′hůd), *n.* [ME. *kinghod*; < *king*[1] + *-hood*.] Kingship; the state of being a king.

Bi alle the kud customes to *Kinghod* that longes.
William of Palerne (E. E. T. S.), l. 4058.

kinghunter (king′hun″tėr), *n.* A halcyon, or non-aquatic kingfisher: a name invented to avoid speaking of a bird that does not fish as a "kingfisher." See *Halcyoninæ*.

Kingia (kin′ji-ą), *n.* [NL. (Robert Brown, 1827), named primarily in honor of Capt. Philip Gidley *King*, governor of New South Wales at the time of Flinders's expedition, during which the plant was first collected, but also intended to commemorate Capt. *King*, who first found the ripe seeds in November, 1822.] A genus of monocotyledonous plants of anomalous character, referred by the latest writers to the *Liliaceæ*, but formerly regarded as belonging to the *Juncaceæ*, or rush family. It has by some authors been made the type of the group to which it belongs, but is now placed in the tribe *Calectasieæ* with *Calectasia* and *Baxteria*. It differs, however, from both those genera in having the leaves crowded at the apex of the trunk, and the flowers likewise crowded in a terminal head, and in its 3-celled ovary. The trunk is woody, and the leaves are linear, the whole plant forming a sort of grass-tree. Only one species, *K. australis*, is known, native of southwestern Australia.

kingio (kin′gyō), *n.* [Jap., goldfish, < *kin*, gold, + *gio*, fish.] A Japanese variety of the goldfish, *Carassius auratus*.

king-killer (king′kil″ėr), *n.* 1. One who kills a king; a regicide.

O thou sweet *king-killer* [gold], and dear divorce
'Twixt natural son and sire! *Shak.*, T. of A., iv. 3, 382.

2. A large, high-finned killer-whale, supposed to be the male. [Provincetown, Massachusetts.]

kingless (king′les), *a.* [< ME. *kyngles* (= G. *königlos* = Icel. *konunglauss*); < *king*[1] + *-less*.] Without a king; having no king.

Tho was this lond *kyngles*. *Rob. of Gloucester*, p. 105.

kinglet (king′let), *n.* [< *king*[1] + *-let*.] 1. A little king; a weak or insignificant king.

A present to the boy at Byzantium, from some hundred-wived *kinglet* of the Hyperborean Taprobane, or other no-man's land in the far East. *Kingsley*, Hypatia, xx.

2. A golden-crested or ruby-crowned wren; one of a number of very diminutive greenish birds, about 4 inches long, having a yellow, orange, or flaming crest, constituting the subfamily *Regulinæ*. The best-known is the European goldcrest, *Regulus cristatus*. (See cut under *goldcrest*.) Two distinct United States species are the golden-crowned, *R. satrapa*, and the ruby-crowned, *R. calendula*, both very common in woodland and shrubbery. They are dainty little birds in form, color, and manners, having an exquisite song of great volume considering their tiny size. They are migratory and insectivorous, build very bulky mossy nests warmly lined with feathers, and lay numerous white eggs spotted with reddish brown.

kinglihood (king′li-hůd), *n.* [< *kingly* + *-hood*.] The quality of being kingly; kingliness; kingship. [Poetical.]

Since he neither wore on helm or shield
The golden symbol of his *kinglihood*,
But rode a simple knight among his knights.
Tennyson, Coming of Arthur.

king-tyrant (king'tī″rant), *n.* The king-bird.

king-vulture (king'vul″tūr), *n.* A large American vulture of the family *Cathartidæ*, the *Sarcorhamphus papa*: so called because the smaller vultures, as turkey-buzzards and carrion-crows, are often driven from their repasts by this more powerful bird of prey. The plumage is white, of a creamy or pale-buff tint; the large wing- and tail-feathers are black; and the head and upper neck are naked or nearly so, and brilliantly varied with scarlet, orange, blue, black, and white. The bird is much inferior in size and in spirit to the condor of South America and to the Californian condor. It inhabits South and Central America and Mexico, in wooded districts; its extreme range is from Paraguay to near the Mexican border of the United States.

King-vulture (*Sarcorhamphus* or *Gyparchus papa*).

kingwood (king'wůd), *n.* A Madagascar wood of unknown origin, very hard and heavy. When fresh it is of a reddish purple color beautifully streaked with violet tints, but turns to a dark violet on exposure. It is used in turning and small cabinet-work. Also called *violet-wood*.

kinic (kin'ik), *a.* [Also *quinic*; = F. *kinique*; < *kina*, an abbr. of *quinquina*, cinchona: see *quinine*.] Pertaining to or obtained from cinchona.—**Kinic acid**, $C_7H_{12}O_6$, a monobasic vegetable acid found in the cinchona bark, where it exists in combination with the alkaloids cinchonine and quinine, and also with lime, forming the kinates of these bases. It is found also in the blaeberry (*Vaccinium Myrtillus*), in coffee-beans, and in the leaves of oak, elm, ivy, holly, etc. Also *hexahydrotetrahydroxybenzoic acid*.

kink[1] (kingk), *n.* [Also dial. *kenk*, and (Sc.) *kinch*, *kinsch*; = D. G. *kink*, < Norw. Sw. *kink*, a twist or curl in a rope; cf. Icel. *kengr*, a bend or bight, a metal crook. Cf. also Norw. *kika*, *kinka*, writhe, Icel. *kikna*, sink at the knees under a burden.] 1. A knot-like contraction or curl in a thread, cord, or rope, or in a hair, wire, or chain, resulting from its being twisted or doubled upon itself, or from the nature of the material. Also *kinkle*.

It is impossible by projecting the after-image of a straight line upon two surfaces which make a solid angle with each other to give the line itself a sensible *kink*.
W. James, Mind, XII. 532.

2. An unreasonable and obstinate notion; a crotchet; a whim. [Colloq.]

The fact is, when a woman gits a *kink* in her head agin a man, the best on us don't allers do jest the right thing.
H. B. Stowe, Oldtown, p. 33.

kink[1] (kingk), *v. i.* or *t.* [< *kink*[1], *n.*] 1. To form kinks; twist or contract into knots.—2. To become entangled: said of a line.

kink[2] (kingk), *v. i.* [< ME. *kinken*, *kynken*, also assibilated *kenchen*, < AS. **cincian* (in verbal n. *cincung*, a fit of laughter) = MD. *kinchen*, D. *kinken*, cough; prob. ult. imitative, like *hic*. Hence *chink*[4], *kinkcough*, *chincough*, *kinkhaust*, etc.] 1. To laugh loudly.—2. To gasp for breath as in a severe fit of coughing: especially applied to the noisy inspiration of breath in whooping-cough. [Obsolete or colloq. in both uses.]

I laghe that I *kynke*.
Towneley Mysteries, p. 309. (*Halliwell.*)

kink[2] (kingk), *n.* [< *kink*[2], *v.*] A convulsive fit of coughing or laughter; a sonorous indraft of the breath; the whoop in whooping-cough; a gasping for breath caused by coughing, laughing, or crying. [Scotch and southern U. S.]

I gae a sklent wi' my ee to Donald Roy Macpherson, and he was fa'n into a *kink* o' laughing.
Hogg, Brownie o' Bodsbeck, II. 24.

kinkajou (king'kạ-jö), *n.* [Also *kincajou*; Canadian F. *kinkajou*, *quincajou* (*Clapin*, p. 357): originally same as *carcajou*.] A procyoniform quadruped of Central and South America, *Cercoleptes caudivolvulus*, family *Cercoleptidæ*, series *Arctoidea procyoniformia* of the order *Feræ* or *Carnivora*. It is about as large as a cat, with a long, tapering, prehensile tail, short limbs, low ears, broad rounded head, slender body, and narrow protrusile tongue; it is of a pale yellowish-brown color and arboreal nocturnal habits. The animal resembles a lemur in some respects, but is most nearly related to the racoon. Also called *American potto*, *honey-bear*, etc.

Kinkajou or Potto of South America (*Cercoleptes caudivolvulus*).

kinkcough (kingk'kôf), *n.* [Also *kindcough*; < *kink*[2] + *cough*. Cf. *chincough*.] The whooping-cough. [Scotch.]

This must indeed be the *kinkcough*. Oh, sir! do not grow so black in the face, if you can help it, my dear sir.
J. Wilson, Noctes Ambrosianæ, Feb., 1832.

kinker (king'kèr), *n.* [Origin obscure.] An icicle. [Prov. Eng.]

kinkhab, *n.* See *kincob*.

kinkhost, kinkhaust (kingk'hōst, -hâst), *n.* [< D. *kinkhoest*, whooping-cough; as *kink*[2] + *host*[4], *haust*[1].] The whooping-cough. [Scotch or prov. Eng.]

kin-kina†, *n.* [Var. of *quina-quina*.] Quinine.

He that first . . . made public the virtue and right use of *kin-kina* . . . saved more from the grave than those who built colleges, work-houses, and hospitals.
Locke, Human Understanding, IV. xii. 12.

kinkle[1] (king'kl), *v. i.*; pret. and pp. *kinkled*, ppr. *kinkling*. [Freq. of *kink*[1], *v.*] To kink. See *kink*[1], *v.*, 1.

kinkle[1] (king'kl), *n.* [< *kinkle*, *v.*; or dim. of the orig. *kink*[1], *n.*] Same as *kink*[1], 1.

I love, I say, to start upon a tramp,
To shake the *kinkles* out o' back an' legs.
Lowell, Biglow Papers, 2d ser., ii.

kinkle[2] (king'kl), *n.* *Brassica arvensis*, the charlock. [Prov. Eng.]

kinkled (king'kld), *a.* [< *kinkle* + *-ed*[2].] Having kinkles or kinks.—**Kinkled glass.** See *glass*.

kinky (king'ki), *a.* [< *kink*[1] + *-y*[1].] 1. Full of kinks; kinkled; woolly: applied especially to hair, as that of the negro, which is not cylindric, but flattened so that when pulled out straight and allowed to untwist itself the flattening is in different planes. The hair of the beard, etc., of other races is also kinky to some extent.—2. Crotchety; eccentric. [Colloq., U. S.]

kinless (kin'les), *a.* [< *kin*[1] + *-less*.] Destitute of kin or kindred.—**Kinless loons**, a name given by the Scotch to the judges sent among them by Cromwell, because they distributed justice solely according to the merits of the cases, being uninfluenced by family or party ties. *Imp. Dict.*

kinnikinick, kinnikinic (kin″i-ki-nik'), *n.* [Also *killikinick*, *kilikinic*; Algonkin, lit. 'a mixture,' 'that which is mixed.'] 1. The leaves or bark of several plants (willow, sumac, etc.), smoked either with or without tobacco by the American Indians.—2. Specifically, the trailing ericaceous plant *Arctostaphylos Uva-ursi*, or bearberry, common northward in America, as well as in the Old World.

The bearberry has, however, an association with Indian history, as it is the *kinnikinnick* of the Western races, who smoke it, and believe the practice secures them from malarial fevers.
Thomas Meehan, Native Flowers and Ferns, I. 78.

3. The silky cornel, *Cornus Amomum*, whose bark was used in the manner mentioned in def. 1; doubtless, also, the closely related *Cornus stolonifera*, or red-osier dogwood. In this sense best known in America.

kino[1] (kē'nō), *n.* [= F. *kino*; appar. of W. Afr. origin.] A well-known drug resembling catechu, consisting of the gum of several trees belonging to the tropics. It is a more or less brittle substance, in general of a dark reddish-brown color in the mass. Its chief component is tannic acid, and it thus becomes a powerful astringent. Its leading use is medicinal, but it is also employed in India in dyeing cotton, giving the color called *nankeen*. The kinds may be classified according to their source. (*a*) East Indian, Malabar, or Amboyna kino is the product of the leguminous tree *Pterocarpus Marsupium* of India and Ceylon. It is the kind most extensively used, and the only kino of the British Pharmacopœia. (*b*) The Bengal, butea, dhak, or palas (pulas) kino is yielded by *Butea monosperma*, to some extent also by *B. superba* and *Spatholobus Roxburghii*. (*c*) Botany Bay, Australian, or eucalyptus kino is derived from *Eucalyptus siderophloia* and several other species, the best variety probably from *E. corymbosa*. It is used in England, under the name of *red-gum*, in astringent lozenges for sore throat. See *ironbark-tree*. (*d*) African kino was the first brought into notice, but has long been out of the market. It was produced by *Pterocarpus erinaceus*. (*e*) West Indian or Jamaica kino is the product of *Pterocarpus officinalis*, the dragon's-blood tree. It has sometimes been exported, but appears to have no fixed standing in the market. (*f*) South American or Caracas kino is thought to be from the same tree as the West Indian. Now in considerable use in the United States.

kino[2], *n.* Another spelling of *keno*.

kinofluous (ki-nof'lö-us), *a.* [< *kino*[1] + L. *fluere*, flow.] Exuding kino.

kinology (ki-nol'ō-ji), *n.* [Irreg. < Gr. κινεῖν, move, + *-λογία*, < λέγειν, speak: see *-ology*.] That branch of physics which deals with the laws of motion. [Rare.]

kinone (kin'ōn), *n.* [< *kin(ic)* + *-one*.] See *quinone*.

kinred†, **kinrede**†, *n.* Middle English forms of *kindred*.

kinric†, *n.* Same as *kingric*.

kinsfolk (kinz'fōk), *n. pl.* [< *kin's*, poss. of *kin*[1], + *folk*.] Relatives; kindred; persons of the same family.

"Well," resumed Mr. Rochester, "if you disown parents, you must have some sort of *kinsfolk*—uncles and aunts?"
Charlotte Brontë, Jane Eyre, xiii.

kinsh (kinsh), *n.* [Origin obscure.] A crowbar used in quarrying. [Prov. Eng. and Scotch.]

kinship (kin'ship), *n.* [< *kin*[1] + *-ship*.] Relationship; consanguinity; generic affinity.

Leolin . . .
Would often, in his walks with Edith, claim
A distant *kinship* to the gracious blood
That shook the heart of Edith hearing him.
Tennyson, Aylmer's Field.

2. (*a*) A confection, usually made of whites of eggs and powdered sugar, mixed, and baked in an oven. (*b*) A sugar-plum or candied confection made of pulled sugar and variously colored and flavored. — 3. *pl.* Same as *kiss-me*. — **Kiss of peace**, in the *early church*, a kiss exchanged as a greeting and in sign of Christian love, and used ceremonially at baptism and on other occasions, but especially in the eucharistic service introduced by the words "Peace be with you" (response, "and with thy spirit"), and "Greet ye one another with an holy kiss," or some similar form. (See 1 Cor. xvi. 20, and other passages of Scripture.) Kissing as an act of salutation was not unusual in ordinary intercourse in some of the countries where Christianity first prevailed; but among the Christians the kiss of peace was ordered at a very early date to be confined to persons of the same sex. Later, the custom of actually giving the kiss fell into gradual disuse, though liturgical forms still survive to represent its spiritual meaning of reconciliation to God and man. In the Western Church the kissing of a tablet called the pax has, since the thirteenth century, replaced the kiss between persons; and this form of the ceremony is still sometimes used at high mass in the Roman Catholic Church, but is not extended to the congregation. Sometimes called simply *the peace*. See *pax*. ★

kiss (kis), *v.* [< ME. *kissen*, *kyssen* (pret. *kist*, *kiste*), < AS. *cyssan* (pret. *cyste*) = OS. *kussjan* = OFries. *kessa* = D. *kussen* = MLG. *kussen* = OHG. *chussen*, *chussan*, *cussan*, MHG. Then in his hand he takes a thick bat,
With which he used to play at *kit-kat*.
Cotton, Works (1734), p. 88.

kit-cat[2], **kit-kat** (kit′kat), *n.* [So called from portraits of members of the *Kit Cat* Club (founded in London about 1700), painted of this size by Sir Godfrey Kneller. See first quotation below. The club, of which Addison and Steele were members, was so called from *Kit Cat* or *Katt* (*Christopher Katt*), a pastry-cook who served the club. "Immortal made as *Kit Cat* by his pies"—*W. King*, Art of Cookery, let. viii. (first printed in 1708).] A particular size of portrait, less than half-length, in which a hand may be shown; a truncated portrait.

The room where these portraits [of the Kit-Kat Club] were intended to be hung (in which the Club often dined) not being sufficiently lofty for half-length pictures, that circumstance is said to have been the occasion of a shorter canvas being used, which is now denominated a *Kit-Kat*, and is sufficiently long to admit a hand. The canvas for a *Kit-Kat* is thirty-six inches long and twenty-eight wide.
Malone, Life of Dryden, p. 534, note.

Addison saw in Steele's *kit-cat* of Sir Roger the occasion for a full-length after his own heart.
A. Dobson, Int. to Steele's Plays, p. xxxi.

Some of his *kit-kats* and his full-length figures give one a better idea of his widely differing subjects than can be found in any other of the branches of his twin arts.
Harper's Mag., LXXVIII.

The poor man's wine,
His wee drap parritch, or his bread,
Thou *kitchens* fine.
Burns, Scotch Drink.

3. To use (food) as kitchen—that is, sparingly, or so that it may last. Thus, a child eating bread and milk may be told to *kitchen* the milk—that is, use it sparingly in proportion to the bread. [Colloq., Scotch.]

kitchen-co† (kich′en-kō), *n.* A corruption of *kinchin-cove*.

A *Kitchin Co* is called an ydle runagate Boy.
Fraternity of Vagabonds (1561), quoted in Ribton-Turner's [Vagrants and Vagrancy, p. 594.

kitchendom (kich′en-dum), *n.* [< *kitchen* + *-dom*.] The domain of the kitchen. *Davies.*

What knowest thou of flowers, except, belike,
To garnish meats with? hath not our good King
Who lent me thee, the flower of *kitchendom*,
A foolish love for flowers?
Tennyson, Gareth and Lynette.

kitchener (kich′en-ėr), *n.* 1. A person employed in a kitchen; the superintendent of a kitchen; a kitchen-purveyor.

Two most important officers of the Convent, the *Kitchener* and Refectioner, were just arrived with a sumpter-mule, loaded with provisions. *Scott*, Monastery, xv.

The industry of all crafts has paused—except it be the smith's fiercely hammering pikes, and in a fain degree the *kitchener's* cooking off-hand victuals.
Carlyle, French Rev., I. v. 5.

2. An economical or elaborated cooking-stove or other culinary appliance. Specifically—(*a*) A special form of stove adapted for cooking, fitted with dampers, and combining ovens, plate-warmers, devices for heating a supply of water, and often many other contrivances.

A general use of gas cooking stoves and *kitcheners* burning small coke. *Sci. Amer.*, N. S., LVIII. 101.

It is almost impossible to have a properly roasted joint in closed *kitcheners*. *Encyc. Brit.*, VI. 332.

(*b*) A name given to ancient utensils of bronze, such as those found at Pompeii, in which water could be heated and various dishes kept hot at slight expense of fuel. The Naples Museum contains some very elaborate specimens.

kitchen-fare (kich′en-fār), *n.* Such fare as servants are allowed in a kitchen.

kitchen-fee (kich′en-fē), *n.* The fat which falls from meat in roasting; drippings: so called because it forms one of the cook's perquisites. [Great Britain.]

The managers were satisfied that fat drippings and *kitchen-fee* were preferable to the proposed substitute.
Caledonian Mercury, Nov. 24, 1823.

kitchen-gain† (kich′en-gān), *n.* Same as *kitchen-fee*.

The sweat upon thy face doth oft appear
Like to my mother's fat and *kitchen-gain*.
Greene, Doron's Eclogue.

kitchen-garden (kich′en-gär″dn), *n.* 1. A garden or piece of ground appropriated to the raising of vegetables for the table.

The product of *kitchen-gardens* in all sorts of herbs, sallads, plants, and legumes. *Sir W. Temple*, Of Gardening.

Shak., C. of E., iv. 4, 77.

kitchen-midden (kich′en-mid″n), *n.* [< *kitchen* + *midden*, after the equiv. Dan. *kjökkenmödding*.] A shell-mound: the literal translation of the Danish *kjökkenmödding*, kitchen refuse. This refuse forms extensive heaps or mounds, which consist chiefly of the shells of edible mollusks mixed with fragments of bones of various animals, and implements of stone, bone, and horn. Mounds of this kind are found in large numbers on the eastern coast of Denmark, in various parts of Scotland along the shores of the firths, as well as in Ireland and elsewhere. They are the refuse heaps which accumulated around the dwellings of former inhabitants, and in the case of Denmark are believed by the best authorities to be referable to the early part of the Neolithic age, "when the art of polishing flint implements was known, but before it had reached its greatest development" (*Sir J. Lubbock*, Prehistoric Times, 2d ed., p. 240). See *midden* and *shell-mound*.

During the past summer the museum at Copenhagen has explored a large *kitchen-midden* in Jutland, situated in a forest a couple of miles from the sea.
Amer. Naturalist, XXIII. 80.

kitchen-mort (kich′en-môrt), *n.* A corruption of *kinchin-mort*. [Old slang.]

Scott, Guy Mannering, xxviii.

kitchen-physic (kich′en-fiz″ik), *n.* Nourishing diet for an invalid; substantial fare; good living. [Humorous.]

For my selfe, if I be ill at ease, I take *kitchyn physicke;* I make my wife my doctor, and my garden my apoticaries shop.
Greene, Quip for Upstart Courtier (Harl. Misc., V. 406).

Nothing will cure this mans understanding but some familiar and *Kitchen physick;* which, with pardon, must for plainnes sake be administer'd unto him. Call hither your cook. *Milton*, On Def. of Humb. Remonst., § 2.

kitchenry† (kich′en-ri), *n.* [< *kitchen* + *-ry*.] 1. Utensils used in the kitchen; utensils for cooking.—2. The body of servants employed in a kitchen.

Close unto the front of the chariot marcheth all the sort of weavers and embroderers; next unto whom goeth the black-guard and *kitchenry*.
Holland, tr. of Ammianus, p. 12.

kitchen-stuff (kich′en-stuf), *n.* 1. Material used in kitchens; requisites for a kitchen; specifically, vegetables for cooking.

In such a state of things, would you easily believe his lordship could pride himself in cooking up this cold *kitchin-stuff*, and serving it again and again, amidst so elegant an entertainment?
Warburton, Lord Bolingbroke's Philosophy.

2. The refuse of a kitchen; garbage; specifically, refuse fat and fat-yielding material, such as may be got from pots and dripping-pans.

A thrifty wench scrapes *kitchen-stuff*. *Donne.*

Here in a small apartment may be a pile of rags, a sackfull of bones, the many varieties of grease and *kitchen-stuff*, corrupting an atmosphere which, even without such accompaniments, would be too close.
Mayhew, London Labour and London Poor, II. 120.

kitchen-wench (kich′en-wench), *n.* A kitchen-maid; a female scullion.

Laura, to his lady, was but a *kitchen-wench*.
Shak., R. and J., ii. 4, 42.

kite[1] (kīt), *n.* [Early mod. E. also improp. ★*kighte;* < ME. *kite*, *kete*, < AS. *cȳta*, a kite (bird). Cf. W. *cud*, a falcon, also flight, velocity.] 1. A diurnal bird of prey of the family *Falconidæ* and subfamily *Milvinæ;* a glede. The kites are among the inferior hawks, having a rather weak bill without a tooth, small feet with moderate talons, long pointed wings, and usually long, often forked tail; but there are no diagnostic characters by which the kites can be defined with precision. They prey upon humble quarry, as insects, reptiles, and small birds and mammals. The common kite or glede of Europe is *Milvus ictinus*, *regalis*, or *vulgaris*, a bird 2 feet long, the wing 20 inches, of a brown color above, the feathers with reddish edgings, the under parts mostly rufous; the tail is 15 inches long, forked. *Milvus ægyptius* is the Arabian kite; *M. ater* is the black kite of Africa and parts of Europe; *M. govinda* is the Indian kite; *M. isurus*, the Australian, in which the head is crested. *Elanoides forficatus* is the beautiful swallow-tailed kite of the United States, glossy black and white, with a long, deeply furcate tail. (See cut under *Elanoides*.) *Nauclerus riocouri* is a corresponding African species. The white-tailed or pearl kite of the United States is *Elanus leucurus;* and there are several other species of this genus in the warmer parts of the world. The Mississippi kite is *Ictinia mississippiensis;* and a very similar species, *Ictinia plumbea*, inhabits South America. In Swainson's system of classification a certain group of hawks which he called *Cymindinæ* were named

Pearl Kite (*Elanus leucurus*).

kites. The name has been misapplied to various hawks of different genera, as *Buteo*, *Circus*, etc. See *glede*[1] and *hawk*[1], 1.

More pity that the eagle should be mew'd,
While *kites* and buzzards prey at liberty.
Shak., Rich. III., i. 1, 33.

2†. A sharper. [Slang.]

Roister Doister that doughtie *kite*.
Udall, Roister Doister, v. 5.

Cramming of serving-men, mustering of beggars,
Maintaining hospitals for *kites* and curs.
Fletcher, Wit without Money, i. 1.

3. [Prob. so called from its hovering in the air, like the bird so named.] A light frame covered with paper or cloth, designed to be supported in the air by the action of the wind, when held by a long cord. The flying of kites is a pastime of adults in Japan and, to some extent, in China, and of children in Western countries. During recent years, however, kites have been put to practical use in aërial photography, signaling, and in other ways, and their construction has become a subject of scientific study. They are made in a variety of forms.

4. *Naut.*, one of the highest and lightest sails; one of the small sails that are usually spread in light winds, and furled in a strong breeze.— **5.** [In punning allusion to *paper* kites (in def. 3). Cf. *flier*, 6.] An accommodation bill; a negotiable instrument made without consideration; a "wind-bill"; in the plural, mere paper credit not based on commercial transactions. See *accommodation*. [Commercial slang.]

In English Exchequer-bills full half a million,
Not *kites*, manufactured to cheat and inveigle,
But the right sort of "flimsy," all sign'd by Monteagle.
Barham, Ingoldsby Legends, II. 48.

6. The brill. [Local, Eng.]—**Box kite**, a kite consisting of a light frame in the form of a rectangular parallelepiped, covered with cloth with the exception of the ends and a space about the middle.—**Electrical kite**, a contrivance employed by Franklin to verify his hypothesis respecting the identity of electricity and lightning, resembling in shape a school-boy's kite, but covered with silk and varnished paper, and armed with a wire.—**Everglade kite**. See *everglade*.—**Flying kites** (*naut.*), the ★light sails of a ship.—**To fly the kite**. See *fly*[1].

kite[1] (kīt), *v. i.*; pret. and pp. *kited*, ppr. *kiting*. [< *kite*[1], *n.*, 1 and 3.] **1.** To go or fly with great rapidity or with the ease of a kite: as, to go *kiting* about. [Colloq.]—**2.** To fly commercial "kites"; raise money or gain the temporary use of money by means of accommodation bills, or by borrowed, illegally certified, or worthless checks. [Commercial slang.]

kite[2] (kīt), *n.* [Also *kyte;* appar. irreg. < ME. **kit*, **kid* (found only in comp.: see *kidney*), < AS. *cwith* = Icel. *kvidhr* = Sw. *qued*, the womb, = Goth. *kwithus*, the belly, perhaps = Gr. γαστήρ, the belly, = Skt. *jathara*, the belly: see *gaster*[2]. Hence prob., in disguised composition, *kidney*.] The belly. [North. Eng. and Scotch.]

kite-flying (kīt'flī″ing), *n.* **1.** The act or art of flying kites.—**2.** The practice of raising money or sustaining one's credit by means of accommodation bills or other fictitious commercial paper. Also called simply *kiting*.

kitefoot (kīt'fůt), *n.* A variety of the tobacco-plant: so called from its resemblance to a kite's foot.

kite-key (kīt'kē), *n.* The key or fruit of *Fraxinus excelsior*, the common ash of Great Britain. Also *kitty-key*. [Prov. Eng.]

kite-tailed (kīt'tāld), *a.* Having a long tail like a kite's: as, the *kite-tailed* widgeon, *Dafila acuta*, a duck, so called in Florida.

kite-wind (kīt'wind), *n.* A south and south-southwest wind in Siam, prevailing in the latter part of February and early March.

kit-fox (kit'foks), *n.* The American corsak, or swift-fox, *Vulpes velox*, a small fox peculiar to western North America, where it lives in holes in the prairies. It has been noted and named for its swift-footedness, but this has been much exaggerated. It was called *kit-fox* by Lewis and Clarke, named *Canis velox* by Thomas Say in 1823, and called *C. cinereo-argentatus* by Richardson in 1829. It is scarcely half as large as the common fox, the length over all being only about 2½ feet, of which the tail is 1 foot. The color is a uniform pale reddish-yellow above, in winter paler grayish with silvery tips of the hairs; the under parts whitish, the upper lip and tip of the tail blackish. The pelage is very fine, with copious under-fur. This diminutive fox is closely related to

Kit-fox (*Vulpes velox*).

Vulpes corsac of Asia, having no near relative among European or American foxes save *V. macrotis* of California.

kith (kith), *n.* [Formerly also dial. *kiff;* < ME. *kith*, *kyth*, *kitthe*, *kutthe*, *kuththe*, *cuththe*, *couthe*, < AS. *cȳth*, *cȳthth*, *cȳththu*, knowledge, acquaintance, relationship, kinship, native land (= OFries. *kethe*, *kede* = MD. *kunde*, *konde*, D. *kunde* = MLG. knee-iron (nē′ī″ėrn), *n.* An L-shaped angle-iron, used to strengthen a joint formed by two timbers in a frame.

knee-jerk (nē′jėrk), *n.* A sudden jerking of the knee, caused by a contraction of the quadriceps femoris, evoked by a blow on the patellar tendon or in any way that gives the quadriceps a sudden tug. Also called *patellar tendon reflex* and *knee-kick*.

All the methods by which the *knee-jerk* may be obtained are merely different ways of giving the quadriceps muscle a twitch by bringing a sudden strain upon its tendon.
Amer. Jour. Psychol., I. 7.

Human Knee-joint.

1. Right knee-joint laid open from the front, to show the internal ligaments: *a*, cartilaginous surface of lower extremity of the femur, with its two condyles: *b*, anterior crucial ligament; *c*, posterior do.; *d*, internal semilunar cartilage; *e*, external cartilage; *f*, part of the ligament of the patella turned down; *g*, synovial bursa laid open beneath the ligament of the patella. 2. Longitudinal section of the left knee-joint: *a*, cancellous structure of lower part of femur; *b*, tendon of extensor muscles of leg; *c*, patella; *d*, ligament of the patella; *e*, cancellous structure of head of tibia; *f*, anterior crucial ligament; *g*, posterior ligament; *h*, mass of fat projecting into the cavity of the joint below the patella; *i*, bursa.

knee-joint (nē′joint), *n.* **1.** (*a*) The joint at the knee; the joint between the thigh and the lower leg; the articulation of the femur with either or both of the bones of the leg, the tibia and fibula. In man the knee-joint is formed by the articulation of the large external and internal condyles of the femur with the broad flattened top of the tibia (the fibula being excluded), covered in front by the kneepan or patella, a large sesamoid bone in the tendon of the extensor muscles. It is a ginglymus or hinge-joint, permitting complete flexion, limiting extension to a right line, and admitting in some positions of slight rotatory movement. As far as the bones are concerned, the knee-joint is one of the most open and insecure articulations in the body; but it is very strongly secured by its ligaments and tendons. These are, on the surface of the joint, a general capsular investment, particularly thick and strong behind, where it is known as the posterior ligament of Winslow, a structure preventing extension beyond a right line; the patellar ligament, that in which the kneepan is situated, and which is the extensor tendon of the muscles in front of the thigh, inserted into the tibia; the internal lateral ligament, partly covering the tendon of the semi-membranosus muscle; and two external lateral ligaments, passing to the head of the fibula. Inside the joint are a pair of crucial ligaments, crossed like the letter X, passing from the femoral intercondylar notch to the head of the tibia. The nearly flat head of the tibia supports a pair, inner and outer, of semilunar interarticular fibrocartilages. These serve to deepen the depressions which receive the very convex condyles of the femur. These cartilages are interconnected by an anterior transverse ligament, and united to the inner surface of the capsular ligament by two coronary ligaments. The most extensive synovial membrane of the body is found in the knee-joint. Its processes, known as *alar* and *mucous ligaments*, are not ligaments in a proper sense. There are several separate synovial bursæ about the joint; it contains a quantity of fat beneath the patellar ligament, and is supplied by appropriate arteries, veins, nerves, and lymphatics. (*b*) Some joint likened to or mistaken for a knee: as, (1) the carpal articulation of the fore leg of various animals, as the horse; (2) the tarsal articulation of a bird's foot; the heel. — **2.** In *mach.*, same as *toggle-joint*.

knee-jointed (nē′join″ted), *a.* Same as *kneed*, 3.

knee-kick (nē′kik), *n.* Same as *knee-jerk*.

kneel (nēl), *v. i.*; pret. and pp. *knelt* or *kneeled*, ppr. *kneeling*. [< ME. *knelen, cneolen, cneolien, kneulen, knewlen*, < AS. **cneówlian* (cited from a manuscript and not verified, but supported also by the verbal n. *knỹ*, for **cnỹlung*, glossed by L. *accubitus*) (= D. *knielen* = MLG. *knelen, knilen*, LG. *knelen* = G. dial. *knielen*, also (Swiss) *kneulen, knüllen* = Dan. *knæle*), kneel; with formative *-l*, of freq. force, < *cneów*, ME. *kne*, knee: see *knee*, *n.*, and cf. *knee*, *v.*] To go down on the knees or a knee; bend the legs at the knees and rest for a time upon them, or upon one of them, as in supplication or homage.

knight (nīt), *n.* [< ME. *knight*, *knyght*, *knigt*, *knygt*, *kniht*, *cniht*, < AS. *cniht*, *cnyht*, rarely *cneoht*, a boy, youth, attendant, servant, = OFries. *kniucht*, *knecht* = D. *knecht*, a servant, = MLG. *knecht*, LG. *knecht*, *knekt* = OHG. *cneht*, *kneht*, *chneht*, *gneht*, MHG. *kneht*, *knecht*, a boy, youth, attendant, knight, G. *knecht*, a servant, = Dan. *knegt*, man-servant, knave (at cards), = Sw. *knekt*, a soldier, a knave (at cards) (Scand. forms prob. < D. or G.); perhaps orig. **cyniht*, with orig. adj. suffix *-iht*, < *cyn*, kin, race, tribe; or, like *knave* of same orig. meaning, from the same Teut. root *kan*, appearing in *ken*[2] and *kin*[1], etc.] 1†. A boy; a youth; a young man.

Hit bifel that Lazar the *knigt* in grete siknesse lay.
Leben Jesu (ed. Horstmann), I. 678.

2†. An attendant or servant; especially, a military attendant; a man-at-arms; a soldier.

Thanne *knightis* of the justise token Jhesus in the moot halle and gaderiden to him all the company of *knyghtes*.
Wyclif, Mat. xxvii. 27.

She as her attendant hath
A lovely boy, stolen from an Indian king, . . .
And jealous Oberon would have the child
Knight of his train, to trace the forests wild.
Shak., M. N. D., ii. 1, 25.

Specifically—3. In Europe during the middle ages, a person of noble birth trained to arms and chivalry, first as page and afterward as squire to the sovereign, or to some earl, baron, or other superior lord, to whom he attached himself, and whom he was bound to follow to war on horseback. Knights were of two grades: *knights bachelors* (or simple *knights*), received into the order with much ceremony and solemnity, in which the church had a large share; and *knights bannerets*, who were generally created on the field by their superior on account of some valorous action, and were entitled to display a square banner, and to hold higher commands, while the former could use only the pennon. In England, under the feudal system, a prerequisite was the ownership of a certain amount of land (called a *knight's fee*), held of the king or of an earl or baron on a tenure which bound the holder to definite military service and other obligations. Although this form of tenure continued until the time of Charles II., the military service was early commuted for a money payment, and the holder of a knight's fee was no longer necessarily a knight. During the age of chivalry following the crusades, knights were bound by the highest obligations to chivalrous conduct, and were supposed to espouse the cause of the unfortunate, especially of women. See *order of knighthood*, under *knighthood*.

A *Knight* ther was, and that a worthy man,
That from the tyme that he first bigan
To ryden out, he lovede chyvalrye.
Chaucer, Gen. Prol. to C. T., l. 43.

These two childeren kepte the Citee right wele, but *knyghtes* were thei noon, for thei were to yonge of age.
Merlin (E. E. T. S.), ii. 238.

For that dangerous fight
The great Armenian King made noble Bevis *Knight*.
Drayton, Polyolbion, ii. 328.

"God make thee good as thou art beautiful,"
Said Arthur, when he dubb'd him *knight*.
Tennyson, Holy Grail.

[Hence, with reference to the particular designations of medieval knights, humorous expressions like *knight of the cleaver* (that is, a butcher), *knight of the pestle* (an apothecary), *knight of the road* (a highwayman), *knight of the shears* (a tailor), etc.]

4. In Great Britain in modern times, a man upon whom a certain honorary dignity has been conferred by a sovereign as a reward of personal merit of some kind, without reference to birth or possessions, and in no way involving military service, which disappeared as a feature of knighthood with the other institutions of chivalry. In the British empire knighthood confers no privilege other than the social one of precedence next after baronets. Knights have the right to the title *Sir* prefixed to the Christian name, as *Sir* William Wallace; but neither the dignity nor the title is transmissible to heirs, as in the case of baronets (who as such are not knights, although they also have the title *Sir*). The wife of a knight has the legal designation of *Dame*, for which *Lady* is customarily substituted. Knights may still, as in medieval times, hold their rank either simply as individuals or as members of an order. (See *order of knighthood*, under *knighthood*.) Those of the latter class are now created only by royal letters patent; those of the former (knights bachelors) may be so created, but are often personally dubbed by the sovereign with the accolade. This ceremony of the accolade was formerly essential to the creation of all knights, whether by sovereign or feudal superior, and was commonly attended by elaborate observances.

And Helmsley, once proud Buckingham's delight,
Slides to a scrivener or a city *knight*.
Pope, Imit. of Horace, II. ii. 178.

5. A champion; a warrior; especially, a champion devoted to the service of another; a defender.

Pardon, Goddess of the night,
Those that slew thy virgin *knight*.
Shak., Much Ado, v. 3 (song).

In all your quarrels will I be your *knight*.
This will I do, dear damsel, for your sake.
Tennyson, Lancelot and Elaine.

6. One of the pieces in the game of chess, having usually the figure of a horse's head. Its move is a peculiar one—from the square it occupies to the opposite corner of any rectangle of two squares by three; and in so moving its course is not obstructed by any intervening or surrounding pieces. The number of squares it commands varies from eight when at least two squares separate it from any side of the board to two when it stands in a corner.

Strange game of chess! A King
That with her own pawns plays against a Queen. . . .
Ay; but this fine blue-blooded Courtenay seems
Too princely for a pawn. Call him a *Knight*,
That with an ass's, not a horse's head,
Skips every way. *Tennyson*, Queen Mary, i. 3.

7†. In *card-playing*, the knave or jack.

Abbreviated *knt.*, or in combination *K.* (as *K. G.*, Knight of the Garter; *K. C. B.*, Knight Commander of the Bath).

Knight bachelor, a knight of the lowest order; now, in Great Britain, one who has been raised to the dignity of knighthood without being made a member of any titular order, such as that of the Bath or the Thistle.—**Knight banneret**. See *banneret*[2], 1.—**Knight errant**, an errant or wandering knight; a knight who traveled in search of adventures, for the purpose of exhibiting military skill, prowess, and generosity.

I have discover'd, not a stone's cast off,
An ancient castle, held by the old knight
Of the most holy order of the Bell,
Who gives to all *knights-errent* entertain.
Beau. and Fl., Knight of Burning Pestle, ii. 6.

Like a bold *knight-errant* did proclaim
Combat to all, and bore away the dame.
Sir J. Denham, Cooper's Hill.

To follow Fame *Knights-Errant* make Profession.
Congreve, Epil. to Southern's Oroonoko.

Knight marshal, formerly, an officer in the household of the British sovereign, having cognizance of transgressions within the royal household and verge, and of contracts made there when a member of the household was one of the parties. Also called *marshal of the king's* (or *queen's*) *household*.—**Knight of the post**†. (*a*) An offender who has been "dubbed" at the whipping-post or pillory. Hence—(*b*) A hireling witness; one who gained his living by giving false evidence; a false bail; a sharper in general.

A *knight of the post*, quoth he, for so I am tearmed; a fellow that will sweare you anything for twelve-pence.
Nashe, Pierce Penilesse.

On this account, all those whose fortune 's crost,
And want estates, may turn *knights of the post*.
Fletcher, Poems, p. 258. (*Halliwell.*)

In Anne's time "*Knights of the Post* are to be had in the Temple Walks from Morning till Night, for two Pots of Belch, and a Sixpenny slice of Boil'd beef."
Ashton, Social Life in Reign of Queen Anne, II. 142.

Knight of the road, a footpad; a highwayman.—**Knight of the shears**, a tailor: probably a pun on *knight of the shire*.—**Knight of the shire**, the representative in Parliament of a county at large, as distinguished from the representatives of such cities and towns as are counties of themselves. [Eng.]—**Knight of the square flag**. See *banneret*[2], 1.—**Knight's fee**, the amount of land, varying from about two to about six hides, or twenty librates, with which a knight was invested on his creation, and which he held on condition of rendering homage, fealty, and forty days of military service each year; the holding sufficient to support a knight.—**Knights of Christian Charity**, an order founded by Henry IV. of France (1589–1610), the members of which were devoted to the care of invalid soldiers.—**Knights of Constantine**. See *order*.—**Knights of Labor**, the name assumed by the members of an association more fully styled the "Noble Order of the Knights of Labor," founded in the United States in 1869 for the protection of the interests of working people and the promotion of industrial and social education among the masses. It is a secret society, has a ritual, has numerous branches called "local assemblies," and is intended to include all kinds of skilled and unskilled labor. The chief executive officer is styled "General Master Workman."—**Knights of Our Lady of Mount Carmel**. See *order*.—**Knights of Rhodes**. See *Hospitaler*.—**Knights of St. Bridget**. See *order*.—**Knights of St. John of Jerusalem**. See *Hospitaler*.—**Knights of the Band**, an order founded by Alfonso XI., king of Castile, in the fourteenth century, for service against the Moors.—**Knights of the Bath**. See *bath*[1].—**Knights of the chamber**, formerly, such knights bachelors as were made in time of peace, in the king's chamber, and not in the field, as in time of war.—**Knights of the Chase**. Same as *Knights of the Order of St. Hubert of Würtemburg* (which see, under *order*).—**Knights of the Cordon Jaune**. See *order*.—**Knights of the Golden Circle**, in *U. S. hist.*, a name assumed by an organization formed in the Northern States by sympathizers with the South during the civil war.—**Knights of the Holy Sepulcher**, a military order established by Godfrey de Bouillon in 1099 to guard the sepulcher of Christ.—**Knights of the Order of Christ**. See *order*.—**Knights of the Order of St. Crispin**, a trades-union association of shoemakers.—**Knights of the Round Table**. See *table*.—**Knights Templar**. (*a*) See *Templar*[1]. (*b*) A branch of the fraternity of Freemasons in the United States, with an organization based upon that of the medieval order of the same name.—**Knight's tour**, a series of moves of the chess knight carrying it to every square on the board once and once only.—**Order of the Knights of Malta**, a name sometimes given to the Order of the Hospitalers of St. John of Jerusalem. See *Hospitaler*.—**Teutonic Knights**. See *Teutonic*.—**Windsor Knight**, one of a body of military pensioners having their residence within the precincts of Windsor Castle. They are now called the *Military Knights of Windsor*, and sometimes *Poor Knights of Windsor*.

knight (nīt), *v. t.* [< ME. *knigten* (= MHG. *knehten*); from the noun: see *knight*, *n.*] To dub or create a knight; confer the honor of knighthood upon. The ceremony is regularly performed by touching the person on whom the dignity is conferred with a sword as he kneels. See *accolade*, 1.

A soldier, by the honour-giving hand
Of Cœur-de-Lion *knighted* in the field.
Shak., K. John, i. 1, 54.

This drone, yet never brave attempt that dar'd,

Order of knighthood, an organized and duly constituted body of knights. The orders of knighthood are of two classes: they are either fraternities, possessing property and rights of their own as independent bodies, or merely honorary associations established by sovereigns within their respective dominions. To the former class belonged three celebrated monastic military orders founded during the crusades — the Knights Templars, Knights Hospitalers, and Teutonic Knights. The other class, consisting of orders merely titular, embraces most of the existing European orders, such as the Order of the Golden Fleece, the Order of the Holy Ghost, and the Order of St. Michael. The British orders are the Orders of the Garter, the Thistle, St. Patrick, the Bath, St. Michael and St. George, the Star of India, and the Indian Empire. The various orders have each its appropriate insignia, which generally include a badge or jewel, a collar, a ribbon of a certain color, and a star. See *bath*[1], *garter, order, star, thistle.*

knighthood-errant (nīt'hụd-er'ạnt), *n.* A body of knights errant. [Rare.]

I was first of all the kings who drew
The *knighthood-errant* of this realm and all
The realms together under me, their Head.
Tennyson, Guinevere.

knighthood-money†, *n.* In *Eng. hist.*, a fine payable by persons who refused to accept the honor of knighthood.

He was fined in October, 1630, for refusing the honour of knighthood, a matter then lately brought up to obtain money for his majesties use. This money, which was paid by all persons of 40 li. per an. that refused to come in and be dub'd knights, was called *knighthood-money*.
Life of A. Wood (1642).

Knightia (nī-ti-ạ), *n.* [NL., named after Thomas Andrew *Knight*, once president of the British Horticultural Society.] A name given by Robert Brown in 1811 to *Rymandra*, a genus of proteaceous plants of the tribe *Embothrieæ*, made by Reichenbach the type of his division *Knightieæ*. They are trees or shrubs of New Zealand and New Caledonia, having sparse thick leaves and dense sessile racemes of flowers which are pedicellate in twos. The fruit is a hard, straight, or somewhat falcate pod. There are only three known species, one of which, *K. excelsa*, a native of New Zealand, is a lofty tree, the so-called New Zealand oak or rewa-rewa, the wood of which is prized for its mottled red and brown color, rendering it suitable for ornamental work and furniture. It also splits readily. The tree is sometimes cultivated as an ornamental shade-tree. The remaining two species are small trees of New Caledonia, differing in some important respects from the New Zealand type.

Knightieæ (nī-tī'ē-ē), *n. pl.* [NL. (Reichenbach, 1828), < *Knightia* + *-eæ*.] A division of *Proteaceæ*, now included in the *Embothrieæ*.

knipt, *v.* An obsolete and more original form of *nip*.

Kniphofia (nip-hō'fi-ạ), *n.* [NL. (Moench, 1794), named after Johann Hieronymus *Kniphof* of Erfurt, professor of anatomy, surgery, and botany.] An untenable name for *Tritoma*, a genus of large and showy liliaceous plants, having long, narrow leaves and reflexed spiked flowers with a narrow tubular perianth, short lobes, and hypogynous stamens. The dense racemes or spikes of yellow or scarlet flowers are borne at the summit of tall, simple, leafless scapes, and are very showy and handsome. There are about 20 species, growing in tropical and South Africa and Madagascar. Several of these are in cultivation as hardy plants, and are very effective in lawns or in front of shrubbery. Among these, *Tritoma Burchellii* and *T. præcox* are perhaps the best known, and are called *torch-lilies*. *T. Uvaria* is called the *queen's-lily*, and in the West Indies it goes by the name of *red-hot poker plant*. Best known to florists under the name *Tritoma*.

knipperkin†, *n.* An obsolete form of *nipperkin*. *D'Urfey.*

B. Jonson, Magnetick Lady, iv. 1.

knitting-machine (nit′ing-ma-shēn″), *n.* A hand- or power-machine for knitting. Such machines employ barbed or hooked needles, having some form of latching device for catching the thread and drawing it through a loop previously made in the same thread, and throwing it off at the right moment. It is the use of these needles and of a single thread that distinguishes a knitting-machine from a loom, a braider, or a netting-machine. Hand-knitters by machinery for domestic use employ either a series of needles laid flat in a frame or a ring of upright needles placed in the periphery of a cylinder. By the use of various attachments these machines can make hollow or flat knitted fabrics, plain, ribbed, etc. The power-machines are essentially the same as the hand-machines, except that, being larger, they knit wider fabrics. There is also a single-needle hand knitting-machine.

knitting-needle (nit′ing-nē″dl), *n.* An instrument used for knitting. Knitting-needles for handwork are straight, slender rods, usually of steel, with rounded ends; two or more are used at once. See *knitting-machine*.
